THE WAR CONTINUES, WE CONTINUE

THE WAR ESCALATES, WE ESCALATE

The Administration's new strategy in Vietnam must be smashed. The Vietnamese people have asked for mass demonstrations by the anti-war movement to stop Nixon's genocidal policies. That's why we're all here; that's why the Attica Brigade is here. Not to destroy this rally, but to extend it -- to demonstrate our support for the NLF-PRG Seven-Point Peace Plan as the only basis for ending the war.

Later today we will leave the rally for a militant action at the Justice Department -- the arm of Nixon's policies of repression at home. Moving to show that it's the same system that destroys people in Indochina, Africa, Latin America, and here at home. To show our understanding that imperialism uses not only bullets and bombs to maim and kill people, but also legislation. At Attica and in Saigon, with HR-1 and Phase Two, with ITT in Chile, the Nixon administration is striking out wildly trying to maintain U.S. control of the world.

Here at home, Nixon is trying to take away hard-won rights by vetoing child care legislation, pushing for the repeal of abortion laws, and launching an all-out attack on working and poor people -- an attack that includes Phase 2 (wages stay low, prices and profits skyrocket), his attacks on the right to strike by invoking the Taft-Hartley law, and the initiation of a program of welfare slavery.

But the people are fighting back! G.I.s, Vietnam Vets, welfare recipients, women, the prisoners at Attica and especially the Vietnamese, are showing us that we can beat U.S. imperialism. The current offensive in Vietnam is pushing Nixon to the wall and we can help keep him there. The past few weeks we've shown Nixon that we won't stand by while he tries to massacre the Indochinese. We are in the streets to stay until he accepts the right of the peoples of Indochina -- Vietnamese, Cambodians, Laotians -- to run their own countries!

The ATTICA BRIGADE is an anti-imperialist student-based organization. We marched November 6th in the NYC anti-war demonstration and since April 22nd we've been in the streets with thousands of others to show our rage about the recent escalation. We're building on campuses and in communities to sustain the day to day struggle, to move beyond reacting to events to creating them.
