## Spain: Three Bourgeois Armies

Trotskyist Fourth International

Published by
REVOLUTIONARY WORKERS LEAGUE OF THE U. S.
2159 W. Division Street, Chicago, Ill.

Once again the Socialist Party is facing the crucial question of its own fate, how to stave off the disintegration gating out its vitals. The Party is torn with internal strife and factionalism resulting from the inner contradictions of its various tendencies and the general. disintegration of the labor movement on an international scale.

Singe the Cleveland convention, the Socialist Party has consistenthly moved to the right. The unprincipled bloc formed at the conventLion against the New York old Guard was tom asunder right after the convention, particularly with the entry of the Trotskyites, who, in their anxiety to remain ̆ loyal and disciplined members of the Socialist Party, attempted to picture the bios in left phrases, as a step toward "revolutionizing" the Party.

The Trotskyites, to justify the Liquidation of the ir independent party, shouted at the ton of their lings that the SP is beaming Marxist. Behind this treacherous screen, the SP stifled the remnants of the leftward movement created in the party by the German and Austrian defeats.

The movement to the right can best be characterized by
I. - the reformist line of the election ompaign.

2 -the opportunist alliance with the Farmex-iabor parties in Minneapom lis and Wisconsin.
3 - support of the People's Front government in Spain.
4-support of Caballero and the Socialist Party in Spain.
5-utilization of the Moscow. Trials for an attack on the proletarian dictatorship.
6 - unequivocal support of the OIO and Lewis in the auto and steel sellouts.
7- shameful and unprincipled boo with the Stalinist in the WA. 8-a policy of open olass-collaboration in the trade union and unemployed fields.
$9-a$ EOlioy of friend y collaboration with the remnants of the old Guard on the last convention basis - "We want our Old Guard".

What are the main tendencies in the $S P$ today? The AITMAN group is definitely orientated towards Stalinism and liquidation into the Labor Party. The bloc with the OLI GUARD (HOAN, etc) will no doubt be consummated at the next convention. Around this group are a great variety of reformists and pacifists. With the HOAN - AITMAN combingtron in power, all vestiges and pretenses of left phrases will disepperr and an open drive toward the right and the Labor Party will take plage. This line the Stalinists will support fully.

On the other hand, the TROTSKITPES represent a purely negative anti-stalin tendency. They are a centrist force striving to unite other centrist elements against Stalinism and for the reform of the SP. At present, their main endeavor is to stave off expulsion through the organization of a national "left wing" bloc with the Jam - Tyler group.

They have given up every principle they once advocated. They fight to maintain a homogeneous party in the bosorn of the Second International while glaiming to stand for the creation of a "Fourth International".

The ZAM - TYIER outfit maintains a preorarious position botween those two foroes, seoking to hold them togother, and to hold the balanoe of power. Its roots are in the Alman group. It opposes the Peoples Front in words but supports it in action. The independence of the Socialist Party is a principle question with them, but - they are for a Labor Party. The old - Garar group and the Pacirists play a secondary role, in relation to these mein groups.

On the side stanãs the LRADER, Noman Thomas. He represents no distinct Thomas force. As an indiviaual he symbolizes ali the vacillan tions and contradictions in the Party.

The Trotskyites find themselves at a disadvantage. With Trotsky in Mexion under the heel of Anerican Imporialism, they nood the S? cover more than over, but his coming to Anorion has ousod fear and alarm inside the othor' groups in the SP. Whatever the othar factions 00 , they zose. A bloo of Altman and Zam against the Trotskrites will rosult in their expulsion. If, howover, the Trotskyites succoed in pulline in Znm-Tylar, they must first give up their already threadoaro chate to Marxisin. Suoh a combination will foroo a split with the Altmm-Foin outift, and eventually lead theminto the Labor Party, possibli" rotaining the SP identity. The probability is that no sufficiently strong Iinc-up will be consumated either way, and $d$ dofinito "solution" will come only after the conivention.

THM SOCIALIST PARTY CANNOT BE REFORGD. It can maintanin itsolf only as a left support for the bourgeoisie. Even as such it is forned to play a secondary role as long as the bourgeoisie oan use such roformist types as the Farmer-Labor Parties and the Jowis-Dukinagy srowd. Only when the workers are movint to the loft of thoso will the Hoan-Thomas variety of reformist be called in by the kourcestieic. And this is cxactiy what the advocatus of the rabor varty heve in mind to rocomplish.

The only road to the new soaial ordor is tho maraist roas, the rocd of the revolutionary overthrow of capitalism. For this tas: is necded a revolutionary Marxist party, based on the experienoes of the suocoss-
ful Russian Revolution and the lessons of the Spen ful Russian Rovolution and the lessons of the Spanish and worla evonts, and applying them to dmerican conditions. There is no othur road. independent of and against the two bankrupt internationals, the strugjie To help in this task is the duty of all class internationals, the $2 n d \&$ Brd

MEMBERS OF THE SOCLALIST PARTY: No mattor to whtet faction you my bolong, your fight against capitalism and for on socialist sopicty gim be suocessful only if conducted in line with the interests end needs of the working olass. he present convention wia oxpose in cincinc lieht S.P. today that stands on this this task. | :---: | :---: | :---: |

The attention of the whole world is focussed on the Moscow trials reoently held in the Soviet Union. With synical delight the bourgeois press uses this opportunity to attack the Soviet Union and discredit the Proletarian Dictatorship. Wprkers watoh the Trials with growing incredulity and fear. Where is the Soviet Union going and what is the meaning of the Trials?

The execution of the 13 prisoners in the Soviet Union, meny of them such leading figures in the Bolshevik movement for 25 years as Piatakov; Seribriakov, etc, the sentencing of four others to jail terms, include ing Radek and Sokolnikov, the execution of another large group last $A_{n-}$ gust, including Lenin's co-worker, Sinoviev; the wholesale arrest of thousands charged with "plotting", "thievery", "sabotage" and "terrorism"; disaflection in the ${ }^{2}{ }^{\prime \prime}$ A $_{\text {rmy }}$ - cannot be atbributed to accidental causes but bave deap social implications. Even were we to take the tord of the Stalinist buroeraoy that the 17 condemned men were plotting fogether with German and Japanese imperialism, to overthrow the Workers State - we would come to the obvious conclusion that socialism is nonexistent in the Soviet Union, that Stalinism is moving toward an impend ing social cataclysm.

How does it happen that in the segond year after the 7th World Congress of the Comintern, which declared "Socialism in the Soviet Union has bee: definitely and irrevocebly established", we find a growing resentment among the Russian workers and a sharpening of intemal struggles? Undor capitalism, a low standard of living acoompanied by neod and miseby, drives the workers into oped conflict with their exploiters; but we should expect that the much vaunted "classless society" proelaimed under Stalinism would have eliminated these antagonisms. The fact that the internal antagonisms are sharper indicates that the class struggle is sharpening instead of abating in the Soviet Union.

## A17 GuIIty

Radek; Platokov, Sokolnikov and others in the Kremlin dock are not unknown figures in the history of the Russian movement. Their oppotilion to Stalin in the PAST is known to the whole world. So too is their abject submission and capitulation to his policies. As part of the Stalinist clique they have carried on a vicious strugele against Marxism and the international proletariat. This is the overwhelming orime of whioh they are ALI gailty. But, are Radek and the others guilty of the charges which brought death and imprisonment?

First, let us state, the real oriminals were not on trial. Stalin, MoIotov, Vorishilov and $C_{0}$ were the acousers: not for the interests of the working olass, but against its interosts. Stalinism acouses Radex, the leading journalist of the burocraey (who from his prison cell demand-
ed the life of Zinoviev, , as well as Piatakov and Soknlnikov, all Stalinists, of treason. But between the aocusad and tha accusurs there is no fundamantal glass difference. Objactively or subjnotively they are all enemies of the working elass.

Whether the accused are guilty of the specific oharges is a secondary question. For their real crimes - the revision of Marxism, the betrayal of the world proletariat - Redek, Zinnviev; Kamerev; Piatakov and the others were not put on trial. Specifioally, it is charged that Radok znd Piatakov and Co. plotting with Germany and Japan, under the leadership of Trotsky, planned to overthrow the Soviet Government and re-establish capitalism! What is the truth and significanoe of these accusations?

The oharge that Radek and Sokolnikö conspired with German and Japanese imperialism; is an answer by the Stalinists to the German-Japanese agree ment to fight commuism. It is an attempt to weaken the diplometic and politioal position of these imperialists, by charging them with modaling with internal affairs of the Soviet Union and a bia for tre supyore of Amerioan Imperialism. Stalinism sooks to demonstrate its "rejiabiz. ity" to imperialism as a whole, and to one set of bourgeois banists against another. Stalinism Qoes not charge that Radok and the othors conspired with the wowle burgeoisie arainst the working olass, bet fi\% they consipired with Crictem irmerialists, the "bad" mes Germany and Japan. Stalinism charges chey conspired with the "woug imporialists.

> Wexints Co-Wonkers

Is it possible that men liko Zinoviev, Kamenev, Radek, Sokolnikov, Smirnov, Piatakov, Muralov, etc, fighters and leaders of the October Revolution, many of them Lenin's close collaborators; is it posaible that those men under the loadershjp of Trotsky, organizer of the Rod arry, oo-leader with Lenin of the October Revolution, plotted to dismmber the Soviet Union and hand over sections of it to the fascist powers? in the service of fascism;", we are asked to believe that they would turn thomselves and the whole Russian working class over to a fascist firing squad. These are men who have spent many years in struggle against utpitalist property relations and the capitalist systom. What could they possibly have gained by such a conspiracy? $T_{0}$ raise the question is to give the lic to the whole monstrous and contemptible feame-up.

Stalinism oharges that thesemen, who in the sourse of thoir wnrk to develop the strategy of mass struggles, educatod a genoration of rovolut-: ionists against the uso of individual terror, have bogome its adyocrics. It is true that these men, by their capitulations to talinisra sinco 1927, have thereby abandoned the Karxist basis for the strubisle aerinst individual terror. And as Stalinists they have assisted anc condonod the perscoution and extormination of revolutionists.
But to have us believe that they all should adopt individual terror ase mothod of politioal strugble requires PRoOF!

## MORE MOSGOW TRIAIS ( $\left.\operatorname{con}^{1} t.\right)$

If what the Stalinists say is true, that there are mass desertions to fascism by former Marxists, they must state the political basis for these desertions. This would be an unprecedented phenomenon which could be explainod only on the basis of the reaction of these people to some development in the class struggle. The failure of Stalinism to present that political besis is POLITICAL disproof of the charges.

But, someone will say, this is hardly convincing. There is the matter of evidence. Evidence? Not ONE single letter or document was producod. Not ONE singlo witness, except the acousod to verify con--versations, meetings and flying visits. Is it possible, for instance, that Piatakov flew to Oslo, went to see Trotsky, and then returned to Russia without a single person or the Norwegian or Russian Governments knowing the first thing about it? Even Piatakov couldntt answer this question at the trial. Trotsky, according to the efficient Vishinsky, had written reams of instructions to his conspirational ooterie. Yet with tons of correspondence in its possession, with every avonue open freely for investigation, the GPV could not produce one single PROOF of the guilt of these men. And this was not accidental. They rroduced none, for the very simple resson that there was nothing to produce. But lacking prodi, Stalinism resorted to another medium ~ the instrumont of the Inquisition - "confessions".

After years of terrorism and sabotaga, intriguc and murdar, 17 rogues sutdenly become penitent and make fuli "confessions" can best be judged by Radek's statement, "I am guilty of ALI the charges of ALL the terrorist plots - even thosa I didn't know about". That IS a confession!

In bourgeois democratic countries oonfessions alone are not considered ample evidence to convict anyone. But in "socialist" Russia, these "confessions" were considered sufficient "evidenoe" to shoot down the remnants of Lenin's Central Comittee.

Exactly how these "confessions" woro obtained we cannot say. But there are genaral nethods which hist ry has reoorded, and we can be certain that the ompling needs of Stalinism demanded theif usage.

1. Violence, force, torture.
2. Threats to the families of the acousod.
3. Use of the GPU as "defendants".

Only those who "confess" aro brought to trial. Why? There are hundrees under arrest who rofuse to ennfess. ONE such persor in tho Kremlin court would have exposed the whole vile treachery and betrayal; would have exposod the myth of tho popularity of the rogime amone the workers; woult havo destroyed tho olifico of "confossions" so carafully and malevolontly oroctoc by Stalinism. For ovory ono
who "oonfosses" therc aro hundrods who rosolutely rofuso and aro novor brought to trial.

Two points in the trial demand spocial attontion.
First, the worst roguc of all; Radok, who admittod ovory crimo and statoc ho was ono of tho loadors was lat off with only 10 year sontence. Others were shok. Onc musi now ask, how loos it haypen that the bisgest "racue" eot off with a light sonterce which he will probebly hever servo? Ono unswes is thet this is a enncossion tomorla opininn which atill ramins inerodulous. The other is that Redek is being "savec"for Bucharin ant pyky just as Knmeny end Zinoviev wero "savec" in tho erricr porict to implimate Rarok. Stalinism

Socondly, the Stalinists acousar these prisonors, ent thoir "leader" Trotsky of plottins with two Inroisn imporinlicm, Gomany ond Japan.
 Zinoviev, Kamonov, and thenteky of "feol-gieali responsibility for his Coath - not for airoct impicaticn with it. Zinoviov ane Kam-
 yoars was it "aisooraror" that thor war" the actual muricrors and they had phottod more asineinations." Ahe now the ourooracy is adding one more acousation, that these "paits" are onnoocted with the ala of fasoist Governnients.
A DESPERETE BYROCRACY

In the FIGATING WORKER, Ootobor 15, 1936, undor the oaption, Radok and Bucharin Noxt, we said. "Now the desparately frightened buroorats are finishing off the last survivors of the oadre whioh made the revolution with Lenin; Radek, Bucharin, Piatakov". Already Stalinist torror has sproad into tho Red irmy; Gonorals Sohniat and Putna; Shaposhnikov, Director of the doadeny of the General Steff; and now, Tukaohevsky, Vice-Commissar of Defonse uncer Vorishdiov, are under arrost. (Mrachkovsky and Roingold, both tost1fled in the oarlior trial that Sohniat was to havo personally carried out the terroristic act against Vorishilov. Sohraldt was not produced as a witness, for the simple reason that the testimony of tho two acoused contradicted oach other as to WHEN Schaidt was rearuited, and HOW tho act was th bo oarried out). We repont again, that only a frantic and desporate burooracy finds the neod for suoh treachery and torror.
Similariy the "aisoovary" of new orimes with each triol indionto the same thing. In it possible the GPU disaoverad now evidence betwoen 1934 and today? If so, whore is the evidence, the witnesses lottor, doouments, etc.? Isn't there soncthing suspioious about new charges without now, or even, old evidence. Under these cir-

| :---: | :---: | :---: |

## MORE MOSCOW TRIN士S (oont.)

 the acoused, but new NEEDS of the Stalinist burocracy.
But why? Why must Stalinism resort to these methods? What are the political needs?

## $\therefore$ Hainst the Extension of October

Stalinism, on the one hand, reflects the prossure of an enormously weakened world and Russian proletariat, and on the other, the constant stronger prossure of intornational imperialism. Stalinist policios rest on alliances ana pacts with imperialists. It fears the powar and might of the working class. Sorving tho interests of the petty bourgeoisie within tho Soviet Union; it conspiros with the Fronch bourgeoisio against the French worikors and oppressed oolonial pepples; with the Spanish capitalist Madria-Catalonia gevernments against the horyio Spanish workors; and with the international bourçooisie against the oxtonsion of tho ootober Revolution,

In 1934 Stalinism executed its right shift fron advonturism to reformism. From the era of "soviets ovorywhore", "unitod fronts from below", "social-fascism" and "red trade unions", it now comos sut opamly AGAINST tho Diotatorship of the Prolatariat and FOR sppport to bourgeois: Aemocracy. Qut of tha 7th World Congress cama Seoples Fronts with the "social-fasoists" of yestorday, Ieon Blu, Cabaliero and Norman Thomas; and with the "damoeratic bourgooisia like Cardenas and Azana. It was only ono stip to oall for National Fronts to inoluco De Ia Roque and a "brotherly union" With the Itailan fasoists, (See Inprecorr MnI. I6 No, 38)
Builaing "socialism in ono equntry" has subordinated the Soviat Union, under the leadership of Stalinism, to the "çod" capitalists, the so-callod demoorated countries, agalnst the "bad" dapitalistw, the fasoist countries.

## Within The Soriot Union

Within the Soviet Union, the pollaies of Stalinism have been carried on with devastating oonsequencos. The sproad of incone betweon the paasants and the industrial workors has oroated a basis for distinct olass differontiations. The potty bourcooisio is recoivinc a relatively largor share of the national income than tha workor. Land has beon givan to the colloctive farms (oorporationa of farmers) in perpetuity; private proporty has bacn logalized ant oxtondea; the petty bourceoisie has beon civon the doninating place in the political set-up by the olimination of soviats with thoir industrial ronganation in favor of a parliargentary systom with thoir gearraphical representation (in the soviot systom tho

## MORE MOSOQW TRISIE (ant.)

proletariat has the majority, in the parliamentary systor, the bourgeois olements must inevitably gain tho majority); Stakhansvism has introduced new methods of speed-up, dividiniz tho workors and oreating a labor aristoracy.
Workers are living in poverty; deprived of freedom of movemont tinre the use of the internal passport. A new word has found coman unfe解: Soviete workers, "sovbour", meaning a Soviet bourceois.
In June 1936, the SU outiawed abortions. Divoroes have beon madgeis mare difficult for the poor.

Prostitution and thiovory ha mado appearance in Soviet sooiety. All under "socialism".

As a result there is dissention and aissatisfaction whioh is seothing and boiling over into OLASS STRUGGLE'. To defond itself and terrorize the working class, Stalinism must find political seapescats. It must check the resontment and find new channols for the attontion of the world prolotariat. The olass strugzio is reflectod in dissaffotion in the ranks of Stalinism itself; whole sections of the burocraoy are eliminated; every voice raised in criticism is terrorizec.

## Transition Economy

These evelopments have led many people to erroneously conolude that apitalism has been restored in the Soviet Union. Soviet economy is a TRANSITION ECONOMY. It is neither capitalist nor socialist. It contains eloments of both. The existence of PRIVATE AND SOCLiI.. IST forms, sido by side; is charaoteristio of the transition porlod from capitalism to commuism.

Stalinism has its base in the oapitalist (petty bourseois) sootor of Soviet economy. Its role is to defend and extend th, and to breach the socialist sector. Thus, Stalinism steers . Soviet Union back towara oapitalism.

It is false to say that SNiTE Caztafinsi exists in the Soviet Union. It is true that the property relations have been breached and are continually extended in the airection of apitalism. But the PREDOMIMINT motie of production is still Transition Fconomy.

Stalinism PAVES the way for capitalist restoration, but it cambt restore it. For this would mean tho destruction of Stalinism itself. Social Demoracy paves the way for fascism, but it does not inatitute fascism. Either the restoration of capitalism or the re-ostablishment of the politieal power of the working olass will orush Stalinism.

## MORE MOSCOW TRIALS (loont, )

With political power in its hands, Stalinism makes its own laws and cannot be removed by legal methods. It can he removed only thru the violont strugglo of classes; by a POIIIICAL rovolution, The intornational prolotariat must givo the Eussian workers overy possiblo aid in the solution of this task. This requizes a new revolutionary party in the Soviot Union as a scetion of tho Communist Fourth International.

## Trotsky's Role

This is the instrument for tho overthrow of Stalinism, Those who do not uso it are not fighting Stalinism, but strengthoning it, by failing to expose its CIASS charaotor. That is the casc, unfortunatoly, with Leon Trotsky and the Trotskyists who have departed from Marxism and are now busy proving it in practice.

It will of oourse be said that Trotsky and his groups are the onos singled out for the most vicious attacks. How, thereiore, can they be capitulating to Stalinism? In this connoction let us point out that the American bourgeoisio frequently arrests men like Norman Thomas. Very fow pooplo will assort that Thomas is anxious to ovorthrow Capiteaism in Amerioa. His arrest, thoroforo, would not bo beoauso he is a Marxist, but it is a method of dolivoring a blow against the Marxists. Similarly with the Trotskyists and Tratsky, Stalinism oan never be destroyed with the Trotskyist program. The Trotekyists are being used to oover-up the non-Marxism of Stalinism and to dolive or a blow at the growth and develppmont of Marxian thoory and practice.

## Axis of Trotsky Defanse

The axis of Trotsky's defense is, 1. I, Trotsky, am not guilly. 2. I can prove it oither in the bourgeois courts of Norway or America, or bofore an "Independent" international commission.
Trotsky demands that he be triod by an "impartial invostigation commission" to decido whothor ho is guilty. Such a oommission can bo useful to investigato tho legal aspocts of the evidence. It eannote be tho axis of his defense, nor oan it be given a froe hand to att tack the proletarian dictatorship and opportunity to frame Trotsky. The axis of the Trotskyists is not the indopendent struggte of the working olass but a complete subordination (in Stalinist stylo) to liboral bourgeois methods.

In roturn for Trotsky's asylun in Maxico the Trotskyists have doliberatoly avoided exposing the role of Cardenas in Mexica. The Loxican president uses Trotsky to broaden his bese for class-comiaboration amongst the massos. This "left" move serves the purpose of (1) putting pressure on the Soviet Union in the interests of Anerioan Imporialism, and (2) of weaning the working olass away from indopondent class aotion and making it dependont on the governmont. Put the Trotskyists have not said a word about this. $T_{\text {his }}$ is a horse trade with Moxiean oapitalism and frnarican

MORE ITOSGOT: T REALS (cont)

Imperialism.
Trotsky is content to let an "impartial" intemational commission settle who is guilty. As if that were primary! What is needed is to expose the manoeuvers of Stalinism leading tho workers back to capitalism in the Soviot Union, and to call for a new Communist party to fight the impending counterrevolution. It is this fight which the Trotskyist have abandoned.
It marks another stage in the degeneration of Trotskyism.
For a Communist Fourth Intamational
There will be more trials. But they are only tho surfact phenomena of a society poinga on the age of a social cataclysm. The real struggle $0 g a i n s t$ Stalinism must bo directed against tho broader aspacts of its counterrevolutionary acts and policies.
The working class must restore Lenin's Constitution and gorforward to tho extension of the october Revolution. For this tho indispon. sable instrument is a now Communist Party in tho joint Union sec. tion of the Communist Fourth International.

TIMOUR NEXT ISSUE L
THE CASE FOR A NEW COMMUIST PARTY IN THE UNITED STATES

TITANS IN STRUGGLE: MORGAN AGAINST ROCKSFELLER

## - SPAIN: THPEE BOURGAOIS ARITES

The croation of a rogular army in Catalonia, consisting of nino infantry rogimonts and throe artillory regiments, adds anothor bourgoois army to the two already oxisting, in Spain, the ariay of the "robels" (Franco) and the axmy or the "Ioyalist" (Azana-Caballero). Three bourgoois armies instoad of one, that is thus far the most tangible result of tho civil war! Takon together with the ontry of ono working-class organization after tho other into owthor the Azana-Gaballero or the Companys governmont, with the gradual inxorporation of the workors ${ }^{7}$ militias and councils into the regular army and the stato apparatus gonerally, with the sucoossful infiltration of "loyalty" to the state into evon the most revolutionary layers of the working-olass, and last but not least with tho physioal decimation of the workors' ranks on the battlofiola, - the croation of still anothor regular army by the Catalan governmont brings the strongthoning of tho state apparatus of tho Spanish bourgeoisio and the weakening of the proletariat to a culmination point. It is plain now that whichover side wins tho war, the vidtor will be a ruling class manytimes stronger than before the civil war, unless a Marxian organization is ablo to change tho relation of forces.

## Civil War Into Imporialist War

The great historical lesson to bo loarnod from this oxperionce is that a struggle of tho opprossea masses jointily with one soction of their oppressors against anothor soction in the rinal rosult loads only to the joint victory of both sections of the oppressors ovor the ppprossod. There have boon since 2848 many such experiences from which the proletariat oould learn this lesson. at anne of them has tekon such extreme froms as the oresent one. Tho se extremeriforms aro due on the one hand to tho depth of the crisis of Spanish society and tho tremendous militancy of the Spanish masses, on the other to tho interest which the bourgeoisio of the world hask on the ove of another world war, in transforming the struggle of olasses into a strugglo of rosu gions and nations, f.o. in the final anolysis into a strugele for tho benefit of the fow great imporialist powers of the world. To moet an oxtrome forms. It is these oxtreme forms, that is, actual war, that is dacoiving oven the most revolutionary workers in pain and intornationally. But it is preciscly these oxtreme forms that are yielding the Spanish and world bourgeoisio the deisred rosult: the woakening of the prolotariat, the strengthening of tho stato, tho gradual transformation of civil war intd imporialist war.

## Ineroased Intorvention

The dogreo to which thoy have succeodec in this oven at this stage is shown by tho fact that the intervention of the groct powors has not ont only not docreasod but indroased, and that it is moro and more thoir intervontion that detomines the courso of events in Spain. The intervention of Russia, far from signifying a roturn to the days of aotive support of rovolutionary movemonts in all countriow only hastons

## SDAIN: THRES BOURGYOIS ARMIES

the inclusion of Russia, invenem amotherng the groat imperialist blocs that are to-day bonding every offort towards winning the "supy port" of tho worlsing massos for thoir "cause", and thareby facil.it... ates immensely the task onfronting the mifling olass. Nhus it is not only the S panist state which has inorocisod its strometh (aithongh in the oontradiotory form of boing tamporarily divided), but every stato.

## Only Road - Tho Party

This viotory of theexploiters is a powerful blow against the proletariat and the proletarian rovolation.

There is only ono road for tho proletariat and their allies. The task is to create as quickly as possible, a rovolutionary Marcian Party, which alone can assuxe the samshing of the Bourgeois Stato and the establishment of the Diotatorship of the Prolotariat.

## THE TROISKYIST FOURTH TMTERNATIONAL

At the enc of July 1936, the Trotskyists held a conference in Geneva, According to them "The aim of this first conference was to rem assemble the international forces of the Fourth Internetional in a new coherent organization, to arm them with $n$ solid ideoloeical arnory and to create a new international, center, larcer and more fitted for Work, It sicmifies both the direct adherence to the movement for the Fourth International of organizations which up to now had not formally adhered to the International Communst Learue, and an impotetant step toward the unification of the forces of the Fourth International in ountries where up to now there hod existed severol groups separoted by tactical differences..... The conference set up a comission to work out within three months a draft propram, following which there will \& be a four months international discussion, after which the first conm gress of the Fourth International will adopt ? definite edition of the profram 3 s the foundation document of the Fourth Intemational" (Fourth International, theoretical orean. of the French Trotskyists; October agae 1936)

Hzation of the $\begin{aligned} & \text { It } \\ & \text { Fourth the Trotskyists are proceeding with the oreanm }\end{aligned}$
But when we examine the connections of this "International" with the world working class, we find that in so far as an international In the revolutionary Ifarxist sense is concerned there is none at all.

The French Trotskyists organ states that there were present delegates from the French party nnd youth; two Belrian organiaations, the expelled left socialists and Vereecken's rroup which have fused 番解e since; the Dutch party, the Fevolutionary Socialist Party; the Marxist Action group from Zurich, Switzerland; anc "observers from Americelt (Maste). The Austrian, Czech, Rumanian, Greek, Polish, Swissi (Bosle) and Dutch youth grouns were invited but did not attend. The Bulcerian, Danish; Spanish, Lithuanian, Canadian, Mexican, Brezilien, Argentine, Chilean, Cuban, Peruvian, Bozivinn, Puerto Rican, Chinese, IndoThinese, Australian, and South African Eroups were not even invited. The reasons given are lack of time and the situation of these froups.

The list is imposing. Analysis will show its fake character. First of all, if we are to take the Trotskyists at their word, sevenwhere a civil war is being fourht. Is this an excuse for not invit. ing a revolutionary oremaization from that country, if there were une? Certainly not, Just the contrary. Especially when setting up 3 revolutionary international. The Thira Intefnational was founded in Russia and met there in 1920 while civil war rared over that Iond and other countries in Europe and Asia. The delegates to the foundiner confress came from many countries and had to orercome the most diff. ioult conditions in getting there. Whey had to pess through the allied blocksde if Russia. Had there been a revolutionary rroup in Spain end had they been invited would they have sent $\sigma$ delegate? Te think so. We must note that the centrist poun whs able to send Gorkin to the recent conference of the Internationni gureau of Revolutionary

Socialist Unity in Brussels.
The Truth of the matter is that the Trotskyists have no oreanization in Spain. Comade Negrete reports from Barcelona that there arr a fewfichting in the ranks. These behind the lines spenc their time in cafes making negative criticisms. revolutionary international wit no organization in Spain is no international at all, in the trarxist sense. The "failuren to invite the nonmexistent Spanish section is typical Trotskyist fakery.

Of the sane ondor is the inclustion of the Puerto Rican "section", Disorganized by the liquidation of section after section into the Second International the Fuerto Rican comrades last summer liquidated the: group into the Third International.

Tho othor groups aro mail; in the list of thoso whioh woro not - invited, and without serious influence in the working alass of their countries. Their total number is very likely less than a thousand. Either singly or together they do not make a base for a Marxist revolutionary international.

The same fakery runs thru the list of those whioh, altho invitod did not attend. The Greek section number some fifteen. The ArchioMarxists who broke with Trotsky some years ago number several thousand, publish an influential press and are intrenohod in the trado unions. The other groups in this "oategory" are about as weak as the Greek "section".

Now for those which did attend.
The French Trotskyist organ of Septermer, says: "Delegates from organizations in the principal oountries were represented: USSR, Belgium", England, Holland, Switzorland, Germany, Italy, France."

The inclusion of the "organization" from the USSR is a piece of pure bravado. Since this congress was held the events in Russia in connection with the civil war in spain and the trials and their murderous aftermath have demonstrated that the Trotskyists have no organization there. At a meeting in New York, Shachtman was foreed to admjet it. As is known, tho Italian "organization" consists of two people who are in Spain fighting in ths ranks against the countorrevolution. The German "organization" is not above a huncreci. The Swiss. group is in the Swiss Social Domocratic Party and there is no indrication that having participated in the "founding" of this "Fourth International" it has followed the French Trotskyists in setting up its own "independont": centrist outfit. The English Trotskyists are a mere handful dispersed in and out of the Labor and Independent

On the seale of the Trotskyist movement, the French party is a substantial section. The figures given in their press in connection with their recent conference, at which a split to ok place, indicate a membership of about five hundred. Already there are signs of disintegration in this section. The Belgian group is a hodge-poree of Trotsky lnyalists, Vereooken's foll wers who have returned to the fold, and some expelled left socialists. On the whole tha Ratotan
sot-up is a duplioate of the Fronch original. just as it was two yaars ago when the new orientation began to spin its courso toward disester.

After this congross had passed into tho limbo of history one of the leaders of the Dutoh party, Sohmidt, followed Luste into the bosom of the church. The United States was represented by no less a stalwart fotyolutionist than Abraham Jacob Maste who was so impressed by the thep exploited and oppressed revolutionary party which is to lead with returned to the United States and made hf pozde witn God:

When Lenin's Third International was founded it demonstrated an enomous recruiting power. Its second Congress stated officially that the danger lay in being swamped with centrist recruits. Trotsly ap plies the dialeotio aocording to the logic of his revisionism begins by losing members!.

The theoretical labors of this congrass also shows a non-Marrian content. The main thesis is called. New Revolutionary Upsurge and the Tasks of the Fourth International". and. bears the unmistakeable stylistic impress of the master himself. To speak of a revolutionary upsurge as taking place now in Europe is to fail to understand the situation. The Trotskyists show as libtie grasp of reality and as little Marxist analysis as did the Stalimists when they proclaimed the Third Period upsurge. Less if anything for in 1929 m 1933 Fascism had not won the signal triumphs it has sinee.

The most amazing thing about the Trotskyist "upsurge" is that it does not inolude Spain. The opening paragraph reads:
"The June strike (in France) opened a new period in the political dovelopment of Franco and Bolgium and undoubtedly provoked not only the sharpening of the alass struggie in these countries but also, to one degree or another mass movements over important sec* tions of Europe including Great Britain and siso perhaps on the other side of the Atlantio".

This was written, no doubt, before the oivil war in Spain broke out. But the civil war had cast a long shadow before it. Poople who presume to organize rovolutionary intemationals must forsee such things as civil wars.

The ontire thesis revolves around the situation in France, some years ago Trotsky justly condemned the theoretical bankruptoy of the Stalinists who in 1928; foresaw an imediate revolution in France and missed the Spanish Ravolution ar 1931. What's sauce for tho Stalinists is sauce for the Irotskyists!

But if the thesis was written before the outbreak of the spanish Civil War, it was voted on during the second wook of that oivil war. How shall we understand tha failure to change it to conform to the imperativo correotion of the class struggle? In voting for thid thesis, tho Trotskyists, sigmifled that thoy had broken with Marx1sm finallya completely and irrovoaably. Under the shook of the Spanish Civil ar the Irotsicyists wrote a postaript to their thesis as its toxt plainly indiaates. The postoript itself is tharefore a con-
domnation of the thesis. The sole purpose of tho posbcript is to make a point about the Frenoh Peoples Front on tha basis of the civil war in Spain: "The july days in Spain have completed and
deparned with extraordinary foroe the lessons of the June days in wrinagringhatevef may be the result of the Spanish civil wor it er countrios. it must now be dionr to evory rrench wcrker in

The Centrist Trotskyites laid down na line for the Spanish workers to follow in the hour of their mordal pead en civil war is just a question of some July days? And these people call themselves revolutionistist

## ZIG - ZAG ON ORGANIC UNITY

On the question of organic unity the theses display the oppw ortunism of the rotskyists in high relief eventiable and ins unity' of the two internationals which, such as they aro; have already in effect united to betray the interests of the proletariat:" From which we ought to conclude that the Fourbh Trotskyist Intorec national is opposed to organio unity. This is not so. Ttotsky and"his International secretariat declared in May 1935 that oryanic unity could play a progressive role under certain oircumstances. Those who wish to mino the autopsy oan invostigate the majter in the May 1935 New International. former theoretical organ of the defunct Workers Party and in the pamphlet on organic unity pab lished by the Revolutionary Workers League some timo ago. Tnless these errors are unoovered the position in the Theses is only a leceiving fig leaf.

Moreover the question of organic unity is one of the questtons tied up with the question of the line for the Communist 4th Tritemational. As long as the Trotskyist position on this questEon is false they cannot have a Marxist position on organic unえよy.

OA the question of the line for the Forth International the theses say:
"The sections of the Fourth International......partioipate in every act of struggle and give it the greatest clarity and organization. They bind themselves to the best of the worker, pushed forward by the movement and nd in hand with them build the new revolutionkry leadership. B their example and criticism they speed up the formation of a revolutionary wing in the old parties drawing it closer to thom in the course of the strucke and pushinc it on the road of the Fourth Entornational". Words! Empty.dism honost words! How create the revilutionary wing in the old purtins? On what line? The line of the "Trench Turn"-the new orientation? On Irfnin's line of the political and organizational indepentence of the revolutionary Marxist ozçanization? If the former why do the theses not say so openly? If the latter was the new orientation incorrect? hen why is thern no condomnation of it and anest elarity and organization of the workers? Why is the door, le:t opon for a repitition of the sane errors in the futuref

Iale questions? The truth is that this now international stands on the political nad theoretion ground of the new orientad. ion. The proof is contanica-mot in these theses-but in a sep-
arate resolution adopted by the conference on the question of the Iiquidation of the Workers Party of the United States into the Ame erican Socialist Party. In this resolution the liquidation is approved. And the perspective of the liquidation--to convert the Socialist Party into the party of social revolution-is approved. Thus the "independent" Trotskyist Fourth International begins by endorsing the new orientation!

What perspective do the theses offer for the creation of the Fourth International as a force in the life of the working olass? Empty words: "To participate directly in the mass movement with its class slogans pushed forward to the end, a clear perspective and independent banner, to be intransigeant with concilliators; pitiless with traitors, this is the road of the Fourth International. It is ridiculous and absurd to discuss whethor or not it is opportune to "found" it. An international is not founded like a co-operative, but is oreated in the strugele. To the question of pedants on the "opportunity", the June days (in France; not the Spanish Oivil War) have repiled: "there is no room for new điscussions". So!

Trotedy launches his international during the period of des feats of the world proletariat, when capitalism on warla soajt is on the offensive qgainst the ysrkins class. Moreover, at the its second week. Any rean with a grasp of reality would have said that the success of the panish workers in establishing their proletarien diotatorship and the founding of the Pourth Communist International were inextricably bound together; just as they were In the Russian Revolution. $A_{s}$ it turns out row the $S_{\text {panish }}$ Workers are fubther away from oforthrawing capitalism than they Were the end of July. Thus Trotsky reverses Ienin: he proolaims as internafional on the basis of the defeats of the prom letariat.

On this basis it is possible to set up an international organization. But not an International in the Marxist sense of a world oadre party rooted in the masses as an objective factor with influence in the Gáass struggle. A revolutionary International organization can convert a revolutionary situation one or more countries into a successful revolution and thereby lay the basis for ar actually establish a Marxist International PAPTY. Trotsky and his followers revoal that they have no understanding at all of the Marxian party and its relation to revolution.

Trotsky does not take up this question theoretioally He merely declares pontifically: "Tpere was A strike wave in Frande in June that has settied the question. There is no room for discussion."

What kind 射 an international is the rintskyist Fourth Inter-
 international. The Trotskyist theses are silent on tilis question. Kowhere do they speak oa a Communist Fourth Tnternatinnay. The

DO the Ameriean Trotskyists. Last June in his spoech apologizing for his reentry into the Socialists Party Cannon said that he and his tribe were done with the name Communist, that the $S_{\text {talin- }}$ ists were welcome to it.

It is not a small question. The name of an international party is not just a label. The name must express the political inio Commuist is scientifically accurate. The Stalinists use it. We cannot help that. We must stracgie to wrest it from them. There is no such thing as revolutionary Soclalism today; Revolutionary socialism denoted the Marxist policies of Lenin which have since become known as Bolshevism. Today Revolutionary socialism means centrism.

Against the Tratskyist Fourth International we raise the slagan of the Communist Fourth International.

It is significant that the Trotskyist theses make no analysis or statement about centrism. Centrists cannot be expected to lay bare tha exrors of thoir own pevisionism. Contrists can alwas be spotted by their silence or ambiguity on the question of oentrism.

In these Theses the omission is particularly flarinc begause of the Spanish revolution. It is ke the Trotskyists to discuss the question of a new. revolutionary party without rem ference to the concrete question of a revclutionary party in $S_{p a i n}$. But that is exactily what they cannot disouss beoruse; they would have to taze up the ontire question of their line as tested by the Civil war. That would mean an examination of their proposal that the Spanish Communist League iquidato into the Socialist Party; their support of the traitor $\mathrm{F}_{\theta} \operatorname{sen}$; their $\mathrm{Z}_{\mathrm{f}}-$ $Z_{\text {at }}$ policy witht the P.O:U.M. First Nin was a strike breaker for refusing to join th $\Phi \mathbb{F}_{8}$; and the P.O.U.M. was opportunist for supporting the Peoples Front. At the outbreak of the civil war The P.O.U.M. became revolutionary Mrxist. Now it must be givon oritical supports Better for theso principle party builders to leave the question alione.

On the situation which is its axis in France, the Theses are equally opportunistic. The analysis is shallow. There is no statement on the importance of Prance for world oconomy and politics both from the capitalistic and proletarian standpoints. The international aspeots of the question; the decisive nnes, are not dealt with.

The situation is characterized as revolutinnary. This was the end of July. How seriously oan this charaoterization be takenf Shortly before the congress made its pronmeiamonto, its highest authority had written that the revolution has already begun. On August 8, the Nation published an artiole by Trotesky written in the midale of July, under the title, Zevolutionary Interiude in France, in which he said: "-within the dopths of
the prolotariat, as well as among the sumits of the ruling classes; a well nigh automatic proparation for a naw confliat is going on" What shall we say of people who declare that a revolution has begun, that the sitnation is only revolutianery and then that there is a revolutionary interlude? Hopeless confusion: No basis for building a world party to overthrow world oapital.

The Theses declare: "These three conditions: disposition on the part of the whole praletariat to struegle: acute discontent among the lower layers of the petty bourgeoisie; breandown in the ormp of finance capital, represent the vasic premises for the pros letarian revolution." This is written not abstractly but to characteriz the situation in France at the end of July.

In our epoch the most important premise is the revolutionary party. This is not included in the Trotskyist catalogue. And not without reason. If we want to be charitable we can say that it is loose writing; that the Trotskyists meant the basic objective premises. Let us examine them on this assumption.

The first two premises are inoorreatly stated. Lenin gave better formulations, So did Trotsky a number of years ago ir the old MIIITANT. It is not only a question of the disposition of the whole proletariat to struggle but its determination to strugele for the overthrow of the system even at the sacrifice of its lifes And it is not merely a question of the acute aiscontant of the lower layers of the petty bourgeoisie. It is a quastion ${ }^{\text {a }}$ their gravitation to the side of the proletariat which attracts tivin to its cause by its determination and bolaness flowing from its revolutionaty line. But let us pass these points and come to the question of the capitalist olass.

The Theses speak of the "lack of confidence of the ruling class in themselves." Immediately after this was written, the bourgeoisie put thru their devaluation program and felt themselves strong enough to rejeot the proposals of the government (which made them under the pressure of the workers) to put curbs on iMcreases in prices. In September the government showed much more firmness in dasiling with the strike wave than it had in June. Today it is strong enough to on vict sit down strikers; usd troops to break strikes and shoot down workers and peasants in the eolonies. What suocess oan be expected from a party which begins by paderestimating the strength of the class enemy?

But the thing is worse than en underestimation of the class enemy. At the same time that the Trotskyists were writing-possibly Trotsky himself- that the bourgeoisie had lost confidence in itself, Trotsky was writing for the NATION: "Holding in their hands all the basio levers of industry, oredit and commeroe, the financial magnates shift the oost of the agreement (the June strike wave settlement) upon the 'midale classes', compelling them by reason of this very thing to enter into a struggle with the workers. In this now lies the orux of the situation."..."The financial oligarchy which did a swimming business in the very heat of the crisis, gould of course, abide both with the forty-hour week, paid vacations and so on.... How can a bourgeolsie which is strong enough to afford such sweeping reforms and then shift the burien on to the shoulders of
the midale olasses and foree them into a class stmacela agatiot tho workors be said to have lost onsibuere in itscige cmy people who write phrases like mrotsky ant his followers ould hevo bason wilty of such lightminded "anaiysis":

The Theses have nothing to say on the question of fascism in Frence. Two years before a paniomstricken trotsky stampaded his followere into the Second International with the cry that faselsm was knocking at the gates. In Joly ke wrote for the Narcon: ": the big capitalists are conficently watoning for such a turn as wili
 tion of bourgeois papas? sons withe sitomubiles and airpianes kut as a real mass movement in Frenco". iTow fasensm is a yuestion for the fature. The opposite error. Fascisa is a hentrod times stronger absolutely and relatively. Ard it is preparing to sbrike.

The attack of the Theses is aentered on the Peoples Front. But it is, in the main, $a_{\text {, }}$ negative attaik. Ther is counterposed to the Peoples Front the incepenéent actinit oit the working olass. But this is a prase which the Trotekyists fill with a centisist cortent. It mast be so because of their ofutrist line on the creation of the revolutionary party. They do not pose the line to powes and advance slogans on this basis. In the stregete in Germany they counderpnsed the united Pront to tno Third Eerioa policies without doing se on the besis of a miNe which callea for tho seizuse of peiver. Vow they fight the opposite arror (Peoples Front) Prom the same centrist benie.

Only here they go a step further to the right. Ths central slogan advanced for the active stragzie against the Peoples Front is: "Oust the bourgeoisie from the Feoples Front". Here is a fine kettle of fish. This puts the formal stamp of approval on the siogan of Zeller: A Peopies Front of Aotion. The trotskysts are going to rom form the Peoples Front. This is the roan of tailanding libe Pecples Front, oi capitajation to i.t.

Iike the Lovestoneites these people must always be reforming something. Both groups have long ago signed away any claims to an independent revolutionary position. What is more natural than that thay should attaoh themselves to something, less periect than they would like it to be, but whioh they hope so remould closex to their heart's desire.

Men and groups are measured by events. The Spanish Civil War is the measuring stick for the policies and actions of all tendencies and organizations in the working class. Juaged fron the stananoint of Marxism against the Spanish events we must concluae that the Trotskyist Congress dofinitely stamps this foree as a oentrist tendenoy moving to the right. The deliburations of this confress determine the future of all Trotskyist groups whioh still fily firotsky's srilod banner. Whether tiey are in the Sheond Intarational or outm side of it, they are a cuntrist toacercy. It tiac Amariesi Trouskyists shoula be kicked out of the Socielint pary thery will amers to the conter which has been erected on tho bas $\ddagger s$ of that Geceva Thesec.

No conciliation is possible with the Trotslyists Unity with them is excluded. It can only take place on tho basis of the rejection of their entire course, which they will. rot ios.

Trotsky "s "Fourth International" suocoods the International Commonist League as the vehicle of metsky" s centrism and revisionism and will drag on an existence of sorta for a while sowing confusion and demoralization, to be succeeded at a later dates by another bum reaucratic and administrative expedient to hide the barikruntoy of his line:

The struggle to build the Communist Fourth International must be conducted against them as a dangerous centrist tendency.

As for Trotsky the individual. The Spanish Civil war is the opportunity for him to retrace his stops, to acknowledge his errors and rejoin the Marxists in the struggle against capitalism and jos opportanist agencies in the working class.

The conclusion is inescapable. Trotsky has never understood the question of the revolutionary party. Today he is repeating in a worse form the error of 1903-17. Under the impact of the Russian Revolution be corrected himself, worked with Lenin, and servo the world working class magnificently. Today the Spanish revolution passes him by without positive affect. It serves only to deeper his revisionism. Trot o sky takes his place with Kautsky in tine camp of the revisionists.

The REVOLUTIONARY WORKERS LEAGUE of the United States carries on tho traditions of Marx and Lenin against tho revisionists and for Communist parties and a new COMMUNIST FOURTH INTERNATIONAT.

Editorial Note: This article was submitted in the fall of 1936 . The intervention of the Spanish events demanded that we devote our primmary attention to this burning question confronting the international working class. The coming March 1937 Convention of the Socialist Party gives this article on the role of the rrotskyists (who are in the

This probably was a defect: p20 probably had text on it. Monty Feb 2014

Rossils in tho labor movement who have givon wh hope for tho dmorisain Noz?inc clans.

The auto and other workers have reacted comrageously to all throats to oust them from the plants they hold. Thousards were ready at one time to march on Flint. If the stato wers to maxe an atterpt to oust the Dodge workors in Detroit today, there is no doubt 50,000 workers could be mobilized to picket the plant.

The workers react quickly to bold ideas. The leaflets distributod both in Flint and Dotroit in thousends of copies by the Rovolu~ tionary Workers League ealling for the spreadiag of the strikes; for a general strike for the olosod shop, were rocsivad with unbeligvable eagerness. The idea of a closed shop, started in those learlets, has spread so rnpidly that the CIO leader, Frankenstoen, in order that the strike do not get out of hand, issued a long statement assuring the bosses that the CIO was not demandinc a closed shop.

In spito of all this onthusiasm and solidarity the politioal lavel of the strugrle has remained very low. So far it is a strugrle for wages, a struggle on the oconomic plane. The large wage inereases, from $20 \phi$ to $50 \phi$ an hour, and the elimination of speed-up from producing 70 jobs an hour to producing only 40 an hour on the Briggs assembly line- all of these victories have been won too oasily, without any serious struscios. The workers have not yet come into conflict with the state to any extent, and the treacherous CIO leaderm ship maintains their level of developement on the lagislative planefight for the Wagner Bill and all other Roosevolt masures.

The possibilities of the situation are truly enomous. With the present fighting spirit of the auto workars, a general strike for the olosed shop, 6 hour daym day wook, in the auto industry is within realization.

The maritime strike was settied a short time ago without a real Victory. In fact the Copeland black-list law if the workers pormit it to be applied- will wreck the union. The steel workers aro smart.ing under the agreement reached betweon the CIO and the steel trust, which gives only bargaining rights to the extent of thoir memborship to the CIO. The agreement has not preventod discrinination and the firing of union mon. The miners ${ }^{\text {s }}$ agroenent expires at the and of this month. The conditions in the minos have grown much worse in tho past Iew yoars. They have suffered a long porica of unomploymont and miserable living conditions. They aro undoubtanly raady for a stragelo.

Everywhore, the air is charged with dynamite. The bourgeoisie lives in dread that this strike wave will sweep the natins; get oompletely out of the control of the CIO and AFAfI labor fakers and asm sume a violent strugzle with the agencios of the state.

The stratogy of tho bosses under these circumstances has been to give conoossions Now in order to tide thom over the season and then make an attempt to smash the union. Even the Morgan section of the
bourgeoisie- the steel trust and General Motors- have been forced to give some form of recognition to the unions. At the same time the bourgeoisie is earesul not to make too many concessions on reoognition, ruthlessly opposing the closed shop, in order that it may be easier to smash tho unions in the future.

The policy of Roosevelt and To. has beon quite a subtie one. There is no doubt that any other policy would have led to a far more violont outsurst on tho part of the working class Roosevelt has pursued a hands-off policy of not interforing directly in thousituation. The workerg havo beon hold in chock by their faith in $\mathrm{R}_{\mathrm{n}}$ osom velt, Iowis and ro., which has beon one of the primo factors in kooping tho strike wave within bounds.

Roogevelt and Ievis attomptad, in the first stages of tho strike wave; to use its prossure to force thru the Roosevelt legislative program, whioh is intondod to provido tho necossary olass collaboration basis for handing those situations. But tho soope and proportions of tho presont strike movament threatons to upsot thoir program. As a consoquonce the politioal struggle has bocome sharper and Roosevalt has talen to attacks on the supreme court, using the strikes as a bludgeon, in an effort to push thru his program.

In all of these manouvors the CIO loadors have played the role of a most faithful lackey to the administration Their polioy has been to strike one part of the industry at a time and to settle it quickly for small concossions. The role of the $I$ olo is to rostrain and oheck tho woricors from ongaging in strike struggles. Thoir task is to load the workors into olass collaboration with the bossos and the state machinery ostablished to throtito all militant action, Vory naturally, thorefore, they hevo put forth domenco whioh oan bo won without a prolongad or sharp strugglo. Thos havo carofully avoidod tho domand for tho olosed shop, which would load to real strugglos and mean gigantic victories for the Amorican working olass.

The watohword of the rio is industrial poaco Ioadors Iike Van Bittner, Philip Murray and othors havo como out against strikos: Jnhn If Lewis, Hnmor Martin and the others babblo constantly about ostablishing harmonious rolations with "management" and socuring "a lasting poace" with industry. Ono of tho 10 Io loflots in Dotroit gives thoie program as a moro logislative ono-Wngnor Invend other bills, and tho ostablishment of peacoful relations with industry.

The Genoral Notors sottlomont was prooipitatod by this dosiro Ior poaca with tho bosses, 65,000 Thrysiar workers are on striko. 11, 000 Fudson workers aro also fightine for rooognition as tho sole bargaining agonoy. Bathor than risk tho chancos of a gonoral strilke in auto, tho CIO profors to push its soll-out policy.

This onnfims what wo havo always said about tho roformists and Iabor fakers: thoy profor poaco with the bossos rather than strugiglos which can load to a viotory over the capitalist olass. The General Motors agroemont is an attompt by $I_{c}$ mis, Martin and So. to throttio the strike wave ant keap the thrysler struggle from swe aping over

Homer Mnrtin, UAWA oresident, put it vory aloar and prociso at the conforonco to ratify thit asroomont. Ho said. "We must stop this ohaos and restoro ordor"..."Mo oan't aiford to havo an oresalzation that is constently on strike."

Ifo itsolif, howover, is pushing tho working elass far beyond this treachorous lino-ovon though the worless in tho main aro not yot conscious of it. Highland Park Ohryslor worlrors, for instanco, took ovor tho polico dutios in all tho area surrounding tho plant. Tho pot of unionism is boiling in Dotroit and elsowhoro and no sooner is ono strike sottloa than two othors braak out.

Thore is a growing suspioion on the part of many workeps (aspecim ally after the Goneral Motors agreamont, which is the rankest of sellouts) nf tho CIO londership. Thore is aissatisfaction and a waning rosontrant against thoir policios. Tho G.Ma ngeement is alroady prow volring tromendous oriticism. Apter tho glorious militancy of tho Finnt, Anderson and othor workors, tho fio janctors signed an agroamont which gives rooognition to tho OAWh only to tho outont of its mombor. ship, has no spocifications rogarding wages, spood-up, and noroly settlod tho points of HOW to tako up sriovancoa and soniority. Tho mothod of sottiling griovancos is deliboratoly complicatod to make it valuo loss.

The ngroomont abandons all claims to minimum wagos. Gonoral Motor workors, somo of whom aro working for 256 an hour, must tako up thoir claims for wago incroasos through the rogular griovanco channols. Thoy arc oxpootoc to "corroct" tho difforontials in wagos by moroly appoaling to tho bossos in tho indivicual plants. ind thoy aro prohibitod from striking axcopt by spocial poxmission of thoir intornational of fiecors, and that only aftor the griovances have gono through the rego ulur channcls- a procoss of at loast a month, onough timo to brajk many stout hoarts.

Tho agroomont whitowashos tho filthy policy of Gonoral Motors; its discriminntion against nogroos in tho south, no provisions for womon workces oxecpt that thoy taka up thoir griovanoos "through tho rogular channcls." Prooisoly what G.M. told tho union boforg it wont out on striko!

This sottlomont is ovon moro rank whon one considers thet tho Gif workors aro still on tho upsurge Tightoon sitanown strikos havo ocourca in twonty days in the Gli plants.

In this whole strike wave the $A, F$ of $I$. is playing a secondary roled Many unions are seoeding from it amd joining the Lewis bandwagon. In their place, of course, Green and Co. have been able to recruit thousands of new members on the basis of tho present strike wave. Possibly they have recruited many more members than they have lost. oddyy onough tho Green outfit has put forth stronger damands in most instanoes than the $\mathrm{C} . \mathrm{I}_{0} 0$., and have often won the closed shop.

The struasle between the C.I.O. and the A.E. of I. has now bocome muoh sharpor, with the 5.1 .0 . taking steps to form a dual apparatus In tho various cities and states and very likely a now Federation of Labor. The bossos, of courso, havo not boon slow in taking advantige
of this situation. Thoy havo mado appoais to the A.F. of I. to stop into the steol industry and form a strong dual outfit against the C.I.O. union. In Detroit a tussle between the two rival forcos is now taking place in-the street car unions. In the auto struggles and others the A.F.of I, is playing a strike-broaking rolo by demanding separato agrooments and organizing separately.

The ${ }^{\text {Stalinists }}$ and $S_{o c i a l i s t s, ~ w i t h ~ t h o i r ~ T r o t s k y ~ a n d ~ I o v e s t o n e ~}^{\text {In }}$ tails, are playing thoir miserable tail-end roles, giving full and unconditional support to the C.I.O. labor fakers. The Trotskyists have hore and there put a slight left tinge to their remarks on the $I_{\text {owis }}$ outfit (although Ganon's "Iabor Action" is almost without. oriticism), but they have made no attempt to fight the C.I.O. Ieadership. They have not oxposed a single one of all the se maneuxers; they have not issued a single logflet or writton a single artiele demaroating themselves from tho C.I.O. officialdom in POIICY. In Stalinist. fashion they hevo mouthed words about the "progressiveness" of the industrial union proposition - without touching to any extent on the class-collaboration policy of the C.I. O, which because of tho dolusions it sows is far more dangerous to the working class than the Green polioy.

All these are the very samo forcos that lined up the labor vote directly or indiroctly - for Roosovelt in the last eloction. They are. now following that up by lining up support for the Roosevolt labor policy.

The Stalinists descend to ever lowor depths. Somplete and abject submission to Iomis and company - of whom thoy are now an integral part. What a far ory from the days when Foster travelled the oountry and wrote books denouncing Lewis as one of the worst lebor fakers of ally

A number of Stalinists stewards at the Hudson plant and at the Dodes plant confiscatod leaflets issued by the Revolutionery workers Treago calling for "A GEIVERAI STRIKE IN THE AUTO INDUSTRY FOR THE CLOSED SHOP ${ }^{\text {T }}$.

The only class strugsle force in the U.A.W.A. has been a small local of 2,500 members in the fibre section of the Auto Industry Iocal 205. This local has come out for the closed shop, has shown its labor solidarity by organizing sympathetic picket lines and demonstrations for the Chryslor strikers less than 24 hours after tho strike was callod: The few strikes it has led have been militant and have brought viotories. It has taken the lead in fighting the Black Iogion by forcing a number of its mombers out of the plants, and has begun to oducate its membership against the National Guard.

This local, if it onn withstand the gigantic prossure of the various politionl forges ind the giant apparatus of the $\%$. I. O., shows promise of bocoming the polarizing force for a class struggle grouping in the trade union world - both inside and outside the c.I.0. It woula be false to be over-aptimistic about Iocal $205^{\prime}$ s possibilitles; the opposition it facos is exceedingly strong. But firmness nnd penetration of its class struggle lino can lead to great rosults.

The Revolutionary Workers League has been active far beyond its small numbers in this strike wave. A number of its members hold leading posts in the union and are doing important work in the Dodge Truck strike. By the thousand and thousands of leaflets and Fighting Workers workers.

Whet is necessary today in the auto industry is to spread the strike into a general strike for tho closed shop. This has been the agitation of the League. The auto workers must especially pay attention to striking Ford's.

The working class must be weaned away from the bourgeois ideology and the no-strike propaganda of the C.I.O. leadership. Democratically elected local strike committee and national strike committees mast be put up as well. And the workers must take the negotiations out of the hands of the union leadership and vest them in rank and file elected negotiation committees.

The working class can break through in these struggles only if it is waned away from putting faith in sly politicians of the Murphy and Roosevelt stripe; is it correctly estimates the strikebreaking role of the National Guard.

The struggles in the auto industry and other industries today can materially advance the working class on the road to revolution, Those who support or fail to attack the C.I.O. leadership are holding back that development.
