Forms were being sent off to London as soon as they came in but the process might take a few days. One thing was certain—Barrett and the Blue Union were not afraid of Mr. Deakin. The Dockers and Stevedores was a fighting union—and put the men fighting union—and put the men first every time.

The men were not taken in by the concessions gained in the last week. They knew that the T. & G.W.U. had only been stirred into action by the fear of losing its members. An example of the concessions gained was the use of concessions gained was the use of two extra men for sorting bags in the holds of ships. Another was the award of an extra 1/- for long lengths of timber.

Funds Needed

Once again we must repeat that the campaign against the ban cannot be carried forward without finance.

We need money to ensure that the fight for party democracy is carried to every corner of the Labour Movement.

If you are with us in that fight and want to help win it, then make a donation NOW.

Send it to SOCIALIST OUTLOOK, 177 Bermondsey Street, London, S.E.1.

APPEAL

The following letter was distributed to delegates at the Trade Union Congress.

Dear Comrade,

We are writing to you in con-nection with the statement issued to all trade unions, constituency and local parties, women's sections and Leagues of Youth by the National Executive of the Labour Party on the subject of SOCIAL-IST OUTLOOK.

The statement declares that 'persons associated with or sup-porting SOCIALIST OUTLOOK are declared to be ineligible for membership of the Labour Party.'

This is the first occasion in the history of the Labour movement when the National Executive has taken action to interfere with the production and circulation of a newspaper. Although the signatories of this letter, apart from the Editor of SOCIALIST OUTLOOK, do not of course support the paper's editorial policy, we re-gard the National Executive's action as an attack on the freedom of the press.

We are writing to ask for the support of your organisation in an attempt to get this decree rescinded at the Scarborough Conference of the Labour Party. We believe that in doing so you will be helping to uphold the demo-cratic traditions of our movement. Signed:

Democratic Rights and the Fight on Policy

ESPITE holiday interruptions, the campaign to lift the ban on SOCIALIST OUTLOOK has got off to a good start. The list of organisations opposing the N.E.C. is

What is encouraging about these developments is that they are tending more and more to pose the ban in political perspective. It is not simply and only an attack on the democratic rights of Party members. It is a political action of the utmost importance.

The fight for democratic rights inside the party today is inseparable from the controversy on policy—for how can that discussion continue unless people have the right to express opinions. And what is the use of people expressing opinions unless they have the right to win a majority for these inside

The Morrison ban is the outcome of a political process. Since Morecambe, the bankruptcy of right wing policies have

Editorial

become more and more apparent. Time and events are working against themthat is why they have taken the gloves off. Make no mistake about it. Morrison

and his backers are deliberately preparing to bureaucratically bludgeon all criticisms of their policies out of the Party.

Only a bunch of Trotskyists

There are people who consider themselves "left" in a fashionable sort of way going around mumbling within earshot of "the local agent" that it is only a 'bunch of Trotskyists" who are for the axe, and other more "respectable" left wingers are quite safe. Such clever fellows seek by this sleight of hand to do two things:

They hope that the word will be passed through the pipeline to Transport House that so-and-so who occasionally reads TRIBUNE and THE NEW STATESMAN is "safe." If, on the other hand, the left should one day take control of the party they hope to keep a toe-hold on the band-waggon. Such elements will be treated with contempt by all serious

Neither can anyone afford the luxury of sitting on the fence in the present fight. All things are down to eartheither the Morrisonites are called to order or they will stamp out all opposition.

A Fundamental Political Crisis

This brings us concretely to the political reasons for the ban. SOCIALIST OUTLOOK believes that the organisational deadlock reflects a fundamental political crisis in the party. If we must now prepare to do battle to defend democratic rights we are called upon to do likewise on matters of policy. The OUTLOOK has been singled out because its purpose is to do precisely this.

We believe that the party desperately needs a consistent socialist policy. All basic industries must be nationalised or no foundation can be laid for an effective Socialist answer to

It is of little use to the colonial people to deplore violence mand the withdrawal of British troops and the granting of freedom to the colonies.

Policy Must be Consistent

It is not consistent to oppose German rearmament and at the same time to vote for increases in the Tory military estimates so that British troops can remain in Germany to ensure that Adenauer and Hitler's backers get the green light to rearm. Real opposition to German rearmament begins with the demand for the withdrawal of all British forces from Germany.

A fight against the war-plans of U.S. imperialism must be essentially linked with a struggle to defeat the Tory war plans on the Home Front.

While Toryism every day unloads fresh burdens on the working people in the interests of the class it represents, the movement will not long tolerate leaders who are more concerned with fighting the suppression of socialist ideas than fighting Labour's traditional enemy.

Between the policies of left and right in the party there is an unbridgeable gulf which cannot be solved by compromise. Once this is realised the road to the victory of the left

In the SOCIALIST OUTLOOK of last week an article declared the H-bomb to be more horrible in its effects than those who developed it had planned. CLASH IN FIRST SESSION

As I write, some of the major debates at this year's Congress have yet to take place. The very first session began with a clash between the platform and the floor.

DEEPLY DIVIDED

As in previous years, Congress is deeply divided between those reflecting the desire of the rank and file that the trade unions' function as workers' organisations and the leadership on the General

It would be foolish to rely on the hope that the very horror of the H-bomb will prevent its use. Having found their lead in hydrogen and atomic weapons is being gen and atomic weapons is being narrowed, America's rulers are now feverishly seeking to develop what they term the "ultimate weapon"—the 'intercontinental ballistic missile with a hydrogen war-head" as they poetically call it. ONLY ONE POWER

The only power on earth which can stop the complete devastation of the globe and the annhilation of humanity, is world Labour. That is the only force that can paralyse the war drive and end the spectre of hydrogen warfare by ending capitalism.

The sufferings of Aikichi Kuboyama must spur on the socialist fight against war, the fight to strengthen the bonds of British Labour with Labour in Japan and the rest of the world in a struggle against the war alliances and against imperialism.

Profound Disgust

PPOSITION to the ban on SOCIALIST OUTLOOK continue to come in from all parts of the country and every section of the Labour Movement.

Birmingham Trades Council passed a resolution expressing "its profound disgust at the recent circular issued by Morgan Phillips." It called on the T.U.C. "to use its authority with the Labour Party, in compelling the National Executive to withdraw this dangerous circular unconditionally. two votes were cast against.

Wallasey Trades Council and Labour Party has also passed a resolution demanding the lifting of the ban on SOCIALIST OUT-

In a resolution opposing the ban, Aston Divisional Executive Committee declares that "the contents of the 'infamous circular' are contrary to the right of minorities to express their point of view."

Leatherhead and South-West Islington Constituency Labour Parties have passed resolutions of protest against the ban.

In the Birmingham area, Northfields, Erdington and Small Heath Constituency Labour Parties have swelled the volume of protests which are reaching Transport House daily.

Morgan Phillips will have quite a bit of correspondence to deal with when he gets back from his China trip—if he can spare the time from acting as Special Correspondent (at £300 per article) for the DAILY TELEGRAPH.

"And if any C.L.P. jack-inexcuse for a witch-hunt, he will continent. have his knuckles rapped if the N.E.C. gets to hear of it.'

This comes well from Mr. Kaufman, writing from Leeds, which has become the very centre of the witch-hunt of SOCIALIST OUTLOOK supporters. To date, there is no record of any of the Leeds "jacks-in-office" having having their knuckles rapped by Transport House. Perhaps Mr. Kaufman will take this matter up with the N.E.C.!

Mr. Kaufman also complastates that there is no danger of the Bevanites and others who oppose official policy being expelled from the Labour Party because "the N.E.C. knows how far it can go and how far it should go. What Mr. Kaufman does not appear to realise is that this move against the OUTLOOK is a trial run by the N.E.C. to see just how far they can go. If they get away with this then no minority group within the Party is safe!

Behind Events Spanish In Goa **Trials**

As an independent geographical and political entity, Goa does not exist. The territory is as much a part of the Indian sub-continent as Bengal, Tamiland or Maharashtra—and can no more, or less, rightfully pretend to separate rights and privileges.

Yet this is just what the Portuguese rulers of Goa demand of the Indian government. Prosperous Goa-manganese and iron ore exports last year topped a total of 11 million dollars—is extremely important to the pauper-ised, battered and still semi-feudal economy of Portugal. More than this—its retention in Portuguese hands is important as providing a link in the chain of potential American bases in Asia, linking Pakistan in the north with Trincomalee (Ceylon) in the south.

That is why the imperialist camp is raising such a fuss over Goa when its leaders were prepared—in order to mollify Nehru—to "sacrifice" the French territories in Eastern and Southern

OUOTE FOR THE WEEK

"One of the consequences of the two-party system is that there are more points of view in the country than there are parties to express them. This means that the electors must make a broad choice as to which of the two great parties more generally represents their point of view. Moreover, it inevitably means that the two great parties include people who, while accepting the fundamental principles of the party to which they belong, are of more than one temperament, and possess more than one point of view on certain issues. To some extent each of the great parties is a coalition of individuals, and it is therefore not surprising that sometimes there are differences of opinion, differences which are more likely to find public expression in a progressive party, which seeks to do things, than in the Conservative Party which is not very anxious to make positive changes."
