Stalin Exposes Own Lies on UN; Still Seeks Deal

Breaking a silence of more than two years, Stalin, in his capacity as Soviet Premier on Feb. 16 issued a declaration of Soviet foreign policy on the unfolding international crisis. This declaration, in the favorite guise of an "interview" with a correspondent of Pravda, the official newspaper of the Russian Communist Party, is a typical Stalinist product: evasive, filled with double-talk, completely devoid of any revolutionary Socialist content, primarily intended for diplomatic maneuvers with Western imperialism.

The critical issue of war and the burden of his comments toward an attack on the United States, the Atlantic Pact countries (singling out Parties) peace Stalin slurs over, directing tries (singling out Premier Attlee and the British Laborites) and National Tour on and the British Laborites) and the United Nations. The closest Stalin came to giving a direct U.S.-World Crisis answer was on the issue of Korea. As for other burning questions - Germany, Japan, Yugoslavia — on these Stalin deliberately maintained silence. These and similar questions he undoubtedly reserved for secret diplomatic haggling at the projected "Big Four" parley, whose and the World Crisis." From preliminaries have been tenta tively set for March 5.

Instead of offering a working-

class, socialist program of fighting the war danger, Stalin still continues to lull the masses at home and abroad with fake assurances that war "cannot be considered inevitable," immediately coupling this, however, with a "warning" that "there are aggressive forces thirsting for a new war" in the United States, magazine, the Fourth Inter-Britain and France. How to combat these "aggressive forces"? All that Stalin has to offer here ment in Buffalo where he is eference to "the campaign in defense of peace" which to March 2, Hansen will speak in he emphasized as being "now of the following cities: first rate importance." The question naturally arises not only of what importance but of what use has it been up to now?

Did Three Dead **Briggs Officials Know Too Much? Demand Autopsies** In Gangster Probe

Emil Mazey, secretary-treasurer of the CIO-United Automobile Workers, following up the revelations of the Kefauver Committee on the conspiracy between the Briggs Manufacturing Company and a gang of thugs to beat up union militants and wreck the union, has demanded that the Detroit County prosecutor order autopsies on the bodies of three former Briggs executives who died shortly after protesting the alliance between Briggs top executives and the hoodlums.

"It seems more than a coincidence that three people who in our opinion would shed light on the beating and the scrap contract (between Briggs and gangster Perrone) should all die in the same year," Mazey said.

The Briggs local 212 also demanded the removal of Dean Robinson as Briggs president, cancellation of the company's contract with the gangsters as a bargaining relationships."

Genora Dollinger, one of the Briggs union militants who suffered a brutal beating by the company-hired thugs, last week in an interview with The Militant stated, "I want to see the gunmen of the Renda-Perrone gang and the officers of the Briggs company, who hired them, brought to trial and punished for the scheduled to stay from Feb. 27 merciless beating of myself and

"The Senate Committee findings in Detroit . . . will, if followed through, also shed light on the murder attempts on Walter and Victor Reuther," she stated.

Thus far neither the Kefauver Committee nor the UAW-CIO have taken any steps to force indictments against the officers of the Briggs company.

The singing of others workers' songs like "Soup" and "Solidarity Forever" bear testimony to the long history of labor militancy and struggle in this textile area. In front of Forstmann's Garfield plant the pickets are set up for light housekeeping. In addition to an oil-drum stove there is a coffee urn and a juke box that some sympathizer has donated. One young picket suggests that the song being played be changed for something better for marching. In addition to the strike posters that the pickets carry, a big poster has been fastened to the company gate announcing that the plant is struck by the TWUA-CIO. The plant police show no disposition to remove the sign.

What Wage Ruling Means

Here is how the Wage Stabilization Board pay freeze

Unions would be allowed only 10 per cent wage hikes above the Jan. 15, 1950 base pay.

If the average base pay is \$1.50 per hour on Jan. 15, 1950, and the workers had won 10 cents an hour in July 1950, they would be entitled to only 5 cents an hour under the proposed wage freeze. Escalator clauses are included, in the freeze,

This ruling, if allowed to stand, would remain in effect until July, 1951.

Wholesale commodity prices have risen 40 per cent since a year ago. By July, 1951 this tremendous leap would be reflected in retail prices and consequently in the cost of living.

Thus, the wage freeze would keep real wages far below the cost of living and bring about a drastic reduction in living

Welfare funds, and shift bonuses would be considered as part of wages under the ruling.

Pay Freeze, Rising Prices, More Taxes, Strikebreaking Rouse Anger of Workers

By Joseph Andrews

The withdrawal of the three labor members from the Wage Stabilization Board on Feb. 16 has created a crisis in Truman's war mobilization plans and in the 18year coalition between the labor leadership and the Democratic administration.

Resignation of the labor representatives was forced by the burning resentment of the workers. They resent Truman's vicious strikebreaking tactics against the railroad workers and the wage-freeze which the Big Business administration seeks to impose despite runaway prices.

The need for the labor bureauby columnist Doris Fleeson in the Feb. 19 N. Y. Post: "Labor's but are pressing for solutions for the bread-and-butter problems of life. So long as inflation control remains ineffective, labor leaders

The labor members made clear that it was not the wage-freeze alone which had aroused the resentment of the workers. "This is not a question of an isolated incident. Prior to the labor withdrawal from WSB, the Jan. 31 UAW-CIO News Letter stated, "The price control order, freezing prices at their highest levels, simply legalizes the scandalous profits of speculators and war profiteers."

The tax program was castigated as one which will "raise all taxes in such a manner that people in the lower income brackets will be forced to bear a still heavier share of the tax burden."

In July of 1942, came Roosevelt's "Little Steel Formula" which froze wages to a fixed percentage increase over the rates on Jan. 1, 1941. This was 15 per cent, or one-third the amount of the rise in the cost of living. This s the precise pattern of Truman's wage-freeze formula.

A Prophecy Life Is Realizing

"In the past, America has known more than one stormy outburst of revolutionary or semi-revolutionary movements. Each time they died out quickly, because America then each time entered a new phase of stormy economic upswing, and also because the movements themselves were characterized by crass empiricism and theoretical helplessness. These two conditions belong to the past. . . . American capitalism will enter an epoch of monstrous imperialism, of an uninterrupted growth of armaments, of intervention in the affairs of the entire world, of military conflicts and convulsions.'

A Program for Labor's Crisis

The belated resignation of the labor members from the Wage Stabilization Board was an act of self-preservation. They could no longer stifle the mounting anger of the workers against the oppressive burdens of war mobilization.

The union leadership's blast against the Truman-Big Business alliance merely put into headlines what every worker knows: war profiteers are running wild and trampling labor underfoot. The question is: what to do?

The break with the board was a step in the right direction. Formation of the United Labor Policy Committee is a necessary move toward labor unity against the government-Big Business offensive.

But the union bureaucracy has done little so far to indicate they plan a sustained struggle to defend labor. On the contrary they are meeting in secret confabs with government officials trying to negotiate a few face-saving concessions in exchange for patching up the coalition

Appointment of a union official to administer top policy will not protect the workers when the policies themselves are wrong; an increase of a couple of percentage points will not make the wage freeze itself more just.

To wage a real fight against "Big Business domination" of the War Mobilization set-up, the United Labor Policy Committee should summon a conference of rank and file delegates from all local unions, AFL, CIO and independent. Such a democratically chosen and truly representative Congress of Labor would check

the Truman-Wilson anti-labor drive. Workers at such a mass Congress would undoubtedly adopt a program of action along these lines:

1. Withdraw all labor representatives from governmental commissions.

2. No wage freeze.

3. An escalator cost-of-living clause for all workers.

4. Tax the rich instead of the poor.

5. Confiscate all war profits. 6. Nationalize all war industries. Operate them with democratically elected

committees of workers. 7. A strong FEPC anti-discrimination law.

8. Genuine price control policed by committees of housewives, trade unionists, farmers and small businessmen.

9. No more trust in the two old capitalist parties! Organize labor's own political party to fight for these demands on the political field.

Operation Slaughter

The press reports that the military objective of the U.S. Army in Korea has changed. MacArthur is "no longer interested in attempting to seize or hold any particular territory." His prime objective now is to kill as many Chinese as possible. Thus the original policy of "freeing" Korea by restoring the corrupt and reactionary Syngman Rhee regime and extending its control over all Korea has been discarded as impossible of achievement and the prime objective today is — killing.

As a British observer remarked of the recent U.S. offensive on Seoul: "Gen-Ridgway's interests are homicidal not geographic."

The American people have never been consulted about Korea. Truman's "police action" was taken without consultation of Congress, let alone the consent of the people. The great desire of the people, shown by the grass roots protests and by newspaper polls, to withdraw all U.S. forces from Korea has been disregarded. Nor can the American people be held responsible for the now proclaimed objective of mass murder in Korea. The guilt rests squarely on the U.S. imperialists.

Not only do the American people de-

rive no satisfaction from the enthusiastic newspaper descriptions of great slaughter of Asian people but they know their own sons are also being slaughtered.

Early this month total casualties for both sides in Korea were announced as 1,300,000. More civilians were killed than soldiers. U.S. casualties alone have reached the 50,000 figure. The Pentagon declares it will send 15,000 boys a month to Korea as replacements. And the end is nowhere in sight. The generals figure that as long as replacements hold out they can keep up their program

They try to make this palatable to the public by picturing it as a great bargain. MacArthur claims that every U.S. casualty brings ten or even thirty enemy casualties. Supposing his figures can be trusted, can you find an American mother who wants to trade her son's life for even 30 mangled or scorched Chinese or Korean bodies?

The sole objective of the U.S. intervention in Korea today is killing. Before the burning desire of the Asian people to be independent, imperialism has shown its impotence to accomplish anything more than murder. Bring the troops back

India Starves -- Congress Stalls

Several weeks ago we reported (see Feb. 5 issue of The Militant) how the Truman administration has employed every trick, including the shunting of the issue into Congress, in order to stall shipments of wheat to famine-stricken India. The American imperialists have continued this grisly game since October 1950 in order to beat down the resistance of the Indian government and force the latter to docilely support U.S. foreign policy.

There are no food reserves whatever left in that country now. There is no foreign exchange to buy grain. If a single food ship is delayed, starvation immediately threatens 100,000,000 Indians who require a minimum of two million tons to survive for two months on their slow-death ration of nine ounces a day. On Feb. 18, even the editors of the N. Y. Times finally admitted as much.

But the stalling continues in Washington. By the middle of February, Truman "appealed" to Congress — where his own henchmen in the Senate and House have pigeonholed the relief meaesure — to "urge assistance" to India. Amid much ballyhoo, a bi-partisan group of 40 Senators and Representatives have sponsored a bill to "Furnish Food Aid to India."

These "furnishers of food" have attached more strings to their bill than are contained in an orchestra, including the harp. India must pay the cost of transportation; the distribution of wheat must be supervised by a special Economic Cooperation Mission; the proceeds from the sale of this grain in India must be set aside in counterpart funds, again under special conditions and supervision, and so on. And here is the pay-off: only onemillion tons, or only half of what is so direly needed, will be shipped!

The shipment of the remainder is "to be deferred." Meanwhile the ECA would at its leisure "examine other supply possibilities and terms upon which this additional grain should be supplied from the United States."

Needless to add. even this contemptible "food aid" measure has still to pass Congress. The devourers of human flesh and spirit in Congress do not care how many Indians starve or die while they seek to tighten an economic stranglehold on India which, in its turn, would render India's government more obedient.

The Board of Directors of the National Association for the Advancement of Colored People wired Congress Feb. 13 urging that wheat be sent to India "in humanitarian spirit and without political. economic or other conditions." But the official labor leaders still keep a shame-

STALIN EXPOSES HIS OWN UN LIES, LEAVES DOOR WIDE OPEN FOR DEAL

(Continued from Page 1) stead of receding, the war danger has in the meantime intensified. This whole cynical, fraudulent and impotent campaign has revolved around the UN, whose real role has been completely exposed by the events resulting from the China-Korea crisis.

And so belatedly and grudgingly Stalin finds himself compelled to tell at least part of the truth about this hub of all his 'peace" campaigning, about this organization of which he is one of the chief architects and about whose role as a "peace bulwark' he had lied, as he still does, so shamelessly.

It suddenly turns out that the UN is "a means for unleashing new world war"; that it is "taking the inglorious road of the League of Nations," "burying its to disintegration," and so forth, Worse yet, it is simply a "tool' acting "on behalf of the requirements of the American aggreswho, besides, complains Stalin, are "undemocratic." The tie-up of the Briggs corporation and the Perrone gang has been known to the authorities since 1946. In that year a special secret grand jury investigation of "labor racketeering" was held in Detroit. Under the then Michigan law it was a one man grand jury. The one man was Circuit Judge George B. Murphy. Despite underworld links of Big Business brought out by testimony, no action was taken. The 28 books of testimony were kept a deep secret till they were reluctantly turned over to the Senate Crime Investigating Committee.

George E. Herbert, general superintendent of Briggs salvage when the contract was suddenly taken from the legitimate scrap dealer who had had it for 18 years and given to the gangsters, got suspicious. So he naively went to the FBI to report this infiltration of the underworld into "respectable" private enterprise. Results came quickly. Herbert and his secretary were fired with no reasons given.

Herbert also testified that in return for the scrap contract Renda was to prevent all future strikes at Briggs. Herbert was warned to "lay off" Renda if he "knew what was healthy for him." Herbert gave this testimony at the secret hearings in 1946. He could not be called by the Senate Committee because he is dead. Emil Mazey, Vice-President of the UAW-CIO has called for the exhumation and autopsy of his body and those of two other key figures who also died since the grand jury hearings.

Renda, son-in-law and the front for the Perrone gang, got the \$11/2 million a year contract at the age of 24. He had no previous business experience nor office. The scrap removal at Briggs requires heavy equipment such as cranes. railroad sidings, a fleet of trucks, etc. Renda had no equipment at all. His "business" telephone was that of his hoodlum father-in-law, Sam Perrone. Renda never handled any of the scrap. He immediately subcontracted it out to the same firm which for 18 years had had the Briggs' scrap contract. Renda simply upped the price of scrap several dollars a ton to the former contract holder and at the same time got it much cheaper from Briggs. Briggs lost \$14,000 a month giving Renda its scrap at the lowered price.

Special prosecutor at the 1946 Grand Jury investigation which brought no results and whose records were kept secret till last week was Lester Moll, a personal friend of W. Dean Robinson, president of the Briggs Co. His questioning of Robinson was very chummy; for instance, he addressed the witness as "Dean." Part of the record runs: Moll - "I think we ought to have a frank discussion of this situation off the record." When the Senate investigator asked Robinson what the off-the-record conversation was about, the Briggs president gave his habitual answer: "I can't remember."

Detroiters had a first class opportunity to see real underworld characters and to watch their Big Business pals sweat and stammer, "I don't remember." The Senate Crime Committee hearings were televised and proved to be the most popular program of the year.

John A. Fry, president of the Detroit-Michigan Stove Company which has employed the Perrone gang since the 1930's and which to this day remains open shop, reversed his testimony on the stand. At first he told the Senate committee: "I never discussed labor problems with Sam Perrone." Then he was confronted with the theretofore secret grand jury proceedings in which he had testified he had "called upon Perwhich he had testified he had "called upon Perrone" when his workers were on strike. He was, also confronted with a report from the Interstate Commerce Commission on Perrone's application for a trucking license. It read: "Mr. Fry indorses this application because he is indebted to Ispano Perrone for helping the company break the strike in 1943 in April."

The two Perrone brothers are old-time gangsters with long records. As far back as 1920 one was arrested on a murder charge. In 1931 there was a larceny charge and an armed robbery charge again in 1932. In 1929 they were involved in an alien-smuggling ring. However the only time they were ever imprisoned was in the mid-30's. On a bootlegging conviction they were sentenced to Leavenworth for six years. There they had adjoining cells. They did only a little more than two years and then were let out, due it was hinted by the Senate investigators to the intercession of Big Business men. While in prison their scrap metal "business" was carried on in the name of Sam Perrone's wife. In 1942 the charge was the carrying of concealed weapons. In 1945 firemen putting out a fire in the stove plant discovered a secret compartment in one of the lockers. In it was a small arsenal. The locker was Perrone's. But as usual the company-protected thugs went free. In 1945 Lydia Thompson was murdered. She left a note for the police stating that in case anything happened to her the police should look for Sam Perrone. He was never brought to trial. Arthur Glover, a Detroit police detective is a longtime friend of Sam Perrone, on Perrone's own admission. This was the very detective assigned to question Perrone in connection with the Lydia Thompson murder. The Perrones and front man Renda, Perrone's son-in-law and holder of the Briggs scrap contract, all carried guns on permits issued by De-

An insight into the "impartiality" of labor mediators and umpires was given by the grand jury testimony of James F. Dewey, Dewey, long an "ace" labor mediator for the federal government was in this period the "impartial umpire" of labor disputes between Briggs Co. and the UAW. Dewey tried to tie the beatings of union militants at Briggs to union factions. He pictured the Briggs Co. suffering from a local that was under the leadership of Trotskyists. According to him Emil Mazey, now vice-president of the UAW and then president of the Briggs local, was a Trotskyist and was "impossible to deal with." He took part in secret conferences "to get rid of these bad people in the plant." At first Dewey denied being in the scrap iron business or hav-ing any interest in it. Then he admitted that he had arranged scrap steel sales to a dealer who had no scrap yard but did business from a hotel. He got a commission on each of the scrap deals he arranged. When W. O. Briggs, company vicepresident, was asked, "Do you know whether he (impartial umpire Dewey) is engaged in the scrap business?" his evasive reply was, "I don't know. Everybody wants to get in on the ac-

Los Angeles **SWP Candidate**

VOLUME XV

LOS ANGELES, Feb. 14 The Los Angeles Local of the Socialist Workers Party entered into the April 3 local election campaign here, this week, when Myra Tanner Weiss filed her nominating petition for Board or Education, Office No. 5.

Comrade Weiss filed her 1000 signatures after a swift four cay campaign and was the first candidate to qualify for office. I'wo others subsequently qualined, and it is expected that a total of five candidates will run for the post if all who filed declarations of intention to run, qualify.

A total of four school board posts are up for contest. The stainists have announced that tney will run Henry Steinberg as a Communist Party candidate for Office No. 1 and Jack Berman as an Independent Progressive Party candidate for Office No. 7. Neither have qualified up to the date of this article but three days remain in which to file.

The elections are formally nonpartisan in nature but Comrade Weiss, and presumably the others, will run their campaigns on a Party basis. Since each office covers the entire School Board district, which overlaps the City of Los Angeles, the program o. the Socialist Workers Party will be presented to the entire city.

Several organizations have already contacted Comrade Weiss with questionnaires, the answers to which will be printed in their bulletins and papers. Among these are the League of Women Voters and the Building Trades

"Errors" of Karl Marx

Short Subjects

By Harry Frankel

A report from Rome last week tells us that the reading of Karl Marx's Capital is prohibited for all Catholics. This prohibition is binding even though Capital is not on the Index librorum prohibitorum, the list of books condemned by the hierarchy of the Roman Catholic Church.

The news is contained in an article in the Vatican's weekly, Osservatore della Domenica, in the form of a statement by Msgr. Enrico Dante, emeritus member of the Roman Academy of St. Thomas Aquinas. Msgr. Dante, from his tone, works hard to follow in the footsteps of his medieval patron saint. Capital, he tells us, is based upon "historical materialism," advocates "atheistic communism," and calls for "the class struggle as the only means for achieving the emancipation of the proletariat. . . All these errors are condemned by the Church.'

He reasons further that Capital is not to be considered approved reading just because it is not on the Index. "Canon No. 1399 lists those books which fall by law under the same prohibition," he adds, "and among these are books which defend errors condemned by the Apostolic See." Like a true son of Thomas Aquinas, he leaves it to an underling to put the matter simply in another statement, which says in part: "Some books are so obviously anti-Christian that it is not necessary to cite them by name in the Index, and Capital is one of these."

The teachings of Capital are thus named "errors." But those who recall the earlier experiences of mankind with the "errors" denounced by the Catholic Church need have no fear that the economic laws discovered by Marx and set down by him in Capital will henceforth cease to op-

tions raised in the dawn of capitalism with the same dogmatic presumption which it now displays in discussing the questions raised by the decline of capitalism. At that time, the Church condemned as "error" the scientific hypothesis that the earth revolves around the sun. This discovery was the foundation of the modern science of astronomy, and an important part of the scientific work of a great age.

Galileo, one of the great geniuses of human history, was persecuted and imprisoned when he attempted to defend this new conception. The consulting theologians of the Holy Office attacked Galileo's stand as "absurd in philosophy and formally heretical, because expressly contrary to Holy Scripture." Galileo was compelled to promise that he would not "hold, teach or defend" the "heretical" doctrines. The book of the Polish astronomer Copernicus, On the Movement of the Heavenly Bodies, in which the new scientific theory was expounded, was placed on the Index because of its "errors."

Giordano Bruno, Italian philosopher of the Renaissance, was imprisoned for seven years and then excommunicated by the Church. His crime was that he taught that the earth revolves ally burned at the stake in 1600, an object lesson of what the Church hierarchy does to all

But observe, the earth stubbornly continues to revolve about the sun, and the sun just as stubbornly refuses to change places with the earth. It is just as certain that the economic laws discovered by Marx will continue to operate in capitalist society in spite of the fact that they are condemned by the arrogant superstition-mongers of the Apostolic See.

"DOUBLE'STANDARD"-The railroad switchmen fighting for a living wage have been denounced for treason by "big wigs and little wigs, from President Truman and Charles E. Wilson down to the editorial writer for the Crossroads Gazette," points out Textile Labor, Feb. 17. But "not a peep has been heard from Truman, Wilson or the press and radio" about the complete tieup of the nation's cotton through the closing of the Cotton Exchange "by a 'strike' of merchants and shippers against price control." Textile Labor's editors cite this as "a stunning example of the 'double standard' which afflicts America." Actually, of course, this is the way one and the same class standard, for the benefit of capitalists and to the injury of labor, always works out.
