COUNCIL FIGHT IS RENEWED AT HOT SPRINGS, ARK., TODAY

We, therefore, ask all persons, in the city as well as outside, who hold bonds, stock or notes against the paper to write at once, giving present address.

Man the "Tug-Boat" Now!

The following articles by Walter J. Millard, national committeeman from Ohio, is the second opening gun in resuming our appeal to complete the \$25,000 fund:

About five weeks ago I came to Chicago for special work in the municipal campaign. During that time I have been in contact with practically every member of the Daily staff.

I have listened to the deliberations of two directors' meetings heaviest vote, running about 12,000 ahead of their vote in the city election

I have listened to the deliberations of two directors' meetings and one stockholders' meeting.

As a result the situation has, in the language of the street, "got in on me." I used to read my paper every night in Cincinnati and smile complacently at its stories of success and admire the ingenuity of the appeals for aid. I, like you, the reader of these words, became somewhat callous to the constant cry for "more money."

ALL IS CHANGED. I shall never look at a copy of the Daily again without a lump coming in my throat. I know that every page is wet with agony sweat, that every line in it is an over-strained nerve.

Palissy, the potter, tearing up the flooring of his house to feed the flames, is outmatched by the brave group who are keeping the flame of the Daily Socialist alive, so that the glaze of truth will start to melt over the minds of the working class.

The situation is MORE DESPERATE THAN I EVER IMAG-

The situation is MORE DESPERATE THAN I EVER IMAGINED. Success is so close it is tantalizing. Every moment the stelegraph ticks out the story of another victory and yet in sight of the harbor of success the Daily seems like a great liner, which, having weathered the storm, founders on a sandbar.

What is needed is a "tug" to pull her off the sandbar of old debts and help moor the ship in the harbor of financial prosperity. It is no longer the question: "Will you man the "tug"? YOU MUST DO SO—to save the hopes and aspirations of our class from a calamity that will take years to overcome and blot out.

The name of the "tugboat" is the \$25,000 Fund. The steam is rising in her gauge, the ropes are tightening, but THE BIG SHIP IS AT A STANDSTILL, choked by the stand that has accumulated in the past.

Future Bright for Socialist Party

AND THE TIDE IS STILL RISING

for the Socialist party in the United States as it more than a year away.

The reports that come from France say that does today.

There does not seem to be anything too big for it to accomplish during the next few years.

When Berkeley, Cal., was swept into the Soclalist fold on Saturday, April 1, and J. Stitt Wilson was made Socialist mayor, the prediction was that something unusual would happen at the regular spring elections.

This something unusual did happen on T esday, April 4, when the stream of victories from coast to coast stampeded the capitalist press into heralding every near-victory as a defeat.

It's a wonderful situation. Instead of ignoring our occasional victories, as has been the case in the past, they are seeking consolation from our

There will soon be a hundred members of the Socialist party in the French chamber of deputies, corresponding to our House of Representatices.

As a result of the high tide of sentiment toward Socialism in this country at the present time 1,000,000 votes would be the lowest mark that v should set for ourselves in the 1912 presidential campaign.

A wave of 1,500,000 votes could easily sweep half a dozen or more Socialists into Congress and send a handful of Socialist into many of our state legislatures.

The wonder was in this spring election, the first anniversary of the Milwaukee victory, not so much how many cities that we captured, but the large number that we nearly captured, and also the phenomenal votes that we cast in many places with a solid opposition.

A review of the victories since April 1, so far as we have been able to learn, is given as fol-

The methods of the company have been to hire Jewish, Polish, Bohemian, Slavic, Russian and Hungarian workers and put them in such positions that conversations would be made difficult. Deaf and dumb cigarmakers are greatly in evidence. They also struck.

Another thing that was done to discourage discussion was to keep the different floor forces from even seeing one another by making the floors empty out out different exits and then forbiding employes of one floor from going to the others.

Now they have engaged Normal hall, on 12th street, just a block east of 40th avenue. Normal hall is equipped with steam heat and siectric light, a phone and a plane, it is pronounced by all who have visited it as one of the best headquarters of any ward in the city. Today the ward has a membership of seventy. At the aldermanic election of 1910 the ward cast 389 votes for their candidate, against 1,061 in 1911, as inandidate, against 1,061 in 1911, an in-

NEW CANDIDATES ENTER

Simultaneously with the announcement of the withdrawal of the nomination coupon, as made vesterday, several new names were entered, and promise to make things interesting for the next few weeks in the great contest now being waged among the many friends of the Daily Socialist who are out securing new readers for the paper. It was just as we thought, that some of the contestants were depending upon their friends to do what they themselves should be doing. But they have decided that if they are to win they must get in the race and show their appreciation of the efforts put forth by their friends.

Several of the contestants paid a visit to the office of the Daily, and after talking the matter over with the contest manager, decided that they still had an excellent chunce to win, and so they have.

In a memorandum on certain points onnected with the strike, General Macready, who was in charge of the military force, says:

"It appeared to me that a false impression as to the uso of both police and military existed in the minds of

"There seemed to be a general idea that the managers were at liberty to carry out any schemes they pleased, such as the importation of blacklegs or fresh work on pits, in short, any measure without consideration as to how it might influence the strikers, and that the milliary spirit would then be

called upon to suprort such action.

"Also, there was a distinct inclination to direct and apportion the movements and numbers of both police and military, while the information from the managers was in practically every case so exaggerated as to be worthless.

Mine Managers Criticised

"Before long these difficulties were put straight, but they are points that should be borne in mind in dealing with future strikes."

ASK PROBE OF TWO FIRE FUNDS

Widows to Worry; Hunt Fake Press Agent.

The Stockyards Survivors' Protective ssociation and the Cold Storage Fire Survivors are combining forces to force Harlow N. Higinbotham to an accouning for the funds of the two fires.

Statements Conflict

In each case Higinbotham held the funds. In 1893 there was \$104,000 col-lected for the cold storage fire survivors; in 1910 \$211,000 for the stockyards

fire fund.

The cause of the investigation as to the disposal of the cold storage fire fund arose from the contradictory statements of the members of the board of trustees. Bernard E. Sunny is said to have told the widows that there was 129,000 left, while H'ginbotham said \$11,000, and the cashier of the Illinois Trust and Savings Bank stated that there was nothing left of the fund. nothing left of the fund.

The widows of the cold storage fire got \$2,000 in real money and the inter-est on another \$2,000. It is said that the interest rate dropped from 5½ to 5 per cent, then 4½ and then 4 per cent. The interest is said to have always dereased, never increased.

No Immediate Relief

Some of the heirs still have the \$2,000 coming to them, but all of the children have since become of age and have been paid their share.

Under the present arrangement, no provision is made for immediate relief. as the public supposed would be done when they contributed. All the money is said to have been already invested in bonds and stocks which are handled by the Illinois Trust and Savings bank, with which Higinbotham is connected. The widows have asked that the trustees charge for office rent and other expenses be investigated, as some seem to think the charge an exorbitant one.

Hunt Press Agent

The attorneys for the widows, W. H. Barnum and David B. Stansbury, called on Highnbotham yesterday and notified him that suits would be started at once. Highnbotham stated that the trustees had done what was considered best by them and he attorneys withdrew to consult with John J. Coburn, a candidate for Supreme court judge at

the primaries yesterday and who has donated his services to the widows.

Inquiries are being made by the newspapers for a man by the name of Harris, representing himself as a news-paper man, who collected a sum of money from the widows to finance a publicity earmaien.

publicity campaign. "The investigation started," said Mrs A. D. Lannon, "from the statement made to me by the Dally Socialist reporter that the newspapers were glad to get the news and would do everything possible for the publicity of our cause without pay."

Are on His Trail

No one in authority would state how much was obtained from the widows, but it is said to be close to \$20. The man called at several newspaper offices and announced himself the official press agent for the association. It is likely that he will soon be located.

He has the entire infield "be-fore" him, so to speak, and does not have to make the turns that a right-handed player is often compelled to make. Of course, there have been some brilliant first basemen who were right-handed, but they were brilliant in spite of this fact and not because of it. A first baseman must always make a specialty of handling thrown balls. He must be able to awept the throws of

The youngster can learn the peculiar lities of players opposing him by close observation. Nearly every batter has some manner of betraying himself. Few use the same style in bunting and hitting.

BURNING DAYLIGHT BY CLACK LONDON

In response to the hail of the poker players he came over to their table in the corner.

"Want you to sit in," said Campbell. "How's your luck?"

"I sure got it to-night," Burning Daylight answered with enthusiasm, and at the same time felt the Virgin press his arm warningly. She wanted him for the daneing. "I sure got my luck with me, hat I'd sooner dance. I ain't hankerin' to take the meacy away from you-all."

Nobody urged. They took his refusal as final, and the Virgin was pressing his arm to turn him away in pursuit of the supper seekers when he experienced a change of heart. It was not that he did not want to dance, nor that he wanted to hurt her, but that insistent pressure on his arm put his free man nature in revolt. The thought in his mind was that he did not want any woman running him. Himself a favorite with women, nevertheless they did not bulk big with him. They were toys, playthings, part of the relaxation from the bigger game of life. He met women along with the whiskey and gumbling, and from observations he had found that it was far easier to break away from the drink and the eards than from a woman once the man was properly entangled.

"You all go and get some grub. I ain't hungry. And we'll dance some more by and by. The night's young yet. Go to it, old girl."
He released his arm and thrust her playfully on the shoulder, at the same time turning to the poker players. "I want a pass."

"Pass? You're not entitled to a pass. You are not an employe. Sorry."

"No; but here the anti-pass law says free transportation can be granted to necessary caretakers of live stock, poultry and fruit. Well, I'm going on this trip with an aunt that's a hen there's your poultry; a girl that's a peach—there's your fruit; and a nephew that's a mule—there's your live stock. Lange, members of the strike committee of the Muscatine, Iowa, button workers, who are in Chicago raising funds for the union to fight the lock-out, spoke before the sheet metal workers at 275 Washington street, and be-fore the beer wagon drivers at 231 La Salle street. They were well received and substantial donations promised.

Aid Is Given

These two young wommen in Chicago and Frank McConnell in New York city have been very successful in raising funds among the unions.

A restaurant run on the co-operative plan, which serves 60 to 75 people at once, has been running for some time, while coal and provisions have been two the coal and provisions have been the coal and provisions have been two the coal and provisions have been the coal and provisions have

while coal and provisions have been remished the married people.

O. C. Wilson, one of the two Socialist aldermen of Muscatine, Iowa, directly following the publication by the Chicago Tribune of an article favoring the manufacturers' side, shows in a letter the value of the Chicago Daily Socialist in labor troubles.

Press Lies Hurt

"The capitalist press is up to its old tricks and the lies hurt," wrote Wilson from the thick of the struggle at Mus-

catine.

"The manufacturers stated to the Tribune's representative," said Miss Pearl McGill, "that the weekly pay roll was \$30,000 and the average output 70,000,000 buttons. A little figuring will show the labor cost to be extremely low, even according to their own statements.

Not All for Pactory

"And remember also that some of this \$30,000 must be used for salesmen, freight, office expenses, etc.. and the workers don't get it. The reason the buttons are sewed on the cards at the homes is that the workers in the shops don't get enough to live on."

The people who are familiar with conditions in Muscatine or, for that matter, in any button works, as they are called, know that the Tribune's statement that sanitary conditions are good is not

sanitary conditions are good is not founded en fact or investigation.

The only way such a report could be obtained is by going to the manufac-turers themselves and taking their word

Sanitation Not Good

The toilets are insufficient, both for men and women. They are the despair of state factory inspectors and Labor Commissioner Van Dyne. The dust from the grinding of the buttons is al-

most pure lime.

It is clear to all the inhabitants of Muscatine that the papers were well subsidized to influence Governor Carroll to send the militia to Muscatine.

Button Manufacturers Bluff

The fact is, all the big business men of Muscatine have been coerced by the threat of the pearl button manufacturers that they would move their factories to other cities. This is a bluff. The action of the National Association of Pearl Parton Manufacturers, which met at the Auditorium hotel here last Tuesday confirms this. They ordered the Muscatine manufacturers to stand

Curbed by Mayor

The mayor immediately refused to al-low the professor to speak in any of the schools, or public buildings, in spite of the fact that the school board had exonerated Prof. Shedd from any intent

to villify the American flag. Shedd was billed to speak under the auspices of the Labor Lyceum at the city hall on the following Sunday. The

The Labor Lyceum decided to bill the professor again, and on April 2 he spoke on "Renomic Patriotism" at the city hall, in spite of the mayor. The following day the mayor advised the Labor Lyceum that the city hall doors would be closed to it in the future.

Doors Are Closed

The mayor refused to change his de-cision and the following Sunday the city hall doors were closed. A great mass meeting was held on the lawn. The fight for free speech being carried on aggressively.

The American civil war, which began just fifty years ago today, was the greatest war of modern times. A Ring-Robbed Railroad

This bold title heads an article by Lincoln Steffens in the April number of EVERYBOLY'S.

Steffens proves that the officials and employes of the Illinois Central Railroad rob the stockholders of said road.

The jobberies, the boodling and grafting, the corruptions and perjuries committed by organizations and "gangs" within this corporation equal the vorest that has ever been known in city, state or government.

Steafens proves conclusively that private corporations employ-LABOR FOR PROFIT are not exempt from the corruptions

And yet millions of dollars were stolen by its others and the ployes from the earnings of said road. The I. C. holds up the public and the employes of the I. C. hold up their own company.

That is a good joke. It proves the adage that "a bad example destroys good morals."

Do these employes steal from their own company?

No these steal from the company which employs them—for

No they steal from the company which employs them-for

which they work. They are not the company. They are only hired hands. They seil their labor—that is to say, themselves—to the company, and then they steal a part of what the company steals from the public.

Profit is theft. It is legal. So is interest. So is rent. Neverthe less they are tributes paid by labor for the privilege of living.

War is legal, nevertheless it is murder.

The capitalistic state is modeled after capitalistic production and distribution. It is no better nor any worse than the system which gave it birth. It rests upon the idea that the means of pro-duction and distribution; the land, mines, forests; the factories, the railroads, the machines, the tools and the money should belong to a class, and that labor should be employ—4 by this class, for the benefit of this class.

The state assumes that labor and capital are partners in the production of wealth.

It concedes that the worker is entitled to a living wage, but it

also insists that capital shall have rent, interest and profit.

It puts property rights against human rights; blood against money; flesh against machinery.

many difficulties.

A stimulating factor was the change of attitude of organized labor towards conusiners' co-operation; still remembering La Salle's teachings of the "iron law of wages," the workingmen had until the early nineties stood sullenly aloof, but then began in increasing number to recognize the great economic and social value of the consumers' societies.

According to the latest official with of civilization back of them and who regard themselves as the very elect of the earth to find that the son of an African chief can compete on even terms if he is given a chance,

It upsets some precious theories and throws light upon factors

Anthropology is laying less and less stress upon inherited ten-dencies and more upon physical and social environment. Similarly it is found that too much stress was laid upon comparative brain weight. Investigation has shown that the Eskimo have, for instance, a brain weight well above that of the average white man. Hindus have smaller brains than Patagonians.

It is coming to be believed that the mental gap between savage and civilized man is due to experience, training and physical en-

vironment rather than to innate factors. If one could take a baby from a savage tribe and place it into a civilized home, without the foster parents knowing its origin, anthropologists are disposed to believe that it would grow into an adult that could not be distinguished from any of its civilized com-

As a rule the current selling prices of the town where the consumers' society does business are accepted as a fair standard shough it is insisted that all goods shall be pure and of good quality.

With every purchase the customer is given a ticket marked with the amount of the sale. Says John-Greenleaf Whittier:

From their decay."

Says the Declaration of Independence: "We hold these truths to be self-evident-that all men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty and the pursuit of happiness; that, to secure these rights, governments are institutions among men, deriving their just powers from the consent of the governed; that, whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it, and to institute a new government, laying its foundation on such principles, and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness."

Says William Cullen Bryant:

Says Robert Southey: "It is not for man to rest in absolute contentment. He is born to hopes and aspirations, as the sparks fly

two individuals shooting ahead of their species."

Says Max Miller: "It is the duty of scholars and philosophers not to shrink from holding and expressing what men of the world call quixotic opinions, for, if I read the history of the world rightly, the victory of reason over unreason, and the whole progress of our race, has generally been achieved by fools rushing in where angels fear to tread, till after a time the track becomes beaten and even angls are not afraid."

Behold the first born of Milwaukee is an intellectual glard.

It has been frequently said, "Oh, Milwaukee is composed of foreigners at anarchists." What about Berkeley, the seat of learning of the state of California?

In the very heat of the campaign Theodorus the Great (7) appeared and multitudes went to worship at his ahrine.

He preached on "timperance, tighteoumess and a indement to come." "Honesty in Public Life?" was his theme at the Greek theater in Berkeley, He sang his song, so new to every American citizen about the "indescribated citizens," and riveted anew the shackles of condemnation upon the multi-millionaire criminal and the lawbreaking laboring man, and on two public occasions spoke for Mr. Wilson's opponent, Mr. Hodgshead, in the highest terms as the "young mayor of Berkeley."

Hodgehead, in turn, in order to show his master that he knew what an "honest public servent" was, and knew just how to give "a square deal" to the confiding public, published in the "Good (7) Government Advocate" (his own mouthplece) the following piece of news, a dispatch from Milwaukee. "Socialists Bring WOE TO MILWAUKEE; 20,000 IDLE MEN TRAMPIWAUKEE, DEMANDING WORK." He dated the dispatch "Milwaukee, March 31," but stole the dispatch from the San Francisco Chronicle of the 19th, dating it over to make it fresh news for the supposed guiltible people of the 19th, dating credit) that portion of the dispatch in the Chronicle that stated that the "taxes in Milwaukee were abnormally high thic year," but left out that portion of the dispatch which said: "The Milwaukee Socialists are not at fault for this, as it was caused by the Rose administration and they allowed the provided of the Principle of the Hodgehead Good (7) Government combine in stating this falsehood than that he and they were willing to of conceive of any other motive on the part of the Hodgehead Good (7) Government combine in stating this falsehood than that he and they were willing to fide into power of he back of a high. The Survival of the Fittest

Is it, or is it not a scientific fact that most fit survive, while the unfit periah?

Many deny this statement of the scientists and point to the social conditions of today with its flotsam of broodlers, grafters and greedy capitalists and as evidence they forget for the moment that we are in a state of transition that the present is but the fruit of the past.

They also forget that if Socialism is not more fit—does not offer the world something finer and better than the present cosolete and absurd system, then it will not succeed, and all our sacrifices and efforts have been in vain. But we know that Socialism will displace the present system, simply because it IS more fit, and because the present one is so very unfit that it cannot at tract much longer even those of meager needs of the send source of the send brings forth fruit after its own kind, and so we know, and can prophesy with confidence, that the future is bright and the harvest near.

We are confent to be called "ahead of the times," for we would hate to be classed with those who are behind the times—those who uphold any vote for the present system with its glaring in justices and evils.

Possibly the greedy, crafty, hardhearted, unscrupulous, coarse and brutal are fit to wallow in the slime of capitalism.

But we know that coarseness, brutal-line with water, but a more humane method is
