Big Auditorium Is Too Small For Lenin Meet

Every Hall in the Great Ashland Auditorium Filled

Chicago workers filled every hall in Ashland Auditorium last night, jammed the hallways, overflowed into the streets and in the monster Lenin memorial meeting, under the auspices of the Workers Party of America, showed that the death of the great leader and teacher of the working class, even the fore-shadowed by many months of illness, has come as a shock to thousands of Chicago toilers.

The stage of the auditorium was a mass of red carnations, wreaths and streamers. They filled the plat-form and had to be moved so the Freiheit Singing Society, the inter-pretive dancer from the Studio Players and the speakers could ap-

Miners Sing While Lewis Rages

By JOHN FITZGERALD.

TOMLINSON HALL, INDIANAPOLIS, Ind., Jan. 30.—The United Mine Workers' convention adjourned at five o'clock tonight in disorder after President John L. Lewis had lost complete control and had provoked the greatest out burst of indignation yet seen here.

The outbreak occurred when a miscount vote on a resolution providing that large locals should be allowed one delegate for each one hundred members was announced as supporting the report of the constitution committee. The vote as counted by the Lewis tellers was 785 for the committee and 692 against.

There was an avalanche of shouts for a roll call. On the show of hands for a roll call the tellers counted three votes short of the necessary number. The convention was on its feet and bedlam broke loose.

Cries of "recount" and "give us a square deal," came from all parts of the hall. The chairgates stood on their chairs and in Indianapolis. a number of delegates started

The delegates then began to sing The uproar lasted more than an hour a part.

Shouts for a roll call continued.

Lewis shouted, "You may yell till you meet each other in hell," and added fuel to the flames. Officials of District 12 are now fighting Lewis on the issue of representation. The gallery cheered and jeered "Let Capellini count the vote." Van Bitner kept on reading but no one heard him.

It is no exaggeration to say that the foreign-born coal miners are the foundation on which the structure of the United Mine Workers rests.

To the convention of the organization these foreign-born miners have suffered for, fought for and built, is invited James J. Davis, open and avowed enemy of the foreign-born working-class population and enemy of the entire organized labor movement.

An enemy of the organized labor movement?

An enemy of the organized labor movement?

Yes! And John L. Lewis, who brings him to the miners' and sang until 5 P. M., when Lewis declared the convention adjourned. United Mine Workers and the labor movement of which it is

So dangerous to the labor unions is the finger-printing and police registration of alien workers, for the benefit of the corporations, advocated by James J. Davis, that the Portland convention of the American Federation of Labor denounced the Davis plan unequivocally and instructed the executive council to immediately begin to fight with every resource the labor movement could muster against their incorporation in the laws

Is the term "enemy of the labor movement" too strong a term to characterize a secretary of labor who, in dozens of speeches made before chambers of commerce, associations of police chiefs, rotary clubs and other strike-breaking organizations, advocates laws that will compel every foreign-born worker to have his picture taken, carry a passport on which it is pasted, have his finger-prints taken and report to the police

Could any corporation agent invent a better method of of labor and community organiza-tions. They will form the greatest against.

2,106 for the resolution, 2,263 blacklisting all active union men, persecuting them, making strikes impossible and breaking up unions?

Yet this is exactly what James J. Davis, guest of John L. Lewis, proposes. As secretary of labor, he schemes to break up unions instead of protecting them.

He wants to reduce the foreign-born workers to the status of criminals living in constant fear of the police, afraid to call their soals their own. This hanger-on of the most corrupt and reactionary government this nation has ever had, himself an immigrant, carrying out the orders of the House of Morgan and the Steel Trust, declares that the foreign-born workers, who have produced the bulk of this nation's wealth, should be branded, tagged and segregated just as were the black slaves for whose freedom the Civil War was fought.

When John L. Lewis, on behalf of his administration, invites James J. Davis to the convention of the United Mine Workers, he gives tacit approval to the Sterling bill and other measures now before congress containing finger-printing, police registration and deportation provisions.

When John L. Lewis invites James J. Davis to the convention he takes a position directly contrary to the convention of the American Federation of Labor to which he was a delegate and endorses the anti-labor acts and utterances of this enemy of the labor movement against whom, in self-defense, its convention was forced to take action.

If the finger-printing and police registration laws against foreign-born workers favored by Davis are passed, John L. Lewis knows that the United Mine Workers of America will be at the mercy of the employers, their spies and their police.

The rank and file delegates also know this and The Daily Worker hopes that they will make known in a manner that James J. Davis, the enemy of the labor movement, and John L. Lewis, his friend and host, cannot fail to understand, their suspicion of, dislike for and opposition against the strike-breaking laws proposed by James J. Davis in his capacity as mouthpiece of the coal operators, the Steel Trust and all the rest of

OIL CENTER OF BIG STRUGGLE

Payment of Taxes

By BERTRAM D. WOLFE MEXICO CITY .- Oil has become the center of the military struggle

While in Puebla, near the military front, I interviewed a representative of an important American oil company, inquiring especially as to the intentions of the petroleum interests in the matter of payment of taxes. "That will be decided in New York," he declared.

"Not in Washington?" I asked.
"Naw, in New York——" and he laughed at my apparent naivette. "We'll possibly pay taxes to both factions," he added after a momen-"That's what we've always done. During the revolt against Carranza we paid him so much per barrel and we gave the revolting general, Guadelupe Sanchez (the same man who is now fighting against Obregon for the same oil fields) a flat rate of \$35,000 a month." "Could you afford to pay two sets

of taxes at the same time?' do you know what a barrel of oil cost us? And what we get for it? Taxes, expenses, labor and all, we can de-liver petroleum at one dollar per barrel. That barrel represents 42 gallons of products that sell at an average of 60 cents a gailon. Figure

it out for yourself, son."

I did. That barrel that costs them \$1, taxes and all costs paid, delivered at the port, nets them something like \$25. I thought the Hughes' famous note on "confiscatory taxes" at a time when the tax on oil in Texas was higher than the tax in Mexico.

When I wrote down the figures in question, the interview suddenly stopped. But I had a new vision of the importance of the battles of Tuxpan, Ciudad, Victoria and Huastecas. The most important center of

This remains in the hands of the government, but de la Huerta has proclaimed the blockade of Tampico, attempting to make it effective with three of the four armored cruisers that make up the Mexican navy. He hopes thereby to prevent the exmaining federal customs house on the Gulf coast. At the same time, he bas issued a demand on the oil companies that they pay their taxes to him, threatening them, first, with not recognizing other payments, and threatening Doheny with the destruction of his oil properties if the taxes are not delivered to the agents of the fascisti government.

That the Ohio lad was not "talking thru his hat" was proved when Delegate Savage, secretary of that District made a savage attack on those who "were abusing their privileges as this: William Feeney, secretary of District 4 employed his son as bookguests" and voting. His motion to go into closed session was carried. When the visitors were ordered to dwindled down to three guests who picked up their hats and walked.

Appeal to Convention Sent Thru Daily Worker

To the DAILY WORKER: In response to your invitation to coal miners to make themselves heard thru the columns of the DAILY WORKER, by the delegates at the convention of the United Mine Workto the fact that it has never been organized. The coal field I am refer-ring to is Eastern Kentucky's.

It would be impossible, within the space to which I feel obliged to limit myself, to give anything like an adequate description of the miserable, deplorable and degrading conditions of the poor coal miners in that section. Wages are shamefully low, conditions in the various mining camps where the miners live are filthy and unsanitary beyond imagination, and the tyranny of the autocratic coal operators would make Judge Gary's steel mills seem like a pure democ-

Defied "Yellow Dog"

I was born and raised in Eastern Kentucky, and I am here in Chicago West Virginia delegates to the United Mine Workers' convention are warned to fight the reactionary leadership of the organization and the fact that I have been blacklisted because I wouldn't lock my mouth to my fellow wage earners, and because I refused to sign an infamous pledge known as the "yellow dog contract," which all the coal companies in Eastern Kentucky shoved in the faces of their employes about a year ago-because I refused to sign that in famous pledge and persuaded others to refuse to sign it.

The coal miners of Eastern Ken-

tucky resent these conditions. They would like to organize and thus be able to make a successful fight against their tyrannical masters. I receive letters almost every day from friends down in that section. One of the letters, which came a few days ago, gave the information that the coal miners at Mayking, a little camp about fifty miles of Hazard, Ky., the center of the coal field, had gone on strike, unorganized as they are, in protest against a 25 per cent wage cut. They are rebellious, and would like to break their chains, but the international officials of the United Mine Workers of America sit calmly back, with folded hands, and offer them no assistance or encouragement

Lewis Deaf to Miners' Calls

The international union cannot plead ignorance of the situation in Eastern Kentucky. For months a constant stream of letters has been and into the office of the provisional president of that district, at Ashand, Ky. President Lewis treats those appeals with quiet indifference, while Samuel Pascoe, provisional president of that district-district 30 -treats them with insolence and contempt. The present payroll of 205,017 is below that of a year ago when the road employed 229,831 workers in all departments. Reduction in the number of employes is explained by the management on the ground that traffic has steadily declined since the middle of 1923. But there are good grounds for believing that the shop layoffs have been heavier than warranted by reduced business, for the road's percentage of bad order freight cars has risen from 3.9% in July to 5.4% in November, the latest month for which reports are available.

its locomtives to get so out of repair as to endanger the lives of engine crews and passengers. Within the month east bound express trains have been delayed for hours because spectors condemned as unsafe locomotives about to pull the trains over divisions in the Indiana region. Such figures indicate the insecurity of job which will characterize employment so long as absentee owners are considered as having more rights than the men who actually make railroad operation possible. Parliamentarians in Germany Grieve

BERLIN.—The worm is turning even in the reichstag. The abnormal condition of government by military edict is getting on the nerves of the parliamentarians who so glibly voted away their powers by the state-of-emergency law and who now find that even the person of a member of the reichstag, and of a former cabinet minister at that, is not sacred to a military com-

The occasion for a protest by an important committee of the reichstag—that having to do with fixing the order of business of the house was furnished by the refusal of the military commander in Munster to permit. Wilhelm Sollman, Socialist deputy and minister of the interior, in the Stresemann cabinet, to address a voters' meeting soon after he had left the cabinet. The action of the military excited considerable comment at the time, but apparently nothing more was done about it.

Now the question has come up in the committee on rules and business of the house, and unanimously the members agreed that Sollman had a perfect right to speak and that the state of emergency law gives the military no right to prohibit voters' meetings.

The committee further decided unanimously to express the opinion to President Ebert and thru him to the minister of defense that the decree establishing martial law gives no right to anybody to put a general ban on political meetings.

The coroner's jury of six "prom-inent citizens" that investigated the fire in the Dunning Asylum for the Insane, a state institution, where 18 persons were burned to death recently, found that "the chief cause of the tragedy was the physical condition of the buildings that burned." The buildings, the verdict said, were frame and without fireproofing and the floors and stairs were of flimsy worn wood that burned easily.

phases of the drive now being conducted in behalf of the German workers by the Friends of Soviet Russia and Workers' Germany, is that the locals are getting new timber into their conferences.

Big Drive Gains Momentum. Cities which have joined in the German drive are: Philadelphia, Bos-ton, Buffalo, Cleveland, Chicago, Flint, Mich.; Grand Rapids, New Haven, New York, Milwaukee, Superior, kane, Seattle, San Francisco, and Spokane, Seattle, Washington, D. C.

The drive has gained momentum and the national office is receiving letters with remittances at the rate of about 100 daily. During the Russian famine this organization collected \$930,000 in cash and about \$250,000 worth of old clothing and medicine. It is expected that much will be collected for the German workers, also.

An interesting item is the fact that Local No. 419, Carpenters' Union, of Chicago, was the first to make a contribution to this German drive. They sent in \$50 to the National Office. In addition to this sum, the treasurer, Richard Karhl, collected Comrade Karhl stated that the local will send more money and that it has already about \$23 to be turned over, in addition to this fifty dollars, which was appropriated from the treasury. At each meeting a collection is taken for the German workers. As soon as they will have a large enough sum they will send their check.

So did the delegates from the Pittston locals, formerly considered Capellini's stronghold. This exposure of Capellini before the mem-

bership of his own district is a victory. The Lewis Machine, like almost every other machine in the labor movement, including the Gompers machine, has retained power by bribing, buying and coercing men whom the membership has come to look upon as progressives, by covering its own corruption and inefficiency with a thin veneer of radicalism furnished by traitors to the rank and file. Former members of the socialist party now hold high places in the Lewis administration, their early insurgency completely forgotten.

The Philippine Crisis

The movement for Philippine independence ing rapid headway. (There are several bills in the House and in the Senate proposing various degrees of national freedom for the Filipino people.

There is only one reason for the marked advance that the Filipinos are making towards national freedom. The Filipinos have fought and fought determinedly and valiantly against their enemies. The Filipinos have gone thru two insurrections; one against Spanish oppression and the other against our own imperial brigands. The only reason that Congress is now considering the question of Filipino freedom is that the Filipinos have struck terror into the hearts of their American oppressors. General Wood is reported to be letting up in his high-handed tyranny because of the resistance of the Filipinos.

It is interesting to note that a tremendous sentiment for Philippine freedom exists in America. The strongest and most ardent adclass military power.

The facts are these: One of the inherent characteristics of capitalist imperialism is the condition under vocates of Philippine freedom are, of course, to be found in the ranks of the most militant and revolutionary workers in the United States. The Workers Party has repeatedly pointed out that it is in the interests of the American working class itself that the Filipino people be freed from exploitation by our bankers and industrialists. It is significant that the Federated Labor Unions of the Philippines have been quick to acknowledge the help of naval watch dogs. the American Communists in the struggle to win freedom for the Filipino nation.

The struggle of the Filipino people for and destroyers, more military railroads and national freedom is only part of the struggle it took the combined wisdom of four hundred of the oppressed masses of the world against officers of the army and navy to make these the plunder and tyranny of the capitalist im-recommendations. Mockery of Militarism

Our military and naval experts now tell us that the recent maneuvers have established beyond a doubt, that the Panama Canal always considered one of the greatest military assets

If the Canal is so poorly defended, why was it is necessary to go thru all these maneuvers to establish its poor military condition?

The answer is easy. Our military and naval experts knew the exact defense value of the Canal before these maneuvers. The joint army and navy maneuvers were simply used to strengthen the growing militarist demands made upon the country by the war hounds and

It seems that capitalism purpose ries a penalty on strong, healthy, capable young workers, whether male or female. What could be harder work than that met in the laundries? Read Jack London's description of kind of slavery in Eden" and you will wonder why so many young girls continue to work in these torture chambers. The can factories employ almost exclusively youth labor. While young workers are the foundation on which the large mail order houses have been built. Yet in all these industries wages are the lowest. The hardest, most monotonous kind of labor is the lot of the American young people, their chances the least. Is it any surprise that the criminal class is composed mainly of young people around the age of 16 to 25?

Every issue of the Young Worker, semi-monthly newspaper issued by the Young Workers League of Amerca, contains letters from young workers in industry. They tell of bitter tales of exploitation, bad working conditions, miserably low wages

and increasing unemployment.

Just the other day a letter came
to my attention which is illustrative of the lives of millions of young people in the United States who are forced to create profits for some boss, who are forced to subjugate all their desires, their ambitions, their dreams to the will of a petty foreman; and yet at the end of the week the wages are not enough even to exist on

I quote parts of this letter: "I have been working in a cracker factory-hours from 7 to 5, packing crackers, which means I must stand up all day long. My hands were swollen and cut and pretty nearly worn out at the end of the first week of it. I got \$11.00 a week (and carfare alone to the job is \$1.80). Prohibition of young workers up to 20 years being employed in shops and industries in-jurious to their life and health (mines, chemical mills, steel industry, glass works, etc.) And finally: Organization of all young workers into the existing unions, trade and

Growing Unemployment in Massachusetts

By LELAND OLDS (Federated Press Industrial Editor)

Decreased employment and continued spread of the part-time are outstanding features of the December report of the Massachusetts department of labor. The number employed by 811 manufacturing establishments fell from 215,453 to 210,567, a decrease of 2.3 per cent. This brings

crease of 2.3 per cent. This brings the number on the payrolls of these factories to a level 5 per cent below October. The department reports fewer employes on the payrolls than in December, 1922.

Railroad car shops showed the heaviest layoffs with 13 per cent of their employes dropped during the month. The boot and shoe industry and the men's clothing industry each laid off 9 per cent of their workers, the hosiery and knit goods industry ed and dispossed city and rural workers has everything to lose and nothing to gain from capitalist imperialism. Increased dangers of war, an accelerated rate of exploitation, and a tendency towards a lowering of the standard of living are the only fruits garnered by the working masses in the imperialist stage of capitalism.

rectly nearly half of the industrial rectly nearly half of the industrial workers of the state are operating far below capacity. Of the 146 establishments connected with the manufacturing of leather shoes, only 50, or 34 per cent, were operating at full capacity. Among the shoe towns, Haverhill has been particularly hard hit. In the course of two months, 30 per cent of the workers employed by manufacturing establishments in that town have been laid off, while only 5 out of 34 establishments are operating full time and full capacity. The average weekly earnings of those employed have dropped from \$28.08, in October, to \$20.79 in December, a decrease of 26 per cent. In Lyon only 6 of the 32 establishments report normal operating schedules.

In every branch of the textile industry the report shows a majority the establishments on a part ca-
