\$250,000 Oil Baby in Chicago to Learn His Fate

# PROSPECTS OF MC ADOO UP

Wilson's Grown Prince Sees Hopes on Funeral Pyre

William Gibbs McAdoo, \$250,000 oil baby of Edwin L. Doheny, purchaser of Naval Reserves and cabinets, will come to Chicago today to learn whether his connection with the Teapot Dome oil scandal has placed his presidential ambition on the funeral pyre.

Mr. McAdoo has done a rather unusual thing. He has placed his political fortunes in the hands of the "public," which means his campaign committee.

If they decide that a candidate can retain the purity necessary to lead the Democrat jackass to victory in the next election, even the handitapped by 250,000 oil dollars, Woodrow Wilson's crown prince will humbly bow his head and mutter "Vox populi; vox Dei."

Presidential Timber Scarce.

It is rumored that McAdoo's supporters will do that very thing. Presidential timber is rather scarce in the ionkey ranks and it is also the opinion of Democrat politicians that the Republicans are so submerged in the Teapot Dome that even an oil can on the Democrat ticket will bring home the bacon.

In an interview the press agent of the McAdoo headquarters in Chicago ikened the enthusiasm of his supporters to the fervor of the crusaders who crossed two continents to rescue the Holy Sepulcher from the Moham-medans. The Infidels in this case are the Republicans and the Holy Tomb is the White House which the knight errants of democracy expect rescue from the sacreligious hands of the enemy.

Today's conference was called at the suggestion of McAdoo. On the suggestion of McAdoo the conference will also do the following: Give Mc-Adoo a clean bill of health; give him vote of confidence; announce that he is politically as pure as the driven snow and attempt to prove that the linking of his name with the Teapot scandal is a red herring dragged across the path of the Democrat party by enemy Republicans.

Scoff at McAdoo Claims.

The public generally scoffs at the alleged devotion of McAdoo to one of the fourteen points, namely "the right of self determination" for his tampaign committee. The Washingexpose having almost extinguished him as a candidate he is trying to crawl back by pulling off a novel publicity stunt.

Among those present at the Mc-Adoo conference will be W. Jett Lauck, of Washington, who will represent the railway labor unions. At the St. Louis meeting of the Conference for Progressive Political Action, (Continued on page 3)

And inside the building, in the empty rooms, lit by the deathly clear electric light, were frozen chairs, tables, cupboards, and it seemed as if they were numb, in a light sleep from which they would easily awake.

The officer on duty at the Cheka, the Investigator, Gornuikh, was writing something, bending over the table. His face was dark, broad, with big cheek-bones and deep-set eyes, and a shaggy cap of hair hung over his forehead. At first sight he seemed elderly, but when you approached him from the side and observed the lines of his mouth, the soft oval of his face, it was clear that he was still quite young.

He wanted to sleep, to stretch his legs under the table, lay his head on the arm of the chair and drop into careless, pleasant sleep. But he must not sleep, for in the sleeping town, over the breadth of the sleeping country, in which are so many woods, ravines and dark unknown ways, Gornuikh alone was sleepless like a sentinel at his post. At any moment the telephone might ring, he might be called to the direct telegraph. . . . Sleep was not to be thought of.

But Gorniukh for two days and nights had not slept for a minute. There had been an operation last night, a whole series of searches, and, returning on horseback thru the empty streets, Gornuikh had breathed the frosty morning air, and had thought of how he would undress and lie down on his bed, but, at the Cheka they had stopped him unexpectedly, and he had had to remain on duty in the place of a comrade who had fallen ill. Swearing hard and with feeling, Gornuikh had taken on the duty and all night had not dozed for a moment. Several times the telephone had rung, and secret cipher telegrams had been brought from the telegraph. As the night wore on his weariness increased, the lines ran together in his eyes, and he stopped writing and listened to the regular noise of the ventilator, and watched the dark blue square of the window. His eyes closed of food by motor transport during the themselves, and from all sides a soft cloud of images, voices, rustlings, and noises enveloped him. An instance of the brand of "Patriotism" the Free State has blessed the Irish workers with, can be judged from the fact that uniforms for the Free State army were bought

The methods employed by the Free State government to deprive the Irish workers of the franchise were explained by Mrs. Clarke. "After the Republicans succeeded in electing 44 Republicans," she said, "in spite of all the obstructions the Free Staters could place in their way, the latter were afraid to allow the County Councils' elections to take place last fall. The Free State government realizing that the bulk of the republican vote came from the workers and the peasants, tried to pass a law which would give the property owner with a \$10,000 valuation, four votes, one with a \$5,000 valuation, two votes and one with \$250 valuation one vote."

Speaking of the influence of British propaganda in the capitalist press of America, Mrs. Clarke said that the capitalist papers distorted the truth about the Irish movement or suppressed it. This remark was cheered by the audience, and when at the close of the meeting the chair-man, Captain Denis Molloy, an-nounced that the DAILY WORKER was for sale in the hall, hundreds of

# Amalgamated Tells Workers Party of Steel Workers Fight Against Gunman Rule at Newport, Kentucky IS SCENE OF

CLEVELAND, Ohio, Feb. 17.—The District Executive LATEST Committee of the Workers Party here recently asked the Central Committee of the Amalgamated Association of Iron, Steel Fear Growing Revolt of and Tin Workers of North America, which has been carrying Police Surely Had This on the strike in the Newport Rolling Mills since July, 1921, for information in reference to the situation, sending at the same time a contribution to help the workers on strike.

In reply to this communication the following letter giving the history of the brave struggle of the workers at Newport was received from the Amalgamated's Central Committee,

Kentucky: Workers Party of America, Cleveland, Ohio.

District No. 6, at Newport,

Dear Sirs and Brothers: In reply to your request of Feb. 4 inst., in which you ask for publicity, about the Newport strike situation, I wish to say that in order to give the brothers a thorounderstanding of the situation in Newport it will be necessary to start from the beginning of the strike, and to which I am willing to add reports from time to time, as I get the news. This may help in keeping away from Newport, persons who go there to get em-ployment at the mills and steel

In July, 1921, the Andrews Steel Co. and the Newport Rolling Mills Co. decided to run the plants on the open shop plan, and refused to sign the scales of the Amalgamated Association and the consequence was, that about 2,300 members of the A. A. were left to choose between the two: either to stay loyal to the A. A. or become outcasts or scabs.

The company, not being as successful as they thought they would be, hired a bunch of thugs and gunmen, and the consequence was that there was a lot of disorder and disruption in the city of Newport, Ky., and the wind-up of the affair was that the state militia was sent to Newport to preserve order. After the militia arrived they soon realized that their presence was not required and after a short stay, the militia returned to

their respective homes.

It seems that this did not suit the rolling mill company, for no more than the militia left than disorder again began to reign in Newport. The company at this time had about 65 armed guards and four machine guns stationed inside of their plant, and in Jan-uary, 1922, the state militia re-turned to Newport, accompanied by tanks that were used in France, also machine guns, under the com-mand of Colonel Denhart, who is now lieutenant governor of Ken-

Shoot at Citizens; Insult Women. The militia at once gave a military demonstration, to show their strength. Citizens were shot at, women insulted, and law abiding citizens were cast in the bull pens. (The bull pen was a sort of prison located inside the Newport Rolling Mills.) The militia began to raid private homes and the saloons looking for moonshine and home brew.

(Of course the striking steel workers got all the blame; they were the supposed cause of disorder,) A reign of terror remained in Newport, as only countries of Russia were used to seeing. After about four months of military regime, the Hon. Governor Morrow, then governor of Kentucky, was finally persuaded to withdraw the troops from Newport and peace once more began to reign, and I am pleased to say has remained so up to the present time. The Newport Rolling Mill and the Andrew Steel Company have had at least 5,000 men in their employ since the beginning of the strike, and have made no

Negroes Quit.

They have brought Negroes from the sunny South, promising them the land of Eden, but it has been to the sorrow of the unfortunate Negro, for he soon saw his mistake. He saw that the golden apple was only a gilded one and did not prove to be what it should be. The result was that as soon as the Negro got enough together he started back South. Unfortunately there are a good many who can't get enough together to pay their way back.

Because three of our brothers told a truck driver that there was a strike on in Newport, the federal judge sentenced them to serve eight months in Winchester, Ky. prison. Thank God their will soon be up as they only have about thirty days to serve.

Traitors Canned.

We have had about 100 of our brothers who deserted the ranks of the A. A. and became traitors to their fellow workmen. I am proud to say that only a few of these deserters remain at the mills, as the company itself has no use for a traitor.

Government Permits Landlord Holdups. While the government is quick to enforce the contracts of the capitalists for big profits, it is doing nothing to help the workers who are at the mercy of the landlords demandrenting houses. The effects of this practice, which is a direct outgrowth of the housing shortage, was summed up to the state investigators by a witness, Agnes M. Craig, as follows: "Tenants pay security to one land-lord and the house is turned rapidly the tenant has no redress under the law but to go to the first landlord for the security. If they cannot find the original landlord, then they can-not find their security!"

Under the law the landlord cannot enforce this security holdup game which, in effect, is a severe penalty on the tenant. Yet, the government permits these landlords to Tke advantage of the poor working man who does not know the law. Very often workers make no attempt even to take such cases to court and thus lose their security because they do

Allows Iron Clad Leases.

Under the very eyes of government officials the United Real Estate Owners of New York City, an organization composed of about 11,000 real estate owners, has been every principle of contracts, the sanctity of which has always been preached by our capitalist defenders of the constitution and for the enforcement of which the workers have often had pay with their jobs, their homes and their very lives.

Despite the enactment of the emergency rent laws the government has blinked at the fact that the provisions of the eleventh clause of the "Iron-Clad Lease" is a complete abrogation of the tenant's rights. According to this clause "a court decision fixing the amount of rental to charged for the apartment is to be disregarded, providing the amount of rent fixed by the court is less than the amount reserved in the lease or the rent last paid if it exceeds that Other burdensome requirements include new penalties in the form of threatened rental increase if the tenant accepts a lodger, or if the tenant remains as a hold-over under the rent laws and the landlord obtains an offer of higher rent for

The State Housing Commission has frankly declared that "such terms are obviously intended to subvert the purpose for which the rent laws were enacted and must be accepted as evidence of the disposition of the land-lord to utilize the present emergency for the purpose of exacting the most oppressive and burdensome lease-Since this conclusion of the State investigators was made public not a single landlord has been compelled to stop breaking the laws of the State.

Evictions Menace Thousands. One of the worst hardships from which the working men are suffering today is the power of summary evictions by the courts. She told the marshal that a check for the landord was left on the chiffonier. Thereupon the marshal phoned the landlord who ordered her dispossessed at once. She then proceeded to sent a registered letter with a check to the landlord and told the judge about it. The letter was return pened with the check not accepted Yet, the judge immediately ordered the working woman dispossessed.

Municipal Court Judge Aaron J.

Levy summarized the extent of these eviction proceedings in the last four years as follows: "In 1919, in the five boroughs constituting the City of New York we had instituted 96,623 landlord and tenant proceedings. In 1920, which, I believe, was the year in which the rent laws were passed, they went to 118,240, in spite of the rent laws, and in the succ ing year of 1921, after the rent laws were in effect for almost a year, they jumped to 125,656. So the gentlement owning real estate in New York were not respectors of the rent laws.' In 1922 there were 85,826 eviction proceedings. In the first half of 1923 there were 65,000 cases of this sort on the calendar. In one district court, the Seventh District Court of Judge Crain, these attempts of the landlords to evict their tenants rose from 9,779 in 1919 before the rent laws were enacted to 19,941 in 1920, after the rent laws were passed.

Government Saves Profiteers. While the government was helping the landlords in their cruel practice of summarily evicting the poor ten-ants, it was, at the same time doing its best to guarantee the property to throw people into the streets. William H. Johnston, president of the International Association of Machinists was quoted as saying that Mc-Adoo's connection with the Teapot candidate, but Mr. Johnston now comes forward with a denial. He states that McAdoo has the support of a considerable portion of organized labor and that he (Mr. Johnston) has high personal esteem for Doheny's legal errand boy and that nothing has happened in the Teapot or anywhere else that has caused him to doubt McAdoo's integrity.

The Plot Thickens.

The oil scandal has caused as much consternation in the ranks of the labor fakers as it has in the ranks of the capitalist parties. That section of organized labor which accepts the leadership of Samuel Gompers is back of Crown Prince McAdoo while the railroad brotherhoods led by Warren S. Stone look on Senator

Should the Republican party bosses invite LaFollette to take along his broom and clean out their Aegean stables the railroad brotherhoods or the officials thereof, might be content to rally behind the man LaFollette rather than the party.

This would be the excuse of course. How Gompers, a Democrat party fix-ture, would feel in such ungodly company can be better imagined than described, hence the strenuous efforts to preserve McAdoo's political virtue, on the part of the Gompers lieu-

More Skeletons In His Closet.

That Mr. McAdoo has more skeletons in his closet than were revealed to the public gaze when Doheny opened the door, was proved by Representative Foster of Ohio when he informed the congress that the firm of McAdoo, Cotton and Franklin received retainers tot/ling a million dollars that they never would have received but for McAdoo's White House connections from the motion picture industry and from the Charles W. Morse shipping interests. This is the Mr. Morse who was released is the Mr. Morse who was released from the penitentiary by Attorney General Daugherty during the Taft regime for the consideration of \$25,000. Evidently Mr. Morse still knows the efficacy of dollars. He made millions out of the three billion dollars that were wasted by the government ship building during the war, was arrested on charges of defrauding the government but thanks to his able lawyers and his generous reable lawyers and his generous retainers he went off scot free.

During the Morse trial Mr. McAdoo testified that his law firm had a contract with Morse which provided for a payment of approximately \$500,000 in commissions on shipments of coal to France. Soviet Russia and the Klan were never presented to the floor for con sideration. The work of the conference, as Dean Miller said, was done in committees—and committees appointed largely by himself.

The reactionary policy of the commission of permanent results is easily explained. Of the 46 members not one is a workingman or farmer, tho workingmen and farmers compose 98 per cent of the Race. # Sanhedrin Capitalists Denature Labor Report in Final Committee

How Dean Kelly Miller's machine took the starch out of the labor program at the All-Race Convention is illustrated in the three labor programs shown here. The first are the demands submitted by the Negro workers in the Workers Party delegation. It offers a definite method of campaigning for the removal of race distinctions in the American Federation of

The second is the labor program adopted by the Labor Committee. This is a modification of the Workers Party program, a modification caused by the fact that Dean Miller had packed non-labor and anti-union elements into the committee, such as Arnold T. Back of this big increase in armament may be seen the hand of the American armament companies and of the American state department. The next most powerful country to Argentina in Latin America is Brazil and there a commission of American naval experts is supervising Brazil-ian war preparedness, which means hefty sales there.

Argentina, to protect itself buys twice as much. Both countries borrow money from American bankers on condition that they spend it that way and give American financial experts the right to supervise their internal finances. At the same time, all this carefully promoted competition and suspicion prevents a Latin American unity for protection against the real enemy of every for protection Latin American country, which is Yankee imperialism.

Mayor Is Encouraging Mob Violence

WILKES BARRE, Pa., Feb. 17.—
"We will make every effort to hold our meetings in Wilkes Barre in spite of the efforts of the mayor and American Legion to stop us,' said Herbert Benjamin, organizer of the Workers Party in Wilkes Barre.

The Workers Party was prevented from holding one Lenin memorial meeting here recently by Mayor Hart and the American Legion, but another was successfully held despite the opposition of the mayor and the Legion. Plans to hold other meetings in the near future are being made by the Workers Party made by the Workers Party. Cappellini Anxious.

Rinaldo Cappellini, president of district No. 1 of the United Mine Workers of America, is very much interested in the outcome of fight. A victory for the Workers Party would seriously interfere with efforts to perfect organization of the Lewis machine in this district. Cappellini is more responsible for the election of Dan Hart as mayor of Wilkes Barre than any other single individual.

Legionaires Active. The American Legion is initiating a rule of mob violence and terror in this city in the hope of intimidating the workers into accepting without protest the deprivation of their fundamental right to meet and speak as they will. We will not be intimidated. On the contrary we have just begun to fight. It is the duty of the mayor to enforce order and to pro-tect us in the exercise of our consti-tutional right, instead, he is encouraging mob rule and inciting to riot. The mayor has no power to issue or withhold permits for public meetings and we will set no precedent that will constitute the recognition of such a right. Not a permit but the police protection to which we are entitled,

Our party members have been making a fine showing during the entire period of the fight, they have not allowed the Legion to intimidate them in spite of the many threats and hints of violence which the press has been publishing almost daily since the fight began, and which are still appearing. (Special to The Daily Worker) NEW YORK MILLS, Minn., Feb. 7 .- Over one hundred farmers met here recently and unanimously de-cided to organize farmers' clubs for a national campaign under the ban-ner of the Farmer-Labor Party, and urged the farmers in the surrounding counties to follow their example.

In a statement issued over the signatures of Sam G. Wallace and K. E. Heikkinen, chairman and secretary of the meeting respectively, the assembled farmers went on record as opposed to the futile attempts of the Coolidge administration to tinker with the problems confronting the farmers by turning their salvation over to committees of Wall Street bankers. As well turn a holdup victim over to the bandit who robbed him.

## McAdoo's Last Stand

Mr. McAdoo, the discredited democratic white hope, recently issued an appeal for a conference of all democrats, "progressives," farmers, workers, and what not, who had been inspired at some time or other by his chances for the presidency and their chances for patronage as a result of his success.

We are asked to believe that this conference, to be held in Chicago today, is called for the purpose of enabling public opinion itself to decide whether Mr. McAdoo is to living standards in all countries and relentless continue his drive for the White House. If Mr. McAdoo and the big financial interests backing him had the slightest doubt as to their being able to organize and manipulate this conference in such a fashion as to secure his being implored and urged in the name of the most sacred duties to and crying needs of the country, to continue in the race and be the standard bearer of "progressivism," such a conference would never have been called. Mr. McAdoo would then discreetly, with perhaps less valor, have slowly and without much ado have withdrawn from the race and would have done some "watchful waiting" for a better day. If Mr. McAdoo had felt that there was any possibility of this conference telling him cold-bloodedly to quit, he would never take chances on dramatizing the disaster that has befallen him thru his contact with the oil property of the various departments of the closures, nor will we, even the President of labor" in the Gom-tivy grow to have one track minds.

Three thousand tons of cast-iron pipe has been sold by the French steel interests to Pacific coast concerns.

All of which shows that tariffs and restriction of immigration cannot and does not stop American labor competing with lower paid labor in other nations. No matter where a commodity that is needed in capitalist economy is produced, if it can undersell like commodities, it will find its way into the world markets and displace higher costing products.

American labor has viewed complaisantly the titanic struggle of the German, French and German workers to maintain their living standards. Its officialdom is today in full accord with the rape of the Ruhr and the impoverishment of the German workers.

The British employers, with 2,000,000 unemployed besieging the factory doors, have lowered the already low living standard of the British workers because British iron and steel have been driven off the markets by German competition. In no other way can even a substantial portion of the German reparations be paid. Our government and our labor leaders want them paid.

If the reparations are collected it will be Chicago, Illinois not from the German workers alone.

Every working class in the world will payand is paying now-in poorer food, shoddier clething, less comfortable dwellings.

The question of German reparations is an international question but not for capitalists alone. It is an international question for labor as well, but American labor speaks only thru American capitalist government with the exception of the Workers Party, which joins its voice with the other 42 parties of the Third International in protest and action against the exploitation and brutalities of capitalism the world over.

The Gompers remedy for foreign competition is restriction of immigration and isolation of the American working class from the international field of the class conflict.

The remedy of the Workers Party of America, is unity of all labor movements in the Red International of Labor Unions, the raising of

Klimin relit his cigarette that had gone out in the street.

And, following Klimin into the inner office, Gornuikh heard of the three meetings at which Kimin had been present, heard of Ziman's report, of Robeiko's speech, of the meeting of the Party Committee.

"And what did Karaulov say?" he asked anxiously. And struggling in pleasant morning sleepiness, like a fly in scented jam, Klimin told his story, and ended it with a sleepy yawn. Gornuikh silently nodded his head. He went to his own room, took from the shelf a fat portfolio of cur-rent work, and began carefully to look thru several dossiers.
