PHADEPHA SHOE WORKERS IN HOT FIGHT

Battle Open Shop on Picket Line

BY R. BAKER.

(Special to The Daily Worker.) PHILADELPHIA, Pa., June 2,-The Shoe Workers' Protective Union of Philadelphia is facing a fresh open shop drive conducted by the bosses' association thru several small shops ecently taken into the association.

The trouble started when Colton & Mennies Shoe Co. refused to recognize the union working permits and the 15 union men in the shop refused to permit anyone without a union permit to work beside them.

Discharge Answered By Strike The union men, members of the Shoe Workers Protective Union, were fired and immediately began picketing the shop. The work of the Colton Mennies shop was taken to another association shop, the Star Shoe Co., where the organized workers refused to touch the work from a struck shop and after an argument which resulted in a threat by the boss to hang out an open shop sign outside and the firing ed out.

At a special union meeting it was decided to fight this strike to the limit. The spirit and enthusiasm of the strikers and the union members assures them a complete and speedy victory. The entire difference lay in a series of socialist party regional the fact that the union insists that conventions, financed by the Jewish the bosses must hire only union men

It has been discovered from reliable The morning session consisted of a sources that the bosses' association goodly crop of testimonials. All who has a fund of \$6,000 to fight this strike. The union on the other hand at a special meeting unanimously adopted an assessment of 5 per cent of the wages of all workers in the union shops to conduct a battle against this new open shop drive and in addition to that have put out dewith the approval of the membership from the Cleveland city council by mands for a 44 hour week and yearly agreements in place of the present six months agreements.

Needless to say, members of the Trade Union Educational League are actively involved both in the strike and the general fight of the union against the open shop drive.

The picket line at the Star Shoe Co., has been enlivened with several conflicts between the strikers and a few scabs that attempted to do the work abandoned by the strikers. At least one of the scabs has received lesson that will teach him not to work during a strike again. The police as usual tried to help the scabs with but

GRUGHTUAKE World Becomes Normal FIGHT BEFORE When Workers Join for FEDERAL COURT Overthrow of Capitalism

By J. LOUIS ENGDAHL.

TODAY, aitho Coolidge repeatedly reiterates that he will have nothing to do with the Workers' Republics, nevertheless, big business worries exceedingly much about Soviet trade conditions.

James L. Patten, Chicago's multi-millionaire wheat gambler, is quoted as saying that as long as Russia remains out of the grain market, the grain trade of the world is likely to be periodically settled and nervous.

A financial writer, in replying to numerous inquiries he claims to have received about Russian conditions, asks himself a question and then replies to himself as follows:

"When, then, will Russia again be normal in the grain trade, normal in exports and imports, normal in home enterprise, normal in development of her resources? Not until the Russians change their business principles and the business character of their rulers."

No matter how much big business, and its government at Washington, tries to dismiss the problem forced upon it by the existence of Soviet Rule, nevertheless it is there. Even the "expert" writers of the kept press, paid to hide the repeated crisis that confront capitalism, confess that Bolshevism must go or capitalism will continue "unsettled and nervous." To be sure they dare not hint that capitalism must go. But that is the real alternative. It is either Communism or capitalism.

Reports from the Soviet Republics Indicate that the harvest days are coming in with bumper crops. Soviet Rule will this year be in the world market with huge exports of grain of all kinds.

That should make all capitalists nervous, especially since crops in the rest of the world are not so good, which will result in high prices. That means that Soviet Rule will be able to get new finances to keep up the work of reconstruction, to improve the life of the peasant. That means strengthening Bolshevism in its struggle against capitalism.

The oil wells under the Red Flag are gushing petroleum at a rate that was never known in the days of czarism. Huge exports are going to many foreign lands. Even Rockefeller's Standard Oil Trust has bought its share.

The American oil business will gulp down just ten billion allons of gasoline this year, 1925. That is 15 per cent more than last year, and automobiles, tractors, airplanes and oil-

burning ships are being turned out in added quantities in this country, calling for more oil, at higher prices. The Soviets have oil to sell; the oil that the capitalist world needs, the oil that the capitalist world is compelled to buy, that it will pay increasingly good prices for, providing Soviet Rule with added strength to reconstruct and build.

The capitalist world says the Soviet world does not treat it "fairly," whatever that means. What the capitalists desire, it appears, is to invade and conquer the Soviet world with their capitalism, without allowing the Soviet world to permeate their territory with its Bolshevism. British imperialism, for instance, tried to stop the advance of Communism by denying admittance to foreign Communist delegates to attend to British Communist Party's convention at Glasgow. But the German and French delegates arrived in Glasgow just the same. They spoke for the German and French workers. They told of the conflicts within the capitalist world, of the workings of the Dawes plan, of the war in Morocco, of the necessity for the workers everywhere to end the rule of capitalism everywhere.

Let us paraphrase the declaration quoted above of the finance expert of capitalism's own press and put it this way: When, then, will the world be normal in the grain trade,

normal in exports and imports, normal in home enterprise, normal in development of her resources? Not until the world changes its business principles and the business character of its rulers; until capitalism that breeds imperialist rivalries. foments world wars on an ever-increasing scale, and threatens all civilization, has been overthrown and the rule of the World Union of Soviet Republics established in its stead. The issue is, "Communism or capitalism must go!" Very well, let capitalism go!

Strike of Boston Painters Ends

Trades Council and Open Shoppers

Work Together. Most of the unions being intimidated by the "open shop" threat of

closed this afternoon by the state banking department at the request of the bosses and the stand adopted by Secretary Johnston, accepted the The bank centempaltes voluntary agreement. Those who refused were liquidation, it was stated by officers the painters, building laborers, elecwho expressed the belief that detricians and plumbers.

The Building Trades Council further weakened any chance of a real fight being put up by declaring that Distribute a bundle every day no support would be given any union that went on strike. All trades returned to work pending negotiations except the painters.

Council Forces Scabbing.

Mass meetings of union painters voted unanimously to strike for the increase. On April 4 the strike was called and 2,200 painters answered the call. The bosses immediately hired as many scabs as possible to LONDON, June 2-Dispatches to fill the places of the union men.

The business agent of the painters union asked the council to order all union men off the jobs employing scab painters. This the council refused to do and the Painters' Union withdrew from the council. Many with scab painters were threatened with fines and expulsions if they did not return to work.

Some Queer Voting Results. Some firms agreed to the new scale and about 700 painters were at work at the increased wages, and paid an essessment of \$2.50 a day during the strike.

International officials of the Paint-

selves attempting a settlement and at last succeeded. A secret ballot taken by the union was declared to have resulted in 500 voting to return to work at the bosses' terms while 300 voted against.

The three-year contract ties the painters securely and the arbitration fraud will aid the bosses in keeping their wages at the same level during the life of the agreement.

Amalgamation or Annihilation.

The result of the whole thing, filled with jurisdictional squabbles, traitorare weaker today than before April 1. The disgust of the painters at the betrayal of the Building Trades Council and their withdrawal from the council will further increase the confusion and distrust among the unions. The need for education of all trades upon the amalgamation program of the Trade Union Educational League is more pressing than ever before.

PORTLAND, Ore., June 2.- Even that despicable company union and blacklist organisation called the Four L-s" has to admit that industry in Oregon is slowing down. With loggers being laid off at many camps and marked slump in the demand for labor in fishing, mining and other industries. employment is becoming harder than ever to get in the promised land of the Northwest.

Men are coming up the coast from California to add to the already acute situation. East of the Cascade range. employment is at its maximum. Sawmills and camps are fairly filled, but with the lull between planting and harvest farm work is slack.

Marshfield reports one large fir logging camp closed. Thompson-Kelly mill shut down. Cedar operations slowing. Sawmills reducing forces Veneer plants laid off the night shift, Farm work has, however, absorbed some unemployed.

Along the Columbia river several falling and bucking crews are laid off. Both camps of the Whitney company on the Tillamook line are closed. Labor turnover in lumber is decreasing. There is little call for farm labor.

May we make a guess? May we guess that the Forward \$25,000 was given with certain stipulations? May we go so far as to say that one of these stipulations is to soft pedal all referece to Soviet Russia?

For at the mass meeting next day, the four speakers occupied the rostrum-Sharts, Kirkpatrick, Harkins and Debs-only Debs mentioned Soviet Russia and he only once. There was an immediate burst of applause. but when he linked this Soviet country with England and Germany in the same breath, this applause died as spontaneously as it had arisen.

The Class War-What For? Eh, George.

Geo. R. Kirkpatrick, the spellbinder, the champion money getter and literature seller of the party, worked awfully hard to sell the American Appeal to the mass meeting. The audience remained frozen in its seats. Out of 1,500 people present mrades a few, the rest coming to

Leo Harkins next tried his hand at a collection. The many in the audienge could have given \$500 easily. when he asked for this sum, none gave. Nor did any of the many middle class participants give even \$100. donations of \$5 weer asked for two hands went up.

By JAY LOVESTONE NEW YORK is again setting the pace. This time it is in the payroll loss and in the decrease of employment for the last month. Most of the industrial districts show declines in employment and payroll for the last month. But the New York losses are bigger than the average, according to the figures just made public by the New York state industrial Commissioner, James A. Hamilton,

From March to April factory payrolls showed a big loss. For the week of April 15, wages of forty percent of the factory workers show a drop of 35,000,000. This is a loss of 4 per cent in one month. At the same time the total employment of the state dropped two per cent.

TTHE tendency in New York state is significant especially in view of the fact that the general industrial situation in the country is usually estimated by striking the average of the conditions in the empire state with the figures of the United States bureau of labor statistics.

Precisely a year ago the decline marking the worst phase of the last depression had begun. Then, the wage decrease was about the same as this year, the the 1925 drop in employment is not as big as the corresponding drop of last year.

The average factory wage for April This is approximately the same wage wages are lower than last year. The York's loss of two per cent. automobile industry is the only one wages over last year.

clothing shops, shoe and textile industry the wages of women workers suffered marked reductions month.

The copper mills, the railway equipment shops, the hardware factories, and the heating apparatus manufactories showed the heaviest losses in the metal industry. It is interesting to note that this decline in the metal industry has been continuous since February.

The curtailment of production was also evident in the textile industry which reported reductions thru nearly every line of manufacture.

Ordinarily the workers engaged in the turning out of building materials show an increase in wages at this time of the year. This year no such increases are reported. In the brick yards part time is very noticeable. Within the last year wages have dropped in this industry from \$24.39 to 19.70 a week. THE two clothing centers of the

state, Rochester and New York City, show losses in payrolls. In New York City the loss was seven per cent and in Rochester it was six per cent. The heavy New York payroll loss compares with a loss of 0.2 per cent in the Illinois industrial district for ing gallows on public squares and to last month. But the loss in the latter section has been continuous. New in New York was \$27.65 per week. Defends Class Prisoners

Why do so many of the best fighters of the working class languish in prison? Why are the instruments of organized capital able so easily to frame up and keep in long confinement some of the ablest and most active exnts of the cause of the workers? Why are the victims of capitalist conspiracy forgotten and their families neglected? Because the forces of protest are not organized.

Because there is no agressive move ent to keep the workers of America alive to the seed of defense and to recall to them that many brave and forgotten fighters still lie behind prison bars.

The executive committee of the Labor Defense Council, realising the need for such a movement, issues the call for a national conference to convene at 10/a. m. on June 28, 1925, in Ashland Auditorium, Chicago, and that invitations be extended to all existing defense organizations, individuals who have distinguished themselves in the struggle against ecution and for amnesty, ex-political and industrial prisoners, and all working class organizations. .

The organ entrusted with the Agitprop work must prepare the necessary material, and the nucleus bureau organizes this individual work. Every Communist is "allotted" one or more of these sympathizers. and it is his duty to enter into conversation as often as possible with these to visit them at their houses, and to discuss questions of interest to them from the standpoint of the party. This is the best preparation for the cutry of such sympathizers into the party.

The distribution of party literature. including the factory newspaper, is one of the very most important branches of mass agitation and propaganda. The propagation of our literature must be carefully thought out and organized. It is an entirely inadequate procedure to simply give a workman a intimate acquaintance with the whole single copy of a newspaper, periodical them: leading arctile, current news, or pamphlet: the impression made by its perusal must be carefully noted, conversation must be entered into or ters from the country, etc. For each the subject, doubts explained, etc. This is best accomplished when the of these strata, enabling their various of the theory and practice of Leninist distribution of party literature is so organized that one and the same person invariably undertakes the work in tory or works, or in a certain group of tation and propaganda work are ex- party schools or educational opporten to take into account the difficulties then some person or body is put on months will enable us to lay down careful calculation of the forces at our From time to time burning questions counteracting as far as possible the cial democratic minister, the social of work and organization.

his associates give this conclusion of political affairs: "Finally, the dele gation is of the opinion that the Sov let system of representation and its scheme of constitutional and civi rights, so far from being undemo cratic in the widest sense of the word give in many respects to the individ ual a more real and reasonable oppor tunity of participation in public affair than does parliamentary and party government.

"In other respects, such particion tion is still severely restricted. For the system has as yet been kept under close control by its originators with the tacit consent of an immense ma jority of their fellow electors. This consent can be accounted for partly by the energy and efficiency with which these leaders carried the coun try thru one crisis after another, and partly by loyalty to the pioneers the revolution. But this permanence in power is a result of past circum stances-not of the present constitu tion. Under that constitution there are certainly as great—and possibly greater-possibilities than elsewhere in respect of popular government, poli

THE Communist International has movement, indications of the road it must travel if it is to play its historical role. It has done this briefly but completely. Not only with an adjustment of major policies but with specific mention of "minor" ones; not

only what we are to do, but also how. Particularly at this time, it is essential to stress this part of the advice to the American Communist movement from the leading world Communist body in its decision on the American question:

"As the Workers Party is at present constituted, it is still altogether too weak to collaborate with sufficient effectiveness in the proletarian mass movement of this great country. Bryan Raised Price of Virtue as His Own Fortune Piled Higher

WASHINGTON, June 2-W. J. Bryan, interested in the Coral Gables land market, was recently talking daily to crowds on the beauty and value of Florida real estate and climate, and he was reputed to be getting \$1,000 a day for this effort.

This calls to mind a story that has been going the rounds of Washington since the Commoner announced that he would give a \$50,000 house, representing 10 per cent of his real estate gains, to a church organization, and would devote himself henceforth to writing.

The story goes that Bryan and Raymond Robbins were discussing the menace of great fortunes a dozen years ago during a campaign, and that Bryan, laying a fatherly hand on Robbins' shoulder, remarked earnestly: Robbins, you know, and I know, that no man can carn a million dollars honestly." Robbins agreed. A year or two ago they were again together. and it happened that the same topic came up. Again Bryan laid the authoritative hand on his friend's shoulder, and looking almost pleadingly into his eyes he said: "Robbins, you know, and I know, that no man can earn three million dollars honestly.'

The issue is raised by a claim that the army engineers are planning to build the \$14,000,000 Arlington memorial bridge by direct employment of day labor.

"Our contact with army engineer officers," said Secy. Tracy, "has taught us in the building trades that most of these officers think in terms of coercion, of military discipline, and they have no use for unions nor any interest in the human element in the work. There are exceptional men among them, of course, but most of them would like to answer any suggestion of a strike by calling out a firing squad. Their training molds them that way. They treat a union spokesman like a dog."

Bosses Try Stalling Off Game

NEW HAVEN, Conn., (By Mail).— Typographical Union No. 47 of this city has placed a demand for higher wages before the newspaper publishers. The present scale is \$41 a week for compositors, which the union wished increased by \$8. But when the local committee met with the owners, who refused to treat with the committee, the union committee reduced the increase to \$3.

The scene then shifted to New York City, where President Lynch met with the head of the publishers. An offer of \$2 a week increase was made to the local union, provided the agreement was drawn up for three years, instead of two. The first dollar was to be granted in Jan. 1936, and the second in May, 1927. The local union refused.

Last Sunday, it was decided to call a meeting for Tuesday, to take strike vote, but instead the strike committee urged no action be taken until June 1. The agreement had expired May 1. The men are determined to get the minimum of \$3 a week increase, payable as from May 1.

The demand of the New Haven Local seems mild, compared to Hartford. Conn. (an open shop hotbed) where the wage scale was \$45 a week. Recently, the Hartford Local won two weeks off on vacation each year with pay, and payment for holidays and illness. Sanitary conditions, which were better than in New Haven now. were considerably improved.

Another Offensive Fizzles

Ever since the workers and peasants of Soviet Russia raised the dard of revolt against the forces of capitalist feudalism in the mighty Russian empire and carried that standard to victory the dead body of the enemy, the capitalist class of the world never given up hope that they would be able to restore the old

Plot followed plot with monotonous regularity. At first, frontal sicks were made on the Soviet republic. When those failed; when ported Mr. Snowden and Sir Alfred is was discovered that the workers' republic was able to stand off Il such attacks, more devious methods were resorted to.

The capitalist powers vainly tried the sword. They tried econe isolation and starvation. That also failed. Today, without the therefore mainly concerned as to how of a dollar from any capitalist government the Soviet Union is ding up its productive power as a strong and powerful basis for e socialist economy of the future.

But capitalist plotting has not stopped by any means. It should I noted that in the forefront of all this plotting was the British return of the pound to the gold standvernment. Perhaps Britain figured in the background, rather than ard. Last year at this time there was in the foreground. But Britain was the guiding brain.

The famous offensive opened by the late Lord Curzon went on ability of this project. It appeared be rocks. The Soviet Union still stands. Curzon is resting under that they were on the verge of furarchetecture of Westminister Abbey.

But the empire is persistent. The latest move of the tory governsent is to attack the Communist International and organize a con- averse. The scales were weighted in piracy to get every government in Europe present Russia with a ount note demanding the expulsion of the Comintern from the Soviet Union. This was expected to find universal favor among the bourcoisie and it was not expected that the working class organizations not amliated with the Comintern would care what happened to it. The government figured that the British labor party would be at st neutral.

But the tory government should know that MacDonald is not as atol of the robber empire today as he was when he turned loose the forged Zinoviev letter for the greater glory of the tories, his own undoing, and to the detriment of his party. The beneficiary of Mr Alexander Grant's biscuit factory has lost caste with the workers since then. When Joynson Hicks, home secretary, sprung his attack the Comintern, there was such an explosion in the British labor States federal board and the Ameri- of the richest elements. Death dunent, politically and industrially, that the tories decided, discretion was the better part of valor.

In reply to questions asked by labor members in the British house of commons, the tory ministry stated that the government had no mention of threatening to break off relations with Russia over the activities of the Communist International. It did not admit that its decision was arrived at after France and Italy refused to bite.

The Soviet Union has more allies than the capitalist powers are ware of. Besides its red army and red fleet, millions of workers mall countries look on the Soviet Union as their only fatherland.

By J. T. MURPHY (London)

WHATEVER else may be said about Churchill's budget, this much has to be said-it is a bankers' imperialist budget! The incidence or the relief of taxation, coincident with the return to the gold standard, point most clearly to the bankers and link the budget to the Dawes report.

.The introduction of the tariff policy directed against foreign countries along with preferences to the colonies of Great Britain, simultaneously with the increase of military expenditure. make it perfectly clear that to describe it as an imperialist budget is no exaggeration.

Mr. Snowden has described it as the worst rich man's budget in modern history," but has nothing to say about its real imperialist character. He would have the navy and air estimates reduced a little and he thinks that "the state of our industries," do not warrant the application of the insurance scheme with which he is very much annoyed. Sir Alfred Mond supthe voice of big business, Sir Robert Horne the conservative leader of the federation of British industries reechoed the story. All the critics were best to help British capitalism and we can pass it along without worrying much about it.

THE first feature of the budget speech was that dealing with the a flerce discussion going on in banking ther inflation. The industrialist elements of the F. B. I. were pressing for it and the labor party were not the opposite direction immediately the Dawes report was put thru and American money began to

power which, while it may not be to these, all those with incomes over America's interests to use it, remains always uncomfortably in the background." This disquistude is echoed by others, but it was the only way possible for British capitalism to regather its forces. American-Angle collaboration in matters of finance is the only cover under which Britain can even steady herself down the decline, and the bankers have decided on it. OTHER factors play their part, of

course. It is interesting to able to lend money that is depreciated to the state and get interest and repayments, in appreciated currency. This profitable business is revealed in a further part of the budget dealing with the national debt. Churchill was very proud of the debt reduction. It amounts this year to somewhere about £40,000,000. 1920 the debt stood at £7.828.779.000. It is now £7,646,000,000. So, altho taxation has yielded for national debt purposes in five years some £1.750. 000,000 the debt is only reduced by £182,000,000. The difference between the two sums has gone into the pockets of the patriotic investors in war stocks, mainly the banks, But the industrialists are growling

for another reason. They cannot yet see how the restoration of the goldstandard is going to help them a great deal with regard to the problem of markets. There is a divergence between dollar prices and pound prices. Whereas British prices are up 71 per cent above 1914 level, dollar prices are up only 62 per cent. This difference in price level places the British exreckon on America as their principal jection to the latter being strengthened by the government's action in

£250 per annum receive a little gift amounting in all to £32,000,000 yer annum.

While these little gifts are being handed round to those who are in clover, the workers come in for a bit of rough handling. Mr. Churchill has stolen the thunder of the labor party with regard to old age pensions, and pensions for widows, but has decided to do it at the expense of the workers, by imposing a tax of four pence per week for men and two pence per week for women who already pay the national health insurance and the unemployment insurance. Old age pensions at 65 years of age come within the scheme and are operative from 1928.

This departure from state pensions on a non-contributory basis is the point upon which the labor party is laying stress.
