SAME OLD PROGRESSIVE TALK IS BUNK

By J. LOUIS ENGDAHL. (Special to The Daily Worker

STEEPLECHASE PIER, ATLANTIC CITY, Oct. 14,-If it were not so tragic a situation for the whole American working class, it could be considered good comedy, the frantic manner in which the Green regime in the American Federation of Labor is trying to put on a mask of progress at the convention here.

When the resolutions committee, with all the profundity it could muster, came back with its amended report on wages, President Green solemnly declared that this "places the American labor movement in a most advanced position on wage theories." This so-called epoch-making statement contained merely the following:

"Social inequality, industrial instability, and injustice must increase unless the workers' real wages, the purchasing power of their wages, coupled with a continuing reduction in the number of hours making up the working day are progressed in proportion to man's increasing power of production."

Same Old Bunk.

This is merely a statement of the basis of the trade union movement, upon which it has been struggling these many years, although president Allied Proposals Not Green suddenly discovered that it is "the enunciation of a new idea establishing a position far in advance of any position we have ever taken before. We stand on the threshold of a giant industrial era. New conditions are here. This is our way of Locarno this morning of Austen meeting them.'

The way, of course, is the adoption of a general declaration, hoary with age, while all definite programs for class struggle actions are denounced as Communist doctrine.

The labor party is applauded in Great Britain and Mexico, but in the United States republicans and democrats get the federation's support.

The Railway Clerks were turned down in their jurisdictional fight with the Teamsters' Union by a vote of 23.845 to 3.895. According to a statement issued by the delegates of the Railway Clerks, this union will quit the federation. The statement follows:

"It is the opinion of the representafives of the Railway Clerks that our grand executive council will give up its charter in the American Federa tion of Labor permanently rather than to give up its jurisdiction over their employes involved." This union has about 80,000 members.

The union label campaign was given considerable discussion. President Green rising to the occasion with a speech in the late Gompers' best style He declared it would dissipate the so called "apathy and indifference" that he claimed had seized the workers since the war.

LONDON-(FP)-Representing 11,-000,000 British and Russian trade to the workers of every country, the London, declares that "the establishment of an all-inclusive, world-wide trade union international has become more necessary than ever."

The joint advisory council, whose report is signed by Tomsky, on behalf of the Russian trade unions, and by the late Fred Bramley, on behalf of the British Trades Union congress, notes the ratification of the agreement for joint action, decided upon at the London conference on April 7. The Russians ratified April 30, and the British at the recent Scarborough Trades Union congress.

The report summarizes the world situation as it affects labor, noting the increasing attacks of the em ployers and the evil effects of the Dawes plan. The danger of war is drawn attention to and the increasing revolts of colonial peoples against capitalist imperialism and exploitation. The object of the guarantee pact to include Germany in a military alliance directed against Soviet Russia is also exposed.

The removal of all obstacles and difficulties in the way of national and international working-class unity" is called for.

ARMY STOPS VICTIM'S FUNERAL; STRIKERS AGAIN IN ACTION; TENANT LEADERS IN JAIL

BALBOA, Canal Zone, Oct. 14.—Panama City is still besieged by hordes of United States troops, brought there to assist the oathsome vassal of Wall Street, who sits in the presidential chair of Panama, to crush the mass demonstrations of the workers against the exhorbitant rents imposed upon them.

Business men subservient to the government and taking heir stand with the avowed enemies of the working class have been permitted to open their stores, but clubs and saloons are tightly closed, except those permitted stealthily to supply the privates and quench the inordinate thirst of certain officers of the army.

Workers Still Defiant. In defiance of the regime of pillage and murder that was instituted by the Panama police Saturday night and carried to the utmost excesses by he intervention of the United States rmy on Monday, the strikers are again stirring to action. The city, at first stunned by the ferocity of the blows that fell upon the workers, ncluding the pillaging of the labor neadquarters, the murdering of one triker and the wounding of many others, is rising again.

Transportation still remains at a tandstill while tailors, bakers and many other craftsmen are still on strike with the movement spreading. Strikers Denounce Murder.

The Belgian franc was quoted at 106.55 to the pound sterling, while the French franc was quoted at 106.75. The fall in the French currency is due to the unsatisfactory outcome of the recent conference in Washington. Depressing reports from Paris indicate a further fall and it is not unlikely that it may definitely hit the tabboggan, sinking to new low levels sufficient to produce an alarming crisis. ing for the ending of the 9 month truce in the mining industry. In spite of the subsidy to the owners the situation remains critical, for the government is attempting to wriggle out of the guarantees it gave to the miners on July 31 that wages should not be reduced during the period of the truce. The miners' union is not going to permit the deduction of a cent from the men's pay, and a crsis threatens.

Such tricky dealings are leaving no doubt as to the alignment of the government with the employers in the impending struggle. While O. M. S. is an unofficial organization, it is prepared to place itself under government instructions in a crisis, and the government itself is making its own preparations to fight labor, if next spring brings a strike. The disclosures in parliament not long ago as to the navy's secret order in relation to the use of the navy for strikebreaking purposes are a case in point.

San Francisco Strike of Waiters Off; Craft Unionism Aids Bosses

By JOSEPH W. SMITH, (Worker Correspondent.)

SAN FRANCISCO, Oct. 14-The San Francisco waiters who have been on strike have returned to work, beaten by craft unionism in the uneven battle. They decided it a lost cause when they had not only their own bosses to fight, but the industrial association and their fellow craftsmen, the cooks, who were union-scabbing

(Continued from page 1) police power in any portion of the republic of Panama whenever public visit of the British trade union leaders order is endangered. But how did o the Soviet Union and the spread of such a treaty come about? Out of the ruth concerning the work of the Rus. pure generosity of the Panaman people? Do nations make such treaties of their own free will? No. There is more than a treaty behind United ions support the conclusions of the States intervention in Panama.

Look at the supplementary volumes of the Encyclopedia Britannica issued significance as far as the British in 1924 and you will find the followtrade union movement recognizes ing:

> Panama, the youngest of the Latin-American republics, is in reality a protectorate of the United States. Its constitution, which dates from February, 1904, states that in return for the guarantee of Panama's sovereignty and independence the United States shall have power to intervene "to re-establish public peace and constitutional order." A close fiscal supervision is at the present time being maintained, and more than once, when domestic disturbances began to threaten, the United States has landed marines, has supervised elections, and has assumed police power in the cities of Panama and Colon.

Thus, not only a special treaty, but the very constitution of the "Repubic of Panama," puts it directly under foreign imperialist rule. Panama is a protectorate of the United States. just as Egypt is a protectorate of Great Britain. But ninety-nine out of hundred Americans are ignorant of this fact. They have been led to believe that Panama, Costa Rica and the other little nations to the south of us are free countries, living symbols, in fact, of American magnanimity and forbearance. They have been taught in school that the United States has no protectorates, that American cap italism is innocent and virtuous and quite different from its wicked cousins in Europe. The United States has not one protectorate but many of them. The example of Panama is illustrative of the whole method of American im perialism in Latin-American.

GITLOW REFUTES GREEN'S SLANDER

Says Rank and File for Unity

(Special to The Daily Worker) NEW YORK, Oct. 14 .- Ben Gitlow, candidate for mayor on the Workers Party ticket, issued an absolute refutation of the statement made by William Green before the American Federation of Labor to the effect that the rank and file of labor were opposed absolutely to the proposal of quarters today.

"Green does not speak for the rank and file of American labor," sald Gitlow, "if he cared to put the question to a referendum of the 150,000 organized needle trade workers of New York, he would discover that fully 90 per cent of them would vote in favor. If he would even go to his own organization, the United Mine Workers of America, he would discover that there, where the candidate in favor of recognition of Russia recently received 66,000 votes against the Lewis machine, that 90 per cent of the members were for international trade union unity and recognition

RHODES FUND SCHOLARSHIPS TORY SCHEME

British Imperialism Controls Education

\$10,000,000 fund for internaeducation, known as the Rhodes scholarships and administered in England, is tightly under tory control, it became known when Pres. Frank Aydelotte of Swarthmore college, American agent of the fund, announced the newly elected trustees. Baldwin In Control.

Chief of them is Stanley Baldwin, conservative premier of Britain, who almost provoked a labor revolt before he surrendered his contention that the miners should take a wage cut. Another is Douglas Hogg, his attorney general.

A third is a powerful banker, another is editor of The London Times, reactionary newspaper, and the last is an educator who was a member of the British coalition government during the imperialist war.

Supremacy Over Whom? The scholarships pay \$2,000 a year for three years and go to 32 college youths in the United States each year as well as to British colonials for study at Oxford. Their founder hoped that they would help insure "Ang-

MANILA, P. I., Oct. 14.—Great Britain is to be seriously challenged in the world monopoly of rubber that she enjoys at present, if reports of experts on the potentialities of the Philippine Islands prove well-founded. In the early years of the use of the automobile and the consequent rising

demand for rubber for tires, shrewd British capitalists began stealthily to acquire control of the sources of this commodity, until recently that nation has been in a position to place such

heavy duties upon her rubber industry, that it goes a long way toward paying interest on her great war debt. American capital was so busy producing automobiles for the world market that it overlooked the vast fortunes to be made in the auxiliaries of motor cars.

Forces to Produce Rubber. Now that the British monopoly

on rubber has forced the price so high as to be almost prohibitive, it threatens the whole auto industry. Hence a mad scramble for new sources of raw material.

Experiments in the Philippines prove that rubber trees can be raised here equally as well as they grow D. Wolfe, agitprop director of District in the tropics. The notion that rub-No. 2, of the Workers (Communist) ber can be grown only within a radius Party, said that if you examine the of ten degrees of the equator is now

In addition to this advantage for capitalist investors, there is an inexhas as its purpose the regulation of haustable supply of potential wage the sale of food in the state, and at slaves and coolies that can be driven the same time he was on the payroll onto the plantations. It costs but of the meat trust. The elementary \$5 to transport a native workman question is separating the workers from the island of Cebu to Mindano, and there are more than one million

> The United States at present con sumes 400,000 tons of rubber per year. This could be supplied by the product of 2,000,000 acres, less than one-third of the public domain in one province alone.

> Thus the competition between the imperialist nations drives them to draw into the industrial hells of capitalism ever larger numbers of the colonial peoples already in political bondage to the great powers.

Gagging Central Labor Councils

The American Federation of Labor convention, whose delegates the British working class, which was holding the real power are officials of national and international unions, and who hate the remnants of rank and file expression provided by the city central labor bodies like poison, took another crack at the membership when they authorized the executive council of the A. F. of L. to take over the property of central bodies whose charters have been revoked.

This is a move against the left wing activities of a number of central bodies which, because of their closer relations with the union membershp, are more responsive to its wishes. It is axiomatic that what steps have been taken towards building a militant labor movement and arousing political consciousness among the organized workers have been taken by central labor councils. This has been followed by the threat to revoke their charters and after some difficulty they have been whipped into line.

The proposal to confiscate their properties (many central labor bodies own labor temples, office furniture, libraries, etc.) is designed to strengthen the hands of the conservative elements and give them additional argument against insurgent action.

The decision itself is proof of the fear of A. F. of L. officialdom of the growing left wing movement. A few years ago this issue could the British or American imperial govnot have been raised because the only difficulty the executive council had with central councils was that they occasionally took the wrong side in jurisdictional disputes and had their charters revoked. But these incidents were only family squabbles without any difference in political policy.

Today the revolt of central bodies always centers around some issue like support of a labor party, amalgamation, sympathy for Soviet Russia, the presence of Communists as delegates from local unions-all of which are fundamental questions for the American labor movement and which indicate an entirely new trend of thought WHO will have the leadership in the and action in the ranks of organized labor.

This is the real important thing in connection with the latest attempt of the A. F. of L. officialdom to hamstring and gag the union membership.

No Agreement at Locarno

The line of division at Locarno becomes clearer as the prophets of an early settlement are forced to explain in more detail the cause of the continual delay in reaching an agreement.

Germany is willing to sign the security pact as it affects the French and German frontiers provided no reference in it is made to to imperialism, the young Chinese her eastern boundaries. The capitalist press which has been devoting columns of space to the more or less minor differences over the Rhineland territory and trying to conceal the nub of the whole questionguarantees for the states on the Russian border, Poland in particular -is unable any longer to pervert the truth with platitudes.

Germany has so far refused to agree to a united front against the Soviet Union that would be implied in the signing of a document recognizing the present eastern frontiers and unless the allied imperialists can get her consent to this, the whole scheme for confronting Soviet Russia with a steel wall, which was to have been consummated at Locarno, falls to pieces.

In the meantime, both Germany and Poland seem to have been liberation from the domination of driven much closer to Soviet Russia, as evidenced by the new treaties recently signed by them.

Our impression is that the allied governments are now engaged in a last minute effort to save their faces and bring home from Locarno some kind of an agreement that can be hailed as a victory, siderable force. Hence, only the workfor their diplomats. Unless the German government representatives make a right about face and Poland is whipped into line or bribed by a huge loan from Wall Street, the Locarno conference will have their view has been proved by the failed of its object-to close the gap between the counter-revolutionary forces of western Europe made by the refusal of Germany to allow allied troops to march across her territory for a joint offensive with Poland against the Soviet Union.

Gold Movements and the Working Class

The new movement of gold from London to New York is further corroboration of what we have been saying of the continual decline of British industry.

British imports increased last month more than \$30,000,000 over the preceding fiscal month, while her exports decreased \$1,515,-000 making a net increase in the adverse trade balance of \$31,515,000 for the month.

The exports of heavy industry (iron and steel and kindred products) decreased \$1,110,925 cmopared with the same month last year, and the textile exports dropped \$922,355. Coal exports declined \$10,391,000 compared with last September.

For the first six months of 1925 British imports increased over the same period last year by \$281,032,985. During the same six

months exports declined by \$50,190,275. These figures are conclusive proof that British industry no longer dominates the world markets. Even in her own colonies serious inroads are being made by the products of native industry

and American firms. Britain is no longer paying her obligations in commoditiesshe has to pay in gold.

Shattered British industry is not an attractive investment even ing perfected by the military league, for "patriotic" Britons and liquid capital will continue to leave fascist bands and the Zankov govern-Great Britain for the United States where the surplus of gold is workers and peasants in Bulgaria. tinue under other forms and the vice causing the financiers to sit up nights devising schemes to prevent Death lists are made and hellish plans

Foreign loans with their accompanying military adventures and increase in armaments, militarization of the American working class, are fruits of U.S. financial supremacy.

There is a world of tragedy for the working class in the following paragraph culled from a capitalist news service dispatch under a Panama date line:

With the arrival of the troops yesterday afternoon virtually all disorders ceased altho a crowd returning from the funeral of a striker who was killed by Panama police Saturday attempted to hold a meeting. They were easily dispersed by the American soldiers. Wall Street rules in Panama.

What Saklatvala Symbolizes

MILE MacDonald was doing the dirty work for English imperialsm in Bulgaria noted in the concluion of the last article, the tories were preparing quietly but effectively to discredit the Soviet Union among the British working class. It was in the name of social-pacifism, "Peace on earth, good will to men." that Mac-Conald carried on the plot with the bloody Zankov government against he workers' and peasants' govern nent of Russia.

It was in the name of social-paci fism again that MacDonald denounced that masterpiece of capitalist trickery, the forged Zinoviev letter 'as a Bolshevik conspiracy" against starving to death quietly. Just as the tories had calculated, the labor party lost the election and, having eased the empire thru a severe inter national crisis, MacDonald was set aside to await a period when his services would be required again.

The world knows now that the Zinoviev letter was forged, the British trade union delegation to Sovet Russia satisfied itself that this was he case, but MacDonald to this day has said not one word to indicate that he knows it the case. In other words. office by his silence than to aid the workers' and peasants' government f Russia by telling the truth.

Saklatvala fought thru the labor party campaign in which the forged Zinoviev letter was an issue and he would have had some interesting hings to say about it. No such firsthand testimony is wanted by either

MEANWHILE, the tory British government is getting ready for out-

class. A dispatch to the New York Times of October 5, says in part under a London date line:

How a newspaper spoiled the game of the crown law officers in dealing with the "Reds," was revealed today by Sir William Joynson-Hicks, the home secretary, in a speech at Liverpool.

The utterances of Saklatvala and Tom Mann had been brot to his attention and he discussed them with the attorney general and public prosecutor. They decided that as the speakers were getting more violent each day, it would be better to wait a week or two till they had completed their series of speeches already announced. Then a certain newspaper published their plan and, said Sir William, "from that moment neither Mann nor Saklatvala opened his mouth in public."

Tom Mann and Saklatvala are Communists and it may be argued that such secret preparations apply only to acknowledged revolutionists. The MacDonald argument runs something along this line when he blames the Communists for the government's suppressive measures. But Sir Will iam Joynson-Hicks knocks this social list-pacifist argument for a row of he prefers to aid the British foreign Japanese ash cans. The dispatch con-

> Then the speaker took up a defense of blessings he bestowed on a society known as an organization for the maintenance of supplies. This society, with Lord Hardinge of Penshurst, the late ambassador to Paris, as president, and on the executive such men as Lord Jellicoe and Sir Francis Lloyd, the general commanding London during the war, has been formed to draw up lists of men ready to maintain pub

of such an emergency as a general strike. Sir William, writing to a correspondent who consulted him about it had stated that the government considered it its duty to maintain supplies at such a crisis and had made plans long since to do so, but could see no harm in such a private organization and would

be glad to use its services. TT must be remembered that this open announcement of the recruit ing and endorsement of extra-legal anti-working class forces was made in Liverpool where a few days before 3,000 British fascisti had been sworn in by the chief constable of the city and the statement made publicly that this force would act in strikes and other emergencies "as a separate force under their own officers.'

The British capitalist press is not a unit in support of this assault on the fabric of bourgeois democracy which had so successfully fooled the workers up to a short time ago. The London Daily News comments as follows on the strike breaking scheme of the home secretary:

We cannot conceive any enterprise likelier to provoke a breach of the peace or to incite the rapid development of class war. If a Liverpool watch committee enrolls the fascisti as police what is to prevent a labor watch committee from enrolling volunteers to form a labor defense corps, which labor politicians of advanced views regard as the only possible answer to selfconstituted strike breaking organizations?

The Ulster volunteers created the Sinn Fein volunteers and the Sinn Fein volunteers produced the Irish revolution and dragged the name of Britain in the dust.

murder of striking workers go forward merrily. The Liverpool conference of the labor party under-the leadership of the MacDonaldites failed to take a militant stand against the legalization of British fascism altho the labor press declared it to be a paramount issue.

The Sunday Worker for September 27, makes the following detailed exposure of the government's plans:

It means that scabbing and blacklegging are to be publicly elevated to the dignity of a patriotic duty; that any sort of trade unionism, or labor politics, that moves an inch beyond lickspittle subservience to the boss is to be officially regarded and (with or without the constitution) treated as a crime. That any sort of savagery, brutality, and impudent insult from any and every sort of hooligan will be applauded as "patriotism" and "loyalty" provided it be directed against the best and bravest in the labor movement.

Maintenance of Famine. It is called "The Organization for the Maintenance of Supplies"-"O.

M. S. for short." While its nominal function is to maintain under government control essential public services of food, heat, light, transport, and sanitation in the event of a general strike, its real function is evident from the very qualification introduced.

It is to crush every workers' struggle that promises to reach success, and while filling the bellies of the bosses secure permanent famine and misery for the working mass.

A Military Force. It will be a force raised, recruited,

Its council (impudently described as non-political) consists of men of title, rank, and wealth, who not only never have, but are never likely to have, the smallest grain of sympathy for labor rightly struggling to be free.

'And the whole scheme we are told "has the approval of the government."

event of a Chinese national re volution? This question has played a great role ever since the commence ment of the present struggle for free dom, just as this was the case in Russia before October 1905. It was only possible to raise this question because up to now in China the class antagonisms had not made themselves very much apparent. A national re volution always bears a bourgeois character; but in the midst of present day world capitalism, which has al ready developed to its highest stage, bourgeoisie cannot achieve merely a national revolution. It has been said on the other hand that the national revolution is not the affair of the working class, and that the latter, owing to the fact of its weakness, would be unable to undertake the leadership.

The United Front.

The Chinese Communists have de clared right from the outset, that the working class must take part in the national revolution, because national foreign imperialism must precede the emancipation of the proletariat. Even if the working class is weak, it can neverthless, in relation to the Chinese bourgeoisie, be regarded as a conng class in China can take over the eadership of the national revolution. How right the Communists were in recent events of China

arried out a blood bath among the Chinese working class in Shanghai end on the 23rd of May the Chinese eudal military leaders, at the command of the Japanese, did the same thing in Tsingtao. This was followed by the shooting down of Chinese on the part of the English in Shanghai on the 30th of May. It is therefore elear that the present struggles for reedom were commenced, and will be continued, by the working class. The bourgeoisie and the petty bourgeoisie have been compelled to fight under the flag of national revolution for the emancipation of the Chinese people from foreign rule.

Workers Leadership.

But every day the counter-revoluionary character of the Chinese hourgeoisie becomes more and more apparent. They declared at first that the Shanghai, and that there also the quarter of the town. Now the bourgeoisie is quite openly appealing for support to the tools of the imperialists, the Chinese military rulers. Chang Tso-Lin in particular is fulfilling with the greatest care these instructions to suppress the strikes and dissolve the fighting organization. At the end of July he caused numerous fighting groups to be dissolved in Shanghai and Tientsin, and in Mukden even the group of the Kuomintang.

The imperialists in China are making use of every means in order to crush the struggle for freedom. Although they all stand in one united front against the Chinese, they are attempting, one in this way and another in that, to suppress the movement for freedom. The English are area of struggle must be limited to proceeding with the most brutal means, whilst the Japanese, who were fight should only be directed against the main originators of the unrest, the English police in the foreign are attempting to cast all blame from themselves and to win the sympathies

Thereupon, on the 18th of July, the bourgeois convened a meeting in Pekin, which again opposed the demands of the workers and only proposed the boycott of the English. The result of this was a collision, regarding which the bourgeois papers naturally reported that the people with the red flags were the cause of the disorders.

med by the Communists on the 18th of July. The dissolution of the fighting organizations in the different districts of China and the prohibition of the Kuomintang in Mukden mentioned above-all this took place after the 18th of July. Shanghai, Tientsin and Tsingtao are the most important ndustrial centers in China. In Shanghai there are Chinese, Japanese and English textile factories. In Tsingtao they are mainly in the hands of the Japanese, and in Tientsin these factories are, for the greater part, owned jointly by Japanese and Chinese. As regards the Chinese proprietors, the only difference is that the Chinese factories in Shanghai are mostly in the hands of the bourgeoisie while those in Tientsin are in the hands of the military rulers. In most cases the textile factories in Tientsin belong to members of the party of that military ruler who exercises the greatest power in the locality. Previously they belonged, for the greater part to the Chili people (the party of Wu-Pei Fu), today to the Aufuists (Tuan She Sui party) and Chang Tso-Lin. The factories of Tientsin are, therefore, to be regarded not only as conomic factors, but also as political and personal-political factors. Hence, e oppression of the workers is particularly brutal. In Tientsin there are, in all, nine textile companies with 400,000 spindles and 20,000 workers.

The facts given above enable us to judge for ourselves in whose hands

Butchery Still Bulgarian

EDITOR'S NOTE:-The following appeal has been issued by the Communist Party of Bulgaria to the workers of the entire world and reveals a continuation of the bloody reign of terror inaugurated by the Zankov government. It gives the lie to the press reports that the Bulgarian fascist government commuted the sentences of those doomed to die and is in reality murdering thousands of workers in the

WE are warning the world prole-tariat, peasants and public opinon that at this moment plans are bement for new mass murders of the devised for carrying them into ef-

The regular prison crews are replaced by cut-throats. On September that this diabolical conspiracy is al-25, 1925, in Varna, three men sentenced to death whose sentences had been "officially" commuted were murdered in prison by the fascist sentries placed there for that purpose

We appeal to the world proletariat. to all intelligent and conscious work. had their sentences revoked, but that ary peasants. ers to come to our aid and with quick there impends a general exterminaaction against the hangman and tion of all those who dare oppose or mass bloodshed. The murders have regime and who had not already passnot stopped for a single day.

following facts:

Telegrams from Sofia to foreign over the world regarding the commutation of sentences of death to life imprisonment of hundreds sentenced by court martial. It was evident that this was done only to pacify public opinion abroad. The announced re vocation of death sentences was mere ly intended to pacify the growing demand from the civilized world that public hangings of the victims of the white terror cease.

When the ttwo-year history of vio lence of the Zankov government is considered, it is no surprise that un der the veil of magnanimity the re vocation of the death sentences would tims, who could not defend their mur ders would be recorded as having committed suicide, attempted to escape, etc. The Varna case proves ready being carried into effect.

THE recent threats of Zankov in the I national assembly indicate that it is not a matter of murdering only ed under the butcher's knife in the with the consent and active assistance

danger which is based upon the tember, 1924 and April, 1925. The communication from Sofia that new lists are being prepared is evidence newspapers gave great publicity all that the threat of Zankov-"Terrible bloodshed will agai ncome to the suffering Bulgarian land"-were not for a distant future, but for the present. That is the reason for the hasty adjournment of the session. It was necessary to give the rulers time to 'work." General Russev not long ago declared that he has received "authentic reports" about the peasants and Communists who are again "hatching something," and soon too, so the government should take measures. It is well-known that such pronouncements by Gen. Russev always heralds new butcheries by the government.

THE democratic leader, Liepchev, by I his conduct also heralds the coming slaughter. Only recently in his paper Preporetz, he suggested a change in the cabinet. It is an open secret that he hoped to come to power after the fall of aZnkv. But he now proposes to postpone the change in the cabinet for a few months until "necessary work" is done, this necessary work being the "cleansing" of Bulthose previously sentenced who have garia from Comunists and revolution-

This position of Liapchev is sustained with demonstrative support of butcher Zankov, to prevent this new have in the past opposed the Zankov Zankov at official and unofficial meetings. This delay means new murders.

of the democratic leader. It is our duty to give broad publicity to the preparation of this new blody crime and to urge the parties, trade unions, co-operative societies, leagues for human rights, and other bdies f wrkers and humanitarian people to take action by means of the press, mass meetings and protests to the Bulgarian and other governments and to arrange demonstrations in front of Bulgarian legations in order to prevent this new bloodshed intended by the Bulgarian fascist govern-

By all means and with inexhaustible energy we must strive to bring about such decisive actions because every lost moment brings death to hundreds. an dthousands of victims of this unexampled terror.

International Labor Defense Ball

munist literature.

The New York section of the International Labor Defense is arranging a grand costume ball on Saturday, October 17, at the Lyceum, 86th St. and Third Ave., in order to riase funds for defense.

The need of funds for the defense of the class war prisoners is growing daily. The International Labor Defense protects all victims of the class

struggle, who are sent to the capitalist prisons. The organization has a large number of cases on hand—the number is still growing. Hence, in addition to enjoying one of the finest balls that have ever been arranged-and there will be dancing and refreshments-
