# SLUSH FUND PROBE OPENS IN CHICAGO

By THOMAS J. O'FLAHERTY

THE law of supply and demand is to blame for the prevalence of speakeasies in the vicinity of the county jail. The prisoners demanded liquor and other citizens were ready to supply it. We rather jocularly kidded the jovial sheriff in this column recently about the possibility of somebody. Catholic Society Heads bent on mischief, planting a still in his sanctum sanctorum. Before the words were in print a big hole was made in the prison wall by a dynamite bomb. A few days afterwards several guards and a notorious gunman walked from the jail into the court and amused themselves at the court's expense.

THE worst was yet to come. The jail began to be the envy of a thirsty citizenry. Committees began to "investigate" it. Then somebody got the bright idea of watching the movements of the guards, and the result was the discovery of a combination brewery and saloon across the street. Wealthy prisoners, members of the several gangs who hi-jack, peddle alcohol and turn over wards to their political angels in elections, could have their favorite drink in a few minutes by whistling, once or twice. To complete the farce it is necessary that Mayor Dever should declare the city is dry. He is a few minutes late with his daily statement.

THREE hundred thousand dollars is the least that a candidate for the United States senate can make a decent campaign on, in the opinion of George E. Brennan, leader of the democratic party in these parts. George knows there is a quiz on the way and he is preparing the public for his auditor's report. #### Reed Probe in Illinois Begins Today

An admission by Samuel Insull, head of the Commonwealth Edison men, girls, school children and Young Company, the gas company, elevated roads and other Illinois public utilities, that he gave \$100,000 to Col. Frank L. Smith, republican nominee for United States senator and head of the Illinois Commerce Commission that gave insuli a number of "favors," and about \$15,000 to George E. Brennan, democratic nomines for senator, is expected before the Congressional slush fund investigating committee that opens its sessions here today,

The committee, which is headed by senator James A. Reed of Missouri, will hold its inquiry in Judge Wilkerson's courtroom on the sixth floor of the Federal building.

Besides startling admissions on the part of Insull it is expected that the campaign managers for Senator William B. McKinley will admit expenditures of upwards of \$500,000. Campaign managers for Smith, are expected to admit that their campaign expenses ran to about \$250,000.

Whether Mayor Walker has intelligence or not I don't know. But the mayor told the press that we wanted him as mediator. We didn't want him as mediator at all."

Ask Labor Union Support. After the refusal to take the men back, the strike committee issued a statement attacking the company president, Frank Hedley, for doublecrossing them. The statement asserted the men were counting on the support of organized labor and demanded that officials of the state and city governments do their duty in protecting the public against unsafe operation by criminal and inexperienced

m HE}$  capitalist rulers confess to their own fear of the wonderful powers and great abilities of our dead comrade, Felix E. Dzerzhinsky, when they hail his passing as "a blow to the Bolshevist Party only second to the death of Lenin."

It may be said that Dzerzhinsky sent a double wave of fear slashing its way thru the bourgeois world; first as head of the "Veh Cheh Kah," the All-Russian Extraordinary Commission for Combatting Counter-Revolution that safeguarded the proletarian dictatorship; and later as president of the Supreme Economic Council, directing the development of industry and the realization of socialism as a stage toward the Communist Society.

Time will give Dzerzhinsky his proper and high place among all those who served the Russian victory that tore down the outer ramparts of the capitalist fortress and gave the workers and peasants of the world a vantage point from which to press forward to the capture of the whole structure. It is not for the capitalist scribes to do honor to Dzerzhinsky by saying he was second to Lenin. They merely write thus in an effort to give the oppressors of mankind, whom they serve, some comfort in the belief that one of their greatest enemies has passed, to trouble them no

So they greeted the death of Lenin. They told themselves that with Lenin dead the Russian Communist Party would crumble into dust, the proletarian dictatorship rapidly dissolve and the Soviet Union be destroyed. Thus they reassured them-

But Leninism lived, as the capitalists have learned, the Russian Communist Party has grown, the proletarian dictatorship become as adamant and the Soviet Union more powerful than ever.

Dzerzhinsky lived nearly four years longer than Lenin to witness the successful development of the Bolshevik Revolution to which they had both contributed their every energy and ability.

One of the Moscow correspondents writes of the last tribute paid by the Russian workers to their dead comrade as follows:

"Dzerzhinsky lies on a red-draped catafalque, surrounded with flowers and a motionless guard of honor, in the former Nobles' Club, now the House of the Labor Unions. "His face is utterly serene, strong,

resolute-this man who, his enemies say, has 100,000 deaths upon his conscience. "Towards the narrow street,

where the Nobles' Club is situated, marching columns of interminable length converge from every section of Moscow.

"A quarter of a million of his fellow citizens will pay a last tribute to Felix Dzer, and then a red-draped, open coffin will be carried to the Red Square and interred below the Kremlin Wall near Lenin's Mausoleum."

"One hundred thousand deaths upon his conscience," says this writer, and then adds: "Not even his bitterest enemies ever questioned the sincerity of his motives. not even his closest friends ever detected a spark of self-interest or

Dzerzhinsky had but one thing upon his conscience, and that was his loyalty to the revolution. Against the enemies of the revolution he invoked the short, sharp decrees of proletarian justice. Thus he triumphantly advanced the Bolshevik outposts of the new civilization, bringing life and happiness to the generations of workers of today and vet unborn, thru insuring the success of the revolution, even by taking the lives or the putting into prison of those who would resurrect the dead czarist regime.

Only the martyred dead of labor must weigh heavily upon the conscience of their capitalist murder-What of those who plunged

the world into the blood bath of 1914, with its millions dead that the present system of exploitation and profit might live on.

Over the world since the war the casualty toll of the soldiers of Communism, fighting for the new day in every land, has mounted into the hundreds of thousands. They have died with "Long Live the Social Revolution!" upon their lips, aspiring toward "The International" of mankind. Let the martyrdom of our dead rest heavily upon the conscience of the fettering past. Sweeping away the debris of an outlived social order does not trouble the conscience of the future.

Dzerzhinsky gave all to the revolution and, as head of the "Cheka," tolerated nothing that endangered the success of the revolution.

Thus Dzerzhinsky leaves a rich legacy for the soldiers of all the Bolshevik revolutions that are to follow in other lands, that they be just as loyal to and self-sacrificing for the cause.

It is significant that in the hour of Dzerzhinsky's death the American Appeal, the official organ of the American socialist party, again speaks of the "harsh and tyrannical" developments of the Russian revolution. Thus it employs the language of the bourgeoisie with whom it has co-operated in many lands to betray the workers' revolution. In the valiant labors of the Russian "Cheka," Dzerzhinsky and the comrades co-operating with him set a glorious example for the defenders of the revolutions that are to come, for the "Chekas" of the future.

Dzerzhinsky was just as uncompromising towards the faithless among the revolution's ranks. As head of the Supreme Economic Council he fought every delinquency, It was said that a short time ago, his life being despaired of, he was ordered on a long vacation. Instead of resting, however, he went on an inspection tour of the Soviet coal and metallurgic enterprises in the Don Basin. He fought the evils, wherever he found them. resulting in high costs of production. He unmasked red tape, bureaucratic methods, struck at intolerable overhead expenses, attacked the overstaffing of factories, sought out grafting wherever he suspected it and meted out the extreme punishment to all found guilty. He developed to a high degree a new spirit of work and self-devotion in the reconstruction of Soviet industry. Thus he helped assure its rapid success.

Revolutionists the world over do honor to Dzerzhinsky. Nikolai Bukharin, editor of Pravda, the official organ of the Russian Communist Party, calls him "the most perfect knight of revolution, a chevalier without fear and without reproach." Because Dzerzhinsky lived there will spring from the ranks of the revolution many such knights and many such chevaliers to carry on his work. Thus if the bourgeoisie only knew how to judge the revolution it would fear Dzerzhinsky even more now that he is dead than it ever feared him while he was alive. Dzerzhinsky is dead! Long Live Dzerzhinsky! Long Live the Social Revolution!

#### Where Is Russia Going?

By HARRISON GEORGE.

TN previous issues we showed how an anarchist element in the I. W. W. proval of a state investigation. The by getting that organization to publish an attack on Soviet Russia, was injuring the organization before the eyes of the workers and voicing the philosophy of the petty bourgeoisie, a class whose sun has set.

But when an anarchist ventures so far into the maze of ideas as to say two words, he makes three mistakes. The writer of the article, stoutly upholding the interests of the petty bourgeoisie, goes quite as far as many of that class when forced to choose be tween the big bourgeoisie and the proletariat-and chooses the big capitalist class. #### Organization Needed to **Better Conditions**

By M. PERLIN, Worker Correspondent.

Carl, a young worker, a member of the Young Workers (Communist) League of America, works for Olson and Company, a picture frame manufacturing company. The shop is unorganized. There are about 80 workers in the shop. Most of them are young workers. They get from \$15 to \$20 a week. They must work nine hours a day.

Most of the workers in this shop are very religious. One day Carl approached one of the workers and spoke to him about conditions in the shop and the need to change them.

This worker replied: "This world don't amount to much and it is not worth struggling to make life better. God placed man on this earth on probation to see if he will follow his commandments. Our real life will begin in the other world, to which we all must eventually come.'

Carl advised him to get all this foolishness out of his head. "Those ideas help the boss and not you. There is but one life. In the few years that we are alive we have to suffer under most miserable conditions. We must know that we have but one life and that it is our duty to better that life.

WHAT HAS GONE BEFORE.

J. Arnold Ross, oil operator, formerly Jim Ross, teamster, is unsuccessful in signing a lease with property holders at Beach City, Cal., because of intrigues of other operators and quarrels among the holders. While he is at Beach City, Bunny, his thirteen-year-old son, meets Paul Watkins, slightly older. Paul has run away from home. His father is a poor rancher in the San Elido Valley who is a "Holy Roller." Paul goes away to make his living on the road and Bunny goes about learning the oil business from his Dad who is bringing in a well at Prospect Hill. Dad was working hard and Bunny suggests a quall hunting trip to the San Elido Valley. Dad agrees and shortly they arrive at the Watkins ranch and pitch their camp. Watkins ranch and pitch their camp. In hunting for quail out of the ground and Dad wheedles the sale of the ranch In hunting for quail they find oi and also arranges to secretly purchase adjacent lands. Paul's little sister, Ruth, and Bunny become friends. Bunny starts to high school at Beach City. With plenty of money and social standing he enters into the life of the school. His Dad warns him of dangers, tobacco, drink and women—a little bashfully on the latter. He falls in love with another student, Rose Taintor.

When Dad took his business trips now he took them alone; hat is, unless he could arrange them for week-ends and holilays. He didn't like going alone; and Bunny for his part, always had a part of his mind on Dad, and when Dad got back, he would near all the details of how things were going.

There were six wells now at Lobos River, and they were all paying big." Dad had four more drilling, and had deepened eleven of his old Antelope wells, and had a pipe line there, through which a river of wealth was flowing to him. On the Bankside lease he had six wells, all on production, and he had paid Mr. Bankside something over a million dollars of royalty, and had only got started, so he said. He had a good well on the next lease, the Ross-Wagstaff, and three more drilling, and out about half a mile to the North he was opening up new territory with the Ross-Armitage No. 1.

It was wonderful to see what had happened to the Prospect Hill field. All over the top of the hill and the slopes a forest of oil derricks had arisen, and had started marching across the fields of cabbages and sugar beets. Seeing them from the distance, in the haze of sunset, you could fancy an army of snails moving forth—the kind which have crests lifted high in the air. When you came near, you heard a roaring and a grumbling, as of Pluto's realm; at night there was a scene of enchantment, a educate the workers in the shop to blur of white and golden lights, with jets of steam, and a glare of leaping flame where they were burning gas that came roaring out of the earth, and which they had no way to use.

Yes, when you drove past, sitting in a comfortable car, you might mistake it for fairyland. You had to remind yourself that an army of men were working here, working hard in twelve hour shifts, and in peril of life and limb. Also you had to remember the pulling and hauling, the intrigue and treachery, the ruin and blasted hopes; you had to hear Dad's stories of what was happening to the little fellows, the thousands of investors who had come rushing to the field like moths to a candle-flame. Then your fairyland was turned into a slaughter-house, where tee local of the International Hod the many were ground up into sausages for the breakfast of the

Dad had a big office now, with a manager and half a dozen clerks, and he sat there, like the captain of a battle-ship in his conning tower. Whatever might happen to the others, Dad took care of himself and his own. He had come to be known as the biggest independent operator in the field, and all sorts of people came to him with propositions; new, wonderful, glowing schemes—with Dad's reputation for solidity, he could organize a ten or twenty million dollar company, and the investing public would flock to him. But Dad turned all such things down; he would wait, he told Bunny, until Bunny was grown up, and through with this here education business. They would have a pile of cash by that time and would do something sure enough big. And Bunny said all right, that suited him. He hoped the "something big" might be at Paradise, for then he would have a real share in it. Dad said, sure, the Watkins ranch was his distention of the entire organized labor covery, and when they come to drill there, the well would be

An unkind fate had willed that Mr. Bandy, owner of the big Bandy "Whereas, the Military Training tract, had been away from home on the day that Mr. Hardacre had collected his options; and when Mr. Bandy got back, and learned about all the sudden purchases, he became suspicious, and decided that he would hold onto his land. At least, it amounted to that, for he raised his price from five dollars an "Whereas, larger and larger num. acre to fifty! They would wait, Dad said, and let Mr. Bandy stay in pickle for a few years. It was like a cat watching a gopher hole, and which would get tired first. Bunny asked which was Mr. Bandy, the cat or the gopher; and Dad replied that if anybody ever mistook Jim Ross for a gopher, he would jist try to show them their mistake.

So they were waiting. Some day that mythical relative of Dad's, who was an invalid, was coming into those rocky hills and tend a few thousand goats; and meantime most of the ranches were rented to the people who had formerly owned them. Three or four were vacant, but Dad didn't worry about that; he would leave them to the quail, he said, and told Mr. Hardacre to have a man put up about a thousand signs over the whole twelve thousand acres he had bought, so as to impress Mr. Bandy with Dad's gluttinous attitude toward small game.

#### The Injunction Marches On

Officers and members of the International Ladies' Garment Workers' Union, New York, are prohibited by injunction from "in and we must mention a few decisive any manner impeding, obstructing, hampering or interfering with factors determining the unavoidabilthe continuance of the plaintiff organization, and with interfering ity of the strike. Of these circumwith the contracts had by the members of the association with their respective employes . . . . and from the use of coercion, force and violence.'

Thus the arm of the law is again stretched out to help the em- italist states. As possessor of a numployers defeat the efforts of the workers to secure more of the profits of their labor for their own use and enjoyment.

If the cloakmakers obey the injunction, the employers have a valuable weapon in their hands. Wherever the injunction has been profits on the side. That was the used by the bosses and obeyed by the workers a lost strike has been period of "peace and prosperity" in the result.

The fighting history of the New York cloakmakers is a guarantee that they will not allow the declaration of a capitalist judge deter of the British labor movement, the them from using the collective power of their membership to shut up leaders of the British labor movement the struck shops and keep them shut.

Nevertheless this legal weapon enables the bosses to drain money out of the union's treasury for the defense of the hundreds of pickets who are sure to be arrested. It is a dangerous weapon.

The injunction used in the strike of the Chicago cloakmakers ially the development of Germany, helped to nullify the splendid stand they made. They defied the injunction and went to jail. The "good friends" of the leaders of the Chicago Federation of Labor, namely Len Small and his lieutenants, who ran a pardon mill for gangsters, let them stay there.

The injunction issued against the I. R. T. strikers at the request of the traction magnates helped to smash the strike. President Ryan of the New York Central Trades and Labor Council, deplored the use of the injunction and went to sleep.

The story of labor struggles during the past years is a history hausted. The voices for lowering the pan, Germany, the British Dominions, the job in the other ranks of the of strikes, defeated by the use of government forces, whose activities were given a semblance of legality by the injunction. The reactionary labor officialdom, always looking for an excuse to stay out of a struggle, regarded the injunction as a godsend. If they would do any fighting it would be gesticulating thru lawyers in front of a judge's bench.

The only way to make the injunction unworkable is to treat it as Alex Howat, the Kansas mine leader, treated the Industrial Court Law of that state which, for a while promised to send Governor Allen, its author, to the White House. But Howat and his miners sent him to the bushes instead. Howat and his lieutenants had to go to jail. The sacrifice was not in vain.

To fight the injunction is the duty of all workers in support of the New York cloakmakers. While it is true that injunctions cannot make cloaks, they can put cloakmakers in jail and help break strikes.

The cloakmakers might do worse in this instance than paraphrase the Farragut slogan: "Damn your injunctions: We'll go right ahead."

THE CAUSES OF THE BRITISH STRIKE.

THE first question is what were the reasons for the Britsh strike. How was it possible that England, that and of capitalist power and unequaled compromise, was transformed re cently into an arena of great social conflicts? How was it possible that 'Great England," the "mistress of the seas" was transformed into a land of "Bolshevist" general strike?

### MUNCIE EDITOR CHARGES KLAN **RULES INDIANA**

#### Appeals Contempt Case to Supreme Court

(Special to The Dally Worker) MUNICE, Ind., July 25.-George R. Dale, editor of the Post Democrat of Munice, who is appealing a contempt case to the United States supreme court following an adverse ruling by the state supreme judiciary, reiterated his charge that the ku klux klan rules Indiana. Dale charges that the klan dominates the state by its control over sheriffs, prosecutors, police, mayors and even the courts.

Contempt Case. With three others. Dale was indicted for violation of the state liquor law. He published an article in his paper in which he said the court was controlled by the klan. Judge Clarence Dearth of the Delaware county court then cited Dale for contempt, fined him \$1,000 and sentenced him to six months.

Dale offered to prove the charges he had published but the court declared that truth had nothing to do with the matter. Dale then appealed. He claims The actual cost of the government his life has been threatened by the
