THE feelers sent out by the British government for a united campaign of the interested powers against China have been turned aside. Unofficial statements from Paris, Tokio and Washington say that those governments have no intention of intervenring in China, at least not for the present. TO SELL FIVE U. S. SHIPS AT \$17,460,000 LOSS

Shipping Board Knifes Government Ownership

WASHINGTON, D. C., Sept. 13. -Five passenger vessels in excellent condition are being offered by the United States shipping board to private steamship lines at a loss of \$17,460,000 to the United States government. This does not include the sums that will have to be paid to the German owners of some of these vessels that were seized during the war.

The Leviathan which is being offer ed for \$6,867,900 cost the government \$11,342,030. \$8,000,000 of this represents the actual cost of reconditioning. The George Washington is being offered for \$2,146,300. It cost the government \$4,209,049, \$3,000,000 was spent on reconditioning. The Republic is offered for \$3,348,200. It cost the government \$4,847,562 of which \$3.-500,000 was for reconditioning. The President Roosevelt and the President Harding which were build by the shinping board at a cost of \$6,000,000 apiece are to be sold for \$1,287,000

These appraisal values were placed on the ships by the shipping board and are now offered for sale with a guarantee of continued operation for a period of ten years. A minority of the shipping board opposes the sale of these five ships at these ridiculously low prices to private combines and are seeking to block attempts being made to sell the ships before their objections can be heard by congress.

NATIONAL AGREEMENT TURNED DOWN BY THE BRITISH MINE OWNERS

(Special to The Daily Worker) LONDON, Sept. 13.—Opposition to negotiations for the conclusion of a national agreement with the striking miners was registered by the district associations of the coal operators today, when the central committee of the mining association met to consider reports from the various operators upon the proposal of Winston Churchill, chancellor of the exchequer, that negotiations be resumed with a national agreement as the objective.

The operators are standing out for district agreements, while the striking miners are demanding a national agreement. District agreements are desired by the owners as a measure to break up the union and its fighting solidarity.

WALKER SEES DEPRESSION IN YEAR 1926-27

Tells Ill. Federation of Gloomy Future

(Special to The Daily Worker) STREATOR, III., Sept. 13. - President John H. Walker of the Illinois State Federation of Labor In his report to the forty-fourth convention of the Illinois State Federation of Labor being held here brought out that immediately following the congressional elections he foresees the setting in of an industrial depression.

He points to the fact that many of the factories are now placing much of their produce in warehouses as there is a small demand for goods. Six pages of his report are devoted to a denial of the charges made by

Senator Caraway of Arkansas that Walker was paid to deliver the Illinois labor vote for Col. Frank L. nation to the senate.

Western Ave., on Wednesday, Sept. 22 at 8 p. m. Besides the candidate Engdahl. William F. Dunne, editor of The DAILY WORKER, and Max Shachtman of the Young Workers League will speak.

The main topic of discussion at the cally will be the Illinois slush fund. With the one exception of Pennsylvania, the Illinois primaries were marked with unprecedented graft and corruption was revealed. How much more remains unrevealed will be one of the points to be touched by the speakers.

The whole question of the old parties and the workers in the coming elections will be gone into by the speakers. The congressional candidates, Sam Hammersmark, Matilde Kalousek and Elizabeth Griffin will be present at the meeting. The admission charge is 15 cents.

CONFESSED SLAYERS' AFFIDAVIT PRESENTED FOR SACCO, VANZETTI

(Special to The Daily Worker) DEDHAM, Mass., Sept. 13 .- Two affidavits, one by Celestino Medeiros, convicted Wrentman, Mass., bank slayer and another by James F. Weeks, serving a life term in the Massachusetts state's prison for his part in the same crime today furnished a sudden turn in the plea for a new trial for Nicola Sacco and Bartolomeo Vanzetti.

Medeiros, now awaiting execution in the Dedham jail, made direct admission of his connection with the South Braintree holdup, describing the operations of the gang involved and charging a certain gang of associates with the two slayings. He refused, in the affidavit, to name the gang. He charged that he had been bilked of his share of the spoils and had been thwarted after having followed the accomplices to New York and then to Chicago.

Weeks, in his affidavit, said that Medelros had told him of his connection with the South Braintree slaying while they were planning the Wrentham holdup.

Organize Their National Revolt (Special Cable to The Daily Worker) CANTON, China, Sept. 13.—The nationalist revolutionary movement of China is greatly developing since the occupation of Hunan province by the Cantonese armies. Mass organizations, labor unions, the Kuomintang party and the Communist party

are growing rapidly. The administration of the province is completely reorganized. Political inspectors are appointed for each district to superintend the activity of magistrates, administration and party

In view of the complaints of peasants of their oppression by the former rural militia, who were instruments in the hands of landowners, this militia has been dismissed and a new force is

being organized. Among other decrees published is one substituting the Canton flag for the old five-colored flag. All schools must dedicate a part of every Monday's sessions to the memory of Sun Yat Sen. School programs must contain an explanation of Sun Yat Sen-

ism and the national revolutionary movement. Thruout the whole province popular meetings are arranged where Kuomintang speakers emphasize that the Kuomintang party does not intend to introduce Communism, but works jointly with the Communist party, the immediate problem of both

parties being the same. In connection with the victories of the northern expedition, great celebrations have taken place at Canton, with a demonstraion staged by over 100,000 participants.

Sen. Oddie of Nevada, an administration supporter, claims to have spent only \$2,553 in his successful primary fight. Gooding of Idaho admits \$1,880 spent. Williams of Missouri says his cost was \$3,000.

L. B. Hanna, defeated Coolidge candidate against Sen. Nye in North Dakota, lists expenses of only \$610, while Midbto. the independent candidate in the same race, spent \$3.75.

In Oklahoma the democratic nominee, Elmer Thomas, spent \$2.748, and Jack Walton, the loser, acknowledges \$2,550 paid out.

President Coolidge and Sen. Butler, G. O. P. national chairman, are opposed to the primary election system, and attempted after the disclosures of million-dollar expenditures in the Pennsylvania senatorial race to make the facts of corruption an argument for a return to the convention system.

BULLETIN.

NEW YORK, Sept. 13.-Richard Merton, German metal magnate, received \$250,000 from the Societe Suisso for his successful efforts in negotiating the return of \$7,000,000 of assets of the American Metals company, held by the United States government.

(Special to The Daily Worker)

NEW YORK, Sept. 13 .- Richard Merton, German financier, so-called star government witness at the trial of Harry M. Daugherty, former attorney general, and Thomas W. Miller, former alien property custodian, charged with conspiracy, appeared virtually as a "white-wash" witness for the defense today under cross-examination.

"Did you have any reason to suspect that any government officials received part of the \$441,000 retainer fee you paid John T. King for aiding your claim to the seized property of the American Metal company?" Col. William Rand, counsel for Miller, asked the former German army captain. "I certainly did not," replied Merton

emphatically. "Did Col. Miller ever say anything to indicate he had any knowledge of

the contents of your claim papers before they were filed?"

Had No Recollection.

"I haven't any recollection that he showed any knowledge," Merton replied after several evasive answers. .. "Have you any knowledge that the attorney general knew the contents of the claim papers?"

"Not that I know of," answered Merton.

The witness related the "heiping out" in arranging the claim papers by George Williams, of the alien property custodian's office as a "frank transaction." He said Williams made him rewrite his first papers submitted because they lacked certain substantial

Speeding Up Fee.

He pictured the \$391,004 given to King for "speeding up" the claim as a 'fee," approximately five per cent of the \$7,000,000 property wanted returned. Merton also explained \$50,000 was given to King the time the claim was filed. The witness maintained that this "fee" was considered cheaper by him than the possible ten or fifteen per cent fee of lawyers.

Guaranteed Payment of Loss.

Merton testified he told Williams of the Swiss organization and the trans-

fer that had been consummated from German to Swiss interests, he told him that the Swiss stockholders had been guaranteed payment of loss thru shares they would receive in American Metal company's assets held by the alien property custodian.

Picked Du Pont Hotel.

Merton said in reply to a question that the reason he picked the McAlpin Hotel as the place to talk with Colonel Miller in April, 1921, regarding means to be taken to effect the return of Toledo. REACTION IN CHINA SPLIT

Japan Playing Her Own Game Against British

SHANGHAI, Sept. 13. - Altho British marines have been landed at Hankow and the British in China are eager for intervention against the rising power of the Canton government, they admit that intervention is futile unless Japan and the United States participate.

Japan is in no hurry to aid the British, since Great Britain is her chief rival and a weakening of the British position leaves a freer field for Japanese trade, which Japan does not intend to lose by sharing in a British attack on China-not, at least, if she can help it.

Records Are Smashed By BY RIVALRIES Industrial Gains in the Union of Soviet Republics

By J. LOUIS ENGDAHL.

WALTER DURANTY, the Moscow correspondent of the New York Times, is getting worried about the conditions in the Union of Soviet Republics.

He is troubled by "the writing on the wall" of "clumsy peasant fingers" demanding "Give us goods!" Yet Duranty admits that the So-

viet officials are not as much troubled as he by the "assertiveness" of the peasantry. Duranty

"Stalin and his associates . . do not ignore the growing clamor and do not. I believe, really regret the increased political consciousness and self-assertiveness of the peasants, embarrassing as it is at the preent juncture. Considering that they have followed a policy of trying to educate and stimulate the peasants, it is quite illogical to suppose that they are unwilling to allow the expression of grievances which they know are genuine enough."

Duranty is chiefly worried because "agricultural production has rapidly increased until now it has reached 90 per cent of pre-war at a general cost-which is an important point-not much higher than prewar. Industrial production also improved satisfactorily enough, butwhich is an even more important point-by the time the manufactured goods reach the peasant their cost is three to four times pre-war."

Thus the whole attack of the capitalist press has changed its front. The charge is no longer made that Soviet rule has plunged agriculture and industry into chaos, from which neither can be extricated. That was the customary song of the anti-Soviet chorus. Duranty, a capitalist journalist friendly to the Soviet Union, now worries because agriculture is improving much more rapidly than industry, claiming that agriculture is making demands upon industry that the latter cannot meet. It was perviously charged that everything was disintegrating under Soviet rule; now it is admitted that construction is going forward rapidly in both city and country, the latter a little bit more rapidly than the former. The only trouble is that the city-country teammates are not running abreast and pulling together to the best advantage.

But Duranty offers no encouragement to the czarist emigres in the western capitals of reaction, in Paris, Berlin and London. Instead of attacking Soviet rule he pictures the peasants as saying:

"Hey, you comrades there in Moscow, don't forget that this is our country, too. When we were slaves to the czar or the landlord we were forced to suffer in silence, but this is a free country nowadays-you have said so, and you have made it so, and we have helped you and believed you-now we can say what we like, and we are saying it."

Their demand is for cheap goods. not cheap in quality but in price. and plenty in quantity. To answer that demand is the task of the city worker, who led the revolution to victory. How well they are succeeding is shown by statistics taken from the September, 1926 (this month) Russian Review, published by the Russian Information Bureau at Washington, D. C.

The Russian Review states: "Industrial production in the Soviet Union registered big gains during the first half of the Soviet fiscal year, Oct. 1 to April 1, according to preliminary figures of the Supreme Economic Council. As compared with the same period of last year, production increased by 44.7 per

"The average number of workers employed in industry increased 30.2 per cent and the average output per worker increased 11.1. Advances were particularly marked in the heavy industries." Here are four big facts: (1) Pro-

duction is increasing; (2) greater numbers of workers are being drawn into the industries; (3) the cost of production is falling; (4) marked gains are being shown in the heavy industries, the last to recover from the heavy blows of the world war. the civil wars and foreign intervention. The hopes and ambitions of the not long ago are even now com-

ing to pass. But there are new problems. The cement industry led the general increase, the output being 113

per cent greater than that of the same period last year. The rubber industry increased 96.5 per cent and the output of cast iron

gained 92.6 per cent. The coal industry, which advanced very little last year, increased by 44.4 per cent during the period, with

an output of 12,410,000 tons. The tobacco industry increased 48.4 per cent, branches of the textile industry showed gains of from 27 to 46 per cent, the output of Marten steel increased by 63.3 per cent and of rolled iron by 71.4 per

cent.

You may inquire as to where these production figures stand with relation to the pre-war output. What is the output of the industry under Soviet rule as compared to the output under the deposed czarist rule? Here are some of the figures:

The output of the paper industry advanced to nearly double the prewar rate. The newspapers today have a far greater circulation than under czarism, books and pamphlets are being published in increasing quantities and illiteracy is being rapidly wiped out.

The linen industry has advanced to one and one-half times pre-war, and the match industry to one and a quarter times the figures for 1913.

The coal, oil, cement, textile and rubber industries each showed about 90 per cent of the pre-war output.

The most backward industry is the metal industry, the cast iron output for the period being 48.5 per cent of pre-war and the output of Marten steel 65 per cent. But this condition is rapidly mending, as is shown by the above figures for the current fiscal year.

The peasants looking toward Moscow, as Duranty points out, learn that industrial production in April (this year) broke all monthly records since the Bolshevik revolution. April production was 3.26 per cent greater than that of March, and 50 per cent greater than that of April. 1925. This is the first time in four years that the April output exceeded that of March. The increased output was accomplished despite a decrease in the workers employed by 1.3 per cent as compared with March.

As compared with March nearly all the principle industries showed increases in April, ranging in the case of the cement industry as high as 17 per cent. New records for monthly production were established in the oil, cement and other indus-

. . . Another encouraging indication is the fact that the Soviet Union continues to take up the production of necessities that would otherwise have to be imported. Thus the Putilov Steel Works in Leningrad are being re-equipped in part for the purpose of turning out spare parts for Fordson tractors.

At the present time the number of Fordson tractors working in the Soviet Union is about 20,700, where there were none before the war. It is expected by the end of the proposed five-year period their number will increase to 77,500. This will nearly quadruple the present num-

knecht, who heads the Passaic strikers' relief committee that has been fetching thousands of dollars a week from the rest of the labor movement and conducting kitchens and childrens' camps told of the long struggle that had built a new big local into the official labor movement and said the Passaic strikers would aid the union in all efforts to organize the million workers in the textile industry.

Applaud Weisbord.

Wild applause greeted the name of Albert Weisbord who resigned as the price exacted by the United Textile Workers' Union for its entry into the fight. The cheering came when Gustav Deak, the 22-year old Botany woolen worker, who is now president of the new local union, lauded the "splendid devotion and leadership of our former organizer, Albert Weisbord," and continuing said: seven months he led the strike and the fact that we are able to join the United Textile Workers of America with unbroken spirit and united ranks is a monument to him, and in his withdrawal we have additional proof of Albert Weisbord's unselfish devotion to our cause and to the cause of organized labor."

McMahon Critical.

President McMahon did not respond n similar vein. He lectured the strikers on the propaganda that had been employed and said that he disapproved of the methods used in criticizing the mill owners and the police of the town. He argued that the strikers could not expect their leaders and their opponents to get together and sit at the same time in mutual recognition if criticisms that he charged were of a scurrilous nature were continued. He emphasized that a different leadership had come into the strike but said that the United Textile Workers was determined to win ecognition for the union. Relief activities will continue to be carried on by the old Passaic strikers' relief mmittee.

WARSAW, Poland, Sept. 13 .- The police invaded the apartment of Deputy Ballin, president of the inter-party committee for amnesty for political prisoners in Poland and, after confiscating documents and records of the committee found in the rooms, arrested seven persons who were there quite by accident, having no connection with the committee.

Protest Parliament.

Deputies of the Independent Peasants' Party immediately protested in the Sejm that the raids on Deputy Ballin's quarters had been mada without the consent of the president of the Sejm and therefore violated the law of parliamentary immunity.

The evident purpose of the raids is to make, impossible the work of the inter-party committee which is an alliance of the left parties in an effort to release the hundreds of political prisoners now in Polish prisons. The committee asks the workers of the world to protest against the most recent excesses of the reactionary Polish government.

6,000 Political Prisoners. There are some 6,000 political prisoners in Poland. The Pilsudski government, which came into power thru a military coup in May this year refused to grant amnesty to these prisoners. This act raised a protest thruout the country that resulted in the formation of an inter-party committee in the Polish Sejm. And it is from this need that the Amsterdam International and its affiliating organizations want to extract the maximum material advantages

Amsterdam "nobly" proposed giving a loan, but demanded certain material securities for this loan from the miners. The Dutch Trade Union Federation, headed by the "radical" Stenhuis, is demanding 4 per cent for the loan, whilst the General Federation of German Trade Unions, headed by Leipart and Sassenbach, whose business acumen is higher, is demanding 11 per cent.

That is the way Amsterdam and its henchmen want to secure the prosperity of their funds by drawing on the blood of the miners out on strike, their funds being dearer to them than the interests of the British miners, the working class by taking their than the interests of the spearhead of the working class.

Threatens France in a Speech

ROME, Sept. 13.—Using as his text the unsuccessful attempt made to assassinate him with a bomb by an individual terrorist who had come from France, Premier Mussolini delivered a speech from the balcony of the Chigi Palace, in which he used very undiplomatic language in speaking of the neighboring republic.

Another Threat. "We must put a stop to certain culpable tiresome conditions which we tolerate outside our own frontiers," said the Duce. "We would advise responsible governments to take note of this, because otherwise their friendly relations with the Italian people might become compromised."

Meant France. This referred directly to France, a fact which none of the thousands of fascists who heard his speech overlooked. There is even talk in the press of Italy demanding of France the right to extradite all anti-fascist Italians

This speech of Mussolini can only be considered another sword-rattling demonstration to raise the nationalist pitch of the fascist followers. There can certainly be no desire on the part of Mussolini for war with France at this time. All other things equal, the French army could over-run Italy in short order. International complications would, however, make this a decidedly untactful thing for France to do. Knowing this, Mussolini makes his arrogant threats and boosts his stock among Italian militarists free of

WORKERS WARNED OF VICIOUS OPEN

New York Commercial Issues War Cry

"Wherever possible, managements should take this opportunity to inaugurate the open shop," cries the New York Commercial, mouthpiece of the eastern financial interests, in an editorial July 10.

The importance to labor of this decaration of war demands its publicaion in full:

"Now Is the Time to Open Shop." "The immediate outlook is for a decided increase in the number and importance of labor disturbances. Durng the coming few months there will be an increasing number of strikes, and the number of demands for higher erably enlarged. Evidence of this increase is even now visible, but today's visibility will prove, in our opin-

ion, only the start to greater propor-

tions that will probably reach their eak in September or October.

Caution Is Urged. "In some cases or where particular conditions prevail it would not be wisdom for managements to precipitate open shop acceptance directly out of a clear, blue union sky. In a great many other cases, however, a demand for advanced wages or the threat of a needed to throw overboard the adherence to unionism and inaugurate the open-shop American plan.

Denounces Union Shop. "Totally disregarding the merits of the open-shop system and the utter action at this time would be backed ployed is better today than at any time since the slump of 1920; that the decline in commodity prices since the first of the year has more than neutralized the slight upward trend in living costs, and that the average number of hours worked and the average weekly earnings have been higher this year than at any time since 1922. All of which means that demands for advanced wages or decreased hours of work are entirely out of place at this time. That such demands will be made, however, abundant evidence in-

dicates. "That wherever possible managements should take this opportunity to inaugurate the open shop is also unquestioned by every one having at heart the welfare of American industry."-New York Commercial, July 10,

Many of the trade union delegates who signed the resolution stated that they were not members of any political party and the charge made by O'Mara is obviously not true.

In a Tight Fix. O'Mara was in a very tight fix and had to lean on socialists for support. O'Mara stated that the socialist leaders such as Norman Thomas, when questioned by him at the lecture in New Haven, stated that it is industrial and not political action which is important, and that such of this type are welcome in the federation and not the Communists, who want independent political action. However, in spite of the treacherous act of the socialist party officials many socialist delegates voted for the resolution. The fraternal delegate of the socialist party had nothing to say.

PULLMAN PORTERS' REFERENDUM WILL BEAT COMPANY SCHEME TO REPRESENT ITS OWN EMPLOYES

The Railway Mediation Board will very soon have before it the claim of the Brotherhood of Sleeping Car Porters for higher wages. The claim will involve the recognition of the union because the Pullman Co. which employs practically all the sleeping car porters and maids in the United States will claim that its company union is the proper representatve of the met.

The law provides that an attempt at+ an agreement must be made by the ters, the questionnaire demands union before it can bring its case before the board, and this formality will take a little time. The initial move will occur within the next fifteen days.

The struggle nearly came to a head five months ago when the union with eighty percent of the twelve thousand porters and maids on Amrican railroads already in its ranks was planboard. The dissolution of this board union and the employers have spent

Always Growing.

The union, said G. A. Price, the financial secretary of Chicago division, in his headquarters at 3118 Giles Ave. to a representative of The DAILY WORKER yesterday, has continued to gain in numbers. It was thought right it, and most of the others, who have to increase the initiation fee recently not formally united with it, will also from five dollars to ten dollars, while a month.

This was done to equalize the burden, since those who had the courage and undertook the expense of starting the union should expect a little greater initial financial support It was clear in the beginning that to it from those who came later and profited by all the work done by the pioneers. Unionism is a new thing to Negro workers, said Price, and it may be that some of the porters are repelled by this raising of the initiation, low as it is still compared with the benefits received. But even at that fight any attempt at political action. the porters continue to join, the union

Company's Last Trick.

The man who now sits on it is supposed to have been freely elected by the zone central committee of the company union. This committee is composed of eleven men, two-thirds of whom, says Price, are stool pigeons.

The porter who now occupies a seat on the company union "board of industrial relations" is likewise a company man, chosen because he can be relied on to betray his fellow workers, and

whether the workers would like:

"Recognition by the Pullman Company of the right of their porters and maids to be represented in collective bargaining by an independent union responsible to and supported by these employes alone, with representatives who are not dependent on the Pullman Company for their livelihood?"

Vote Company or Union. And in order that there be no mistake or quibble, the porter or maid is invited, after voting on this question, to signify whether he or she would rather be represented by the 'plan of employe representation of the Pullman Co." or by the Brother hood of Sleeping Car Porters.

It is already clear, said Secretary Price, that the thousands who have joined the brotherhood will vote for vote against the company union. The Pullman Company will have something hard to explain when it gets before the mediation board.

Even the Chicago Bee, edited by Chandler Owen, an official of the union, cannot carry the defense of the union officials against the canards circulated by the Pullman agents because the owner of the Bee, Anthony Overton, is a pure and simple capitalist.

Overton is president of the Douglas National Bank, owner of the Overton building at 36th and State street, and has made a fortune out of the Overton Hygienic Co., manufacturing what are advertised as "High Brown Toilet Preparations."

Cotton Speedingup Is Cause of Depression

Increased productivity of cottonmill abor, more than curtailment of the market for cotton goods, is responsible for the wholesale unemployment and part-time which has characterized the textile industry since 1920. Per capita consumption of cotton cloth has increased 9% from 66 yards in 1914 to 72.5 yards in 1923. But according to the Assn. of Cotton Textile Merchants of New York, the gain in productivity per worker since 1900 is about 22%. This has been due in considerable measure to a 500% increase in the capitalization of the industry, with each worker required to tend more machinery. The capitalization of the industry per worker is now about \$4,000 compared with \$1120 in turn on this larger capital.

Production in Soviet Russia

The March number of the Monthly Circular of the Labor Research Department, London, comments on the remarkable growth of production in Russia in contrast to the industrial stagnation which is evident in other countries of Europe.

The following excerpt from the above named official publication of the Trade Union Congress should carry more conviction than the doleful concoctions that appear in the capitalist press hostile to the

"While unemployment in Germany, England and several of the smaller European countries has been rising steadily, and for several months has been at a level which affects a very large proportion of the workers in each country, the number of industrial workers in Russia has been steadily increasing."

Oscar would then feel that he amounted to something, tho he often felt like knocking the boss' head off when he bawled him out because the gang did not empty the car on time.

Oscar would tell those things to his wife sometimes. "I am no slavedriver and nobody will ever see me rushing the gang," Oscar would say proudly. Molly would say nothing, but she thought much. Another child was coming, but Oscar's pay remained

Year followed year and Oscar and Molly grew old. Seven children were born to them. The four eldest were now working. The girls were stenographers and the boys worked in grocery stores. Oscar thought one of the boys should be a priest and the other a doctor. He thought the girls lap of his life. Things seemed much should become nuns or marry business better now. The work was just as men. Whatever they did was little hard. The pay was just as small good to Oscar, because they had their pany, was found asphixlated in his "It is as easy to feed two mouths as own troubles. Oscar was still working room yesterday. No doubt the association for the protection of the United States from the pope will jump on the story of the four nuns who were caught with \$5,000 worth of dutiable goods crossing the Canadian border into the United States. The sisters at first declared they had nothing for the customs, but the ladies looked rather rotund, so they were searched. The officers found lace sewed into specially made petticoats. The nuns were at a loss to know how the lace got there. And the officers were considerably more amazed when they found babies' clothes with the lace, the priests garments and the table linens. J. Arnold Ross is a wealthy independent California oil operator who was first Jim Ross, a teamster and then a merchant before he went into the oil business. Bunny, his son, is a sensitive boy, learning the oil business and now demands of the men will be granted and Bunny is very happy. going to high school. Dad has a field in the San Elido Valley on the Watkins they were both much younger. He liked Paul who had run away from home because he didn't like the religious discipline imposed by his father. Paul is now a carpenter in the new Watkins field and his sister Ruth is keeping house for him. The Watkins field is really Bunny's and he has been made very wealthy thru the bringing in of a great well which has grown to fourteen derricks. In the meantime war with Germany looms and the men in the oil field under the leadership of an organizer for the Oil Workers' Union, Tom Axton, perpare to strike for an eight-hour day and a raise in wages. Paul becomes a leader of the strikers and a battle is on betwene the oil workers and the Oil Operators' Association which supplies thugs and gunmen to the various operators, including Dad, during the strike. Bunny is back at school and receives the reports only thru the press. He is somewhat sympathetic to the strikers and doesn't believe the calumnis printd in the press about the strikers. Bunny goes back to the field and gets a chance to talk with Paul who has now become a strike leader and editor of the strikers' paper. He tells Bunny he is too soft to do what he would like to do, stand with the atrikers. That same day, news comes from Washington that because of the war the demands of the men will be granted and Bunny is very happy.

QUCH was the way of Bunny's initiation into the adult life. Gone were the days of happy innocence when he could be content to sit holding hands with Rosie Taitor. "Holding nands" was now walking on a slippery ledge, over a dark abyss where pleasure and pain were so mingled you could hardly tell them apart. Bunny was frightened by the storm of emotion which seized upon him, and still more by the behavior of the girl in his arms; a kind of frenzy shook her, she clung to him in a convulsion of excitement, half sobbing, half laughing, with little cries as of an animal in pain. And Bunny must share this delirium, she would not have it otherwise, she was furious in her exactions, the mistress of these dark rites, and he must obey her will. The first time, the boy was overwhelmed by the realization of what he had done, but she clung to him, whispering, "Oh, Bunny, don't be ashamed! No, no! I won't let you be ashamed! Why haven't we got a right to be happy? Oh, please, please, be happy!" So he had to promise, and do his best.

"Oh, Bunny, you are such a sweet lover! And we are going to have such good times." This was her crooning song, wrapped in his arms, there under the spring-time moon, which is the same in California as everywhere else in the world. And when the chill of the California night began to creep into their bones, they could hardly tear themselves apart, but all the way over the dunes they walked arm in arm, kissing as they went. "Oh, Bunny, it was each other. But now they were old bold and bad of me, but tell me you forgive me, tell me you're glad I did it!" It appeared to be his duty to comfort her.

Driving back to Beach City they talked about this adventure. Bunny hadn't thought much about sex, he had no philosophy ready at hand, but Eunice had hers, and told it to him simply and frankly. The old people taught you a lot of rubbish about it. and then they sneaked off and lived differently, and why should you let yourself be fooled by silly "don'ts?" Love was all right f you were decent about it, and when you had found out that you didn't have to have any babies, why must you bother to get married? Most married people were miserable anyhow,, and if the young people could find a way to be happy, it was up to them, and what the old folks didn't know wouldn't hurt them.

Did Bunny see anything wrong with that? Bunny answered that he didn't; the reason he had been "such an old prude," was just that he hadn't got to know Eunice. She said that men were supposed not to care for a girl who made advances to them; therefore, she added with her flash of mischief, it would be up to Bunny to make some advances from now on. He said he would do so, and would have started at once, only Eunice was driving at forty-some miles an hour, and it would be better to hurt her feelings than to upset the car.

Were there other girls like Eunice, Bunny wanted to know, and she said there were plenty, and named a few, and Bunny was surprised and a little shocked, because some of them were prominothing to do with the British mining strike as the figures do not movie star saw Potemkin in Berlin he has declared the picture "the greatest fore. Eunice told him threw their hats in the air and pre- about their ways, and it was a good deal like a secret society, withdicted that war was only a horrible out any officers or formal ritual, but with a strict code none the less. They called themselves "the Zulus," these bold spirits who had dared to do as they pleased; they kept one another's secrets faithfully, and helped the younger ones to that knowledge which was so essential to happiness. The old guarded this knowledge jealously-how to keep from having babies, and what to do if you got "caught." There was a secret lore about the art of love, and books that you bought in certain stores, or found stowed away behind other books in your father's den. Such volumes would be passed about and read by scores.

> It was a new ethical code that these young people were making for themselves, without any help from their parents. Eunice did not know, of course, that she was doing anything so imposing as that; she just talked about her feelings, and what she liked and what she feared. Was it right to love this way or that? And what did Bunny think about the possibility of loving two girls at the same time? Claire Reynolds said you couldn't, but Billy Rosen said you could, and they were wrangling all the time. But Mary Blake got along quite happily with two boys who loved her and had agreed not to be jealous. This was a new world into which Bunny was being introduced, and he asked a lot of questions, and could not help blushing at some of Eunice's matter-

> Bunny crept into the house at two o'clock in the morning, and no member of the family was the wiser. But he was equally as late the next night, and the next-had he not promised Eunice to "make the advances?" So of course the family realized that something was up, and it was interesting to see their reactions. Aunt Emma and Grandma were in a terrible "state," but they could not say why-such was the handicap the old generation imposed upon themselves. They both went to Dad, but could only talk about late hours and their effect on a boy's health. And Dad himself could not do much more. When Bunny said that he had been taking Eunice Hoyt driving, Dad asked about her, was she a "nice girl?" Bunny answered that she was the treasurer of the girl's basket-ball team, and her father was Mr. Hoyt, whom Dad knew, and she had her own car and had even tried to pay for the supper. So there could be no idea that Bunny was being "vamped," and all Dad said was, "Take it easy, son. don't try to live your whole life in a couple of weeks.

> Also there was Bunny's sister, and that was curious. Had some underground message come to Bertie, through connections with the "Zulus?" All that she said was, "I'm glad you've consented to take an interest in something beside oil and strikers for a change." But behind that sentence lay such an ocean of calm feminine knowledge! Bunny was started upon a new train of thought. Could it be that late hours meant the same thing for his sister that they had suddenly come to mean for him? Bertie was supposed to be dancing; and did she always come directly home, or did she also park by the wayside? Bunny had got over being shocked by the parking of Eunice's car, but it took him longer to get used to the idea of the parking of his sister's car. He bagn to notice, as he drove along the highways in the evening—what a great number of parked cars there were!
