SPEAKS THRU

PUPPET DIAZ

Eurrent Events By T. J. O'FLA HERTY

"MEXICO Defied by Nicaragua," shricks a headline in the Chicago Tribune of last Sunday. The truth is that the United States threatens Mexico thru its puppet Adolfo Diaz, president of Nicaragua by grace of United States bayonets. United States intervention in Mexico is now a question of the moment. The stage is set, the public mind has been plaughed, fertilized and furrowed and the next step is the inevitable "overt act" which can be produced at discretion.

THE arrogance of our dumbbell sec-I retary of state passes all bounds. His arrogance is measured by the number of poison gas bombs he can command. But it is a mistake to think that United States imperialism will have easy sailing in South America. The resourcefulness of "weaker peoples has been adequately proven by China. Imperialism must go on or die. Like the drone that passes out of the picture after it does the only fruitful act in an otherwise useless life, imperialism is driven to its own destruction, the while it is expanding. Its a case of being damned if you do under her bed for guns. It's a long

AFTER eight years of peace Ger-many has finally won the war. We are informed that the allies-or what is left of them-have lifted arms control supervision of Germany's military machine. Not that Germany took the supervision any more seriously than the average police captain takes prohibition. But it galled Germany's dignity to have allied snoopers looking under her bed for g uns. Its a long time between wars but the gods must have a jolly half hour laughing over the allied victory of 1918. The only countries that won are the United States and Germany. The victors are principle. so victorious that they would have a hard time borrowing a dime on Christmas day.

STALIN AFFIRMS POSSIBILITY OF SOCIALIST VICTORY IN THE SOVIET UNION BEFORE COMINTERN

The following is a cabled report of the seventeenth session of the plenum of the executive committee of the Communist International meeting in Moscow with delegates present from nearly all of the 58 partles thruout the world affiliated. Previous special cable dispatches to The DAILY WORKER have reported speeches and reports on the following important questions: The international situation of capitalism and the tasks of the Communist Parties; the lessons of the British general strike; the significance of the events in China and the Far East. The present report, giving Stalin's speech and Zinoviev's remarks on the situation in the Communist Party of the Soviet Union, throws a vivid light on the controversy just completed between the opposition, led by Trotzky, Kamenev and Zinoviev and the Central Committee of the Communist Party under the leadership of Stalin, Bucharin, Tomsky and others.

REPORT OF STALIN'S SPEECH

(Special Cable to The Daily Worker)

MOSCOW, U. S. S. R., Dec. 11. (Delayed.)-The seventeenth session of the plenum of the Executive Committee of the Communist International on Dec. 7 heard Joseph Stalin, secretary of the Communist Party of the Soviet Union, report on the Russian question. In his preliminary remarks he made the following points:

The struggle within the Communist Party of the U.S.S.R. dates from long ago; the history of the party is a history of inner contradictions, the overcoming of these contradictions,

and the gradual consolidation of the party on the basis of victory over fundamental contradictions arising during the development of the party and the proletarian struggle. Inas much as the contradictions are fundamental and not tactical, no middle line, no compromise is possible. Concealing the fact of the existence of contradictions would mean the party's ideological death. It is absolutely necessary to fight out the divergencies of

natural resources. No Mention of U. S. Club.

Diaz speaks of "Mexican aggression" but says nothing of the open forcible domination of Central American politics by the United States. He takes up the cudgels not only for imperialist reaction in Nicaragua, but for reaction in Mexico as well. He ays:

My government feels that many worthy Nicaraguans, members of the historic and illustrious liberal party of this country of noble traditions, have in the blindness of political passion alled themselves with the forces of communism, radicalism and religious persecution now in control and running rampant in Mexico, but not representative of what is believed to be the true sentiments of a large majority of the Mexican people.

According to Daiz, the United States is a benefactor of small nations.

My government felt confident that the government and people of the United States who have always shown a high regard for the independence and rights of sovereign states, however small and weak, would accord their moral support. to the government of Nicaragua In its efforts to defend the institutions of this nation against the aggrescions of Mexico, a country twenty times larger than Nicaragua.

"The aggressions of Mexico," were he support of a popular revolution against a dictatorship set up under American protection and the interference of Mexico in this respect was not only a right but a duty, say liberals here.

Two Latin-American Groups.

The manifesto of Diaz is proof of a clear division on foreign policy among the Latin-American states. One group backed by the honest nationalist eig

from imperialist pressure. The other group consists of individuals whom the American state department and private capital has been able to buy and who attempt to organize all the internal forces of reaction-landlords, clericals, etc. against popular government and for American imperialist domination.

Written at U. S. Direction.

The Diaz manifesto was undoubtedly written under the supervision of the American state department and it has as its main purpose the creation of further pressure upon the Mexican government to get it to abandon its intention to enforce the land and mineral provisions of the 1917 constitution.

It is doubtful if this document will exert much influence in convincing wide sections of the Latin-American people that Mexico has less gight to support a popular revolution in Nicaragua than the American state department has to support a dictator possessing no mandate of any kind from the Nicaraguans.

Black Sea in Rowboat

ODESSA, U. S. S. R., Dec. 12 .-- A 16-year-old girl, Tamara Schumarino, has crossed the Black Sea in a row boat, a distance of about 1,000 miles, and is the first women to shoot the Dnieper rapids.

In recognition of her daring feat. the girl has been made an honerary member of the Red Fleet, the first woman to be so honored.

tion of socialist construction has only a theoretical interest. The question has the greatest practical importance: whether or not it is possible, today, Quoting Engels as authority, Stalin under the new system and during the emphasized that the the proletarian partial stabilization of capitalism to party must not become a debating build the socialist economy. club, it can withstand the pressure of Charges Trotsky Distorts. bourgeoisie influence only thru a hard

position in the Communist Party of social-democratic views which he held in 1915 in this respect.

The sixth question refers to the problem of the prospects of the proletarian revolution. Quoting from Trotsky's speech to the Fifteenth Congress of the Communist Party of the U.S. S. R., Stalin pointed out that Trotsky had misquoted and distorted Lenin's

words when he alleged that Lenin estimated from thirty to forty years as the period necessary for the building of socialism. What Lenin actually said was that for the next ten or twenty years the correct relations must be maintained with the peasantry in order that victory be assured of world-wide importance otherwise there is a possibility of failure in

wenty or forty years. The seventh question is, with whom can a more profitable alliance be

made, with the world proletariat or the peasantry of the U.S.S.R. This is put by the opposition in a childish. literal way, as if both the world proletariat and the peasantry were eagerly competing to offer themselves as allies. The actual position is that the U. S. S. R. proletariat is yearly consolidating its power, rallying the peasantry, scoring successes in socialst construction and strengthening the bonds of friendship with the world's workers and the oppressed nations. Under such conditions there is no reason to deny that the U.S.S.R. proetariat has all chances to conquer its

wn bourgeoisie and continue successthe very revolutionary traditions of fully to build socialism in their own the Soviet Union proletariat will not country despite the capitalist encirclecountenance frank opportunists as for ment. Henry Ford Displays His FORM COMBINE Ignorance With Another TO FIGHT FOR Wild Attack on the Jews

By J. LOUIS ENGDAHL.

HENRY FORD has come out with another attack on the Jews. This time he has been egged to action by Oscar Strauss, the New York banker-philanthropist, who denounced the Detroit flivver kaiser before the national council on Palestine, meeting in Boston.

Ford launches his assault against the Jew along three lines: (1) That he controls all the financial centers; (2) That he owns the press or controls it; (3) That he controls the revolutionary elements of the world.

Ford's arguments grow directly out of his own economic position. He tried to finance his own enterprices without the aid of Wall St., which means in spite of the power wielded by finance capital. In attacking the Jewish bankers, he merely crystallizes his opposition against Wall St. on the heads of a group of financiers that has been especially successful in the money marts of the world since the days when trade and commerce first began. But the Jewish bankers are merely a part, a big part to be sure, but merely a part of the whole human element that enters into the capitalist structure, which includes Ford and which Ford will not attack.

. . .

desiring more money and power under capitalism, it is only reasonable to expect that Jewish financiers. like all other money lords, should buy up newspapers and other periodicals as propaganda mediums, Ford does the same. He puts huge sums into his publication under the high-sounding name of "The Dearborn Independent," which is independent of nothing. It is a slave of Ford's ideas, voicing Ford's views, just as much as the operator on Screw No. 11,001 is enslaved to that screw, or, exercising any spirit of independence is quickly fired. That finance capital, especially its Jewish section, should own more newspapers, more movie houses. more theaters, than are to be found in the possession of independent capitalists, of which Ford is the most prominent type, is only an admission of the weakness of the position of the independent industrial

capitalists. . . .

Ford, of course, ties himself in a complete knot when he continues his argument to its ridiculous conclusion by declaring that the Jew (the international Jew) "controls the revolutionary elements in the world, on the one hand, and the ultra-conservatives on the other, so he has equal power in Communistic Russia and in capitalistic England," inferring that the Russian Jewish Communist is working hand in

workers organize, building their own press, in this case the New York (Communist) Freiheit, and organizing their own struggle, not for the abolition of Jewish industrial and finance capital as apart from Irish, or German or native-born American industrial and finance capital, but for the ending of the whole capitalist system, which includes Ford.

. . . It is not strange that Ford should denounce both "Communist Russia"

and "Capitalist England" in the same breath. Before the war England was the stronghold of finance capital. Today it must struggle for a place in the sun with the new stronghold of finance capital---Wall Street. It is against finance capital with its imperialist program that Communist Russia wages its attack. Ford, the industrial capitalist, who tries to finance his own enterprises, is caught in the "No Man's Land" between these opposing forces.

It is inevitable that, in time, Ford will be crushed between these two

opposing forces unless he surrenders to either side. He will not surrender to the workers. He may surrender to Wall Street-to finance capital, becoming its ally, the ally even of the Jewish international bankers whom he now denounces, as well as the ally of international bankers of every other race and nationality. He will either surrender to finance capital or be crushed by it. That is the meaning, for instance, of the struggle between the Ford Motor company and the General Motors corporation, the latter organized by the House of Morgan.

Thus finance capital consolidates or crushes. . . .

It is Andrew Furuseth, the head of the International Seamen's Union, who shricks as loudly about the "yellow peril" as Ford does of the "Jewish peril." Furuseth, during his many years in the American labor movement, has always stood up and proclaimed against the rising army of the Orient that will wage war against white civilization. To be sure, the struggle is on in the Orient. But it is now a "red peril" instead of a "yellow peril."

The Chinese masses are fighting the

WORLD RUBBER

U. S. Capitalists Ready for Battle

(Special to The Daily Worker) NEW YORK, Dec. 12 .- A score of the largest and most powerful automobile manufacturers and rubber manufacturers of the United States today were banded together in a gigantic rubber-buying pool aimed to break the monopolistic grip of England on the

world's supply price of raw rubber. Arrangements for a joint purchasing fund credit of \$40,000,000 were negotiated with the National Bank of Commerce of New York and the International Acceptance Bank.

The plan, known to have been under consideration for several months, was attributed to Charles B. Seger, president of the United States Rub ber company. While refusing to divulge details. Seger intimated that the pool funds would be utilized for purchases of huge stock of crude rubber at times when the market is favorable.

Big Companies in.

Other large manufacturers associated with the United State Rubber company in the pool were the General Rubber company, B. F. Goodrich, Goodyear, Firestone and Fisk Rubber companies, General Motors, Studebaker, Willys-Overland, Dodge, Packard, and other automobile manufacturers.

It has been estimated that the synlicate would have a purchasing power of 50,000 tons of crude rubber annually.

. . . .

Britain Not Worried.

LONDON, Dec. 12 .- No danger of anything resembling a trade war in rubber was anticipated today by Brit. ish rubber interests as a result of the purchasing pool organized by American rubber interests.

British rubber interests welcome the new American combine, the head of one of the largest rubber syndicates in Great Britain told correspondents.

Can Take Care of Trade.

"Such a combine will help to stabilze prices and prevent seasonal flucuations," this spokesman said. "The British rubber capitali is so large hat there is no possible danger of anything resembling a trade war as he result of the Americans pooling heir resources

Raw rubber advanced on the market today, upon news of the new combine.

The colonial office stated today that the American combine will not affect the operation of the Stevenson plan, and that rubber production for the coming year has been already fixed. insofar as British rubber is concerned.

glove with the British Jewish finance capitalist against the interests of Henry Ford, which Ford interprets no doubt to be the interests of the whole American people, or "the common people of the world." * * *

There is no doubt that the Jewish people exercise a tremendous power, and play a considerable role in the activities of the world. But the Jewish people, like all other races and nationalities, are divided along class lines, into great capitalists, small, capitalists, numerous middle class elements and the great masses of workers, which also have their various categories.

Ford will not admit that there is such a thing as a class struggle. He doesn't see the necessity for any, not even for a trade union, let alone a Communist Party. He offers his form of paternalism as the cure for all society's ills.

If Ford were really interested in fighting the Jewish finance capitalists then he would support the social elements that make war upon these capitalists, the outstanding element being the Jewish workers. But he will not do this, because Ford is himself a capitalist fighting the workers.

. . .

The struggle among the Jewish people themselves is best typified in the garment industry. Here the bankers help the industrialists finance their enterprises and join with them in their wars upon the Jewish workers, supported by the Jewish-owned capitalist press, like the New York Times, the New York World and other sheets.

Just as Henry Ford has his renegade socialist propagandist, Allan Lewis Benson, candidate of the socialist party for president in 1916, and even had the support of exsocialists and worker and farmer radicals in support of his presidentials aspirations in 1924, so the Jewish capitalist front against the Jewish workers has its support in the socialist officialdom of the garment president of the International Ladies' Garment Workers' Union, and in the Jewish Daily (socialist) Forward.

A Proletarian Letter to a Wall Street Banker

Dear Plute:

December 13, 1928

SIT UP in your easy chair for a moment and pay attention! It's a proletarian talking to you. Not one of your crawling bootlickers, but a class-conscious worker. So don't mind if you find this letter a bit rough on your bourgeois feelings.

I notice that you are feeling pretty good these days—raking in the shekels on a grand scale piling up record-breaking dividends and big interest on your money: Cal's building a bigger war machine for you, reducing your taxes and squeezing us workers. They are getting after the Reds too, I see—the whole gang—Woll, Sigman, Lewis, McMahon, the bosses, the plute press, and the courts. And meanwhile The DAILY WORKER, the fighting organ of the proletariat, is up against a serious crisis, and has raised only \$23,869.42 of the \$50,000 it needs. Looks like you're in clover.

But hold on, old boy. You'd better not crow until you're out of the woods. If you count on us being licked, you've got another count coming. Put this in your meerschaum and smoke it. WE HAVE JUST BEGUN TO FIGHT.

And the first job we're tackling is to KEEP THE DAILY WORKER. We'll raise that \$50,-000 and no plutes or labor fakers will stop us. We'll keep The DAILY WORKER, if we have to move heaven and earth to do it. We'll not only keep The DAILY WORKER, but we'll build it up day by day, into a mighty organ of the class struggle, an organ to fight you and your kind, an organ of the left wing of the labor movement, an organ that will help to establish a Labor Party in America as a first step toward a Workers' and Farmers' Government in America.

Hoping that I haven't made you feel bad before Christmas, I am,

Yours to

KEEP THE DAILY WORKER

Organizer Was Victim of New York finance on the basis of co-Hired Gunmen

MORGANTOWN, W. Va., Dec. 12 .--(FP)-After a year of mystery it seems that the supposed accidental The financial objective has been the death of Lawson McMillion, lumbertack and radical organizer in West the United Mine Workers of America. Virginia lies suspiciously near the door of the Spring Creek Lumber Co. and the lumber trust.

Attacked by Boss Gunmen.

About 21/2 years ago he was attacked by lumber trust gunmen in Rich- ing more than honorable co-operation mond, W. Va, wounded with an ax with the boss ends practically in coand left to die. But he recovered and operation on the bosses' terms. then the courts got after him on a treason charge at Marlinton but failed to convict. Some months later he was Greever, general counsel of the nonagain in a hospital as a result of a murderous attack by a corporation gang. The American Civil Liberties Union demanded an investigation of Gov. Gore and while this was pending McMillion was reported accidentally shot dead while hunting. That was in October 1925.

A friend of McMillion, I. G. Miller of Morgantown, suspected foul play but was unable to investigate on account of ill-health until the fall of 1926. Then he discovered at the lumber camp where McMillion had worked that a man named Christian admitted shooting the labor organizer oal. but claimed that he was walking behind McMillion with his gun cocked and a twig discharged it. Examination of the body however revealed that the shot had entered near the top of the shoulder and ranged down. There had been no regular inquest or doctor to report the case and the company had its employes act as a coronor's jury.

"These and many other things leading up to and following McMillion's death," says miller, "convinced me that he was killed intentionally by a hireling of the lumber trust or the Spring Creek Lumber Co. The case demands investigation by the Civil Liberties' Union and the I. W. W."

At meetings in

Washington in August and in Cleveland in November the committee and its special committee of five members chosen to deal with this matter decided that all would support each other in the negotiations.

Under the Watson-Parker law the management and the workers "must" grievances arising between the companies and the men. But these boards may be either national, regional or confined in authority to one system each. When the unions proposed some time ago that regional boards be created the reply of the management to all the organizations was that

the management would "prefer" system boards. At the same time there became apparent a definite campaign by the managers to split off the four brotherhoods on the trains from the rest of the unions. When a suggestion was made that the train dispatchers, telegraphers and switchmen should be included in the train crews' group the managers objected.

cial handkerchief folding can now be done by a machine with one operator doing more work than four workers can under old methods. Two Passaio men have invented a folding machine which works for handkerchiefs, towels, napkins, pillow cases and similar

articles. They have organized a machine manufacturing firm to supply the many handkerchief factories of this district. Passaic is one of the main handkerchief manufacturing centers of the United States, turning out 75,000 to 100,000 dozens daily. The new machine will fold 150 dozen of these an hour.

ship, by an overwhelming vote, approved the step that would bring this formerly weak, independent, isolated union into line with the most powerful and best organized union in the shoe industry.

Approved Amalgamation.

Mr. Seidel, the then organizer of the independent union of workers on children's shoes, was present at the social meeting where the decision was made to join the Protective Shoe Workers' Union. After the vote was taken he expressed himself as being heartily in favor of the move, and in a declaration before the membership asserted that he would do all in his power to aid the progress of the organization. He concluded his remarks by assuring those present that he was leaving the city and would no longer take an active part in the affairs of the shoe workers. Some of the members of the union doubted his motives as well as his word.

Those members who questioned the honesty of this man, Seidel, proved to he correct.

The few followers that he had were astonished a short time ago when there appeared in the press a notice calling the children's shoe workers to an organization meeting and signed by Seidel as organizer of an entirely new union.

Failed to Attract.

Coolidge to Strike.

Coolidge is expected to remain candidate until the last possible minute in 1928, since he hopes to find the democrats so divided by religious quarrels at that time that he can break the third-term jinx. He knows he can force the republicans to re nominate him, if he uses the full power of the patronage machine and the Negro delegates from the south, and if no sensational scandal involving his own office breaks in the spring of election year. But if he finds himself unable to run he is expected to

try to hand the nomination to Hoover. Favored by Protectionists. New York politicians believe that Morgan & Co. want Coolidge to run in 1928, while the high-protectionist manufacturers look upon Longworth as better material. Lowden of Illinois, whose farm relief ideas have been denounced recently by Senator Borah, is considered too "radical" for the eastern capitalists. Borah, incidentally, is hinted at by the Long worth forces as their possible secre tary of state. They hope that the tactful use of his name may keep the progressives from attacking "Nick"

OPTICIANS FIGHT FOR BETTER PAY, **WORK CONDITIONS**

Are in Fourth Week of **New York Strike**

By a Worker Correspondent.

NEW YORK, Dec. 12 .- Highly skilled mechanical opticians, industrially organized into the United Brotherhood of Optical Workers are now in the fourth week of their fight to gain recognition and enter the ranks of militant trade unions. With the lessons of two previous attempts since 1916 fresh in their minds, the optical workers are out to win the following demands: recognition of the union, closed shop, 44-hour week and pay for all legal holidays. Tho highly skilled workers, the average wage is less than that of the hod carriers.

Bosses Fight.

Knowing that plans had been laid before the strike was called for a national campaign to organize the upwards of 30,000 optical workers in the industry, the bosses are making every effort to break the morale of the workers by spreading defeatist propaganda among them, writing them Individual letters, offering increases in wages and the notorious B. & O. plan of organization. The answer of the optical workers was manifested in 'redoubled efforts to picket lines and a greater determination to win. Out of town optical workers will benefit by a victory in New York and may render moral and material aid in the following manner:

1. Be on the lookout for work sent from New York.

2. Print handbills for shop distribution, warning of the strike and to beaten up by him, thrown on the disregard news ads for strike break-

3. Make shop collections.

Prepare the stage for a branch of the national organization in your narrow margin when he was shot at, city.

WORKERS FACE

Car Plant Speeding Up

Before Shutdown

By JOE PLOTKIN

JOB LAYOFFS

By LELAND OLDS, Federated Press.

The seasonal improvement in factory employment thruout the country which began in August failed to carry on into October, according to the U. S. department of labor. The general level which maintained a lead over 1925 thru the first 9 months of the year has fallen back to the October 1925 mark.

The total distributed in wages, however, continued to gain, increasing 3.7% in October to a level nearly 21/2% above October 1925. This resulted from gains in fulltime operation. Factory wages in October 1926 averaged \$27.20 a week compared with about \$26.60 in October 1925.

This report, like those immediately preceding, shows marked increases in employment compared with 1925 in industries manufacturing new productive power but sharp reductions in +

industries producing goods for the consumer. Productive capacity grows tho consumers can't purchase all that can be turned out today.

"The outstanding ains over the 12month period," says the report, "were structural ironwork, foundry and ma-

chine shop products, machine tools, electrical machinery and steel shipbuilding. Notable decreases in employment in this comparison with Ocober, 1925, are shown in all the textile industries except cotton goods (which shows a small increase), automobiles, hardware, steam fittings, sawmills and millwork, cement, stamped ware, cigars, carriages and wagons."

More Steel Workers.

tional Industrial Conference Board, Plans producing iron and steel prodan employers' group. acts all the way from pig-iron to the The department of labor has cominished machine tool or skyscraper puted that it required \$2,300, when girder employed 5 per cent more food was somewhat higher than at workers than a year ago and paid 7.6 per cent more a week in wages. But the huge automobile industry reported 12 per cent fewer workers than in October, 1925, and a reduction of 15 per cent in the amount paid each week in wages. The textile group shows heavy cuts both in employment and in total wages thruout the garment trades. In men's clothing there was 4 per cent fewer workers and 3.4 per cent less

ployment was down 5.5 per cent and wages 6 per cent, in women's clothing 6.5 per cent and 12.1 per cent, while in millinery and lace goods there were

15.2 per cent fewer workers than in October, 1925, and total wages had been reduced 12.6 per cent.

See Thru Hoover. This lack of balance between pro-

duction of productive equipment and production for consumption worries business men who attempt to forecast the future of industry. Calling

attention only to the general employment figure, Secretary of Commerce trade is seasonal and the average rate Hoover radiates optimism. He is a Coupled with other devices of the good press agent for Coolidge prosperity. But the best business observers know that the foundations of prosperity are shaky and discount Hoover's wind as simply for popular con-

sumption. Below 1923 Level.

BREAKING CHAINS' GIVES VIVID

1/2 per cent below the 1923 average sive return to the investing class.

Building—But Not for a Day.

Experience is often an expensive but effective teacher. The present financial crisis of The DAILY WORKER, bad as it is, will have been valuable for us, if it will have taught us that to build our paper into an effective mass organ, we must have an energetic and well-organized network of agents thruout the country. The entire future of The DAILY WORKER depends upon this important factor. Unless we succeed in this, we cannot hope to establish The DAILY WORKER on a firm and substantial basis.

These agents, at least one in every town and section, must serve as the live connecting links between The DAILY WORKER and the masses. They must serve as the vanguard of The DAILY WORKER, as our confidential field agents. They are the ones who will push The DAILY WORKER into ever-widening circles of the working class, organizing free distribution, circulation and subscription campaigns. They are the ones who will keep us constantly posted on the important industrial news of their particular locality. The DAILY WORKER agents will be the backbone of The DAILY WORKER.

A second-rater cannot do this work. It requires imagination and initiative to develop practical schemes for circulating our daily. It requires the courage to face rebuffs and disappointment. It needs someone with force and push. With such a comrade in each important city and community in the United States, The DAILY WORKER can laugh at the prospect of future financial crises.

These agents will be able to gather around themselves a group of enthusiastic boosters, who devote themselves ardently to the task of building up our paper. Our foreign language comrades have been able to establish such organizations, as singing societies, dramatic clubs, etc. arranging various activities for the benefit of The DAILY WORKER. We can do the same, and improve upon their methods.

Those who are supporting The DAILY WORKER during the present financial difficulties will be glad to learn that the management is determined to lay the basis for a broad, supporting organization for our paper, so that we may be insured effectively against the recurrence of these difficulties. To this important task, we invite the fullest co-operation of our readers.

BERT MILLER.

The Coal Miners' Election Does Not End the Struggle for Fighting Unionism

Tomorrow is election day in the United Mine Workers of America.

The election comes at a time when the forces of reaction in the American labor movement are arming for a new drive on the progressive elements who are opposed to the "worker-employer cooperation" policy of the trade union officialdom.

In the United Mine Workers this policy has found expression in the anthracite agreement with its tacit abandonment of the closed shop and the acceptance of arbitration. It likewise found expression the period when imperialism endeav in the "gentlemen's agreement" between the Lewis machine and the ored to throttle them; that these times coal barons to drvie 200,000 miners out of the industry.

While the coal operators have been allowed to violate the Jacksonville agreement at their pleasure without being called to account creative forces of the masses of the by the Lewis machine in any effective manner, war has been made on the most loval and militant members of the union. The expulsion policy of the Lewis machine has as its object the crushing of all opposition to making the union a semi-official organ of the coal barons.

The union faces the expiration of the Jacksonville agreement next spring with 70 per cent of the coal mined being produced in non-union fields whereas, at the beginning of the Lewis dictatorship, only 30 per cent of the coal came from non-union fields.

The Lewis machine can be judged and condemned as crooked, incompetent and a menace to the life of the union by this one fact alone

succeeded in crushing out all opposition any more than it has succeeded in strengthening the union.

The "Save the Union" ticket, headed by John Brophy, William Stevenson and William J. Brennan, is unquestionably supported by a big majority of the membership.

In an honest election this ticket will win.

But it has been a long time since there was an honest election in

the United Mine Workers.

The Lewis machine is determined to hold onto its jobs and will stop at nothing to maintain its hold.

There must be no let-up in the struggle for a strong, fighting Party, advocating the overthrow of the union no matter what the Lewis machine does. From the election to the convention, from the convention to preparation for the new party. struggle next spring-this is the road the progressive bloc in the

U. M. W. of A. has to travel. It alone represents the interests of the union membership against the interests of the coal barons. If it falters and fails to wage a continual struggle for its program and is dark indeed.

For the sake of the whole labor movement, which would receive a staggering blow if the U. M. W. of A. is further weakened, the opposition to the Lewis machine cannot cease fighting until control Needle Trades Labor of the union is taken from the hands of an officialdom which long ago stopped thinking in terms of the interests of the coal miners of this continent.

The Odessa Conference Between the Soviet Union and Turkey

By S. IRANSKY. THE meeting of Comrade Georges Chicherin with the Turkish foreign minister, Tewnk Rushdi Bey, has attracted general attention. Th bourgeois politicians and journalists are exerting all their powers in order to show the "real meaning" of this neeting

Behind the words of sincere friendship spoken in Odessa they see everyhing possible except that which is to be inferred from these words. They imagine relations between the peoples cannot be otherwise than "in accordance with their own model," "league of nations of the east," "Pan-Asiatic league," "fight against Italy and Great

Britain," etc.-this is how they interpret the meeting in Odessa. The Difference.

B^{UT} they do not see the other, the real aspect of the matter. It official British journalists, Augur in the October number of the Fortnightly would seem as if they had forgotten Review and Paulson Newman in the that the Soviet Union and also Tur-October number of the Nineteenth

key, as Comrade Chicherin expressed it, "have experienced every ordeal in are past forever and that both countries have concentrated their forces

on peaceful work, upon developing the people.' They do not seem to notice what it is that unites the peoples of Turkey

and of the Soviet Union. "The Soviet Union," says Comrade Chicherin, "is fighting against the attempts of the imperialists to enslave

it economically, against the attempts ness." He further develops the idea that the Dodecanese Islands are for to compel it to pay the czarist debts, etc.; the Turkish people are fighting the Italians a splendid jumping-off

ground into Asia Minor," and that against the attempt to deprive it of its economic and political independ-"this cannot be prevented."

Paulson Newman develops this

Tewnk Ruchdi Bey summed up the theme and points out that the only ! exchange of opinions which took place possibility for Turkey to secure guarantees against the Italian danger exin Odessa in the following words:

"The close friendship existing be- ists in an understanding with Great ween the Soviet Union and Turkey is Britain and the abandonment of an one of the necessary pre-conditions of independent national policy. He de-peace in general and also of a peace- clares straight out that Turkey is incapable of remaining completely independent, without some sort of foreign influence. She must submit to the

T is such a language, in which there leadership of the west, otherwise "she is no trace of agressiveness, the will find one fine day that she has language of peace, of brotherhood, of lost her territories." equality and friendship, that the diplo-

Newman writes further as follows: mats of the Soviet Union and of Tur-"Obviously the only means which Turkey has in order to save herself The press of the Soviet Union and from this danger is gradually to of Turkey also speak in the same change her policy in such a manner that it permits the European ele-The diplomats and journalists of ments which are friendly disposed the west use a completely different towards her to guide her. At the present time, when relations be-In this respect the articles of the tween Great Britain and Turkey are satisfactory, there are obviously no obstacles to the bringing about of a final approchement between both countries in the interests of both Century, are exceedingly characterisparties.

"As far as Turkey is concerned, such an approchement would doubly secure the position of Turkey, i. e., THE notorious official journalist of on the one hand it would promote the British foreign office who the commercial prosperity of the country and on the other it would preserve Turkey from aggressive actions from outside. With regard to Great Britain, this approchement would render easier our foreign policy towards Russia and Persia, it would lighten the tasks of our manabsolutely lacking in culture, has condate in Iraq, it would strengthen the verted a fertile country into a wilderconnecting routes of the British empire with India and relieve the situation in Egypt, because the

carrying out of our Egyptian policy, would come over to our side.'

British Aggression.

TN the last sentence there is set forth in the most obvious manner the aggressive intentions of British policy towards the Soviet Union and the Near East, the realization of which policy is hindered by the independent, peaceful policy of Turkey and of the Soviet Union.

But all this would be "terrible" if were not to a great extent only a leasant dream of the imperialist diplomacy of Great Britain. The international situation is not so bad for Turkey as Messrs. Augur and Newman and their like wish to make out The policy of peace not only expresses the interests of the peoples of the Soviet Union or of the vanquished peoples who are striving to build up a new life. This same policy also corresponds to the wishes of the broad masses of the population of the imperialist states themselves. The antagonistic interests between these states, which exist in spite of all possible blots, hinder them in their inentions to penetrate by means of vio-

ence at least into Asia Minor. Language of Threats.

THE policy of the western states knows only one language when dealing with the East-the language of threats. But nationalist Turkey of the year 1926, which has experienced every ordeal in the fight for inde pendence, is not the Ottoman empire, and it is no longer possible to speak to her in the language of threats, even if these threats are sweetened by promises of advantages. This will of Egypt, who in many respects ex- the policy of the western states is di-

(Copyright, 1926, by Upton Sinclair.) VI.

Bunny was on a holiday, and must enjoy himself; if he failed to do so, the enjoyment of his two companions would be marred. He must smile and escort them to a theater. and afterwards send Dad home in a taxi, and go with Vee to a supper party with some of the screen people, and gossip about their productions and their profits, and see them drink too much, and know that there would be an hour's talk about prohibition and bootleggers, starting as soon as he and Vee refused to drink. Were they "on the wagon?" Or were they afraid of this liquor? This was something special-the original Koski stuff, or whatever it might be in New York.

Then in the morning the pair would go to the "gym," and practice stunts together, making themselves a quite competent pair of gymnasts Vee said that if ever Dad went broke, and she got "klieg eyes" and had to guit the movies, they could earn several hundred a week on the "big time circuit." They would have lunch, and then maybe there would be a matinee, or somebody calling, or reporters or special writers; or Vee would go shopping, and absolutely insist upon having her darling Bunny along, because he had exquisite taste, and why did she dress but to please him? Bunny met other rich young men in his position, and learned that such remarks were preliminary to the man's ordering the bill sent to him. But there was nothing of the "golddigger" about Vee-when she gave the invitation, she paid.

What she wanted was her Bunnyrabbit. She adored him. and wanted to be with him every moment, and to show him off to all the world, including the newspapers. They had been together long enough for Bunny to know her thoroughly, and to realize the drawbacks as well as the advantages of the alliance. That she was sensual did not trouble him, for he was young, and his ardors matched hers. The arts that he had learned from Eunice Hoyt were combined with those Ves had learned from many lovers, and they were dizzy with delight; the impulse that drew them together was impossible to resist.

But intellectually they were far from being mated." Vee would listen to anything he wanted to talk about, but how little she really cared about serious things would be comically revealed by her sudden shifting of the conversation. She had her own life, one of speed and excitement and show. She might jeer at the movie world and its works. but nevertheless she was of that world, and applause and attention were the breath she lived by. She was always on the stage, playing a part-the world's professional darling; always bright, always fresh, young, beautiful, sprightly. Such a thing as thoughtfulness was suspect.

writes under the nom de plume of Augur," declares that for Italy the greatest question is the question of the "surplus population," and it is inevitable that the "eyes of the Italians are directed to the waste territories in Asia Minor, where a government,

"Divide and Conquer"—in the Philippines

"Divide and conquer," was the slogan of the Roman empire, and the imperialists of today have found no reason to alter it.

The latest dispatches from Washington dealing with the question of Philippine independence indicate that the state department is following this policy.

First comes the news that Aguinaldo has assumed leadership of a movement to assist the American dictatorship and Saturday He directed the challenge at Fitzpatthe announcement that:

It is the earnest desire of the president to settle the problem of the Philippines, to establish a relationship between the islands and the United States satisfactory to the Filipinos, to restore native co-operation in the government, and to develop the vast natural resources of the archipelago, PARTICULAR-LY IN THE PRODUCTION OF RUBBER, for the benefit of the Filipinos.

The emphasis is ours and it will be noticed that, quite in accord with the imperialist practice of exploiting colonial peoples ONLY for their own good, that the development of Philippine natural resources is to be solely for the benefit of the Filipinos.

Colonel Carmi Thompson, Coolidge's special investigator, is credited with believing that:

An agreement can be reached with the Filipinos on the question of autonomy and eventual independence whereby their complete co-operation in the government will be restored and the way cleared for the development of rubber production on a large scale with American capital.

The line of procedure is clear.

The "better class" Filipinos are to be appealed to on the basis of their material prosperity which will be enhanced by turning the natural resources and the working class over to American capitalists who will have the protection of American guns.

It is the same policy that Great Britain has followed in Ireland and which resulted in the creation of the puppet Free State govprnment.

The middle class leadership of the Filipino independence movement now meets an acid test. It must choose between loyalty to the masses of its countrymen and subservience to American imperialism.

More than ever is it necessary to build a workers' and peasants' movement in the Philippines which can exert the maximum pressure union for all the needle trades. on the middle class leadership and prevent the liquidation of the whole movement in a welter of corruption and systematic robbery of the Filipino masses.
