THE announcement that Ford is GIVING his workers a five-day week with six days pay has become the talk not only of the bosses thruout the country but is a topic of conversation among the workers. Just what is it all about? Is Ford generous?

Is he actually GIVING the workers something for nothing?

The DAILY WORKER will answer these questions in a special edition to appear under the date of Thursday, October 7. Workingclass writers will analyze this new departure and explain whether Ford is actuated by a desire to improve the standards of the workers or is simply using a new method to squeeze more work and consequently more profits out of his wage slaves.

MAGNATE HAZY IN DAUGHERTY BRIBERY TRIA

Graft Bonds Traced to **Daugherty Bank**

(Special to The Daily Worker) NEW YORK, Sept. 30 .- Richard Merton, German financier and one of the principal witnesses in the conspiracy trial of Harry M. Daugherty and Thomas W. Miller, was recalled to the stand today in federal district court

Merton, who came here as a govfled as to the manner in which he brot about the government's approval in 1921 of the \$7,000,000 claim of the American Metals company for property seized during the war.

Merton was a hazy witness this morning.

The government traced \$40,000 more of the Merton-King bonds to show that in November, 1923, this block was in the physical possession of the Midland National bank of Washington Court House, O., an institution of which Mal. Daugherty, porrting the Farmer-Labor Party had been held during the month of August. brother of the former attorney gen eral, was and is president.

Juggling The Bribe. On Nov. 17 of that year, the \$40,000 block was sold by Otis L company brokers of Cleveland, at Mal Daugh erty's orders, and brot net proceeds of \$39,333.56. A certificate of deposit' in the same amount was then entered in Mal Daugherty's personal account.

Vera V. Veail, assistant cashier, in describing this procedure, testified that Mr. Daugherty, in effect, loaned the Farmer-Labor Party thru securing this amount to the bank for three to six months at 4 per cent interest, but that the money was subject to call virtually whenever Mr. Daugherty wished.

Bank Paid Mal.

On the following Dec. 21, Mal Daugherty "called." The bank "paid" the certificate he held against it, and deposited cash to his account in the amount called for in the certificatein other words, \$39.335.56.

On the same day, the bank records then showed, a second certificate of deposit appeared for \$49,165. This \$49,165 "certificate," or bank obligation, was entered in the personal account of Harry M. Daugherty. Made Up Total.

Actually, this \$49,165 represented nine smaller certificates, which, taken together, made the total amount. But the amount was discussed on bloc as though but one certificate. Redeeming this obligation, the bank "paid" Harry Daughon this certificate, on July 17, erty 1924

By that time interest charges of \$1,174.51 had brot the total value of the \$49,165 certificate up to \$50,339.51. The bank, its records showed, liquidated this obligation to Harry Daugherty by entering in his account five fresh "certificates" of deposit of

\$10,000 each, or \$50,000.

N° OTHER daily newspaper in the land will cover the American Federa-tion of Labor convention that opens in Detroit, Monday, as carefully and thorely as The DAILY WORKER.

In addition. The DAILY WORKER, however, will report the convention from the viewpoint of the growing militant section of American labor that is In continual clash with the reactionary officialdom that will dominate at Detroit as in previous A. F. of L. conventions.

Every issue of The DAILY WORKER during this convention should be of great and absorbing interest to every thinking worker in the land.

J. Louis Engdahl, editor of The DAILY WORKER, left last night for Detroit, to send in reports on the usual preliminary gatherings, the meetings of the building trades, the metal trades, mining and union label trades departments of the A. F. of L. With the opening of the convention Monday, a complete review of the annual report of the executive council will appear in Tuesday's issue.

By J. LOUIS ENGDAHL.

THE United States government was never able, according to its own agents, to get enough evidence to deport Nicola Sacco and Bartolomeo Vanzetti to Italy during the redbaiting years following the world war.

It did not dare put them on trial because of the working class principles that they espoused.

It, therefore, charged them with murder in order "to dispose of them." It built up a carefully woven tissue of lies, forced witnesses to perjure themselves, twisted the stories of others, in order to create the frame-up connecting these two workers with the payroll holdup and murders at South Braintree, Mass., April 15, 1920.

. .

Glancing back over the newspaper clippings of years ago, I find such headlines as the following: "Sacco Gun Main Defense Point"; "Sacco files New Appeal; Excepts from Ruling that Pistol Barrels Were Interchanged"; "Faked Photos Framed Sacco": "Pistol Barrels Exchanged in Sacco-Vanzetti Case; Interchange of Parts Used for Comparative Purpose Admitted by Defense Expert-Without Effect on Motion for New Trial, Says Court." So it has been going for six years. Instead of a fight over principles-working class principles-it has been a struggle for the identification of bullets, guns, automobiles and a question of the number of witnesses that could be won to support the lie that they saw Sacco and Vanzetti at the scene of the holdup.

. . .

This whole fabrication is now effectually shattered in the affidavit of Celestino Madeiros, a Portuguese, who tells the real story of the South Braintree hold-up and blasts sky high the frame-up of the government.

Madeiros, now facing death for the Wrentham bank robbery, tells his story in detail in the lengthy affidavit filed with Judge Webster Thayer, at Dedham, demanding a new trial.

Attorney William G. Thompson, who is now making the legal fight for Sacco and Vanzetti, visited Madeiros in prison on Nov. 20, 1925 after Amleto Fabbri, of the Sacco-Vanzetti Defense Committee, had brought to him the confession of Madeiros smuggled to Sacco by a runner in the Dedham jail reading as follows:

"I hereby confess to being in the South Braintree. Shoe company crime, and Sacco and Van-

Pride and his sister. Madeiros says he became acquainted with the boy four years later when he came to live in Randolph with his pal, James F. Weeks, on the same street.

When the party started from Providence at 4 a. m. on the day of the robbery and murder, it went first to Boston, then back to Providence, then back to South Braintree, arriving about noon. The men spent some time in a "speak-easy" in South Braintree, two or three miles from the place of the crime.

On the visit to Boston a stop was made in Andrew Square. Madeiros remained in the car while the others went into a saloon to get information, as they told him, about the payroll money that was to be sent to South Braintree.

Madeiros said he had never before been in South Braintree. These four men had persuaded him to go with them two or three nights previously, in a saloon in Providence. Two were men from 20 to 25 years of age, one was about 40, and the fourth about 35. Madeiros was then 18, which means that he is now only 24. . . .

Two men did the shooting, the oldest one and one other man. When

the party broke up it was agreed. that the others should meet Madeiros in a Providence saloon the next night to divide the money (more than \$15,000 was taken) that they had obtained. Madeiros went to the saloon but the others did not come. Madeiros said that during the payroll robbery he remained in the back seat of the automobile; that he had a Colt automatic pistol, but did not use it. He was told that he was there to help back the crowd in case a rush was made.

Madeiros says that two of these

men lived on South Main Street, and two on North Main Street, in lodging houses, and that he had known them three or four months. The oldest man was called Mike, another one was called William, or "Bill," and he did not remember what the others were called, but said that their names did not amount to anything because they changed their names frequently.

Madeiros again reiterates in his affidavit that Sacco and Vanzetti had nothing to do with this crime, that it was entirely "put up" by the oldest of the Italians in Providence. In an antotation later in writing on the margin of his affidavit. Madeiros claims that he knows the last names of all four of these men, but that he

(Continue from Page 1)

says that he has also conferred with J. Harry Philbin, of Baltimore, vicepresident of the Emergency Fleet cororation

Senator's Letter. Here is a letter he has written

Philbin: "Due to the coal strike in England there is an unusually great demand

for American coal at this time. Our coal mines are wholly adequate to meet the demand. The only difficulty lies in transportation. It is within the power of the United States Shipping Board to remedy this, and I shall be more than grateful to you than I can express if you will look into the matter promptly and bring about much-needed relief.

"The greatest danger probably lies in the rapid advance in rates which the scarcity of vessels is causing.

"Interest of Labor" to Scab.

"If the shipping board would place twenty-five to fifty boats in this trade for prompt loading they could be readily chartered and prompt dispatch given.

"In taking this matter up with you I am bearing in mind not only the interest of the mine owners and coal dealers, but also the miners, railroad men and other workers, who are vitally affected in that many of them are laid off when the mines are not working full time."

Hampton Roads Bids for Ships. Hampton Roads, according to inormation received here today, will also ask for the use of governmentowned ships in transportation of coal from Norfolk and Newport News to he British Isles.

"This should mean a great thing for Hampton Roads," W. A. Cox, of Norfolk, director of the State Port Authority of Virginia, declared in commenting on General Dalton's announcement that the government will now solicit business for its ships.

Capitalist Government Alds Scabbing. Boats leased or owned by the government are now loading at Norfolk

for shipment of coal to break the Britsh miners' union. The first ship flying the United States flag to leave Norfolk for the British Isles with a full cargo of coal sailed for Queenstown, Ireland, for orders, the other day. She was the Sudawsonco, of the Transmarine line. and her captain boasted that she was manned by "a complete crew of United States citizens."

zetti was not in the crime. (Signed) Celestino Madeiros." . . .

Here is the story, therefore, of one who actually participated in the crime that the United States government charged against Sacco and Vanzetti. Madeiros says the eventful day, April 15, 1920, began for him at four o'clock in the morning. He says he was picked up at that time at his boarding house, 180 N. Main Street, Providence, Rhode Island, by four Italians who came in an open Hudson touring car.

Then the story proceeds. With the Italians. Madeiros says, he drove from Providence to Randolph, and there changed to a Buick car which was brought by another Italian. The Hudson car was left in the woods and was taken again after the robbery had been done. The Buick was left'in charge of a man who, Madeiros understood, drove it away and left it in another part of the woods. After the job at South Braintree, and after changing into the Hudson car, the party passed thru Randolph, and was seen by a boy named Thomas

refuses to disclose them . . . This is the simple story of the

South Braintree hold-up and murders, admitted by one of the participants. It is a repetition of the story of hundreds of similar holdups and sometimes murders in other sections of the country, with which labor has had as little to do as Sacco and Vanzetti were concerned in the South Braintree affair.

Sacco and Vanzetti are still in prison sentenced to death in the electric chair. A capitalist judge is pondering whether he shall grant them a new trial on this new evidence disclosed.

Labor over the land must thunder its demand, not only that Sacco and Vanzetti be granted a new trial, but that they be unconditionally freed on the ground that the government's frame-up has been blasted to bits with the truth after six long years of delay. Working class justice for

Sacco and Vanzetti!

Tomorrow-The affidavit of James F. Weeks, pal of Madeiros, who corroborates the affidavit made by Madeiros.

been tied up for a considerable time, will be placed in this coal-carrying trade. The commercial Pathfinder, a Moore

and McCormack (commercial) line ship, which was purchased from the United States government for a very small sum, carried 6,508 tons of scab coal from Baltimore to Queenstown, Ireland, for orders, on Aug. 28.

Several ships of other United States ines have also carried part cargoes of coal from Norfolk and Baltimore.

Fill British Foreign Market.

The Saucoa, a shipping board ship, as far back as July, left Hampton Roads, with a part cargo of coal for Genoa, Italy. The American Republic ine, which is owned by Moore and McCormack, is taking part cargoes of coal to South American ports while the American Export line is carrying part cargoes of coal to Mediterranean ports.

The Union Sulphur line, another United States company, according to reports current along the Baltimore and Norfolk watrfronts, may soon engage in transport of coal from this country to smash the British miners' union:

SPANISH DICTATOR NEARING END AS OLD SUPPORTERS DESERT HIM AND REBELLION STIRS MILITARY

By a Spanish Worker.

MADRID (By Mail)-Primo de Rivera's coup d'etat on September 13, 1923, was possible and was easily carried out because he was backed by the big Spanish bourgeoisie in opposition to the old political parties, by the army command responsible for the shameful military defeat of 1921 in Morocco which was on the point of being deposed by the "chamber of deputies," and even by King Alfonso, who was also anxious to stop the proceed-

FASCISTS GET THE COIN FROM THE FINANCIERS

Blackshirts Practice Extortion

ROME-(By Mail)- It has always been known that the fascist movement in Italy was from the start financed by the wealthy industrialists as their last chance of preventing the establishment of a workers' government.

It has hitherto not been easy to ecure definite evidence of the means by which the necessary cash was got together, but the recent scandal associated with the collapse of the Aglight a number of interesting details of the way in which this form of

corruption operated. Farinacci Extortionist.

The bank was closely associated ing an independent national status with Farinacci, the former secretarypoints out that Ireland and Canada, circumstances of the bank's failure it was clearly established that he used Hertzog denies that he stands for his position in the party to extort subscriptions (from prominent landowners whose finances were associa-

Dear Sirs and Brothers:

JODAY there is only one out-and-out, aggressive and militant working class daily in the English language in the United States-a country with more than thirty millions of workers. This is The DAILY WORKER.

Being part of the American labor movement, you can readily see the burning need for such a paper as The DAILY WORKERa daily which unceasingly and fearlessly fights for the workers in every city of the land and in every struggle of the oppressed and exploited. Race, creed, color, nationality don't count one bit with The DAILY WORKER when there is to be a call to action or a mobilization for a fight against the capitalist class anywhere and at any time.

You know that it costs piles of money to get out a daily paper and to keep it going. The American employing class spends nearly a billion dollars year in and year out only thru the subsidy of advertising to keep its press going full speed against the working people and the impoverished farming masses. The eleven thousand American millionaires are doing more than their bit pouring out many millions in many other ways to keep their press on the job fighting the workers.

Of course, you know that THE WORKERS MUST BUILD AND HAVE A POWERFUL PRESS OF THEIR OWN. But this is a hard job. It costs very much. And yet we cannot possibly get laong well without a mighty working class press to battle courageously and unflinchingly for the interests and demands of the exploited masses. THIS IS EXACTLY WHAT THE DAILY WORKER HAS BEEN DOING FROM THE VERY FIRST DAY OF ITS EXISTENCE

NOW THE DAILY WORKER IS UP AGAINST IT. We are having a very hard time to keep going. We have no advertising revenue from the bosses and bankers or any other sort of subsidy from the exploiters of labor. We will continue publication only if YOU say so. The DAILY WORKER IS YOUR PAPER. Invest in it. KEEP THE DAILY WORKER.

If you will ask for references, we will not be able to give you the same ones that the New York Times or World, or the Chicago Tribune, or the Los Angeles Times, or any of the other hundreds of prosperous employing class dailies will give you. Not a single banking house, not a single broker on "the street," not a single manufacturing corporation in the whole country will tell you to put your money in an investment to KEEP THE DAILY WORKER.

The best we can do in giving you proof of our reliability is to refer you to hundreds of labor unions and working class organizations and thousands of exploited workers thruout the country.

If you want to know why YOU should support The DAILY WORKER and make an immediate contribution, as best you can, to KEEP THE DAILY WORKER, then ask:

1. The thousands of heroic striking textile workers in Passaio.

2. The thousands of victorious fur workers in New York City.

3. The thousands of garment workers bravely battling against vicious injunctions.

4. The growing progressive forces fighting to save the Miners' Union.

5. The scores of thousands of badly underpaid workers in the rubber factories in Akron, in the automobile plants in Detroit, in the steel mills in Pittsburgh and Gary.

6. The thousands of workers striving to build an American labor party.

Company and Inspector Work Hand in Hand

By ZERO, Worker Correspondent.

DAISYTOWN, Pa., Sept. 30 .- There are laws made by the Pennsylvania legislature to protect the life and limb of coal miners. But these laws are not observed. There are state mind inspectors whose duty it is to see that such laws are obeyed. But they do not do their duty. This story tells how and why.

448 Injured in Six Months. Vesta Mine No. 4 is a dangerous mine. In the first six months of this year there were 448 miners who reeived first aid in the company hospital. Some of them are now beyond any aid.

There was much carelessness in Suffer Awful Misery in spite of the "safety first" slogan of the company. So a few weeks ago when the company started to do some badly needed cleaning of side swipers, pull ing down of bad roof, taking down loose coal, posting up manway as places and so on, we wondered what was coming off. We didn't have to wait long.

Knew Inspector Was Coming.

One fine morning assistant mind oremen and fire bosses were rushing from place to place and instructing the men to put their places in as safe condition as possible, as the state mine inspector was coming.

The inspector came around with some of the mine officials and went walked into Phoenix from different only where the company wanted him parts of the valley in search of food, to see it. He did not see any place

INDUSTRIAL UNIONISM DISCUSSED **AT BRITISH TRADE UNION CONGRESS**

By CHARLES ASHLEIGH.

The discussion at the Trades Union Congress on the question of industrial unionism versus "One Big Union" requires a certain understanding of th structure of some of the British unions.

At first sight, it might appear that the One Big Union idea is the most thoro, and the most "Left." This, however, is by no means the case: and. at a congress where so much cowardice was shown by leaders, and where the big mechanical voting powers were wielded in their favor, it is some consolation to know that the idea of one union for each industry gained the ongresses' approval by 2,164,000 to+ .650.000.

These things go by contraries, and the girl who landed Bunny did so because she did not try. The family of Henrietta nvestigated by President Glenn Frank ersonally as an outgrowth of claims Ashleigh had had money for generations, and so could afford to look down upon it, and all those who sought it. This was the way to impress Bunny, who was aware that his money was painfully new. Never would he attain to the aggressive self-assurance of his sister; he was looking for something better than himself, and for a while he found it in the Ashleighs, with their perfect manners and well trained servants and mansion full of the debris of culture.

Henrietta was tall and slender, gentle, soft of voice, and reserved to the point of primness. Her mother had just died, and for a year she wore black, which of course was very conspicuous. She was high church Episcopal, and on Sunday mornings wore long kid gloves and carried a little prayer-book and hymnal joined together, bound in black leather with a gold border. She took Bunny to church and he learned that one does not have to take efused to comment on the letter she ancient Hebrew mythology with vulgar literalness, but may have she had not communicated with Stern its symbolic meaning explained by a white-haired old gentleman with a trace of English accent.

What Henrietta meant to Bunny was a refuge from the anguish and tumult of illegitimate desire. He fied to her as to a saint, and madonna alive and visible upon a college campus. She was far above the glaring crudeness of the smart set; she did not use paint nor powder-nothing so common as perspiration would presume to appear on her delicately chiseled nose. You might dream of kissing her, but it would remain a dream; she would call you "Mr. Ross" during the first six months of your acquaintance, and after that she would call you "Arnold," finding it dignified, perhaps because of Matthew. So long as you knew and striking against wage reductions. The truly appreciated her, you would make the highest grades in plant makes men's shirtings. The class, and, as the little black and gold prayer-book phrased it, workers are organized in the United "honor and obey the civil authorities, and submit yourself to all your governors, teachers, spiritual pastors and masters."

Ш

Bunny went up to Paradise for his Christmas holidays, and there was the first word from Paul, a plain card, bearing the stamp of the American Expeditionary Force, but no place; no picture post-card with "Scenes in Urkutsk" or "Camel-sleigh on the Volga," or anything like that "Dear Ruth," it said: "Just a line to let you know that I am well and everything it all right. I have received three letters from you. Please write often. We are busy and I am having an interesting time. Give my love to all the family and to Bunny and Mr. Ross. Affectionately, Paul."

Ruth had had this treasure for several days, and there was no telling how many times she had read it, and studied every word on both sides. It seemed to Bunny a cold and unsatisfactory note, but he did not say so to Ruth; he asked Dad about it, and Dad said there would necessarily be a great deal of censoring of soldier's mail, and Paul had probably written this bare message to make sure it got through. Why did there have to be so depression which has made part-time and unemployment characteristic of much censoring? Bunny asked; and Dad answered that these were ticklish times, and the army had to protect itself against enemy propaganda.

> Dad had been reading a magazine article which explained what was happening in the world. The German and Austrian empires had come down with a crash, and that was a great per cent over 1914, wages had in triumph for democracy. But now the friends of democracy had creased only 42 per cent. In 1918 the a second big job to do, which was to crush the wild beast of value of their output was up 140 per Bolshevism. They were starving it by a blockade on every front, nd their wages 55 per cent. In and wherever the well-behaved and respectable Russians had set

R. R. SHOPMEN JUMP FROM THEIR COMPANY UNION FRYING PAN INTO FIRE OF GOVERNMENT "MEDIATION"

WASHINGTON-(FP)-Shopmen employed by the Boston & Maine rail road who turned their company union into a rebel camp some months ago have appealed to the U.S. Railroad Mediation Board in Washington and have been promised its "services." Commissioner Hanger is scheduled to arrive 50 per cent of capacity, Fall River breadcasting station WCFL is on the in Boston Sept. 20, and to take up this dispute after dealing with two other air with regular programs. It is industrial difficulties involving the Boston & Maine.

Company Union Changes Gears. Some months ago the company union

ment in favor of a strike rapidly dein the B. & M. shops sent a delegaveloped.

After much discussion the leaders persuaded the men to apply instead company officials, did not like their for affiliation with one of the independent unions-the American Federation of Railroad Workers. This organ ization made formal application to Washington for mediation.

It charged that the company had injustly refused to establish adjustment boards to settle the shopmen's grievance as was contemplated in the Watson-Parker railroad labor act. Appeal from Capital to Capitalist

Government. Officials of both independent and standard rail labor organizations are keenly interested in this case because it is the first one under which the

members of a company union have risen in revolt and made application to the mediation board for its help in setting a dispute with a big railroad corporation.

The board has recognized the right of the independent -union to which these B. & M. employes have affillated to act as their spokesmen in summoning the company's representatives to explain why the new law has been ignored.

Coolidge Finally Rules. If the board is unable to adjust the rievance-if the company does not back down and reinstate the men and recognize their right to enter an actual labor union-then the case will go forward to an emergency board to be appointed by the president. This last tribunal will issue a report urg-

findings of fact. WRITE AS YOU FIGHT ! do so the mills did not change their machinery and manufacturing methods to meet the new demands."

Less than \$1,000 a year.

Wages in Fall River cotton mills in only 137 per cent. This means that 914, the journal shows, averaged only the percentage of wages to the total. \$430 for the entire year's work. In value of the product fell from 26.4 per only one year since has the average cent in 1914 to a low point of 17.1 per reached \$1,000. 1919 the figures were 175 per cent up a government on the borders, the allies were helping them the value of the product was 202 per cent over pre-war, wages were up

and 98 per cent, and in 1920, when with money and supplies. General Denikin had taken possession of south Russia; on the west a lot of new states had been set up; on the north, at Archangel, an anti-Bolshevik group was making headway under British and American protection. As to Siberia, there had been a Socialist government, holding over from the Kerensky days; but these Socialists were a lot of talkers and now they had been kicked out and replaced by a real fighting man. In 1924, when the dividends paid by Admiral Kolchak, who had once commanded the Tsar's fleet. It was this he-admiral the allies were backing to run Siberia, and our troops were there to keep the railroad open for him. Of course the Bolsheviks and their sympathizers in this country were making a fuss about it, and telling all the lies they could; that was why we had to have a censorship, said Dad.

> Bunny accepted this explanation without question. He had been in a training-camp for seven months, and had acquired the military point of view. He was keenly alert to the danger of Bolshevik propaganda and determined that if ever he ran into any of it, he would hasten to denounce it. So innocent was he, and so little aware of the subtlety of the enemy-he never dreamed that he was at this time absorbing the poison; and-of all places in the world-in one of the class rooms of his most Christian and conservative university.

It was hard on a poor overworked university president. Dr. Cowper's most trusted dean had engaged this young instructor, upon recommendation of high-up Y. M. C. A. authorities. The young man had been doing relief work in Saloniki, and was the son of a prominent Methodist pastor; he bore the name of Daniel Webster Irving, and how was anyone to imagine that a man with such a name might be suffering from political shell-shock?

This young instructor was subtle in his method; he did not say anything that could be pinned down on him, but would sow his seeds of doubt by asking questions and advising students to "think for themselves." There are always in every college class one or more "sore-heads," the sons of unorthodox parents; one in Bunny's class was an avowed "rationalist," and another had a Russian name. All that a teacher had to do was to let these fellows ask questions, and quickly the whole group would be wandering in a maze, demoralized by what the Japanese government in its control of education describes as "dangerous thoughts."

President Wilson had gone to Europe, in order to bring about the reign of justice he had promised. He was having a triumphal progress through England and France, and our newspapers were full of the wonders of what he was about to achieve. But in Mr. Irving's class Bunny heard it pointed out that the president had dropped from mention the most important of his "fourteen points," the demand for "freedom of the seas." Could it be that this had been the price of British support for his program? And then, more startling yet, Bunny learned that the secret treaties which the allies had signed among themselves were now laid on the peace table, and made the basis of jealous bickerings. Bunny had never forgotten about those treaties, how Dad had assured Paul that they would turn out to be Bolshevik forgeries. But here the allies were admitting them to be genuine, and furthermore, setting out to enforce them, regardless of any promises of fair play which President Wilson had made to the Germans!

European Intrigue—The Menace of Imperialist War

Hard on the heels of the Briand-Stresemann love feast comes the meeting aboard an Italian warship of Sir Austen Chamberlain and Mussolini.

While nominally maintaining friendly relations with France, the menace of the proposed Franco-German pact forces Great Britain to make a counter-move which the recent activity of Italy in the . Meditérranean area also make necessary.

British imperialism finds its lines of communication to India and China endangered by the Spanish-Italian alliance which demands Italian participation in governing Tangier, from which Gibraltar can be made impotent as a British base controlling the western entrance to the Mediterranean and by the development of air and submarine methods of warfare which place Cyprus and Malta, its intermediate naval bases, at the mercy of a powerful WHAT is the situation in the trade centrally situated Mediterranean power such as Italy is.

To play Italy against France and France against Italy without icy of officialdom had its reflection in breaking with either is the present problem of British diplomacy.

Great Britain already has agreed to a division of Abyssinia with Italy to placate the latter power, but Italian imperialists ambitions do not end there. They contemplate expansion eastward and the Balkan question likewise will be one of the major topics of conversation between Chamberlain and Mussolini. The Italian minister to Albania and the foreign minister of Bulgaria are coming to Rome to consult with Mussolini after his conference with Chamberlain.

Herein lies the greatest immediate danger for the Soviet Union. If Great Britain can engineer an Italian offensive against Turkey, in which Bulgaria and other Balkan nations would take part, the Soviet Union frontiers would be endangered. 'In addition, the Soviet Union could not remain passive in the event of an offensive against Turkey by western imperialist powers.

In all probability Great Britain will also try to get Italy's endorsement of her activities in Poland where both French and British diplomacy has suffered a defeat with the signing of the new Soviet Union-Lithuanian treaty which sustains the right of Lithuania to Vilna and is thus a challenge to the league of nations.

Not since the early days of 1914 has there been such feverish activity in the European foreign offices.

The alignments for the next world war are being made.

Only the Communist International and the Red International of Labor. Unions point out to the world's working class the imminent danger of a new war, call upon the labor movement to or. ganize to prevent imperialist war and point out the only way it can be prevented-by the unity of the world labor movement and militant struggle on all fronts.

Henry Ford-the A. F. of L.'s Messiah

Trade union leaders, according to interviews secured by the Federated Press, hail the five-day week announcement of Henry Ford as a victory for organized labor.

This, of course, means that Henry Ford is regarded by these leaders as a friend of workers-"a good employer." Secretary Davison of the International Association of Machin- tuating industry but even here there ists hails the Ford five-day week as "taking up of the slack in em- has been a great decrease as compared ployment in the industry."

WHAT Samuel Gompers always referred to as "that great parliament of American labor"-the convention of the

THE DAILY WORKER

American Federation of Labor-opens its forty-sixth annual session on October 4 in Detroit.

It will be dominated by the most reactionary officialdom of the most reactionary labor movement in the world. The convention will reflect only in a distorted form the needs of the American workingclass.

It will make its own review of its own activities, its own estimate of the status of the American labor movement, draw its own conclusions, put forward its own program as the program of American labor.

N the last year large sections of the officialdom of the American Federation of Labor have made a long step towards agreement with American capitalism. The official movement has abandoned even purely trade union struggles almost entirely. "Worker-employer co-operation" has been ever on its lips. Mass opposition to this policy is developing slowly but surely.

There has been a certain continuity in the policy of A. F of L. officialdom for the last four years. Its causes and its effects on the mass of the American workingclass must be determined in order that they may be counteracted effectively.

THESE articles are an attempt to describe the American la-bor movement as it is under the leadership of A. F. of L.

officialdom, to determine the strength of the two currentsto the right from above, to the left from below-and to estimate the possibilities for our party and the left wing in the next immediate period.

THE DAILY WORKER From Portland to Detroit WORKMEN'S SICK AND DEATH FUND IS PROTECTION AGAINST RED TAPE AND CAPITALIST INSURANCE FAKERS

The irony of history pursues the reformer of today like it did King Midas of old-whatever he touches turns into gold; but into gold for the ruling class, and into gall and wormwood for the workers.

The prohibition (of the democratic party), the trade unionism (of Havelock Wilson), the socialism (of Marshal Pilsudski) no matter what their origin, today they belong to the most valued assets of capitalism, worth more to its bullioned and minted gold in the world.

Likewise with workmen's compensation and insurance. Since the employer needn't fear a suit for damages to pay out of his own pocket he cares still less about the loss of life and limb of "his" workers (observe the increasing disasters in coal mines, oil production, railroad, steel etc.). And how many workers pass successfully the miles and mazes of red tape that are wound about these state depart-

dollars do the workers pay every year SOME OF THE BRANCHES IN N. Y. AND N. J. OF THE No Red Tape. In the Workmen's Sick and Death

Nothing could be farther from the truth. As a matter of fact, the Ford plants have been running on a five-day basis for a long THE clothing trades, where there is time during which every conceivable device for increasing production has been tried out on the working force.

The experiments have been successful-altho many of the centers, and where the workers are the failure of the trade unions to rally patients have died from the operation-and for months before the the most class conscious, shows a big any large numbers of the workers for recent announcement Ford's plants have been getting a six-day out- progressive decrease. put in five days.

More than that, it is stated by Ford's technicians that it will be possible to get with the five-day week a full six-day production greater amount of coal, there has been with a SMALLER force of workers.

What becomes of the theory that the five-day week as established in Ford's plants reduces unemployment?

The Federated Press correspondent falls into the same error when he characterizes Ford's plan as a "decision to pass employment around by establishing the five-day working week."

Even Ford himself does not pretend that he is trying to reduce unemployment.

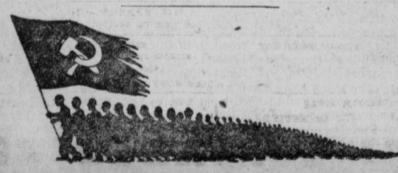

The "good employer" theory as it affects the viewpoint of A. F. of L. officialdom is well illustrated by the following paragraph from a Washington dispatch dealing with the Ford announcement:

At headquarters of the American Federation of Labor the Ford announcement was hailed with pleasure. It gave President Green the opportunity to open the annual convention October 4 in Detroit with the assertion that in that citadel of non-unionism one of the vital reforms advocated thruout its history by The Federation had just been triumphant.

The bankrupt character of the Federation leadership, when we recall that it decided against undertaking an organization campaign in the automobile industry. Yet now it calls Ford's plan a victory for organized labor.

A gain of 1.4 per cent in railroad employment between May and June brings the total number of rail workers at the half year mark to 1,833,621 or 51,925 ahead of June, 1925, according to the interstate commerce commission. This June the railroads distributed \$249,055,495 in wages or about \$9,000,000 more than in 1925.

During the first half of 1926 the carriers employed an average of 1,772,375 workers. This means the railroad furnished about 27,274 more steady jobs than in the same period of 1925. Rail

road wages for the half year total. \$1,456,069,658 or \$37,996,117 more than the first six months last year. The employes so far this year received about 48.1 per cent of the railroad dollar, compared with 48.4 per cent the

first half of 1925 Dollar a Month More. The average wage of all railroad workers, including high-salaried executives, was \$136 in June, 1926, compared with \$135 a year previous. This slight gain the commission attributes

to an increase in the average number and say: We ask for nothing more, A^N example: There is a Medved-yev fraction, whose standpoint has ever wants: close the Comintern, deof hours worked per employe. That is, to the line so long Teleg. and Telephoners.... I freedom to this legitimate view, advocated by the Menshevists, by Engineers (freight) 873 Engineers (freight) 1.516 to this fraction. Do they not call Kautsky, by the S. R. and by many Firemen (freight) 1.067 Conductors (freight) 1.336 Brakemen (freight) 1.000 1.017

over 1925 appreciable. These employes show gains of about 3 per cent. Wages of shop mechanics and of train service employes show gains of between 1 and 2 per cent. Gains by other

groups are hardly worth recording. The improvement in employment aflects all classes of employes except. the shopmen. Compared with June, 1925, there are 3,566 more clerical workers, 35,933 more maintenance of way employes, 1,263 more workers in the various terminal groups and 11,775 more train and engine service employes. The number of shopmen is down 1,250.

Maintenance Workers Badly Paid.

The pauper wage paid the quarter How typical railroad employes made of a million adult male workers in out in the half year, compared with the maintenance of way department the first six months of 1925, appears in remains the sorest spot in the industry. In the first half of 1926 these 1926 track workers averaged only \$438, which would give them less than \$900 \$775 551 for the full year's work. No man can 438 support a family on that wage. Such 941 a minimum wage tends to pull down 983 all other wages in the industry.

Make it a weekly habit. ONE DOLLAR A YEAR
