# TEXTILE STRIKE PARADE DESPITE POLICE REFUSAL

## "BAN WON'T STOP MARCH," SAY MILL UNION'S LEADERS

Thousands to Turn Out Saturday

NEW BEDFORD, Mass., June 27. The request of the New Bedford Unit of Textile Mills Committee, that a permit be granted for a parade of the 28,000 textile workers out on strike here, was flatly refused by the police yesterday. The parade is planned for Saturday.

Immediately after the refusal the

strike leaders issued a statement denouncing this action and declaring that permit or no permit a parade would be held. Organization plans for the parade have already been set in motion, it was stated. New Boss Move.

Official announcements were issued by the mill owners to the effect that they intend to "reopen" the mills on July 9th. This is generally taken to July 9th. This is generally taken to mean that the bosses will bend every effort to import a few scores of strikebreakers in order to give the impression that strikers are going Convention Segregates to the national office of International back to work. Even the bosses trade journals here and in New York admit that enough people cannot be obtained to operate the mills.

# British Labor Reformists to Continue "Peace" Conference With Lord Mond

### TRADES UNION "LEADERS" VOTE FOR SELL-OUT

Class Collaboration Endorsed

LONDON, June 27 .- Continuing the discussion of A. J. Cook's motion to end the conferences on industrial peace between the leaders of the Trade Union Congress and a group of employers headed by Lord Mond, the General Council of Trade Union Congress has put itself definitely on record for class collaboration by defeating the Cook resolution.

The capitalist press here is jubilant over the open endorsement of class collaboration which is implied in the refusal to end the industrial peace conferences.

At the same time the acceptance by the general council of the industrial committee of labor's report is causing intense resentment among British unionists and corresponding satisfaction to the employers' groups The report calls for the establishment of national industrial council one of whose functions will be to investigate any strike reported to them before it is declared. The council will consist of representatives from the national federation of employ-

Machado Asks Mexico to Suppress Machete

MEXICO CITY, June 27. - Sidelights on the plan of persecution of workers which the Machado government of Cuba is known to have planned against the Cuban workers s reflected here in the demand of the Cuban government that the Mexican authorities take steps to suporess El Machete, the organ of the Mexican Communist Party. The demands have been made through the Cuban embassy in Mexico City and are based on the statement that the paper is encouraging unrest among Cuban workers.

The action of Cuban government follows the announcement that president Machado had conferred with secret agents and members of the Cuban police force with a view to beginning a campaign of imprisonment against leading Cuban workers.

The Cuban government has also asked the suppression of Cuba Libre which recently carried an attack against the policies of the Machado

### **INEW TERRORISM** HITS ARGENTINE WORKING CLASS

Police Seize Several in Raids

BUENOS AYRES, June 27 .-- The general persecution of progressive and militant workers, ushered in two nights ago when Buenos Ayres police raided the headquarters of the Bakers Union where they allege they "found" a bomb was in full swing yesterday, with at least ten men known to be under arrest.

Workers' organizations and homes as well as private houses are being ransacked by the police in their latest efford to paralyze the labor movement in the Argentine thru the arrest of the militant leaders.

The pretext given for the continued raids is the search for evidence which will clear up the explosion of a bomb at the Italian consulate on May 23. At the time hundreds of workers

were jailed and examined by the police in the hope of extorting incriminating evidence from some of them. The authorities were afterwards forced to liberate all arrested men as no grounds for prosecution could be discovered in any of the

RENTON, Pa., (By Mail) .- I would like the readers of the "DAILY WORKER" to know what is happening in Renton, Pa. A few months ago I asked and answered questions I read in the Miners' Journal in a long letter to its editor. I never read anything in the Journal that did'nt condemn the Save-the-Union Committee. Since I noticed that all of the articles contained lies I decided it was about time the editor was answered. So I did it.

### HILLMAN BETRAYS **WORKERS IN NEW** UNION-BOSS PACT

Workers Denied All; Satisfies Bosses

The officialdom of the Amalgamated Clothing Workers Union have finally completed their betrayal of the mens' clothing workers in the New York market and have signed an agreement with the employers association which grants them the slave-driving system of piece work, the ciation which grants them the slavecalling of a stoppage for the benefit of the bosses association and other

ted" by the graft machine in control ing graft scandal. of the New York Joint Board. Hillman also agreed not to ask for the 40-hour five-day week.

At a joint meeting of all the executive boards of New York locals, together with the delegates of the Joint Board, the agreement brought to them by Hillman, who came from the meeting with the bosses, was passed after not a single word of discussion. The meeting was attended by several scores of Hillman's functionaries. It was plain to even the staunchest followers of Hillman that the union leaders had given the bosses everyturn. When a vote was called for, there were several scattered "ayes," several isolated "nayes," while the great majority remained silent.

The officialdom of the once militant but now corrupted Amalgamated are calling approximately 400 shops out on a stoppage for the benefit of the bosses association, and for the further intrenchment of the union administrative machine. The stoppage affects the shops of the independent manufacturers, their contractors, and also those who are termed by the association as their own recalcitrant members. By stopping work in the independent shops and their contractors, the officialdom hopes to force them into membership in the association. By halting production in the factories of the "recalcitrant" bosses, the union chiefs intend to whip them into line to compel them to pay up their back debts to the employers organization, which is not ... ing enough to use pressure on its own members.

A Gentlemen's Agreement The granting of piece work to the employers was accomplished without incorporating it into the agreement proper. It is an arrangement called

by the bosses and Hillman a "gentlemen's agreement."

This new contract opens to the graft ring encircling the union apparatus wide vistas of golden opportunities for bribery. Piece work was not granted to the contractors, in general. But the contractors working for members of the association will get piece work. The query heard on get piece work. The query heard on jingoist organization. #### Mr. Raskob Booms the "Smith Market"

Alfred E. Smith as president would give the country a constructive business administration. Business, big or little, has nothing to fear from Governor Smith. There is no occasion for business timidity during a presidential campaign. Business has outgrown the feeling that there is something to fear in campaign years. It is on too big a scale for that. John J. Raskob.

Mr. Raskob is that prophet of the Stock Exchange whose word to a newspaper sent the prices of all leading stocks soaring. Raskob is chairman of the finance committee of General Motors and one of the monarchs of American finance-capital.

The whole life of Raskob is given to the organization and financing of huge concerns for the efficient exploitation of labor. Of supreme interest to him is the matter of forcing the hardest possible conditions of labor upon the hundreds of thousands of workers employed by the giant General Motors corporation and other concerns in which he and his associates are interested. Especially at this moment his corporations are concerned in the greatest possible lengthening of the working day. This is one effect of the universal spread of high machine development. When in all leading industrial countries the number of workers employed is decreasing in relation to the amount of investment in tremendous modern machine plants, the capitalists' greed for surplus value can be met only by increasing the length of the working day, intensifying exploitation and worsening conditions. Of most vital concern to Mr. Raskob at this time is the complete barring of all labor organization in automobile and steel manufacture and coal production.

Mr. Raskob is no fool. He knows that in the immediate years shood there will be big and restless movements for the organization of huge mass unions in the automobile, steel and machine trades, and that the great mass union of the mine workers is now in process of being born. Raskob knows that right ahead will be strikes as big and even more important than the great steel strike of 1919-20 and the railroad and coal strikes of 1922.

Raskob knows, because he is no fool, that the full power of the central government and of the state governments will be their worst to suppress thiis organi- rose up at various quarters speaking tion had a demonstration and they and weed out all dead timber. Raskob, living in Wall Street, knows that Smith has been advertised as somewhat "pro-labor" and "liberal," and that such names stick in the gullet of his Wall Street associates.

So Mr. Raskob tips them off again. "Big business has nothing to fear from Governor Smith." The lyric cry of recognition that rises to the lips of one apologist for capitalism when he beholds another brother of the ilk quivered upon the pages of the New York Times when Evans Clark, star "economist" of the Times, rose on his hind legs and rowed for all the world to hear that George Bernard Shaw's new book. 'The Intelligent Woman's Guide to Socialism," is a "monumental" work.

In addition to tooting the kazo for George, whose whiskers are the pride of the Second International, Mr. Clark also tried to take Karl Marx down few pegs. Marx may have been right as far as British capitalism is concerned, Clark chortles, but he was all wrong about the land of the brave and home of the free where the bosses are cooperating to keep prices as low and wages as high as possible. And to prove that Marx was wrong this ex-socialist proceeds to pervert him. Which really proves that Mr. Evans Clark has an acute, un-Marxian nose for whiffing the direction from which his pay-check comes.

Our prosperous contemporary, the Wall Street Journal, announces that 1 10 per cent cut has been made in the prices of Firestone Tires. This should be hailed with a rousing cheer by the proletariat. No worker now need let his Hispana-Suizas, or Rolls-Royce fall into decay for lack of a few dollars.

Frank G. Gannon, superintendent of Street-Cleaning now on trial for graft in New York, managed to save \$111,588 in 3 years on a salary of \$3,800 a year. When asked to explain this phenomenon, Gannon answered "A little birdie gave it to me." Which means of course, that Gannon. while playing golf with the business men of the city, arranged the graft between shots.
