## Japan and U.S. Come to Grips at Geneva

Today the leader of the Japanese delegation to the Disarmament Conference announced that his government demanded a navy that would be as large as that of the United States, demanded new naval ratios of 10-10-9 with the U.S.A. and Great Britain, demanded the ceremonial burial of the London and Washington treaties, and wound up by saying that if these Japanese demands were not met at Geneva, Japan would be "reluctantly" forced to withhold its adhesion to any new disarmament convention which the present Conference might arrive at.

This represents the greatest disruption, the most clear and open break, that has taken place in many years in the camp of world imperialism. The contradiction between American and Japanese national capitalisms finds here a glaring expression, in the broad light of day.

It is American imperialism that is playing the aggressive role in China and the Pacific. England has many other irons in the fire. Firmly established in the valley of the Yangtze River, she has a share of China already. But the United States arrived late on the scene. She proclaims the policy of "the open door," a slogan under which she is carrying out the most rapid economic penetration. Japan, on the other hand, as she pushes down through Manchuria and Jehol into China proper, consolidates her position and slams the door in the face of American capital.

The Japanese do not attempt in any way to hide the fact that it is the battle fleet of the United States, recently returned from manoeuvers in the seas that wash the Japanese coast, that they have in mind when they make this demand for parity in the form of an ultimatum to the

Japan is faced with an economic crisis at home that is second to none. Industry is working at less than half capacity. Exports dropped 32 per cent during 1930, and another 22 per cent during 1931. The situation has continued to worsen in the last year. The army of unemployed is over three million strong. A financial collapse is imminent, with gold reserves dropping from 1,124 million yen in 1929 to 521 million yen at the end of 1931. Finally, the rule of the Japanese big bourgeoisie is menaced by the growing Japanese revolutionary movement, the spread of "dangerous thinking," as Marxism is called in Japan, and the spread of working class organizations, which are equally dangerous for the Japan-

So Japan is being impelled towards imperialist expansion, and its inevitable accompaniment-war.

In Japan's expansion in the Pacific, in Japan's struggle to found a Japanese empire on the continent of Asia, the enemy standing in the way is the United States of America. Similarly, America, seeking to push forward the frontiers of its influence in the Pacific, seeking to expand its investments and widen the market for its goods in China, is brought always face to face with the same enemy-Japan

Hence Japan's demand for an equal navy, a navy which she can use first as a bargaining weapon, and second as a weapon of military offense against her fce.

Hence the insistance of Roosevelt's "ambassador" Norman Davis that the naval ratios of the Washington and London agreements be retained in the draft disarmament convention now being discussed at Geneva.

Here is a conflict which can be with difficulty masked, which cannot be disposed of by signing pacts, or by initialling the equivocal formulas of the professional diplomats.

## "Low Quality-Not Illegal"

Roosevelt "economy program". It is a means of saving money by tightening the belt of the unemployed. The commissary system is replacing cash and voucher relief.

Where cash or a money voucher was given which made it possible for the housewife to select food for the family, now a basket is given to replace it. The cheapest food is bought in large quantities and dished out 23 relief for the unemployed. Besides being inadequate, it is disastrous to the health of grown-ups and many times causes death to little chil-

An outstanding proponent of the commissary plan is none other than the "liberal" Governor Pinchot of Pennsylvania. By this plan, the governor wants to feed adults at 47 cents and children at 27 cents a week.

What this basket of food means was illustrated by a photograph of a label on a can of tomatoes distributed in Westchester County, New York. On this label was printed:

"Below U. S. Standard. ow quality, but not illegal."

Here was food of admitted low quality distributed to unemployed, while good food is destroyed in order to maintain high prices.

In New York City last month, two little children of James Gourley

an unemployed worker, died after eating poisoned cornbeef, distributed by the Home Relief Bureau. The low standard of relief that was given in the form of cash is being abolished. It is replaced by food baskets whereby unemployed work-

ers are given poisonous trash that cannot be used in the market. There is no level that the capitalist government will not go to in

order to save the money of the rich at the expense of the workers. This however was met by a number of struggles throughout the country. Sharp resistance is shown by the unemployed to these attacks to put them on food rations.

These struggles against relief cuts should find a unified strength on the slogan for Federal Unemployment Insurance. The government must be made, as a result of the united effort of the working class, to realize that which the workers demand is: Taxation of the rich, using of all war funds to supply the necessary money whereby the unemployed will get Unemployment Insurance.

## The "Daily" in All Struggles!

circulation of the Daily Worker, one need only point to the Scottsboro case. During the recent trial in Decatur, when the special daily features, written at the scene of action were appearing in these pages, the "Daily's" circulation increased immeasurably on the streets of New York alone.

Why was there not so great a sale in Chicago, where a huge number of Negro workers live? Swely they also awaited the news of this great struggle, breathlessly, from day to day!

In almost every great industrial center of the United States, the workers under the leadership of the Unemployed Councils, carry on the fight for unemployment insurance, for adequate relief. The Daily Worker is the only newspaper in the country which devotes its space and its editorial leadership and support to these struggles. How can the small circulation of the Daily among these masses of unemployed be ex-

It is a fact of long experience that, whenever great strike struggles have been carried on without a simultaneous popularization of the Daily Worker among the strikers, the organizational possibilities of the struggle could not be fully utilized after the strike was over. This has happened again and again. IT MUST NOT HAPPEN FROM NOW ON!

We must remember that it is not for the Party members alone, but for the great masses of jobless and employed workers in this country that the Daily Worker is published. Many Party members do not seem to realize this. Far too many members of the Party are content to receive their paper every day, read it, and throw it away to await the next day's edi-

This negligent use of our foremost collective organizer and agitator must be condemned and corrected without delay. Every single Party member must USE his "Daily", must spread it among his friends, must utilize it to gain new forces for our increasing and intensified struggles.

The Daily Worker must be spread by Party members in strikes. It must be popularized in the struggles of the jobless, in the heroic battles' of the farmers, in the militant fight for the release of the Scottsboro boys, Tom Mooney and every class-war prisoner in the United States.

Every Party member must individually assume responsibility for this. He must see that his unit, his section, his district, carries forward the work of gaining new readers for the "Daily" with enthusiasm, with energy, with proletarian thoroughness.

Only in this way can our circulation drive be a success! Only in this way will it be possible to acquire the 20,000 new readers which is the goal of the present campaign!

ALBANY, N. Y., May 26.—Two thousand workers of the State De-partment of Public Works will be fired. One thousand will loose their jobs by June 1 and the others by the end of June. This is the decision of Governor Lehman, a clos friend of President Roosevelt. Thi decision to throw out of work 2,000 workers comes after a week of glaring headlines that Roosevelt will start additional public works.

The governor went to Washington to ask for fifty million dollars. But this step in adding more to the jobless shows that the money is not to be for the unemployed.

## GOVERNMENT OFFICIAL IN MORGAN PAY PLOTTED AGAINST U. S. S. R.

WASHINGTON, May 26 .- One of the most significant of the startling disclosures made yesterday at the Senate Committee investigation is the fact that one of the government's professional "red baiters" was on the Morgan stock tip graft list.

The man is Robert E. Olds, under-secretary of the Treasury during Hoover's administration, and subsequently a member of the American Reparations Commission abroad.

In 1927, Olds, as a state department official, acting for the United States government, gave all the American newspapers a deliberately false story, manufactured by himself and his agents, which contained forged documents claiming to show that the Soviet Union was attempting to stir in Mexico hatred for the United States.

These vile forgeries were part of the state department's attempt to arouse intervention hysteria in this country.

The Hearst papers spread these forgeries throughout their nation wide press service.

## Strike Wave Spreads in Southern States

A wave of strikes is breaking out | ST. LOUIS CO. TRIES TO BREAK in the South, chiefly in textile mills. The chief grievances of the workers are: (1) the installation of new speed-up systems in connection with the announcement of wage increases of a few cents, (2) wage increases so small that they do not begin to cover the rise in the price of necessities caused by inflation and (3) in two cases wage cuts of from 10 to 50 per cent.

MOBILE TEXTILE WORKERS

STRIKE FOR HIGHER PAY MOBILE, Ala.-A strike is in force at the Prichard Cotton Mill Products Company in Mobile, Alabama, against a wage-cut of 50 per cent and the attempt to make the workers tend 40 looms instead of 28 as at present. The mill employs 155 workers. The workers demand a 10 per cent increase to meet, in part at least, the rising cost of necessities, and the abolition of the new speedup system.

The weekly pay of the workers in the Prichard Mill ranges from \$7.50 in the cloth room to \$3 in the spool-
