Officials Anxious as Anger of Negro, White Workers Grows

BALTIMORE, Md., Oct. 23.-State and Somerset County officials joined yesterday in an hysterical attempt to pass the buck for responsibility for the flendish lynching of George Armwood, as indignatnt protests from white and Negro workers and intellectuals developed into a nation-wide thunder of denunciation of the lynch-murder and the officials responsible for the convenient removal of Armwood from Baltimore to Princess Anne a few hours before the lynching. They likewise blocked all attempts at investigation and punishment of the known leaders of the

electing delegations to visit Governor Ritchie this Wednesday with demands for the removal and prosecution for murder of the guilty officials and the death penalty to the known members of the mob. The delega-tions, which will arrive in Baltimore Wednesday to join a local delega-tion, will go on to Washington to place the demands of an aroused working-class on President Roosevelt. They will demand the impeachmen of Governor Ritchie, and a halt to the plans for the legal lynching of

Euel Lee this Friday.

Negroes of Baltimore, boiling with resentment, are militantly supporting the organization of the local delegation, despite the attempts of the reformist misleaders to disrupt the growing struggle of Negro and white workers against the violent suppression of the oppressed Negro Nation. Resentment is almost universal in the Negro district against the bellycrawling tactics of Rev. C. Y. Trigg, local leader of the National Association for the Advancement of Colored People who, as a member of a united front delegation which visited Ritchie last Friday told the lynch governor that when he heard his "Excellency was from Richmond I knew that everything was all right." NRA in Steel Town **Tells Workers They Joined Wrong Union**

Told Not to Belong to Steel, Metal Industrial Union

YOUNGSTOWN, Ohio, Oct. 23— The local N. R. A. Board (headed by Mark Moore, Mayor of Youngs-town) cynically told a delegation of Republic galvanizing department workers Saturday that, although the N. R. A. guaranteed their right to join "any union of their own choosing," they had joined the wrong union (the S.M.W.I.U.) and the local Board could do nothing for them.

'We don't have anything to do with enforcing the steel code," Mr. Peffer, for 18 years an official of Republic Iron and Steel and now one of those in charge at the N. R. A. headquarters, told the delegation.
"The steel industry is so big it 'polices' itself. You should take matter up with Mr. Purnell (President of Youngstown Sheet and Youngstown Sheet and Tube), who is in charge of these mat-ters in this district, and, if you don't get any satisfaction from him, take it up with the American Iron and Steel Institute in N. Y."

"We are investigating the matter," he told the blacklisted men who were openly informed by the com-pany that they were discharged for joining the Steel and Metal Workers' Industrial Union.

One of Youngstown's oldest labo racketeers, Harry Du Chen, who used his editorship of the Labor Record to attack the steel strike in 1919, was the other N. R. A. official to interview the delegation. "You boys made a big mistake," he said. "Your organization is not recognized by the American Federation of Labor. How can you expect any protection in an outfit like that?" Local 1051 of the United Brotherhood of Carpenters and Joiners for initiating a referendum for the Workers' Unemployment Insurance Bill is seen in the steps for a trial of the local ordered by the General Executive Board for Thursday, October 26. In a letter to the local, signed by Frank Duffy, General 4-Day Strike of

Secretary, the General Executive Board states: "A copy of the 'Dally Worker,' dated New York, Friday, August 11, 1933, was submitted to the board, in which it shows that a copy of your circular letter (unem-ployment insurance referendum) was sent to that paper, and that contents of said letter were published in the Workers' Demands Daily Worker' and quoted incorrect untrue and false statements to the Food Workers Union detriment of our organization."

The so-called "false" statemen refer to the fact that Local 1061 charged that whereas seven years ago there were 400,000 members in this A. F. of L. union, at the present time official figures show there were only 83,000. The referendum charged that the high-handed methods of the union officials in expelling unem ployed carpenters for non-payme of dues was responsible for the share decline. At the same time, they charged that the high officials were filling their own pockets through high salaries at the expense of the carpenters who were suffering un-

employment and wage cuts. The proposed referendum, on which the local is now to be tried, declared for acceptance of the Workers' Unemployment Insurance Bill, exemp tion of unemployed carpenters from payment of dues to keep them in good standing, and the reduction of

salaries of high officials.
The constitution of the United Brotherhood of Carpenters and Joiners provides that if 25 locals in 25 states submit such a referendum, it must be sent out by the Board. To flaunt the 470 locals in 43 states who endorsed the referendum initiated by Local 1051, the trial is now ordered.

The trial committee, appointed by the General Executive Board, consists of the henchmen who are re-sponsible for the decline in membership and for the maintenance of fat salaries at the expense of the

rank and file. All carpenters' locals who endorse this referendum should immediately come to the support of Local 1051, now the focal point of attack. They should send in their declaration of support to the local, protest against the high-handed trial. They should fight against this attack of the Gen eral Executive Board against a local that initiated a movement in th interest of the rank and file. All locals endorsing the unemployment surance bill and other measures in the interest of the membership of the Brotherhood should now voice thei trong support of Local 1051.

Cuts Wages by Re-Classifying

(By a Westinghouse Worker Correspondent)

NEW YORK.—The electric code was signed by President Roosevelt on Aug. 4, becoming effective on Aug What have been the concrete results in Westinghouse?

Workers are being constantly transferred from one section to another with a change in classification. When the classification is lower, it is always accompanied by a correspond-ent reduction in rate, even though the change is "temporary." But when the change is to a higher class of work, it is usually difficult to get the When this point was brought up

by an elected member of the shop committee, Mr. Phillips, works manager, replied that this was not intentional, but is due to the failure of the apparatus to function as intended. The vicious speed-up under the group system and standard time makes it hard for many of these workers starting in on unaccustomed work to meet the limits. The nervous strain increases the accident initiative, who should seek to Won by Protest vous strain increases the accident hazard enormously, especially since many of the machines are in bad condition. This is particularly true of the older employees, many of whom have been demoted from the superommittee was organized in the bundry department last week to

visory board and have not worked with their hands for years. We may be sure that these conditions will continue and grow worse unless we workers, ourselves, take some measures to prevent it.

Calls to Navy Yard Men to Organize Against Layoffs

By a Metal Worker Correspondent) sentiment of the metal workers at the Brooklyn Navy Yard for a mass protest meeting, we were promised all sorts of things: Return of our pay cut, better conditions, more work, etc. We know that this has not even begun to be a reality.

Where is the spirit of the yard workmen? We continue to live like siaves, just about getting along by the skin of our teeth, with the misterable wages given us. Through the threat of our last protest, we were able to get back another half day's work and pay. Don't you think if
we really had a protest meeting we
might get back all of our pay.

I would like to hear from some other yard workmen who realize that of all is not well, and don't believe in empty premises any more, and are ready for some real action. In this 25 way, we can organize effectively against this new deal of wage cuts and speed-up (ask the men on the New Orleans.)

A lay-off of about 1,000 to 1,500 men will most certainly take place by the end of this year, unless we organize and fight it. Anyone desiring to communicate with me for the purpose of getting together, kindly write to this paper at once.

Death of a White Collar Worker

DURSUING the theme of yesterday, this whole problem of the relation between the revolutionary movement and the so-called intellectuals (or let's say, white collar workers), I am leading off with a most unusual letter from a comrade who knew T. E. Barlow, the Communist leader who was lynched recently by the four Nazi-Klu Kluxers in Fort Worth,

This letter comes from Comrade A. W. Berry of Kansas City, Kans.,

and he says?

"In May, 1932, during the preparations for the National Nominating Convention of the Communist Party, Comrade Barlow was considered a good sympathizer of the Party, but too much of a 'softie' to join the ranks of the 'hardboiled.' The Party comrades in Houston, where Barlow first contacted the Party, thought that because he still had traces of religion and had attended some sort of medical college, that he would not fit it. He was also a clerical worker (bah!).

"I remember that during the preparations for the Texas delegation, Barlow was a tireless worker. At the conference where the delegates were elected he was unanimously chosen to go to Chicago. We had to make the trip in a delivery truck; 14 delegates in all. Because of his office employment Barlow was not able to stand the hardship of the trip. Inhaling the exhaust fumes day after day gave him bad headaches. We had to stop often to let him re-arrange his position. All the comrades thought he would never make a good Communist Party member. (And, by the way, travelling some 3,000 miles in a truck crowded with luggage and people, is no joke.) Most of us had been manual workers, or had been trained to such hardship by long membership in the Party and revolutionary move-

"But by the time the delegation came back from the Convention the now historic 14th Plenum Resolution had sunk home to some of the comrades in Houston. Barlow was admitted to the Party despite his 'softness' and lack of ability to 'take it.' He now became an organizer of the unemployed, organizing a number of committees in the Negro section, leading them to the relief station and getting relief. Later he became candidate for Congress in the special elections. Although there were a number of political mistakes made in the campaign, it served to bring some of the views of the C. P. before a large section of the Houston population. He became organizer of the Party in Houston.

Going to Fort Worth in the early spring of this year, his native ability for winning the confidence of workers, together with his knowledge of revolutionary tactics gained during the past year, enabled Barlow to expose the leadership of the Socialist Party local there and start the rank

and file on the road to revolutionary activity.

"By the first of July, this year, all except one member of the local had turned in their Socialist cards and applied for membership in the Communist Party. At about the same time, Barlow was at the head of a mass eviction struggle, was arrested and kept in solitary for days. The followup of his work on his return after a tour of other Texas cities caused him to be arrested and murdered. His death has stirred many sections of the Texas toilers to action, And this, briefly, is the story of one so-called 'intellectual softie' whom sectarianism had tried to keep out of the Party and revolutionary activity.

"I am sure that around many sections there are others, equal to, or potentially greater, than this revolutionary hero of the Texas masses who was once dubbed 'softle'."

Theme for a Proletarian Novel

IF SOMEONE could write, simply and with psychological insight, the life of T. E. Barlow, he would be writing one of the important documents

For the martyred T. E. Barlow is a type hitherto little known in America, but destined to be a hero of our time—the Proletarian Intellectual. There will be more and more Barlows, coming from the mines and steel mills, the office stools and draughting rooms.

The prejudice Comrade Berry points out, is, I believe, a temporary one. Too many intellectuals have flitted in and out of the movement and given this group a bad name. But the matter has passed now onto a more immense plane. The vacillating temperament of the bourgeois individualist is swamped teday in the great permanent need of a disinherited class

The lower middle class is bankrupt—the farmers, small home-owners, students, professional people. It is they, in the person of such "clerks" and "religious medical students" like T. E. Barlow, who now approach the revolutionary movement-feelers cast out in the dark toward the great historic alliance of all the oppressed groups in America behind the leadership of the revolutionary workers in the basic industries for the final over-

It has always been too easy to sneer and repel this great mass and its representatives-it will prove more difficult to learn how to win them. This is the reservoir from which finance-capital draws its man-power for Fascism: To abandon this class to such a fate doesn't seem to me the height of political wisdom.

A Basic Fear

ONE of the basic dangers has been that these intellectuals come into the movement bringing a great deal of worthless bourgeois baggage in their minds, and trying to sell this junk to the movement.

They sometimes demand positions of leadership, and try to revise and pervert the proletarian character of the Communist movement.

It is true, in many respects, that the intellectual in America has been trained in all the rotten habits of bourgeois individualism. One of the most amazing sights to me has been to watch some of the recent recruits to Marxism around New York. Their progress is sometimes as rapid and humorous as that of an old Keystone comedy,

On Maj I they suddenly discover the proletarian revolution. It had been present in the world for over 60 years, but the boys shout and whoop as if they were the original Columbuses.

By August they have gone through quite a "revolutionary" career. They have lectured and written articles, and made some first-hand contacts as members of various committees. They have also attended a few

By Christmas they have begun to realize that the movement is a hard and bitter thing, and one that offers no soft berths to any single person. By New Year's they have discovered that "Communists make serious mistakes," and that "Lenin and Stalin aren't the best of Marxists"-all

because they'd really never heard of John Dewey.

By the next May Day these heroes have become completely disillusioned. Now they have a whole new program for Communism; and they

share the "betrayed" feelings of a Trotzky. Really, it is no wonder intellectuals get a bad name. The worker earns his Communism and the right to make mistakes by hard and dangerous experience. Do these intellectuals really EARN their right to criticize? They know nothing, actually nothing, of the revolutionary practice. It is all in their heads. But what a mistake to judge a great historic group

by a few such representatives. T. E. Barlow comes from the same group

s these people, and that should always be remembered, too. lelping the Daily Worker, Through Michael Gold

CongressmanDickstein Denies Voting for Dies Bill

By SENDER GARLIN

"In discussing the Dies Bill, which provides for the 'exclusion and expulsion' of allen Commu-nists, Dickstein maintained that he has been falsely accused of having voted favorably upon it."-Interview with Congressman Dickstein by Washington Bureau, Dally Worker, in today's issue, page one.

T ALL happened on a lovely spring day.

The story, though not detailed, is given in all its essentials and with that unconscious realism (and dullness) which has long distinguished the Congressional Record.

The exact date was June 6, 1932. The scene was laid in the tobacco-laden atmosphere of the House of Representatives, during the 72d Congress, first session. Congressmen were rambling about the place. Some of them were reading newspapers others were engaged in conversations, as the Clerk of the House was droning out the numbers and descriptions of the bills on the calendar "A bill to amend . . . a bill to authorize the appropriation . . . a

MR. DICKSTEIN did not oppose the bill. He did not speak against it. When, as chairman of the House Committee on Immigration, moved "to suspend the rules and pass the bill" he demonstrated in the most compelling manner his complete approval of the bill.

A complete united front was fected in order to push the bill through. Dickstein yielded his time to political "opponents" in order to enable them to speak for the bill. Chief among these was Hamilton

After Dickstein had yielded "three minutes to the gentleman from New York," Fish rose and said:

The bill would permit deportation of members of the Communist Party militant unions, and fraternal organizations merely for private opinions or membership, and without proof of the character of the organization to

Passed by the House of Representatives, and reported favorably by the Senate Judiciary Committee, the bill did not reach a vote on the floor of the Senate. This was due largely to the widespread protest movement against the bill, led by the Communist Party, the International Labor Defense, and the Committee for the

Protection of the Foreign-Born.

The Dies Bill is by no means a dead issue, however. It will un-doubtedly come up in the Senate when Congress convenes in January, and may be rushed through unless the workers are vigilant.

Mr. Dickstein is chairman of the committee to which the Dies Bill was sent. If he were really opposed to the bill, he might have contributed to its death in committee. But was he opposed to it? Will he say how he voted in committee? Undoubtedly the clerk of the Immigration Committee has refused to divulge Dickstein's vote on the ground that the committee had met in executive (se-

Mr. Dickstein, in implying that he was not in favor of the Dies Bill, reveals, perhaps a poor memory. Perhaps. However, his feeble attempt to dissociate himself from the vicious Dies Bill is the method which he has followed for years in order to parade as "a friend of the poor," while at all times serving as a pliant tool of the ruling class.

Some months ago in a radio speech Dickstein even chided the "Daughters of the American Revolution"-few of whom, incidentally, reside in the East Side district from which he is elected.

AT THE moment Dickstein is wal-A lowing in publicity as a result of his announcement of plans for an investigation into Nazi activities in the United States.

U. S., Japan, U.S.S.R.

THE likely inauguration of diplomatic relations between the United States and the Soviet Union must lead no one to imagine that any fundamental change will or can occur in the antagonism of imperialist America to the workers' socialist fatherland.

The attitude of American capitalism, which Roosevelt earries out faithfully, and with a thicker layer of demagogy than Hoover managed, remains precisely the same. It is expressed with crude frankness in an editorial in the Duluth News-Tribune of October 16-a newspaper which is a part of the chain owned by Paul Block, pub-

"The average American does not wish to see war between Japan and Russia," this editorial says. "If, however, such a state should arise, he hopes that Japan will give the Soviet a lesson that will forever after keep it west of the Stanovoi mountains . people wish Japan to quit pin-pricking the United States, while they do not object to Japanese expansion along reasonable and legitimate lines as indicated in these

THE competition of Japanese imperialism to American exploitation of China and other areas of the Pacific shores is one occasion for the race in naval building on an unprecedented scale on which Washington and Tokyo have embarked.

But if the Japanese could rob the Soviet workers of Eastern Siberia, and re-enslave its workers in capitalist exploitation, that would be "reasonable and legitimate" to the American imperialists, "who hope that Japan will give the Soviet a lesson.

This is not a complete statement of the international intrigues of Wall Street diplomacy, but it expresses in a crude and open way the undying class antagonism which Paterson, is the formation of a united union. is the motivating force of all capitalist maneuvers with respect to the Soviet Union.

Another Roosevelt Speech

DNHT after Rocsevelt finished his radio speech last night two things happened.

One is that the prices of commodities leaped upmrd again. The stock market boomed as Wall Street speculators reaped golden harvests.

'The other is that the value of the dollar on the

International markets sank. And in these two immediate consequences of the Rogsevelt plan to buy more gold, to inflate the cur-

rency, the toiling workers and farmers of America can see what Roosevelt has in store for them. Further cruel cheapening of the dollar, further slashes in REAL wages, further rises in the cost of

An intensified, bitter strife for foreign markets, international currency war against rival imperialist

powers that can only lead to another world WAR!

WHAT does Roosevelt's program of rising prices mean for the American workers and farmers? It means masked robbery and increased exploitation. For the workers it means that their meager wages

buy less and less. For the farmers it means that they must pay more

for their supplies, machines, clothes, etc. The workers and "rmers have already had a bitter

taste of this Roosevelt plan. In the last ave months, Roosevelt has jerked up the cost of food by 20 per cent! But wages, even according to the most optimistic reports of Roosevelt's Department of Labor, have not risen more than 7 per cent. The Roosevelt program of rising prices has put over a uniform, masked 13 per cent wage cut on the entire American working class!

But did the farmer get the benefits of this rise in food prices? Not a bit.

Roosevelt's own Secretary of Agriculture admitted in a public speech made only two weeks ago that the osevelt N.R.A. program has caused an 18 per cent gap between the things the farmer sells and the things he must buy, effecting a deep slash in his REAL income!

Roosevelt declares that the solution of the crisis lies in rising prices for farm and manufactured goods

But both the farmer and the workers are skinned in the process. It is the monopoly capitalist corporations in the middle who get all the fat gravy out of the Roosevelt price-raising program! That is Roosevelt's

WHAT does the Roosevelt price-raising program do for American Wall Street imperialism? It plays right into its hands. When Roosevelt cheapens the dollar by buying gold, he is, in effect reducing the cost of production for the American capitalists, because they are thus enabled to pay their workers in CHEAPENED

Roosevelt's scheme to buy gold is equivalent to the setting up of a financial machinery similar to the British Equalization Fund. This means intensified currency and trade wars. It is the workers and farmers of both countries who, on account of rising costs of

living, will bear the brunt of the attack. Roosevelt robs the workers at home in order

permit Wall Street to drive ahead in appro

WHY did Roosevelt leap into the breach last night with his new pronouncement?

The answer is simple. It is because the failure of the Roosevelt N.R.A. program as a solution of the economic crisis is becoming more and more obvious to the masses of American workers and farmers. The American masses have had six months of Roose-

velt's program. And every one of Roosevelt's rosy promises has turned to ashes! Roosevelt has not been able to give the American workers what he promised them-bread and economic security! That is why the coming winter brings Roosevelt

face to face with the most tremendous wave of coal and steel strikes in a generation. That is why the farmers of the nation are at this very moment rising in enormous tides of rebellion against the Roosevelt

dustry in declining. Where are these workers being hired? Not in steel, not in auto, not in textile, not in railroads, not on farms. Where? Only in Roosevelt's ROOSEVELT talks of public works. But of the total three billion, only a little over one billion has been

spent, by far the lion's share has gone for WAR PREPARTIONS! Roosevelt did not mention that. ROOSEVELT praises his Farm re-financing program. But he does not mention that this program has not relieved the enormous debt burdens of the farmers one bit. Roosevelt has merely transferred the mortgage from a private mortgage holder to a government

"allocated"-not spent. Of the \$75,000,0000 actually

corporation. The debt, however, remains, while the mortgage holder is protected against losses! That is just why the farmers are now up in arms! Roosevelt tried new maneuvers. He tried to establish a separation between the NRA and the rest of his program. But every worker knows and remembers that Roosevelt announced his program as a whole, as a unit. Every workers can see through the Roosevelt

attempts to back out of his promises. Where as he denies the starving workers and their families any unemployment insurance, he is building the most gigantic war program in the history of the Faced with the resistance of the workers, he is driving ahead toward increasing police and state military violence against the workers

He has spoken against strikes. He prepares for war, for more brutal suppression of the American toiling masses. That is what Roosevelt offered the American workers and farmers last might,

An Intervention Signal

DRIESTS have always led the way for advancing armies by laying down the moral preparation for

That explains the Congress of priests now being held at Vienna which has decided to raise funds "for the famine victims in Russia."

This appeal for funds (a perennial phenomenon with priests) is significantly timed to coincide with the sinister war provocations of Japanese imperialism in the Far East, the increasing menace of Fascist war preparations in the West.

It comes at a time when every government is bristling with war preparations.

That is what makes it an ominous signal. The priests, who have very close connections with the White Guard conspirators at Paris, Shanghai, etc., smell military intervention against the Soviet Union

It will be remembered that recently the Pope tried a similar campaign for the "hunger victims" of the Soviet Union.

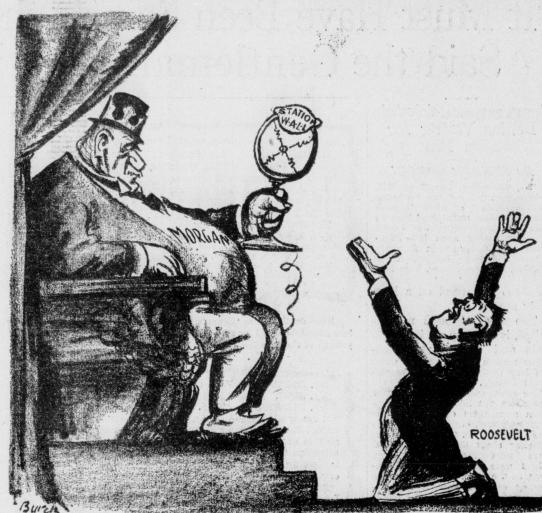

But the colossal victories of Soviet collectivization, the enormous harvests and the record-breaking speed of collection, forced him to beat an ignominious and

The priests at Vienna deliberately close their eyes to the fact that the workers and peasants of the Soviet Union have destroyed all poverty and starvation by destroying capitalism. They have abolished unemployment and wage slavery.

The workers of the world will ask these priests why they are so indifferent to the millions of actual famine victims in every country where capitalism

They will ask why these priests persist in lying about the Socialist victories of the Soviet Union. They will ask these questions because they see the sinister military intervention that so obviously lurks beneath the hyporcritical sorrows of the well fed priests at Vienna.

An important part of the fight for the defence of the Workers' Fatherland is the merciless exposure of the lies and plots of these priests at Vienna.

Mass Pressure Forces Extension of Stay

NEW YORK-Tom Mann, 77-yearold British militant labor leader, will use the extension of his stay in America, won by the pressure of masses on Washington, to visit Tom Mooney, Billings and J. B. McNamara in San Quentin Prison, it was announced yesterday by Donald Henderson, secretary of the American League Against War and Fascism.

Word arrived from the warden San Quentin that the two imprisoned Pabor leaders, who have been behind bars for the last 17 and 22 years, respectively, will be permitted to see Tom Mann, who is very anxious to talk with the two staunch fighters and bring his greetings from the English masses to them. Mann has for many years carried on a struggle in England for the liberation of all class war prisoners and has taken a of capitalist justice.

Soviet Autos Win Gruelling Mountain, Desert Run

By VERN SMITH.

Daily Worker Moscow Correspondent. MOSCOW, Sept. 30 (By Mail). — Not even the flight of the stratostat, whose amazing record ascent of over 60,000 feet drew all eyes to the sky for part of this morning, could keep those eyes off the street traffic this afternoon. Cars and trucks shoved through ever denser masses of pedestrians and street cars moved end to end, on the way to Moscow's Park of Culture and Rest. Autos and trucks and buildings along the way made autos and trucks were found in carried red slogans, "Greetings to the Heroes of Kara-Kum," "Welcome the makes and in some ways better. Victors of the Kara-Kum Desert,"
"Welcome Back the Moscow-Kara

A great celebration to hail the expedition was to be held in the Park. It was re-entering the city it left two months and twenty-six days before manufacture, with types of three imtheir field) going along for compari-son, had left Moscow to travel by way of Samara on the Volga (good roads so far) then over mountains, old watercourses, former caravan routes and sand hills to Tashkent in Central Asia, then straight across the trackless Kara-Kum desert and through the narrow strip of watered land along the Eastern shore of the Cas-pian Sea to Krasnavodsk. There they were ferried by boat over the Caspian to Baku, and sent to brave the Caucasus, steepest mountains in the European part of the Soviet Union, and so Northwestward to Moscow

The Moscow-Kara Kum-Moscow run had five main purposes, as explained at the Moscow celebration today by Mirietsky, commander of the motorcade that made the trip.
First, it was to ascertain the qual-

Secondly, it was to test out the electrical equipment of the cars. This also was found satisfactory.

Thirdly, it was to give a most rigorous and grinding trial to the Soviet synthetic rubber, and, Mirietsky reports, "Our synthetic rubber was found to be fully as good as imported natural rubber." What this means to a country that hitherto had to purchase abroad all of this substance so necessary to modern, and especially electrical and automotive industry, is beyond estimation.

Fourthly, geologists and engineers were carried along to map the route across the Kara-Kum desert and as-certain whether a railroad can be laid from Tashkent to Krasnavodsk along this route. The scientific corps accomplished its task. Record Desert Crossing.

The expedition was able to report every car and every man travelled every inch of the way. "Some have said we should first build roads and then develop an au-
