Sidelights on the Lynch Trial of Heywood Patterson

Daily Worker Reveals How the Southern "Liberals" Give Help to Prosecution By JOHN L. SPIVAK

Of all the court cases I have ever witnessed in 15 years of newspaper covering of trials, and of all the cases I have ever heard of, I never saw heard of one so raw, so brazenly indifferent to the primitive principles of simple justice as the third trial of Heywood Patterson in the Morgan County courthouse in Decatur before Circuit Judge W.W. It was not a trial in the legal ense of the word. Alabama simply rushed through what was obviously a pre-arranged determination to place a Negro boy in the electric chair at Kilby Prison in Montgom-

These labor a hletes lin if Germany persisted in its discrimination against Jews.

N June, just before the meeting of the International Olympic Committee, which was to take up the matter of final approval of place for the next Olympics, Major General Sherrill, one of the American delegates, made similar blustering threats in response to telegrams from the American-Jewish Congress, and to petition from twenty prominent American athletes. The International Olympic Committee then went into secret session and emerged from the 1936 Games firmly pledged to the Nazis because Germany had "given assurence," "but Jews would be permitted to compete for the Gen. Olympic team "as a principle." This meaningless wind was hailed as a victory for the "democratic principle in sport" by the A. A. U. and the American Olympic Committee. Some Conclusions from the Chicago Stockyard Workers Strike

WE HAVE no reports as yet regarding the role of our Party and the Trade Union Unity League in the strike of the Chicago stockyard workers. We are, therefore, in no position to draw the final lessons from our participation in the strike, or to help fully in the solution of the problems we are faced with.

But our main purpose in writing of the situation time in view of our lack of knowledge of the tole of the Communists played in the strike is to charply raise the question of our whole trade union in the Chicago District as dramatized in the

WHAT are the outstanding lessons of the Chicago packing house workers' strike?

First and foremost there stands out the isolation of our Party from the main body of the workers in Chicago. The strike took our Party by surprise. We have in the city of Chicago a mebbership of 2,500 in the Party, but yet such an important struggle could develop without our Party in any way being prepared for it. That this is so can be seen from the participation of the Chicago comrades in the National Packinghouse Conference and the meeting of the District Bureau immediately following it. This results from the following facts: The Party is not yet composed of the decisive sections of the Chicago proletariat, it has not yet drawn the membership into the trade unions (only 20 to 25 per cent are in unions and these are in the lighter industries); the leadership is not sufficiently a driving force for trade union work and the Party although recognizing the growing radicalization of the workers in resolutions does not draw the proper conclusions from this growing radicalization of the workers especially in the basic industries which include large sections of Negro workers.

The second outstanding lesson is the failure of the District leadership to make serious efforts to carry through the concentration policy with the resulting serious consequences of this failure. The packing industry for some time and especially so since the 14th Picnum of the Central Committee was recognized as the main industry of concentration in all resolutions adopted by the District Committee. But has this policy been carried into life? Were really serious efforts made? Unfortunately even the District Bureau will readily answer in the negative.

The District Bureau has even after the Open Letter neglected to take up the work among the packinghouse and stockyard workers as a central task. The serious danger to the whole Party and the immediate effect upon the membership from making repeated decisions that remain on paper are, we are sure, obvious to you if you only give the question a moments' notice. Any explanation that you did not have the forces, finances etc., can of course not be seriously advanced as an explanation. The Party organization that has 2,500 members in its ranks in the city of Chicago alone, has a number of experienced and leading forces including members of the C. C., a number of important Party daily papers in Chicago, an English Party bi-weekly, numerous mass organizations (fraternal, language, unemployed councils, etc.), embracing tens of thousands of white and Negro workers among whom without doubt there are broad connections among the stockyard workers.

The third outstanding lesson is without doubt the

underestimation of the role and influence of the American Federation of Labor. Even up to the end the leading comrades in the District Bureau were not aware of the extent of the A. F. L. organization among certain sections of the workers in the stockyards and the role that they would play in any struggle. This was called to the attention of the comrades on a few occasions but it seems was not taken with sufficient seriousness even to cause an investigating the situation. We continued to be isolated from the workers, and remained unaware of the actual developments. As a result we had no connections with these organized workers, and could not influence their course, not to speak of organizing revolutionary oppositions within the A. F. L. unions and develop the united front policy.

WITHOUT doubt the situation revealed in the stockyard strike is characteristic of the whole trade union work in the District. The slighft progress made recently in the trade union work has been limited almost entirely to a few of the lighter industries both as far as the T.U.U.L. unions are concerned, as well as to the work in the A. F. L. We remain isolated and have made no progress among the basic sections of the unorganized and the more important industries among the workers organized in the A. F. L. unions. The leadership does not steer a decisive course in the trade union work and only a small section of the Party is taken up with trade union work.

It is necessary for the Chicago comrades to discuss the questions here raised and to further elaborate them in the District Committee. Perhaps it would be advisable to hold a special general membership meeting to dramatize the importance of the whole question. This meeting should then be followed by a discussion in every nucleus and every important trade union fraction. These meetings should be utilized to explain the line of the Party in the trade union work in the light of the sharpening class struggle and to deepen the understanding of the membership on the concrete recent developments (deepening crisis, crisis in the N. R. A., growing fascization, growth of strike movement, role of A. F. L. bureaucracy and S. P., growth of trade unions, A. F. L., T. U. U. L., independent unions, etc.) and to draw the membership into the trade

The District Bureau should at once further elaborate the tasks in the concentration industries (packing, steel, railroad) and among the more important A. F. L. unions (metal, transportation, packing, etc.).

It is necessary to perhaps re-assign the leading comrades to special tasks on the basis of the concentration program to provide guarantees that the plan will be carried through. It is necessary to renew the work among the un-

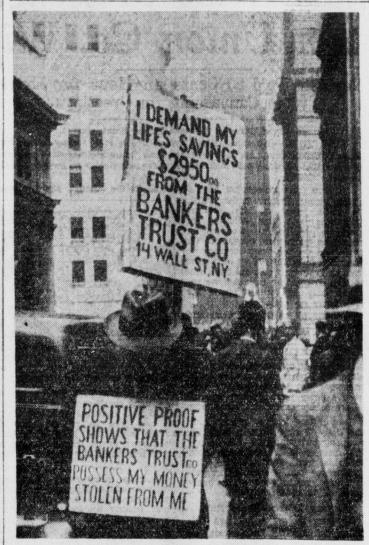

employed, among the Negro masses, the work of the fraternal and language organizations to bring this work in line with the concentration program.

It is especially urgent to undertake recruitment into the Party and the building of the circulation of the Daily Worker in such a manner that we at least astablish the contacts with the most important strata of the Chicago proletariat, especially among the native white and Negro workers.

It goes without saying that in the first place this whole program must take into account the immediate situation in the stockyards.

We urge the District Bureau to at once discuss these questions and to more decisively develop and carry out a line which will lead to a strengthening of our work in the basic industries

Blaine, chairman of the Welfare Committee special concentration for funds will be made on employes of department stores, comation lines and 80 utilities com-"The success of the campaign," he added, "now hinges largely on the contributions from employes."

Just as last year when workers were compelled on threat of losing their jobs to contribute to charity drives, pressure will again be exerted on workers badgered between rising prices and wage cuts, both instituted

The pamphlet, signed by the multi-millionaires, speaking of the forced labor program, says that "the govern-ment could do that much and no

multimillionaires certainly be interested in making the government do nothing else. This explains their intense opposition to the Workers' Federal Unemployment and Social Insurance Bill which thrust complete responsibility for care of starving unemployed workers on their shoulders and off the shoulders of the workers.

Needle Unions Help Boost Sales of the "Daily" to Members

NEW YORK .- Splendid co operation by needle trades workers to spread the Daily Worker among their ranks is reported by S. Wishniak, Daily Worker Red Builder, who has been given per-mission to speak about the "Daily" at union meetings. Sales of the Daily Worker among needle trade workers have already shown an in-

crease as a result of this. All other trade unions are asked to extend similar co-operation to Daily Worker representatives and thereby help further their own "Daily," organizer and mobilizer of the workers, is more firmly rooted among the trade union masses.

SEATTLE, Wash., Nov. 30 .- A decision to affiliate its 8,400 members to the Trade Union Unity League was made by the delegates of the Fishermen and Cannery Workers' Industrial Union at its recent first national convention in

The decision was made by unan-imous vote of the delegates who expressed their conviction that a union cannot remain independent of the militant trade union movement and maintain its fighting

Never More Than 41 Per Cent Had Any Bank Accounts

NEW YORK, Dec. 2 .- Reflecting the narrowing income of the lower sections of the population, there was a sharp drop of over two billions in the amount of savings bank de-posits at the end of June 30, it was announced today. This is a drop of 11 per cent from the same period

The analysis of the decline published by the American Bankers Journal admits that the drop in savings was due to increased expenditures by the workers forced by he rising cost of living.

Since 1928 the number of savings bank depositors has been declining, so that today only 31 per cent of the population has any savings account, as compared with 41 per cent four years ago. The average account is now \$62 per person as compared with \$232 then. At no time B'klyn, Plan Meets to did more than 41 per cent have any deposits at all.

The effect of the crisis has thus peen to slash the meagre savings of the masses by over 80 per cent per capita.

The decline in denosits is even greater than the official figures indicate, since the figures for the latest deposits include the interest accrued to the deposits, thus mini-mizing the actual withdrawals of deposits during the last 12 months.

of Western Union Co. Win Victory

(By a Group of Western Union Messengers) NEW YORK.-We messengers have gained a real victory from the Western Union Company. It was more than "gained" from the company It was actually "wrung out" of them. And for this victory we have to thank the Daily Worker.

Letters from messengers have appeared in the "Daily" showing the brutal, vicious system under which we work. One of the bitterest grievances was the soliciting of greetings and holiday messages for which the messengers canvassed. We were paid 5cr for every message we succeeded in getting. If we canvassed for four hours and only got two firms to give us greeting messages we received only 10 cents.-This is for four hours of work.

In many places we got mean and cruel treatment by business firms and people who didn't want to be annoyed by messengers who were canvassing. Many times we were kicked out of offices and not gently either. All of the messengers hated his work but because of the beggarly salaries we're getting we had to try to increase it by canvassing. Soon after letters appeared in

Cleveland Worker Criticizes Methods of Local Council in Conducting Meetings

"During the winter months the Unemployed Councils and other working class organizations conduct many indoor meetings especially open hearings and mock trials. Here in Cleveland we have had two open hearings on neighborhood scale-both drawing hund ds of workers. To both of these meetings we drew workers not connected with our movement before. From the point of attendance both were assuccess. Another good feature was next day, and no new faces at the

Many workers in the audience were crying when she finished her story. In that crowd were many more with her problems-and now we must ask ourselves-did this open hearing show this woman who is responsible for her condition? Did

open hearing show her a way out of her present condition? As this is her first attendance at a meeting called by the Unemployed Councils-did we show her what the Unemployed Council is—what the role of the U.C. is—and since the Communist candidate for mayor was the prosecutor-did we show her what the Communist Party is-or did we just confuse her more?
"I think that she left confused-

that we did not prove to her that the way of the Holy Rollers was not the way out-that the Unemployed Council was a fighting organization for immediate demands—and we did not combat her many illusions success-

-A. O., Cleveland.

NOTE BY EDITOR: The selfcriticism of Comrade A. O. is clear. Only a few points must be empha-sized. There are Communists in the Unemployed Council of Cleveland-in the leadership of the Council. How did it happen that this open hearing to which all parties were requested to send representatives, the name of the Communist Party representative was omitted? How did it happen that, although the Communist representative was a candidate for mayor of Cleveland and prosecutor at the trial, the role of the Party was not brought forward?

This shows a tendency manifest, not only in Cleveland, but in many districts, to conceal the face of the Party. This is one of the reasons why our Party does not grow, workers are not recruited. Our Party representatives are not leaders only because of their native ability, but just because they are Communists—members of the Communist Party. Their line is clear because it is the Communist Party line. The program. of the Party must be brought to the workers, otherwise mass meetings and open trials are merely an exposure of conditions and no results

are obtained. The next question that the cor-respondent raises is that even the role of the Unemployed Council in the struggle for relief is forgotten. Naturally the city authorities are condemned for their failure to pronot shown what the Unemployed Council can and does do, there is

no reason for the worker to join.

In short we fail to take the necessary steps at all meetings to draw the workers into the organization. The results are clearly shown by

NOT the minor fellow-traveller Michael Slonimski, but the Communist I. M. Gronski, now editor of Novy Mir, may be said to have represented "official" opinion at the writers' plenum. He did not mince words about RAPP's mistakes. Neither did he confuse the policies of RAPP with the policies of the Party. His speech is included in the "mysterious"

"Our plenary session," Gronski said, "is the first of the organization which represents the whole mass of Soviet writers. Through the establishment of such an organization, broad masses of the old intelligentsia, grown up under conditions of bourgeois culture, by the turn which they have accomplished, associate themselves with the Soviet power and the socialist revolution. It goes without saying that this was not accomplished all at once. It was rather prepared by the whole preceding development of the proletarian revolution.

"That the Bolsheviks are right, the old intelligentsia have realized in face of facts as the crisis of world economy, the successful carrying through of the Five-Year Plan, the splendid development of collectivization and the impetus given to cultural development in our country. And as soon as the intellectuals had become convinced of this, not separate sections of them, but the whole mass, turned towards the Soviet power.

"As you know, writers are not separated by a Chinese wall from the rest of the intelligentsia. They are one of the most progressive and socially active detachments of the intelligentsia. The turn which I have just mentioned, has also taken place among writers. The old writers, the old masters of literature, have turned toward the Soviet power and the socialist revolution, a fact, which is so obvious that hardly anyone will dare dispute it now.

THE most serious error of the Russian Association of Proletarian Writers (RAPP) consisted in not drawing at the right moment inferences from the altered conditions, and in being converted from an organization which furthered the development of Soviet literature, into an organization which impeded this development. That is why the Party dissolved this association.

"Some comrades have given a wrong interpretation to this decision. They believed that the dissolution of the RAPP was tantamount to the refuation of the whole past of this organization. These comrades have forgotten that the RAPP has been the leader of the great movement of the workers and peasants who streamed into our literature.

"The RAPP people have been guilty of mistakes. They should be criticized for these mistakes, but criticized as class comrades. The former followers of the RAPP begin themselves to criticise their own mistakes. Well and good. We must make it possible to remedy their mistakes and put up a fight in concert with us for Soviet literature."

In specifying some of RAPP's errors, Gronski said: "RAPP'S criticism has been frequently cliquey and intolerant. No sooner had a writer misplaced a comma, then he was already represented as a class enemy and almost expelled from literature. It used to be a common saying: 'We shall throw you out of literature.' We do not waste many words with a real class enemy, we are ruthless toward a class enemy, but it is just for this reason that one must be rather careful with the term 'class

"Criticism must be thorough. The old writers who associate themselves with us have to overcome inner contradictions. Criticism must help them to follow our path. Criticism must be comradely: it must assist the writer in his difficult work, it has to treat the artist with forbearance. It is also up to us to build up patiently a new Bolshevik critique.

"The class struggle in the country goes on. In some fields, at certain periods, it will even sharpen. The class struggle makes itself also felt in literature: Though ruthless against the real class enemy, we must guide the writers through our criticism, and help them get nearer to us, to identify themselves with the working class. The pre-requisites for a truly

beneficial treatment of creative problems exist already.

"The comrades from RAPP demanded of the author to write according to the method of dialectic materialism. But the comrades of RAPP have not been able to give a simple and unambiguous answer to the question: What does it mean to write according to the method of dialectic materialism. Our literary people will seriously study Marx, Engels, Lenin and Stalin. We want our writers to know Marxism-Leninism thoroughly, to be well-versed in history, economics and philosophy, and to make the method of dialectic materialism their own. But we cannot possibly demad of the authors to 'write according to the method of dialectic

WE speak now of Socialist realism, of realism which helps us to give a true account to the masses of socialist construction, and the progressive movement towards a non-class society. Our answer to the question how one should write according to the method of socialist realism. is: WRITE THE TRUTH! But by recommending the method of socialist realism, we do not by any means reject revolutionary romanticism, the are for socialist revolutionary romanticism, for romanticism which makes clear to us the ways of development, which helps us to describe the alm

of development, to open to the masses a vista of great possibilities. "By creating the best conditions for the development and full bloom of Soviet literature, rich in genre and methods, and uniform as to its aims, we explain that the time is past when declarations and literary feuds were a substitute for works of art. According to artistic literary works, and not according to declarations, shall we judge the work of the

THIS speech-and it must be remembered that it is a speech at the founding of an organization, and not a literary essay-gives a somewhat different picture from our Scribe's bloodcurdling "inquisition."

But is high time that we had something more than artists, speeches, reports, circulars. The greatest boon to the revolutionary writers in this country would be a history of Soviet literature in the past 16 years by an American scholar like Joshua Kunitz, let us say.

Through such a history your young writers could acquaint themselves with basic problems, with mistakes, with achievements; and, if they guard themselves against the error of mechanically transferring ideas from the U.S.S.R. to the U.S.A., they could learn much that is necessary, fundamental, indispensable for a healthy development of their own move-

Save Heywood Patterson!

IUDGE CALLAHAN asked for a verdict of blood. And he got it.

Heywood Patterson, young Negro worker, innocent of any crime but that of having been born into the ranks of an oppressed people, has again been doomed to die in the electric

The ruling class landlords of the Southern plantations, the government, and the courts of Alabama are eager to fling the charred body of this young Negro worker into the upturned faces of the Negro people. Not only the Southern plantation masters, but the entire ruling class of America is eager to answer the rising rebellion of the Negro people and the growing unity of Negro and white workers, with the bodies of the Scottsboro boys as a warning.

Down at Decatur, the capitalist courts openly forgot their hypocritical aloofness and stepped down into the ranks of the running lynch-pack.

The verdict is only the logical fruit of the whole lynch hatred that reeked in the atmosphere of the court. It is only the logical result of the whole lynch spirit that beat in the capitalist press of the South, and in every instrument of ruling class propaganda.

As for the judge, capitalist tool in the hands of his capitalist masters, his every word smoked with lynch lust, that he hardly made any pretense of concealing behind his iudicial phrases.

Judge Callahan charges the jury. And for one and a half hours, upon the ears of that Jim-crow jury beat a cunning, insistent, unmistakable lynch cry.

For one and a half hours of his "charge," the capitalist judge spat hatred and sent his blood scream at young Heywood Patterson and his defenders.

And then, at once, exhausted with his brutal tirade, and eager for the execution, he prepared to step down, forgetting in his blood lust, even the formal requirements of his own ruling class justice—he forgot to speak of how the jury might bring in an acquittal!

IT IS in the hands of an avowed lynch butcher that the nine Scottsboro boys find themselves. It is in the hands of a governmental machine that behind its mask of "impartiality" does the lynch bidding of the plantation masters, that all the Scottsboro boys await their doom!

It is impossible, it passes comprehension that anyone can be calm and indifferent to this cold-blooded lynch butchery!

It is impossible that the toiling masses of America, of the whole world, that any honest human being can witness this ruling class murder without flinging every ounce of his energy to wrest these innocent Negro boys from the hands of the executioners!

The Southern plantation masters have again spoken their determination that the Scottsboro boys must die.

But the final verdict is not with them! It is with us, with the workers of America, with the working class of the world, that the final decision rests!

For three years we have, by our mass might, by our mass protest, stayed the hands of the lynch butchers!

It lies within our power to wrest them

from the executioner! Everywhere, at once, the toiling masses

of America and the world must rush to the defense of their Negro fellow comrades, awaiting the final massacre!

A BOVE all, it is with the Communist Party, revolutionary leader and vanguard of the oppressed masses, that the responsibility lies for the organization of the campaign to save the Scottsboro boys.

The Communist Party, in every district, section, and unit, must begin without a single moment's delay in laying the concrete steps for the mobilization of the masses, for the freedom of Heywood Patterson and the Scottsboro boys.

Upon every Party functionary and member rests the responsibility for the organizing of protest meetings, the sending of telegrams and resolutions to Alabama and Presi-

dent Roosevelt for the release of the boys. In every trade union local, it rests with the Party and the revolutionary trade union opposition to introduce resolutions of pro-

In the factories, streets, and neighborhoods, the Party units and mass organizations, from top to bottom, must be instantly

galvanized for action! The life of Heywood Patterson is at stake! Can we fail? Action, action and more action, is the necessity! For the freedom of the Scottsboro boys!

"Recovery" -- For Whom?

CMOOTH, smiling Roosevelt, ushered in the National Recovery Act with all the ballyhoo of a slick stock

"RECOVERY," HE SAID. But FOR WHOM?

Today, buried away in the forbidding, expensive pages of a powerful Wall Street organ, the Commercial and Financial Chronicle, the answer is given.

In ten short lines of statistics, specially compiled for the eyes of the upper class, not intended for the eyes of the workers, is the extraordinary, damnable answer, the ruling class answer.

For the first nine menths of this year, the net profits of 453 of the largest monopoly corporations leaped as if galvanized by an electric shock from \$87,000,000 last year to \$373,802,000 this year! An increase of over 425 per cent in profits during the last

That's what the Roosevelt N.R.A. has accomplished for the biggest Wall Street monopoly companies.

That's the main purpose it was intended for-to load more huge profits into the laps of the Wall Street nonopolies. That purpose it has accomplished.

Out of whose hide were these profits chiseled? Out of the hides of the workers and ruined farmers.

The N.R.A. codes were the machinery by which the employers were able to sweat more profits out of the toiling masses than ever before

Through speed-up, through wage cuts masked under the polite name of "minimum wage," through intensified robbery.

And even more, through the Roosevelt jacking up of the prices of all manufactured goods to skyhigh levels.

The N.R.A. sent food up 25 per cent in six months. Clothing went even higher. The farmers had to reduce their acreage, and then pay almost double for a shirt, or a new part for their tractors, or for a new supply of fertilizer.

The way the Roosevelt program has worked so as to monopolies bigger profits is clearly seen in the auto and railroad industry, for example.

N THE AUTO industry, production during the summer spurt increased ten times as fast as employment increased in the auto factories!

In the railroad industry, the Roosevelt program as worked out through its railroad co-ordinator, Eastman, has permitted the roads to show huge increases in profits, in the face of declining traffic, by keeping the number of railroad employees down to a minimum of one million men or less, and through the destruction of many of the working rules wrested from the railroad magnates through long struggle.

More production per worker! That explains just how the 453 biggest Wall Street corporations were able in the last nine months to hack out of the hides of the toiling population the huge 450 per cent increase in profit. The Roosevelt N.R.A. did it for them.

Meanwhile, the real wages of the millions of American workers were driven down below the March level of Hoover. Even the latest report of the A. F. of L admits that. It proves that the REAL income of the American masses is now at least 1.2 per cent lower than it was in March, when Roosevelt was elected by the masses for his promises of recovery! Actually the cut in real wages was much greater, amounting to ten per

The effect of this Roosevelt slash on the income of the masses is startlingly revealed by the figures on Saving Banks Accounts made public two days ago in the Journal of the American Bankers' Association. These show that within twelve months, there has been a drop of over TWO BILLION dollars in savings accounts. The rising cost of living wipes out even the workers' meagre savings.

Before Roosevelt came in the average savings account was figured at \$236. Now it is \$63.

And at that less than one person in three has any

IOW the Roosevelt government faces a government debt of \$23,500,000,000. It's all in government bonds. And the Wall Street banks, insurance companies, investment trusts, own by far the greatest part of these government "debts."

Who got all this tremendous fortune that the government borrowed? Over 85 per cent of it went for war preparations and in enormous subsidies to Wall Street banks, monopolies, etc.-to the very same corporations who are now reporting these tremendous profits.

Let every worker and small farmer ponder on this fact, that within the last six months Roosevelt has handed out through the N. R. A. over \$11,000,000,000 in subsidies to Wall Street railroads, banks, and monopoly industries.

The present Roosevelt Chairman of the R.F.C., Jesse H. Jones, got over \$63,000,000 for his own little bank in Oklahoma. Just like Dawes got \$85,000,000 for his bank in Chicago under Hoover.

These subsidies to the Wall Street monopolies were supposed to provide new jobs for the jobless, and raise wages for the employed.

The actual result has been the opposite. The huge subsidies have stayed at the top, where they were intended to stay, to pay interest on bonds, rents, fixed charges, and dividends to Wall Street.

WHO will pay for these huge Roosevelt subsidies to Wall Street through the R.F.C. and the N.R.A.? It must eventually come out of the masses in TAXES. That explains why Roosevelt EXTENDED the Hoover excise taxes that take \$600,000,000 out of the

poorest section of the population every year. To pay for these subsidies, Roosevelt, through the processing taxes, has already levied an indirect SALES TAX of over two billion dollars on the consuming

Meanwhile, the 17,000,000 jobless have not been able to get one cent of Unemployment Insurance for themselves and their families. Roosevelt gives eleven BIL-LION to the Wall Street monopolies, who in turn increase their profits 425 per cent. But he denies assurance to the starving jobless, because, he says, the budge Under Roosevelt, the R.F.C. hands out \$10 to the

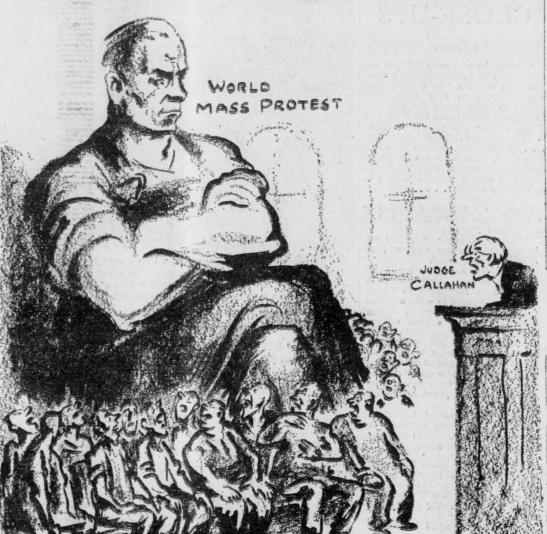

bankers for every \$1 for relief. And even the \$3,300,000,000 Public Works Fund, which was to provide jobs and give wages to the 17,000,000 jobless, has been over 85 per cent spent already, to not more than 50,000 jobs resulting, and with starvation wages on the job!

Even the C.W.A. program is just another attempt to continue the main purpose of the Roosevelt government as regards relief-to make the care of the jobless as cheap as possible for the Wall Street mono-

Billions in subsidies for the Wall Street monopolies! Four Hundred and twenty-five per cent increase in profits! Twenty five per cent rise in the cost of food! Reduction in real income of all wage workers! Ruthless struggle against Unemployment Insurance, to protect profits of the capitalists! That is the Roosevelt

So now it is clear as the sun, what kind of recovery the Roosevelt government had in mind when it promised "recovery" in March. It was recovery for Wall Street monopoly capital at the expense of the exploited, propertyless masses.

The statistics hidden away in the Wall Street publications reveal Roosevelt and his program for what they are-tools and servants of the Wall Street monopoly masters.

PARIS, Dec. 3 .- With the French Socialist deputies openly supporting the government's plans to balance the budget by further cuts in the social services, increased taxation and other attacks on the toiling masses, the Chamber of Deputies yesterday gave two rapid votes of confidence to the new Camille Chautemps ministry, whose early fall was predicted in all French circles.

NEW YORK .- In 1909, Dimitroff organized help for the workers of Sweden. In the edition of August 30, 1909, the organ of the Trade Union Federation of Sweden, "The Answer," published the following

"Aid from Abroad. From the Trade Union Federation of Bulgaria, a letter has been received which reads as follows: Dear Comrades, we send you another 150 francs for the strikers. Greetings for our heroic Swedish comrades in the fight from the organized workers of Bulgaria, G. Dimitroff, Secretary,

"Before this, the Trade Union Federation of Bulgaria, according the latest notices, contained only 1,509 members, had sent 200 francs. Considering the weak beginnings and the circumstances of the organization, their gift is extraordinary."

This notice is a document of pro-

"My questions are clear and factual. I am not voluntarily in the prisoner's dock. I would rather work for Communism in freedom. But under the circumstances I naturally utilize the dock as a battlefield for my convictions.

"I cannot help it if the public prosecutor makes his bed and then does not want to lie in it. It is not my fault that guiltless men are accused of arson. I shall continue to defend myself by all available powers!" Witnesses called from concentration

camps and preventive custody—most of them members of the Communist Party and other revolutionary organizations—were unanimous in declaring that although arms had been purchased, it was for defense against Nazis, especially against the expected Storm Troop march on Berlin, and not for an armed insurrection.

These men had been brought to the trial as state witnesses by the Nazis, who had thought they were sufficiently brow-beaten and tor-tured to renounce their former comrades and aid the prosecution. In-stead, all of them, to a man, turned on the prosecution, courageously and steadfactly bringing their testimony to the aid of the four em battled and framed-up Communist

Prosecutor Parisius, in an attempt to snare the witnesses on the ques-tion of the conditions that existed for armed uprising, asked "under what circumstances would Communists attempt to seize power?"

The witnesses were again unanimous in declaring that conditions did not exist in February and March for an immediate struggle for power. The situation, they insisted, did not pos-sess the prerequisites demanded by militant Leninist tactics for a seizure of power. Most of the witnesses testified that, because of the treachery of the Social Democracy, even the struggle for a united front had been sufficiently advanced at the begining of 1933.

The prosecutor, increasingly irri-

tated as the testimony of the wit-nesses, one after the other, failed to fulfill his program, was furious as they turned their testimony into an attack on the Nazi prosecution.

The Canton government is demandsisted again, however, that they had never spoken of an armed uprising, only of anti-fascist defense. If a they declared it was always accompanied by a statement on prere quisite conditions, which did not

exist in February. The statements referred to by the judge were obviously extorted at previous examinations, or the minutes falsified. This explains why the prosecution called on these witnesses—and also why it has fallen into its own trap.

German Food Cost Rises Under Hitler

BERLIN, Germany, Dec. 3 .- Fo prices have increased under the Hit-ler fascist dictatorship. The German workers must now pay considerably more for many food necessities than before Hitler came into power, official figures reveal, showing the increasing hardship and misery worked on the masses by Hitler's rule.

Butter now costs 3.40 marks a kilo, whereas in April the price was 2.40 marks. Cheese has gone up 30 per cent in price. Cream is 25 per cent higher than it was in April. German lard has gone up from 1.20 to 1.96 marks. The price of mar-garine more than doubled since February and is now 1.40 marks
