Set Up Committee PITTSBURGH, Pa., April 28.-The rank and file conference of seventy unseated delegates to the 60th A.A. Convention, adjourned yesterday evening, after setting up a National Emergency Committee seventeen and establishing the national apparatus for an organizing campaign.

Heading the committee are Clarence Irwin, national chairman; Lou Morris, secretary-treasurer; and Mel Moore, national organizer. Since he is absent from the N.E.C. meeting, it is not yet definitely established that Moore can accept the latter post.

This first session of the American Writers Congress was the dedica-tion of many of the best writers in America to the struggle against the cultural barbarism of fascism, nst the monstreus crime of im-

perialist war. Granville Hicks, noted critic, au-thor of "The Great Tradition," as chairman, opened the meeting in the name of the Congress. Greetings from Gorki, Barbusse Enthusisatic autor of the proletariat, then the uniform of the proletariat, then the straight for the strait-jacket of fas-cism, and they will find no peace there."

Enthusiastic applause greeted him as he sounded the keynote of the Congress: "It seems to me to be a good omen that it was a writer, Henri Barbusse, who sounded the call to arms that launched the American League Against War and Pascism. It is now vital for writ-ers to take their stand for the protection of culture against these two barbarous enemies of culture." Hicks then read two messages of greetings, one from the world-famous Soviet writer Maxim Gorki,

and the other from the Interna-tional Union of Revolutionary Writ-

Malcolm Cowley, an editor of the New Republic, and author of "Exile's Return," brought a roar of laughter as he began: "The fascist Hitler has shown himself to be the most discriminating critic in the world. Without exception, he has driven every good writer out of Germany

and has kept every bad one. "The only good book that has come out of Germany was written by a Communist Party organizer out centration camp," Cowley continued as the workers and intellectuals cut him short with deafening applause.

"The brutality of our society," Cowley continued, "with the inindifference and heartlessness of the upper classes to human suffering is a sure sign of its decay. Art and culture cannot live in such world. The Victorians, surrounded by squalor and misery, could at least se their eyes. Then they, at least,

reformed their prisons, their schools Today, the upper classes shrug their shoulders at the suffering at their doorsteps. Such brutality is no soil for literature. Out of this fascist brutality no culture can grow. Italian culture is like a dead tree-only parasites can grow on it."

AT AMERICAN WRITERS CONGRESS GLEN ALDEN PICKETS:

**HEARD BY 5,000 AT CONGRESS** 

The following address by Earl Browder, general secretary of the Communist Party, was delivered at the opening session of the American Writers Congress held Friday night at the Mecca Temple Auditorium in New York.

The Congress which we are opening tonight is unique in the history of our country. Strange may seem at first glance, there has never before been a large gathering of writers, the creators of our fine literature, to consider the problems of their work and its relation to the masses of the population, its rela-tion to the problems of the coun-try. Its significance is attested not only by the notable array of participants, but by this meeting, a mass welcome which expresses a much broader mass interest in Congress. Like most of the many new things we are experi-encing, it is one of the products of the crisis-a crisis which is not confined to our industries, but which is threatening the destruc tion of the whole cultural heritage of mankind.

How does it come about that the secretary of the Communist Party, who has neither the ability nor the time to be able to count himself among the literary creators, is invited to address this Congress, which is overwhelm-ingly unaffiliated with our Party, at its opening meeting? The answer to this question not only indicates the function of my but throws a bright light on the basic problems of the Congress.

The answer is clear. The overwhelming number of writers who are producing living literature have become conscious, in one degree or another, that the class struggle between capitalists and workers-the two basic forces in modern society—is forcing novel-ist, dramatist, poet, critic, to choose on which side he shall stand. This Congress consists of those who, having faced the iss have definitely taken their position on the working class side against the return to barbarism involved in the fascism and war of the decaying capitalist system.

**Basic Contact With Life** 

Writers, moving more and more into contact with and participation in the class struggle, have one and all found this current. rejuvenating and enriching their artistic work. They have escaped from the corruption that is de-basing bourgeois intellectual life. They have found that basic contact with life, for want of which the cultural sphere of capitalist society is rotting and withering They have found their away. place as indispensible forces in the struggle for a better life. In this current they have learned

letarian background. In my few minutes it will be my task to make clear the Party policy, and to dispel some of these misunder standings

First, is the question: Does the Party claim a leading role in the field of fine literature? If so, upon what basis? Our Party claims to give po

litical guidance directly to its members, in all fields of work, including the arts. How strong such leadership can be exterted upon non-Party people depends entirely upon the quality of the work of our members. If this quality is high, the Party influence will grow-if the quality falls down, nothing in the world besides this can give the Party any leading role. We demand nothing more than to be judged

by the quality of our work. That means that the first demand of the Party upon its writer-members is that they shall be good writers, constantly ter writers, for only so can they really serve the Party. We do not want to take good writers and make bad strike leaders of them. The Party has such a leading role as its members can win for it by the quality of their work. From this flows the conclusion, that the method of our work in this field cannot be one of Party resolutions giving judgment upon artistic, aesthetic questions. There is no fixed "Party line" by which works of art can be automatically separated into sheep and goats. Within the camp of the working class, in struggle against the camp of capitalism, we find our best atmosphere in the free give and take of a writers' and critics democracy, which is controlled only by its audience, the masses of its readers, who constitute the final authority.

among all writers of the political problems of the day, and trace out the relationship of these po-litical problems to the problems of literature. We believe that the overwhelming bulk of fine writ-ing also has political significance. We would like to see all writers conscious of this, therefore able

conscious of this, therefore able to control and direct the political results of their work. By by no means do we think this can be achieved by imposing any pre-conceived patterns upon the writer. On the contrary, we believe that fine literature must arise directly out of life, express ing not only its problems, but, at the same time, all the richness and complexity of detail of life itself. The Party wants to help, as we believe that it already has to a considerable degree, to bring to writers a great new wealth of material, to open up new worlds to them. Our Party interests are not narrow; they are broad enough to encompass the inter-ests of all tolling humanity. We want literature to be as broad. One of the means whereby the Party hopes to assist in linking up literature with life, lies in participating with you in organizing this field; organizing the writers, organizing a growing audience, and furnishing the connecting links between these two basic factors in cultural life.

Should Establish Standards We think organization of writers should be concerned, first of all with the establishment of certain standards, certain beacons marking the main channel of our stream of literary thought. Next, it should be concerned with winning new collaborators, broadening and deepening the movement by drawing in more established writers and training new ones. Third, it should tackle the economic problems of the writers, on the basis of organizing his market and setting up certain standards to work toward.

The Communist Party has given its help to the weekly New Masses, precisely because we saw the pos-sibility of this paper, in its new role, as serving some of these needs. The New Masses, since it was changed from a monthly sixteen months ago, is no longer primarily a cultural organ. It is a political weekly with strong cultural interests; it is one of the links between the cultural field and the broader life of the masses; addressed primarily to the middle classes, its task is to link them up with the working class, the bearer of the new socialist society While not a party organ, the New Masses represents the Communist line, in linking up these related but different phases of life. Its new role has not served to dissume picketing of the U. M. W. A. courage cultural publications as such; on the contrary, it is precisely in the last sixteen months that we have witnessed the greatest growth of purely literary pub-lications on the "left."

We are all of us bound together forced to work out our common problems collectively, by the menace of a common enemy which against imperialist war internationally, is our common bond. We

RECAUSE the Saturday editi BEAUSE the May Day edition, SLAVA DUNN'S column, on the "mother's organization of her work" has been held over. Her next column will appear Saturday.

CAN a working class mother with small children find any time left from her numerous tasks at home, to continue to develop her mind-to participate in class struggle activities, to have some real companionship with her own children, husband and comrades? The job of a housekeeper and mother, on a small or insufficient income, is very hard. The hours are the longest of all existing jobs. Small or sick children may need her day or night. The job requires all sorts of skill, yet most of the women have had no training for such work at all. They usually work out some way of doing the cooking, mend-ing, cleaning and child training-through the trial and error method which is very wasteful, and usually

WE OFTEN hear complaints that women in the home are backward, petty, and ignorant of the significance of the class struggle. In 1920, Lenin wrote: 'A woman continues to remain a household slave, in spite of all freedom of the law. She is bowed down, smothered, dulled, degraded by petty household work which chains her to the kitchen, to the nursery, wasting her. labor at work which is savagely unproductive, petty, nerve wrecking, dulling, and deadening."

The inevitable isolation of the mother at work from other human beings results in a serious lack of mental stimulation, especially since the job requires all twenty-four hours. She cannot leave or change her occupation. And yet this same job of being a mother of children could be perfectly joyous, natural and creative in a well-organized socialist society. The nurseries, kindergartens, and other institutions available to all mothers make a tremendous change. This change has been already achieved to a remarkable degree (however not yet completed) in the Soviet Union.

THIS May First, millions of mothers will march there and celebrate in joy and peace with their comrades, while their children have their own celebration at the schools. Those younger ones will march with their little flags around the school blocks and remain to be taken care of the rest of the day. In the Soviet Union many mothers are already able to use their energy and brains in the work they can do best and have some time left for more education, as well as happy companionship

THESE achievements however did not come to them suddenly out of a clear sky. Many years of work and effort were contributed by themselves in order to help bring about the change: Our working class the change. Our working class in a room. seems to be a very simple motion. You just will to do and the thing is done. Actually, separated into its parts, any such seemingly simple act consists first, of the will to perform the act; secondly, there is transmitted from the brain to the level of the muscles that are going to be called into play an impulse to get to work: thirdly, from this level, say in the spinal cord, an impulse is sent directly to the mus-

cles involved in the performance of the act, and the motion is completed. Now, take the motion of the hand

We have been talking our lungs out (that is, so to speak, on the type-writer) for lo! these several weeks we have already explained above this voluntary motion is really a very simple act and might almost seem to be an immediate thing.s Most assuredly, the will to do is all there, but there appears to be a hitch in the process from hand to pocket. L. R., B'klyn., N. Y.:-You seem to be quite logical in analyzing your own case. The most common causes of bad breath are dental cavities and pyorrhea and sluggish bowels. If you can satisfactorily correct these and the condition still persists, we would suggest investigating the nose, mouth and throat. Trouble here, such as sinusitis, enlarged, infected tonsils, mucous growths, etc.,

may lead to a post nasal drip and resulting unpleasant odor Also any difficulty in the upper part of the intestinal tract, as in

the stomach or gall bladder, may be a contributing factor in causing the persistence of the bad breath and sour taste. Particularly you, who at the age

of nineteen, should be enjoying the best of health, have no normal reason for feeling tired and listless. Consult a competent physician, who

will search thoroughly for any of the sources of infection we have mentioned. Do not use the highly advertised mouth washes and gargles as they contain only diluted antiseptics costing a few cents a gallon and selling for almost a dollar a pint,

This tremendous profit is a typical example of the drug racket that can merrily flourish

present system of society. An inexpensive and equally efficient mouth wash can be made at home. Such a formula may be used: Boric Acid-one-half teaspoonful

Potassium Chlorate - one teapoonful Peppermint water to six ounces. This may be diluted even more or used full strength.

"BUT to get back to that Roerich guy," said the D Artist, "that art business gives me the laugh. Think of it. When Goering's air fleet goes out to bomb Paris on a night raid across the frontier, ial instructions, I guess, will be handed to special instructions, I guess, will the trave. Listen, boys, the Premier will say, blow the hell out of the Frenchies but watch out for that Leonardo on the third floor. Or while the streets are flarwith big bombs and somebody's getting his blown to hell on a corner, some guy in one of the General's squadrons will suddenly turn around in the cockpit and shout, "Hey Heinrich! Look out! There's a Picasso on that street!"

#### Saving Mr. Whistler

THE Artist gave a snort. "But the Frenchmen won't have to worry so much. There's nothing left in Berlin they can blow to pieces anyway. The Nazis saw to that. If there was art left by the time Hitler's bonfires were over, it had to be sneaked out over the border in a crate marked 'Glass. Handle with care'."

"How about London?" I said.

"London?" said the Artist. "The dirigible commanders will get their orders just like the aviators. Blow the hell out of Trafalgar Square, but watch out for that Joshua Reynolds! Bomb Piccadilly, but please watch for that Whistler water-color And won't little Nicholas in his screwy museum on Riverside Drive be pleased when telegrams come through from the front: Rome bombarded. Deaths total twenty thousand. Property damage fifty million dollars. Beg to inform you that Fra Angelico's 'Madonna and Child' uninjured."

### Art's Immortal Head

VES," the Artist continued, snorting his con-I tempt of the proposal, "a great little idea of Nicholas, this art pact. While the millions of men and women and children are dying and being butchered by the imperialists, Roerich will be rubbing his hands in smug glee, because some Pope's monument or the basilica of a church is not harmed. Let them die, as long as an etching is safe in the war of the worlds!"

"No," he continued, "it isn't Roerich alone that's got me hopped up. He's only one screwy mystic buried in a screwy museum full of weird landscapes. It's the smug attitude of thousands of so-called little art-lovers who feel like Roerich does. That the bloodiest war in the history of the world is looming on the horizon in which millions of people will be needlessly slaughtered unless the workers stop it, does not concern him. It arouses in him only one fear. That some busts e portraits will be smashed to pieces by the big guns! That millions of lives will be gambled away in a war for markets doesn't bring the sweat to his head. But that a cameo of the mistress of a French king will be damaged sends him scurrying off to the White House and the capitals of the world to get the butchers to promise solemnly that in the blood they will let loose they will not damage one hair on art's immortal head!"

## The Black-Connery Bill

Question: Why do the Communists oppose the Black-Connery Bill now pending in Congress, which provides for a 30-hour week to relieve unemployment? P. K.

Answer: As a result of mass pressure led by the Communist Party for a thirty-hour week without reduction in weekly earnings, the new Black-Connery bill contains such a provision. But it is hedged around with so many exceptions and modifications, that the bill in its present form would harm workers by increasing speed-up and outting pay envelopes through spreading work.

These points stand out clearly in reading the bill. Employers can be granted exceptions to the act by appealing to the president. Past experience has shown the workers that Roosevelt always complies with any such demand. Secondly, if an employer should cut hours and wages at the same time, there are no provisions for punishing him except vague references to the fact that such an action will constitute a misdemeanor. However, as the N. R. A. has shown, employers can violate such agreements with impunity. The government agencies instead of prosecuting them, help in tying down the workers to bad working conditions and miserable pay. Thirdly, the act is to be effective only during a period of "national emergency." This means that Roosevelt could terminate it, any time he decides the emergency is over.

Hidden in the bill is a joker which reveals the real purpose behind the measure. There is a clause which allows Roosevelt to forbid the importation of any commodities which endanger manufacturers in this country. Of course, the phrase is not so blunt. But the practical effect would be that he could order higher teriffs, or stop completely, those foreign products which endanger the profits of American manufacturers. Thus under the guise of helping labor, the monopolies would be given a powerful weapon with which to increase their profits and control.

The bill would not help the workers. If hours were cut, their work would be speeded up, and against this there are no provisions. The bill would increase the profits of the manufacturers and would not better the living standards of the masses. It is being offered to the unemployed masses as a substitute for adequate relief and unemployment insurance. But in practice it would increase speedup, and consequently increase unemployment.

What the workers need is a thirty-hour week with a guarantee against all reductions in pay or increase in speed-up. They need a bill which has no loopholes for the employers to increase their profits through indirect wage-cuts. Such a workers' bill would increase the incomes of the workers at the expense of the bosses. All these measures the Black-Connery hill does not provide for; that is why the Communists urge the workers to fight and strike for a genuine reduction in hours and a genuine increase in pay.

## The Professor and the Nazis

After years of laboratory experiments, Dr. von Miraus, anthropologist, has established certain invariable characteristics of the German race.

Three traits are found among Germans: intelligence, honesty, and Nazi-ism.

"What?"

"I'd like to get a pact up asking the governments of the world to swear solemnly they won't kill children under ten, horses or cats, blind owls, or mockingbirds, in the next war. I'll bet they'd sign it. And I'll bet all the little nature-lovers, and the Society for the Prevention of Cruelty to Animals, and the wardens at the zoos would support it. help of a drowning man.

As the waves of working class protest sweep higher over the "Socialist" Jewish Daily Forward, at its alliance with Hearst against the Soviet Union, the editor. Abe Cahan, screams with a louder and longer defense. white intering in

The first one was three quarters of a column, the second, a column and a half and the latest, three and a half columns.

But so corrupt is the mind of this leader of the reactionary "Old Guard" of the Socialist Party, that each defense he makes entangles him in an even deeper anti-working class swamp than the last.

In his latest outcry, Cahan loudly proclaims the "truth" of the anti-Soviet "horror" stories which "Com-

THERE is nothing more desperate than the cries of rade" Lang first wrote for the Forward and which later, through a deal arranged by Cahan, were reprinted in the Hearst papers.

> "As witness, he can cite no one better than that "specialist in all that concerns Soviet Russia"-R. Abromovitsch, member of the Executive Committee of the Second International, who operates on an international scale in the spreading of Soviet "horror" stories.

> -Lang's motive in writing for the Hearst press, it seems, was only the purest. "Here was an opportunity to let the American people know the truth," says Cahan. To the Forward Gang, themselves publishers of a

> lying anti-Soviet sheet, the Hearst press reveals itself as a fountain-head of truth! This is the same Hearst of whom Dr. Charles A Beard recently said: "No decent person would touch him with a twenty-foot pole."-

Dr. Beard's reference to "decent persons," it is clear, does not apply to the Forward outfit.

Cahan pretends to have scored a point when he accuses the Communists of a "scandalous and libelious insult" against "Comrade" Lang. The insult lay, Cahan says, in maintaining that Lang received a large amount of money from Hearst.

As a matter of fact it was a number of leading Socialists and not the Daily Worker, who attacked Lang on this point, labeling him with the pleasant title of "pen-prostitute."

Lang's anti-working class crime would be just as odorous if it were a labor of love performed for Hearst gratis. A traitor who gives counter-revolutionary service free of charge, is no better than one who puts a price on it!

The drive of the Socialist workers to rid their Party of the reactionary "Old Guard" has put the Cahans on the defensive.

In the united front May Day demonstrations being organized by the Communist and Socialist Parties in Cleveland, Des Moines, Newark, and many other important centers, the "Old Guard" sees the handwriting on the wall. For their whole policy has always been directed against the Soviet Union and against the united front.

There is still time, in scores of cities throughout the country, for the Socialist Party to join with the Communists in a united May Day that will terrify the Harry Langs, the Cahans, and their master, William Randolph Hearst.

# Speed May Day Plans!

THE last minute, preparations for May I Day are being completed all over the country.

In Chicago, the militant fight of the workers, with the Communist Party leading the struggle, has forced the reactionary authorities to reluctantly grant a May Day permit. In the city of the Haymarket affair, the fighting spirit of May Day lives. The Daily Worker has already published the long list of cities and towns

where the united front has been forged for May Day, where working class solidarity has triumphed over all the obstacles placed in the way of united action by the "Old Guard" Socialist Party saboteurs and the upper trade union bureaucrats.

There is still time for this unity to be built. In the next few days that still remain, in every shop, trade union local and working class group, the question of a united May Day must be raised.

The Communist Party urges every worker, every Socialist and non-Party trade unionist, to join the ranks of the united front May Day parades. Let us pledge our solidarity in the struggle for better conditions, against capitalist exploitation, against war and fascism, for the defense of the land of Socialism, the Soviet Union.

Speed all plans for a united May Day!

of the strike. It was an excelent expression of working class solidarity. Now, if this same spirit of solidarity is extended to the picket line the Colt plant could be shut completely and the

most significant step yet taken in support

strike brought to an immediate victorious end.

The strikers should beware of the "mediation schemes" reported being taken by Miss Frances Perkins to prevent the threatened general strike. Eighteen months of mediation and arbitration has proven to the strikers that laying hopes in such schemes will only drag the strike and meet with failure for the workers. Mr. Kuenel, president of the Hartford Central Labor Union, placed it correctly when he told the press recently that a general strike is the next step to which labor will have to resort in order to make the Colt owners come through.

Delay in the execution of the decision for a general strike will play into the hands of the employers. Practical preparations must be pushed rapidly NOW. A definite date should be set. All unions should be mobilized for a unanimous general strike vote

Effective relief, mass picketing at the Colt plant, and a general strike could force a victory immediately.

# For Unity in Steel Union

EXPOSING Mike Tighe's efforts to divide the ranks of the steel workers by refusing to seat 70 regularly accredited delegates, representing the majority of the membership in the A. F. of L. steel union, the rank and file conference in Pittsburgh has issued its declaration of policy.

Helping Tighe, the capitalist press of the steel bosses in Pittsburgh has tried to characterize this as "a move for the organization of a new union." Emphatically it is not a step for the organization of a new union. Quite the contrary. It is the organized efforts of those expelled to unify, to knit the ranks of the A.A. split by Tighe at the behest of the steel bosses. Its purpose is to fight for united ranks within the Amalgamated Association of Steel Workers, to organize the steel workers in the fight against the steel trusts. Every worker reading the rank and file declaration printed on the front page of today's Daily Worker will clearly see that this is a serious step for unity within the A.A. in the face of the emergency, split situation created deliberately by Mike Tighe and Co. Every worker will greet these steps for unity among the steel workers, and will do everything to assist them by exposing Tighe's splitting policy, by calling on their local unions to pass resolutions for unity and protesting to Green and Tighe against the disrupting, dividing policy followed by Tighe in the A.A.

Railroad Workers-May 1 Why They Should March **Railroad Retirement Act** 

N EVERY large railroad center of this country, appeals have been issued calling on the workers of all industries to merge their organized power on May 1 in mighty demonstrations for their immediate demands. In Chicago, the workers will march and demonstrate:

One wonders whether the chief New Dealer has the slightest conception of the effect of his silver policy in China. In Mexico, for example, financial panic already reigns. The banks are closed, in order to avert economic collapse. But even this will not save terrible hardships for the masses. In China, where the central government has no power over the outlying prov-inces, where the financial system is chaotic, the result of Roosevelt's silver policy will be catastrophic.

ALL attempts to reach a settlement in the strike of 2,300 Chevrolet workers failed. The General Motors Corporation. declared that it will not negotiate until the workers are back in the plant. While the workers declared that they will fight it out to a finish.

The truth is that it is not merely a fight between the workers and the management of the Chevrolet plant in Toledo and the United Automobile Workers Union there. The Toledo workers are only the advance guard in a showdown that must come between all the locals of the union and the auto barons.

/For the automobile workers to stay on the sidelines and watch the Toledo local -just one of their small divisions-have it out with the powerful General Motors, would be to meet with certain failure. The strike should be spread to the entire industry. A strike vote was taken in all 175 locals. The demands of the Chevrolet workers are essentially the same as those of the other auto workers. All the A. F. of L. locals rejected the Automobile Labor Board, which was appointed by President Roosevelt. All the locals see now what a fraud it proved to be. The automobile workers should also realize that it would be fatal to again wait for orders from Green, Dillon and Co.; who advised them to fall for the auto board trick.

Pressure for a strike must be renewed in all locals with greater vigor.

A 100 per cent shutdown of the plant as in Toledo can be accomplished everywhere if a determined attitude is taken by the workers and local officials.

Silver—And Pay Envelopes ROOSEVELT'S inflationary advances in the price of silver means only one thing-terrific increases in the cost of living.

The jacking up of the price of silver by Roosevelt is part of his whole inflation policy, which steadily and surely is heading for open inflation.

Silver prices are gyrating like mad on the world markets as the capitalists manipulate prices. Profits are raked in. Speculation is running wild as the pickings rain in on the money exchanges. The money changers who Roosevelt promised to "drive out of the temple," are now, under Roosevelt, reaping more harvests than they have since the palmy days of '29.

'Even the bourgeois professors know what this means. "The end is not yet," writes Professor Kemmerer of Princeton, financial expert. "Serious inflation threatens us, and this will double the cost of living."

What this means for every American worker and his family is clear-tightening of the belt, hunger, misery. The American working class must

# THE AIM OF IMPERIALIST WAR AGAINST THE SOVIET UNION

**IMPERIALIST** war against the Soviet Union is open, bourgois, counter-revolutionary class war against the proletariat. Its principal aim is to overthrow the proletarian dictatorship and to introduce a reign of white-guard terror against the working class and the toilers of all countries. (Resolution of the VI World Congress of the Communist International. July-August, 1921

Proletarian democracy, of which Soviet government is one of the forms, has given a development and expansion of democracy hitherto unprecedented in the world, precisely for the vast majority of the population, for the exploited and for the toilers.
