# MINERS FIGHT SLASH IN WAGES

AS WE SEE IT By T. J. O'FLAHERTY.

JOHN L. LEWIS has a competitor for the post of secretary of labor in the Coolidge cabinet. John Donlin, until a few days ago head of the Building Trades Department of the American Federation of Labor has his hat in the ring. It remains to be seen whether the Coolidge wise men will prefer a member of the Gompers machine, which supported LaFollette to a man who lent his prestige as head of the largest union in the Fed-Reduction of wages by new eration to the G. O. P. cause. According to Donlin's press agents, he "regulations" imposed by the had a good war record, this being Hudson coal company, has sent testified to by Barney Baruch. SHANGHAI, Nov. 17.—Sun Yat Sen, war lord of Canton and dictator of South China, landed in Shanghai today. Incensed at the protests coming from foreign quarters that he is allowed to enter the international settlement here, Sun made a statement denouncing the activities of the foreign powers in China.

"If foreigners should dare to oppose my presence in Shanghai, I am determined to take drastic steps to deal with them," Dr. Sun's statement reads. "The time must come when all foreign settlements in China will be abolished. Every patriotic citizen of China realizes fully that China's rights have been infringed upon long enough. Should the revocation of foreign concessions be delayed any longer I fear some unhappy incident will result."

Dr. Sun's destination is Tien Tsin where he is to meet Feng Yu Hsiang, the christian general of China, who now is in control of the Peking government. The date of Sun's departure for Tien Tsin is unknown.

### Thank You!

A few days ago we printed a letter from prison as a sample of many coming to our office, showing what sacrifices the men behind the bars make to get a subscription to the DAILY WORKER. This request entitled, "Will you send the DAILY WORKER to jail?" has brought a response of \$5.00 from George Linday of Evanston, III. The money and a slight allowance on our part will enable the prisoner whose letter we published to receive the DAILY WORKER, the Communist International and the Workers' Monthly for six months as he desired. We with to thank the contributor who will no doubt hear from the prisoner directly acknowledging the gift.

There are others in prison anx ious to read the DAILY WORKER and our other publications. We will gladly accept donations for this purpose.

The rank and file are "next" to this brand of "leadership" and the "gang's" howling about the "Reds being on the job" seems like an echo from the steel trust propaganda dished out during the great steel strike.

It was the Tighe brand of leadership that lost to the Amalgamated Association two of its best lodges in Canonsburgh, Pa. It was Tighe's friendship with the Standard Tinplate Co. at this place that the industrial organization, built up by the militants, was lost along with over one-half of the membership. It was the Tighe & Co. leadership that lost two of the oldest and strongest lodges in the Amalgamated Association at Granite City, Ill., who were "punished" because they dared challenge the authority of Tighe.

The czar-like censorship maintained over the Amalgamated Association Journal by the headquarters gang has prevented news of these wrongs reachng the rank and file. Ben I. ### "Education Week" Helps Rouse Inquiring Mind of LAFOLLETTE AND Nation's School Children

By J. LOUIS ENGDAHL.

TODAY, "Education Week" is supposed to be on in full blast. The pursuit of "the reds," under the cry that Communists are a menace to "life, liberty, justice, security and opportunity," and with all the blood hounds of the American Legion not on the trial, was scheduled to take on enormous proportions.

But there is little evidence of life and activity anywhere in the capitalist camp.

There is no beating of tom toms, to arouse the multitudes to a lynch law frenzy, thru the columns of the kept press. At least not yet. There may be before the week is

The Communists have taken seriously the challenge issued by the Morgan-Coolidge administration at Washington for "Anti-Red Week." Everywhere thruout the land larger masses than ever before are being reached with the message of Communism. They are being shown the difference between capitalist and Communist education.

Perhaps the capitalist enemy, still drunk with its victory on Nov. 4, in the political arena, feels it unnecessary to put forth any exertion on "Education Week." Perhaps it feels that it is best "to let well enough alone."

There is the big probability that the "Red Baiting Program" issued by the American Legion head of the Bureau of Education in the Department of Commerce, carries the sting that is piercing the hide of those who framed it.

It is dangerous to give birth to a questioning attitude in the minds of children. It is not to be expected that they will swallow, all of them, without thinking, the fraudulent program presented to them.

When the charge is made that, "The Red Flag means death, destruction, poverty, starvation, disease, anarchy and dictatorship," some youngsters among the millions of working class school children may rise and inquire:

Why is it that there is so much dying, needless death, then under the stars and stripes? The children of the coal miners, especially, could inquire, or the children of any worker toiling in the mills and the factories; always facing needless death in the unnecessary hazards of capitalist in-

What about the poverty under the stars and stripes? Millions of children know that their fathers and mothers must count the pennies lest a single one of them be spent on any but absolute necessities.

What about hunger and starvation under the American flag? A million children go hungry to school every morning. Penny lunches must be served, most often to those without a penny, in the schools to the undernourished children.

What about disease under the American flag? The children will raise that question. They know how disease comes stalking into their homes; disease that could easily be fought, if the doctor could be paid; if father and mother didn't have to work so hard; if the children got better food; "if we could only live in a better home!"

The children won't understand very well what is meant when the American Legion program for "Education Week" says that "The Red Flag stands for destruction, anarchy and dictatorship." But they will begin to question if these are not the things that exist under capitalism; destruction of all that is worth while in life for the great masses of workers and farmers; chaos in all the relations between the units in the great human family; all under the brutalizing dictatorship of greed.

What is this Red Flag?

It is natural to assume that the children will ask about

The teachers must answer that it is the flag of Soviet Rule that reigns over the Russian Workers' Republic; spreading out over one-sixth of the land surface of the globe.

But that will only be the letting loose of the first little questions that will soon pour like an avalanche from the inquiring mind of the child. The boys and girls of the United States will want to know more about Soviet Russia; if it

is so bad why do the many millions tolerate the Red Flag? Then somehow they will learn that Soviet Rule is the goverment of the many millions of workers and peasants in Soviet Russia; the government that they have established themselves in their struggle against death, destruction, poverty, starvation, disease, anarchy and dictatorship; all those tormentors of mankind thriving under all the flags of the capitalist nations.

Today is called "Patriotism Day" of "Education Week." The New York World, in discussing "Education Week" says the natural reaction is, "Patriotism? Sure! Fine Thing! I'm for it?" But on second thought the question arises, "What kind of patriotism?" And there is where the trouble starts.

The children will begin to question why they owe patriotic allegiance to the flag of Morgan, Rockefeller and the government, that permits millions of children to be fed into the factories; there to be destroyed in their youth; unable to enjoy manhood and womanhood if they ever reach it.

They will begin to wonder if they do not owe patriotic allegiance to the struggle that has already brought such happiness, such a bright prospect for the future, to all the children of Soviet Russia, under the Red Flag, that the enemies of the children in the United States condemn so hysterically.

Let American capitalism loose the avalanche of questions from the inquiring mind of the children in school and it will thus help destroy itself and all that it stands for.

By LAURENCE TODD. (Federated Press Staff Correspondent.)

WASHINGTON, Nov. 17 .-Panic did not merely wipe out half of the popular vote which would have been cast for the LaFollette ticket if the election had taken place in September: it has destroyed the chance of formation of a new party next January when the conference for progressive political action is to meet to discuss the matter.

Fear of disturbing and angering the men who own the industries was sufficient, in November, to elect Coolidge.

"Clean" Party Born Dead. Fear, transmitted by means of the direct threats of closing down factories and mills, and by indirect threats contained in forecasts of "chaos" and general collapse, drove millions of farmers and wage workers and their wives to abandon their eager resolves to throw in their lot with the progressive movement.

This same fear, reinforced by the act that the republican and democratic machines remain in the field with ample money at their disposal, is now crushing out the last hope of progressive republicans and democrats that their leaders will create a new 'clean" party.

The Federated Press has questioned spokesmen of every element in the progressive movement in the national capital since the election, except Senator LaFollette, who has been in Wis-

It finds that the railroad labor chiefs believe that they must continue to appeal to republican and democratic voters and to the persons whom these voters elect to federal offices, and that instead of creating an independent party they should build up the conference for progressive political action for the purpose of nomnating their friends on the tickets of the two old parties. The central idea of the non-partisan league appeals to them as being more practical than the idea of trying at this time to supplant the democratic party. They say bluntly that they are going to "play

Always Opposed "New Party"

There has never been any question as to the hostility of the officers of the American Federation of Labor to new party. They vent recent campaign to denounce the two old parties as being in the hands of the enemies of the people, but they did not declare that the time for launching a new party was at hand. The El Paso convention is scheduled to declare for the old policy of nonpartisan action. Between the C. P. P. A. and the A. F. of L. strategy is this difference—that the C. P. P. A. proposes to establish organizations in the congressional districts to pick out far in advance, the best men to be nominated and elected on one or the other of the old party tickets.

The A. F. of L. has seldom taken an effective part in primary campaigns, but has waited until too late to secure the best representation of labor in

Senator Borah, who with Senator Couzens and Senator Hiram Johnson will hold a balance of power in the new senate, has declared against any attempt to put Senator LaFollette out of the republican fold. The democrats have intimated to Senator Wheeler that they are ready to welcome him back and to make their program progressive enough to attract his support. Unless LaFollette shall decide to raise the standard of revolt, alone of his party group, the progressive republican and democratic elements are likely soon to sink back into the party ranks from whence they came. This will leave the socialists and

the thin framework of the farmerlabor party as the reliable elements upon which a new party may be based. The farmer-labor group is so nearly akin to the socialists in its political philosophy that its absorption by the socialist party is by no means impossible. Tries to Straighten Socialists.

The socialists who appear generally lisappointed and impatient with the results of the 1924 alliance, will go to the C. P. P. A. convention in January with but one program—the extension

of socialist teaching. If the C. P. P. A. rejects the essentials of socialism, then the socialists will stand on their own feet and resume the work of straight propaganda for the socialization of the industries. Railroad labor, the keystone in the

arch on which the new party was to rest, has not fitted in with the socialists. It prefers to disturb the interior structure of orthodox politics while events shall shape it anow.

has been made a stronghold for teaching the right of the Educational Week working class to rule.

The Soviet commissar of education has rebuilt the entire outlook of the proletarian students on the basis of the new society. All scientific works used during czarist times, wheih were similar to books now used in the American schools, were filled with propaganda against the working class. Histories, sociological works, books on economics and anthropology were found to be counter revolutionary propaganda against the working class and were destroyed.

#### Czarist Education a Fraud.

What Edward A. Ross, professor of sociology at the University of Wisconsin, says of the czarist education, applies word for word to the present educational system of the United States as controlled by the capitalists. "Under the czar," says Professor Jones, "a gigantic fraud had been perpetrated on the children and the common people by feeding them husks when they were famishing for bread. The trick was to obscure while seeming to enlighten, to conserve darkness while going thru the motions of extending education." Professor Ross has here unwittingly given the true slogan of "American education week."

"It was not enuf that the czar's (in America the employers' and Coolidge's) servants picked and drilled the teachers. A horde of inspectors (in America school superintendents and officers of the national education association) went about tasting the microscopic doses of truth administered to the children and testing the teachers' loyalty."

#### Taught to Be Self Reliant.

In America hard work is glorified. And in Russia hard work is also glorifled. But in Russia, the school children are taught to work and learn for the good of the working class as a whole, which produces all wealth and to the office of the school at 208 E. controls it for the use of the workers.

Textbooks on sociology and political economy which tell the children they must be good servants to their employers in order to succeed are no longer in use as they are in America. The profit system is shown up as a system of oppression of the workers by the capitalists.

#### Self-Government in Schools.

One of the main functions of the school is to teach the child collective action, we learn in Anna Louise Strong's history of Bolshevik Russia. "The schools are trying to fit the child to build a socialist state," she says "The schools are the next battle front for Communism. The school is a self governed school community, in which children, teachers, janitors all have equal voice. It decides everything. What shall be done with the school funds, what shall be planted in the school garden, what shall be taught. If the children decide against some necessary subject, it is the teachers' job to show them, thru their play and life together, that the subject is

Self government, self help, self management in common activity are part of the basic policy of the Soviet schools. The fair friendly division of labor is considered the corner stone of education as citizens of a future socialist commonwealth.

### ANTI-RED WEEK SEES **EXPOSES OF "PARTIES"** IN GOOSE-STEP SCHOOLS

Reports of wild parties in the most exclusive "goose-step" universities of capitalism continue to pour in as "education week" proclaimed by Coolidge begins, Reports of unrestrained drinking, and all night campus carousings in the exclusive "rich boys' club," Lake Forest University, give the latest evidence that education under capitalism is degenerating. The nation will disregard the welfare of the youth of the country, as long as the control of the wealth and the country's produce by capitalists is upheld by the schools.

Superintendent of schools in Chicago, William McAndrew, who at the bidding of the chambers of commerce is stamping out the teachers' councils, declared in Kansas City Saturday, that "purpose of education In the United States should be political, civic and social, rather than scholastic, cultural or vocational." An article by Karl Reeve in a forthcoming edition of the DAILY WORKER, will expose the social forces, including child labor, that are preventing the children of America from securing an education.

While two million children slave in the industrial system McAndrew prates about turning the schools into propaganda factories.

#### Communist Juniors In Flying Start on "Education Week"

The Juniors got off to a flying start when several hundred of them attenda. Workers must belong to a ed a mass meeting at Imperial Hall, Sunday. William F. Kruse entertained the Juniors with a moving picture, depolitical party of the workers-the picting the struggle of the workers for the emancipation of their class in many countries. The picture showed the to the organization of revolu- how the priests and teachers under the rule of the czar put on airs and lived the high life. Then the decrepit homes of the workers under the rule of the czar were shown.

Scenes were shown of the struggles of the workers in Germany against the capitalist class, and pictures of the children's schools of Bolshevik Russia and their life under the rule of the workers' and peasants' Soviet government followed. The Juniors cheered pictures of the workings of the Soviet educational system, where the children are taught that they must always fight for the interests of the working class. The children had their own pro-

gram, enacting a play showing how the Juniors fight "education week" propaganda in the schools when asked to recite patriotic poems and talk against the working class. The hall rang with the Juniors' group yells.

### CHICAGO LABOR RED WEEK STAND HIT AT GOMPERS

### Fitzpatrick Did His Best for A. F. of L. Head

The action of the Chicago Federation of Labor Sunday in instructing the schools committee to draft a letter of protest against Education Week, charging it is an attempt at cheap propaganda, is a blow at the policy of the Gompers' machine.

Gompers strongly urges the Federation of Labor convention now meeting in El Paso to endorse "Education Week," and the Chicago Federation of Labor delegates unmistakably registered their protest against turn ing the schools over to the American Legion.

Happy Over "The Day"

"It is propitious that the opening of Education Week' is on the same day that the convention of the American Federation of Labor convenes in El Paso, Texas," writes Gompers in the November American Federationist, "and will thereby give impetus to this much needed service."

It was thru no fault of President John Fitzpatrick that the Chicago Federation opposed "Education. Week." Fitzpatrick had declared that the Chicago Federation of Labor to co-operate with the Legion in "education week" was up before the schools committee. Fitzpatrick knew that the letter could not possibly be acted on in time to do any good as "education week" started yesterday. M. Halushka, of the Men Teachers' Federation, however, brought the matter immediately before the meeting by moving that the schools committee draw up a protest against "education week." Halushka declared that 'education week is obviously an atempt of the American Legion to push some cheap propaganda into the public schools.

. In spite of Fitzpatrick's unwilling neses to see the Federation take any action, the motion of Halushka was unanimously passed. Fitzpatrick told the DAILY WORKER that he would refuse to make any statement against education week. "If you fellows are against it," said Fitzpatrick, meaning the Communist, "Then I guess I'm

Fitzpatrick Confers With Gompers Fitzpatrick had a long conference with Gompers when the latter passed thru Chicago last week. It is not known whether education week was discussed. Gompers, in the Federationist, urges "all labor organizations everywhere to co-operate with all bodies interested in the promotion of education week." Gompers thus advises the Federations to ally themselves with the strikebreakers and anti-laborites of the American Legion.

He explained how, prior to the revolution. working men who attempted to educate themselves were persecuted. They dared not be found with paper and pencil in their possession and taught themselves to read and write by using coins and learning the letters stamped thereon. This education of ambitious workers, was in most cases, accomplished in prison, where they came in contact with other victims of the czar's dictatorship. The prisoners, when liberated thru the revolution, had acquired sufficient knowledge to become leaders of the Soviets and were made managers of factories and other indus-

### We Have a Friend in Kansas City-

SOME people imagine Communists as such ornery, cussed creatures.

As persons convinced of a certain social theory and that like bigoted Jesuits they undeviatingly adhere to its theory and practice.

On the basis of such criticism the Communists are most heartily hated (and feared!) by the fakers in the Labor movement—and most generously snubbed by a good many liberals.

But the rigid adherence to the straight and narrow path of the Communists in their theory and practice has also gained us many good friends who are not yet in the movement but who are willing to "Build the DAILY WORKER," seeing in it the strongest weapon to promote the interests of the American workers.

Comrade Nelson Sorenson, DAILY WORKER agent in Kansas City, has found such a friend who modestly insists that his name be withheld. It's a real case of modesty when you

### See What a Builder He Is!

On the suggestion of Comrade Sorenson he was willing that the DAILY WORKER be sent for two months to 100 workers who were anxious to get THEIR paper but could not pay at this time for a subscription. He paid at once one-half of the subscription price of all.

At this stage enters our Building Agent in Kansas City. Comrade Sorenson is busy now trying to get renewals on all 100 subscriptions. On all those who are still unable to pay for renewal when their subscriptions expire this true friend of the Labor movement will pay for the second month of the subscription they received.

Of all those subscriptions renewed the DAILY WORKER gladly loses the cost of one month's subscription and has gained thru the favor of our Kansas City friend—a worker who will no longer stay without HIS paper if he can possibly manage it.

This notice is a grateful acknowledgment to our Kansas City friend and an appreciation of the efforts of our Kansas City Agent, Comrade Sorenson, whose plan our friend thought so well of.

Here is a real suggestion not only for individuals who can and would like to help the movement in some constructive fashion. Here is also a plan that units of any organization, including Workers Party branches could well adopt. This is constructive BUILDING with immediate results!-like the building work by other workers who have secured NEW subscriptions in the last two and a half days-on Thursday, Friday and Saturday of last week. ### A Useful Hint for a Worker's Household

It really costs the DAILY WORKER a good deal to keep our readers advised by post card and letter that their subscription has expired. It takes time and help and money (and we sure need the last item!). But every issue, if you get the DAILY WORKER by mail, tells you on the address label when the subscription expires. Use this little household hint—take a look at the label. Take a look at it and act on the suggestion and save us the sometimes necessary inconvenience of giving our time and our help and our money (we'll tell the world we need it!) to advise you that your subscription to YOUR paper is expiring.

Periodically we may suggest other useful household hints but this time act on the suggestion and look on the label of THIS PAPER you are reading-if you got it by mail. Renewals also help greatly to "Build the DAILY WORKER."

P. S.—The December issue of the WORKERS MONTHLY will soon be ready. New features will gladden the hearts of those who already have or will subscribe before it appears.

# CO-OPERATORS GET SHOCK IN SOVIET MOTION

### Resolution Is Beaten by Narrow Margin

By WILLIAM WEINSTONE.

The fourth Co-operative Congress which was held in New York City on November 6 to 8 was a dull uneventful gathering. It was attended by about 50 delegates from various parts of the country. The first two days of the congress passed in a futile discussion of bookkeping and control. The congress showed itself to be completely divorced from the life of the working class of this country and failed to touch the vital problems of the movement. Had it not been for a resolution on Russian recognition introduced by the militants which came up on the last day, it would have been difficult to distinguish the congress from any general gathering of liberals and professionals. Proletarian Note.

The resolution introduced by the militants, calling upon the American government to establish recognition and enter into relations with the Scviet Republic, was the first proletarian note struck at the congress. The resolution committee bringing in its report stated that the committee was divided and left the matter open for decision to the body. The representatives of co-operatives, coming from proletarian sections such as the Finnish co-operatives of New York, Minnesota. Wisconsin. whose representatives are militants in the labor movement and supported also by the delegates representing other co-operatives having a distinct proletarian membership, came out energetically for the adoption of the resolution. Among the delegates representing co-operatives with a petty bourgeois membership, there was consternation when this resolution was reported. These delegates would have rushed from the hall in terror if it were at all possible.

Feared Soviet Motion.

Despite the fact that the Russian co-operatives are the most powerful in delegate of which had greeted the direction build up the movement. congress at the very opening, the mere mention of the Soviet government aroused fear and trembling in the hearts of these petty bourgeois delegates. The working class representatives spoke vigorously and well on the issue, but they were not in sufficient numbers to carry and the resolution was tabled by a vote of 19 to 14. Some of those who voted against declared their sympathy for the Soviet government but had not the courage to adopt this resolution. Their argument was the stock argument of all reformists that "politics" must not be mixed with the movement. Working Class Connections

The co-operative movement showed itself to be in the very earliest stages of organization. The movement has not yet taken root among the workers and the lack of vision, the reformistic petty bourgeois leadership which this ter, Dec. 3. resolution showed dominated the movement, is to a great extent re-small theaters and the last is a big sponsible for its weakness.

the majority of delegates not because they understood the significance of it and saw that the failure of the cooperative movement to serve the class struggle was the paramount cause of its weakness, but because they feared that another discussion similar to the intense one held on Russian recognition would again divide the congress.

In Reformists' Hands In the election of officers the direction of the movement fell again into

the hands of petty bourgeois liberals

and trade union bureaucrats. It is not to be expected that they can make any vigorous campaign to establish the cooperatives in any sections of the country. The resolution adopted on relations with trade unions would call for such a campaign. The first action of the executive committee should be to send a ringing appeal to the American Federation of Labor convention meeting on November 17, to start action in forming co-operatives in order to meet the strikes, unemployment and period of depression in store for the working class in the coming months. But little can be expected of the present executive committee in this direc-

The co-operative movement is weak today because of the bureaucrats and reformists. The left wing are not organized and cannot impress their militancy upon the movement. The American workers need the building up of this instrument for the successful waging of the class struggle.

The Communists should give the movement their earnest attention and the international movement and a by their energetic participation and

"Every Communist a Co-operator" should be a slogan that the party ought to adopt and in the coming year help to give life and vigor to the cooperative movement.

# GERMAN POLICE

#### Communist Paper Sued for Libel

"Bloodhounds and Criminals as Po lice Officers." That was the headline of an article appearing in a Communist paper in Dusseldorf. The police of Dusseldorf found in this headline not only an insult to itself, but one to the whole institution of the police of Germany. Suit for criminal libel was brought against the paper.

The trial disclosed conditions in the machinery for the administration of justice of Germany that challenge any attempt at description. The whole institution of police was uncovered as one big cesspool. The government of the republic of Germany is in the hands of a band of unscrupulous mercenaries whose only object is to enslave the German workers for the benefit of German and international can ital. Whoever lends a hand in the execution of this task is welcome and is given some authority as an official or an agent of the police.

In Pay of Police.

Haarman, the infamous mass mur derer of Hanover was enabled to per petrate his crimes only because he was in the pay of the police as a stool pigeon. And he was able to commit his murders practically under the protecting hand of this police.

The court in the trial against the Communist paper in Dusseldorf was biased and prejudiced against the workers. Yet, after hearing three witnesses, this court had to declare that the Communist paper established the truth of its accusation that bloodhounds and criminals make up most of the body of the police. #### This—Or Face Annihilation

It is typical that one of the most important parts of the American Federation of Labor, the Building Trades department, is torn with dissension over jurisdictional disputes. The 350,000 carpenters and joiners, quarreling with the sheet metal workers, withdrew from the department some time ago in order to continue the job war against the sheet metal workers.

The Stone Cutters' Union accuses the Granite Cutters' Union of cutting artificial stone which is "not hard enough" to use granite cutter's tools upon, and therefore belongs, by grace of the "jurisdictional board of awards," to the stone cutters' jurisdiction. The scrap over this made such bad blood that 32 granite cutters were compelled by their union president to scab on a job at New Haven, struck by the stone cutters.

In California the open shop drive against the building trades threatens to wreck them all, but the head of the Bricklayers' Union questions the wisdom of sending money to help the building trades of California for fear "of furnishing ammunition to fight" the national department.

These are merely mild and typical examples of bureaucracy rather than give way to the increasing of the craft unions into industrial unions. In every strike the glaring impossibility of victory by the scattered segments of labor, which battle huge corporations alone while other crafts calmly not only do their own work, but the struck work

of the craft on strike, becomes more evident. Against such a demoralized condition the Trade Union Educational League has raised the banner of militant struggle by its campaign for amalgamation. "One union for each industry," has been its cry. Great blocks of organized labor have rallied to the call for amalgamation. Only the bureaucracy stands obdurate. It would mean the loss of many effort to enact judicial murder, legalized murder. fat jobs for officials. Therefore, even the it is a matter of life and death to the rank and file, the officials will not move.

The employers are preparing a new open shop drive, new wage cuts and a general offensive. Conditions cannot improve, they cannot even be maintained! ### The Morning of a Busy Gentleman

Lenin determined this very definitely after the Second Congress of the Russian social-democratic party. Thru the formulation of the famous paragraph one, he came to the creation of the Girondist wing of the party. Since then he continuously criticized the right wing of the Russian socialdemocratic party whose reformism became apparent to everyone only in

Thruout the first revolution, in the period preceding the late war, and particularly after the war, this antireformist sense of Lenin manifests itself in all his activities. He was deceived neither by revolutionary tions. He exposed to the daylight the reformist theoreticians and men of action, despite all their attempts to conceal their real nature. He was primarily a man of experience and practical deeds, and it was in this sphere of life that he caused the defeat of the strategians of reformism. More than one-half of his writings were devoted to the demoralizing activities of reformism, especially to the Russian Mensheviks. Just as an archeologist determines the species of a pre-historic animal by the examination of a single bone, so Lenin was able to determine the reformist nature of his opponents by a single phrase in one or another of their articles.
