JAIL COMMUNISTS IN CANADA

Whole Communist Movement Declared Illegal As Attacks Begin

TORONTO.—Thousands of Canadian Communists face arrest and persecution as eight Communist leaders were found guilty of sedition and sentenced to prison and an authoriza-tion issued to confiscate all of the Communist Party's property in Can-ada. The decision was issued on No-

Seven of the Communist leaders received five-year and two-year sentences to run concurrently, with the recommendation by the court that they be deported after the expiration of their terms. The eighth received a two-year and a one-year sentence, also to run concurrently. The gov-ernment has openly declared that a conviction in this case would be the starting point of a drive to smash the Communist movement and to arrest the 5,000 Communists and sym-

pathizers whose names it possesses.

The offensive being launched against the Canadian Communist Party is a grave menace to the entire international labor movement. All workers, whatever may be their political views, should unite to maintain the right of a working class party to exist legally in Canada and to defend devoted working class fighters

GREAT INTEREST

Russell - Lovestone Debate On Dictatorship To Be Held Nov. 27

The most lively interest is being exhibited among the advanced workers and radical intellectuals of New York City in the debate recently announced between Jay Lovestone, editor of Revolutionary Age, and Bertrand Russell, noted English scientist and philosopher, on the subject: The proletarian dictatorship is the road to freedom. The debate will take place on Friday, Nov. 27, at Central Opera House, 67 Street and Third Ave-

This debate is certainly the most outstanding of all the speaking dates Mr. Russell will have during his brief stay in the United States this year. Here he will have the chance to de fend his well known viewpoint that economic, and therefore all freedom may be achieved along the road of democracy as we know it today (that is, capitalist democracy), while Jay Lovestone, on the other hand, will defend the Communist concept that only thru the proletarian dictator-

ship can mankind be emancipated. Tickets for the debate are \$2.00, \$1.50, \$1.00, 75c. They may be ob-tained at the office of the New Worers School, 63 Madison Avenue, under whose auspices the debate is be

All those interested are urged to get their tickets early as the demand for seats is already heavy.

THERESA FOX IS **DEAD OF CANCER**

Active Communist Worker Dies At Age of 63

Theresa Fox, for many years a very active worker in the revolutionary labor movement, died on Wednesday, November 11, as a result of cancer. She was 63 years old.

For many years Comrade Fox was a member of the Socialist party and of its left wing. She joined the Communist Party upon its organization in 1919 and undertook active work in its ranks. With the onset of the Party crisis she immediately ranged herself with the Communist Party (Majority Group). She was a member of Harlem Section (New York City) of the C. P. (Majority Group) and was particularly occupied with work among the Negro masses in Harlem.

Communist Opposition

Big Election Victories For

A WEEKLY NEWSPAPER DEFENDING

THE INTERESTS OF THE WORKERS

Communist Opposition Forges Ahead In Switzerland And Alsace While Official Party Registers Defeat

ing defeat of the official French Communist Party in the recent municipal elections comes the splendid victory of the Communist Party of Alsace, affiliated with the International Communist Opposition, in the local municipal elections.

In Strassburg-South, Mourer, the Communist Opposition candidate, was elected on the first ballot, with a majority of several hundred, over the Socialist Bohn, the joint candidate

of the imperialist block.

In Strassburg-West the Communist Opposition candidate, Schreckler, headed the poll with a vote of 1601.

The official Communist "Party" (a condition of the control of the con tiny sect) ran a rival candidate who tiny sect) ran a rival candidate who got 476 votes. The Socialist, Koesler, obtained 1483, and the candidate of the autonomists, Reibel, 1348.

In Strassburg-East, the Communist Opposition candidate, Hengstler, received 1340 votes, the Socialist Will 1018 and the extension of the social strains.

Weill, 1918, and the autonomist, Roos, 1831. The Communist candidate 1831. The Communist candidate withdrew in favor of the autonomist in the second balloting.
In the country districts of Alsace

great progress was also made by the Communist Opposition forces.

The tactics of the official Com-

munist Party in Alsace are signifi-At first the Paris Central Committee offered to make a bloc with the Socialists in Alsace (the spear-head of the imperialist front!) against the Communist Opposition. When the Socialists refused, the Comnunist Party leaders offered to make "united front" with the Communist

In contrast to the almost annihilat- ed. The anti-imperialist front was maintained and was victorious!

> A similar victory was recorded in Switzerland. In Shaffhausen, where elections to the national parliament recently took place, the Communist Opposition received 3,189 votes as against the 130 votes of the official Communist Party. Bringolf, editor of the Communist Opposition paper, Arbeiterzeitung, was elected. Bringolf's vote was nearly 300 more than

> A week after the national parlia-ment elections, there took place can-tonal elections in the Schaffhausen canton. Bringolf was candidate here also and again was victorious. The Opposition candidate received 6,400 votes, while the official Party candidate could muster only 270 votes. The other parties also ran far behind.

In the same week a second balloting took place to fill one seat of the Schaffhausen city council. In spite of the fact that the Socialist candidate was supported by the Freethinkers (a thoroly bourgeois party), Comrade Erb, the Communist Opposition candidate, was victorious.

These great election victories of the Communist Opposition in Alsace and Switzerland stand in striking contrast to the almost uninterrupted defeats of the Communist Party of France and the practical non-exis-tence of the Swiss Communist Party. This contrast is an accurate reflection of the contrast in tactical policies of the Communist Opposition and latter break with the autonomists, of the official Communist Party, a that is, break the national front against French imperialism! Of mass work as against a policy of the course, the Alsatian Opposition refus-

Canada, the Empire and the U.S.A.

The Crisis in Canada

by William Moriarty

Canadians seem to have lost confi-lence in themselves. Here follows ome reason which justify Mr. Bennett in both particulars. At the time f the last budget, it was disclosed hat the revenues for 1930-31 were lown from \$446,000,000 to \$356,000,-200. Added expenditures meant a deficit of roughly \$84,000,000. For current fiscal year the yield is expected to total \$325,00,000, which will fall short of requirements by \$105,-To meet this it is proposed hat \$20,000,000 be borrowed, and \$78,000,000 be raised by fresh taxation. Still seven millions shy, Mr. Bennett hoped at the time of bringing down his proposals that this might disappear if trade improved and, consequently, revenues increas-

It is important to note that the tax ncreases affected over \$200,000,000 worth of British export trade. Iron and steel products, leather goods, furniture, etc., were the principal items affected.

Still concerning ourselves with rade, let us look at the results of the first fiscal year of the Bennett regime. Imports for September last were virtually cut in half compared with the same month in 1930. Exports tell a like tale: \$81,000,000 a year ago, less than \$46,000,000 in '31. The half-yearly summary shows a drop of approximately \$200,000,000 in imports and \$136,000,000 in exports during that period. This is the customs story. Without going into wearisome details of trade in general, a reference to the statistics of carloadings perhaps depicts the situation more clearly than anything else. These were 28.8% below September 1930 levels, or a difference of 83,818 carloads. Note too, how consistent has been the decline. For the first three months of the current year, 17.9,121.9 for April; 18.8 for May; 20.7 for June; 21.4 for July; and 26.1 The whole revolutionary labor for August. Taking the current movement mourns the death of Com- year, up until September, the total neared half-a-million carloads less of pounds. The average decline in than the corresponding period of trade with the rest of the Empire 1930, or 26.2% down. In terms of

an agricultural country. Many American workers need to be disillusioned crisis, President Hoover proposes—on this, and it is important that the "good will, the rebuilding of confifact be borne clearly in mind if we dence and faith!" are to appreciate the situation which has developed since Britain went off exceeded only by United States, United Kingdom, Germany and France. Per capita, she stood third in exports and fourth in total trade. Of course, agriculture is of major importance to Canada, and the crash in wheat prices has struck a vital blow at her internal position. The "scissors" has sharpened the crisis, the agrarians having found out to their cost that wheat pools may be a buffer to falling prices, but that they are weak reeds n the face of world competition and glutted markets. Therefore, the western farmer has not only been brought to his knees with lowered returns for his grain, but is also compelled to pay rates for industrial products which are still high, despite bankers stastistics on ever-declining prices.

Summarising, then, the internal situation, we find that Canada is experiencing the industrial crisis in the same proportion as other countries (530,000 unemployed male workers There is the added crisis in the agricultural field. Drought in the west Five million acres of the best wheat growing areas affected.

Canada and the Empire Turning to the "motherland", there is no need to explain that the crisis is there, for England is the birth place of crises. But remembering the Imperialistic character of Britain's development and the importance of her trade with the colonies, a glance at the statistics will reveal the source of the growing differences between the Empire and Canada, or all of the colonies, for that matter. Comparing the figures for the first quarter of the present year with those for 1929 the drop is from 8.41 to 4.34 millions (continued on page 4)

LAWRENCE, Mass.—As a result of the ineffective, hesitating and compromising leadership of the United Textile Workers officialdom and as a result also of the destruction of the destruct tive, splitting and dualist policies of the National Textile Workers Union (the T.U.U.L. union), the textile strike here has been broken. Of the 23,000 workers originally on strike, all but 6,000 have already returned to work without conditions, while these remaining workers are out only because they have been locked out and the mills closed. At the same time the textile companies, led by the American Woolen Company, has announced a wage-cut of 25%.

The defeat in Lawrence stands in contrast to the successful defensive struggle recently waged by the Paterson silk workers. In Paterson the Communist Party (Majority Group) was able, on the one hand, to supply effective and militant leadership for the strike and, on the other hand, to defeat the disruptive manouvers of the T.U.U.L. union.

HOOVER CALLS FOR WAR

Urges Big Arms Increase In Armistice Day Address

The world is more heavily armed today that at any time before the World War with "international conwith war with international conflicts probably no fewer than they were before actual bloodshed in that war began," Herbert Hoover, President of the United States, was forced to admit in his Armistice Day address in the District of Columbia. The danger of a new international conflict is great, the President emphasized, and the way to meet this danger is—"preparedness for defense," increasing armaments for war, in other words!

As a result of the "shock" of the late war and the "consequent loss of confidence," there has set in a period "Canada," said Premier Bennett man-power, there were 23,193 fewer recently," is experiencing the most reliroaders at work over the same length of time.

"When the further complained that Canada is by no means completely confidence, there has set in a period of "unemployment and distress in agriculture and business everywhere and from it all we have been passing thru an emergency second only to the thru an emergency second only to the great war." And to meet this acute "good will, the rebuilding of confi-

Of course, the President's glittering phrases really hide the viciously the gold standard. In exports and aggressive character of American imtotal trade, during 1929, Canada was, perialism at home and abroad. It is precisely at the time that America's war-like role all over the world is clearest that Hoover takes the opportunity of spouting "peace" phrases which hardly hide the brazen imperialist content.

> A very successful overflow meeting was held by the New York district of the Communist Party on Saturday, November 7, at the Coliseum, in celebration of the fourteenth anniversary of the Russian Revolution. The meeting was packed and spir-

LAWRENCE STRIKE Japs Held Back After Sharp Fighting In Manchuria; False Leaders And T. U. U. L. Disruption Result In Boss Victory TORY PLAN International Anti-Service Communications International Anti-Service Communications Tory Plan Tory Plan

King's Speech Outlines Full Reactionary Program

The government (that is, the Tory) resolution on the speech from the Throne was adopted by a vote of 422 to 38. By a similar vote the Labor amendment was defeated.

LONDON.—A complete, the very general, program of aggressive imperialism was laid down in the speech rom the Throne, that marked the ppening of Parliament. The speech from the Throne is traditionally an expression of the policy of the new government.

In the debate on the King's speech Prime Minister MacDonald filled in the outlines with a more detailed program especially on international financial questions. A European gathering to reexamine the whole question of debts and reparations, an obviously anti-French manouver, was proised. At the same time he announced that final preparations had been made for the reconvening of the Empire economic conference.

Nothing was said in official quarters on the Manchurian situation but

International Anti-Soviet Campaign Continues Spite Japanese "Denials"; League Council To Meet On November 16; Canton Swings To Japan

After several days of extremely sharp fighting in the Nonni bridge egion, hastily raised Chinese troops under General Ma Chen-shan succeeded in holding back superior Japanese forces, in spite of the latter's advance on the right flank reported on November 15.

At the same time strong rumors are current that a "compromise" solution is in the offing under pressure of the U.S.A.

BANKERS CALL FOR RAIL WAGE-CUT: UNION LEADERS READY TO GIVE IN

Investment Bankers Association Demands 10% Slash To "Meet Securities"; Union Heads In Conference With Executives; New Wage-Cut Drive On

At its conference at White Sulphur Springs, W. Va., the Investment Bankers Association, went on record Statistics of the U. S. Department of demanding an immediate reduction | Labor has recorded about 2,000 wageof 10% in railway workers wages 'as an emergency measure in order to provide a national revolving fund direct wage-cut, changing the minito meet the \$600,000,000 of railway mum basic rate from \$7.00 to \$6.00 securities which will become due in per day. the next four years.'

The official leaders of the big railway unions are already preparing the ground for granting the demands of the bankers and putting over the new

The proposed cut in the railway

cuts since June 1, 1931. Henry Ford has dropped his mask and put over a Wall Street is expecting more firm

resistance to wage-cuts by the workers, as is evident from the declaration by Roger Babson in his latest confidential weekly survey. Mr. Babson says: "Strike totals are mounting, 167 being recorded in October compared with 55 the previous month workers wages marks a new step in and 39 in October a year ago. We the nation-wide drive to slash wage expect to see further spread of labor rates. Last month the government troubles during the next few months. egistered 650 wage-cuts, spread over | Clients should take extra precautions

The international campaign of incitement against the Soviet Union is growing very fast under "unofficial" Japanese inspiration. Altho Tokyo officially "denies all rumors," the Japanese generals in Manchuria and at On November 12, a sharp battle took the forces of General Ma Cheng-shan, the Soviet government is unswervingly pursuing its policy of peace and non-intervention, altho it certainly does not disguise its sympathies with the Chinese masses who are groaning under the Kuomintang distatorship and Japanese militarism.

Torces of Canag Hai-peng, so-called "independence" leader, really, a paid agent of the Japanese general staff. With the reorganization of the Chinese forces in Manchuria under General Ma a pronounced change seems to be taking place in the vigor and effectiveness of Chinese resistance. All reports indicate the disciplined and determined character of Ma's troops as well as the support they are receiving from the local peasantry.

The Japanese are seriously disturbed over the new turn of events. A new Japanese ultimatum has been isdemanding General Ma's immediate resignation. General Ma has so far completely disregarded these threats. As a reaction to Japanese aggressions, a strong sentiment has developed among Ma's forces in favor of a pro-Soviet orientation. Marshall Chang Hsueh-liang, dispossessed war lord of Manchuria, has issued a de-claration disavowing any such con-nection, declaring that "such an al-liance would damage China's cause Geneva and with the United

In spite of General Ma's increasng resistance, the Japanese have now pretty well succeeded in seizing hold of all essential economic, political and military posts in Southern Manchuria. All railroad lines, except the Soviet-administered Chinese Eastern railway, are in Japanese hands and Japan is now laying hold of the coal mines and metal mines of the region. The determination of Japan not to release hold of Manchuria is openly avowed. There are three possible roads for Japan in the pursuance of its main course: (1) Straight annexation, which is very unlikely in view of present relations; (2) the formation of an "independent" buffer state, such as Afghanistan, under Japanese influence; and (3) the establishment of a practically independent Manchuria as an administrative unity under Japanese hegemony. This third course is the most likely altho the econd course is not impossible.

A sensation was created by the announcement from Shanghai that the Canton government, headed by Wang Chin-wei, Eugene Chen, etc., has come out for the proposal to "demilitarize" Manchuria (that is, to "liquidate" Chang Hsueh-liang) and to establish it as a separate administrative entity, nominally under Nanking, but actually under complete Japanese control. It will be recalled that the Canton clique was originally pro-British and pro-Japanese, but later began to waver in an American direction (the "unity negotiations" with Nanking). Apparently now Canton has adopted a definitive proapanese position. This is to be corclated with the recent pronouncenents in British Conservative government press in favor of Japan.

because of this in meeting labor problems during this period . . . The American Federation of Labor annual meeting at Vancouver last month, disclosed more fighting spirit on the part of organized labor than has been in evidence since the death of Samuel Gompers in 1924."

BIG MOONEY MEET IN ANTHRACITE

A Report From Wilkes Barre

A conference of 47 delegates repence entirely forgot the purpose for presenting 23 unions and workers orgal which it was called and turned into anizations, (including the Authracite a typical anti-Communist gather Section of the C. P.—Majority ing. There was a majority and min-Group), having a total membership ority report on the credentials. The of 5000, gathered in Union Hall, Wilkes Barre, Pa., on Sunday, November 8, for the purpose of preparing a united campaign in the Anthradelegates who had come with "yellow cite region to secure the release of Tom Mooney and Warren K. Billings. The conference unanimously endorsed Mooney's appeal for a uni- fore did not have the required yellow ted and broad campaign on the part of all workers organizations, irrespectively excluded. His attack against the tive of difference of opinion in other questions, and decided to organize gate from the Workmen Circle mass meetings in all important cities of the Anthracite to get more unions into the campaign, and to call a showed how the conference, by exbroader conference in Wilkes Barre, cluding the delegates from the Comon Sunday, January 10.

A resolution demanding the immediate release of Mooney and Billings as well as one demanding the release of the thirty-four Harlan miners on trial, the eight Scottsboro Negro boys and all class-war prisoners, was adopted and an executive committee of 23, consisting of representatives from each organization present, was elected to be in charge of the camp-

Many important organizations including three local unions of the United Mine Workers of America of Districts 1 and 7 in the Anthracite (including the important McAdoo local) responded to the call for the conference issued by a committee representing seven workers' organiza-tions. Nick Borich, secretary of the Provisional Committee, was elected the delegates to a lynching spirit permanent secretary of the conference against "the Reds." He, more than and the Pennsylvania organizer of the Socialist party as chairman of the conference. Others taking a leading part in the conference were Bradley, Rinaldi, Vrataric and Gallia, important figures of the miners locals in the Anthracite.

D. Benjamin, of the New Workers School of New York City, and F. Snyder, who knew Tom Mooney personally, spoke at the conference and appealed to all delegates and organizations present to unite their forces in the campaign in the spirit of Tom Mooney's call. The conference was most enthusiastic and expressed determination to bring the Free-Mooney Campaign into every working class organization in the Anthracite.

The official Communist Party and the district committee of the International Labor Defense not only refused to participate in the conference, but called upon the provisional committee to "disband," to call off the conference, but has adopted a splitting policy of calling a separate conference, contrary to the appeal of Mooney.

The United Front Free-Mooney Conference held in Wilkes Barre laid the basis for a real campaign; in fact, it proved to be the first conference held this year which carried out in action the letter and spirit of Mooney's appeal and relatively it is the broadest movement organized so far in the country.

IN PHILADELPHIA

PHILADELPHIA, Pa.—In direct violation of the spirit of the appeal sent out recently by Tom Mooney to all labor organizations, the delegates from the Communist Party (Majority Group) and from the Mooney-Harlan-Scottsboro Defense Committee, affiliated to the I.L.D., were excluded from the conference called by the Tom Mooney Molders defense committee in Philadelphia on Novem-

Led by the Socialists, the confer-

NEW 'AGREEMENT' IS RUMORED

(Continued from page 1) the Council of the League of Nations in Paris on Monday November 16, which Ambassador Dawes has been instructed to attend for the United

States.
Within the last few days the pro-Japanese attitude of the British Conservatives, now in control of the government, has become especially mark All indications point to probability that the United States will propose a "compromise" solution of the Manchurian question, one that will leave Japan in the status quo and will make it possible for Wall Street to resume its offensive later on. The attitude of American imperialism seems to be to shift the center of conflict to the Japanese-Soviet antagonism, with the confident expectation that whatever is the outcome it will be of benefit to Wall

War is actually under way in Manchuria! So far it is a war between Japan and isolated Chinese forces but it contains within itself the possibilities of a world conflagration. Manchuria is today the theater of basic world political antagonisms: the U. S.A. against Japan, supported by Britain, and Japanese imperialism, supported by world imperialism, against the Soviet Union. Each of these systems of antagonisms is now accentuated to a very high degree and the outbreak of a conflagration, which can only be a world war, is hanging in the balance.

The Communists and "Americanism"

A Letter From A Sympathizer

ing letter received from a sympathizer. In the next issue of the Revolutionary Age we will publish an extensive answer to this letter. This reply, written by Bertram D. Wolfe, takes up the question of the flag, of American revolutionary traditions and the "national loyalty" of the Communists.

America is in a bad way. "Rome is rotten, ripe to fall." But which way she will fall is uncertain as yet. The widespread misery which is steadily increasing, coupled with the growth of wholly predatory lawlessness, is going to cause civil strife of some sort within the next decade. That strife will be a critical period for all humanity. If Communism should triumph, we shall at least be progressing along the road of social evolution. But it is quite possible that Communism will not troumph. Worse, it is possible that it will receive a set-back that will postpone its ultimate success for centuries.

You would like to insure its success. You may not be convinced that the issue will arise so soon. From the point of view of the maturing of the revolutionary class in America, it to be able to do any real effective might not. But other forces are work, workers must unite irrespective working to bring this cataclysm of their political affiliation.

Havingto been forced by Guss and bigger. Capital itself is participating in gang-wars, hiring rival gangs to fight competitors. The country is seething on the edge of civil war. That war may be merely another bloody episode in history, with no political gain for the masses. It will be just that, if those masses are not strongly bunded together to protect their own interests.
You want to win this revolution.

Once the power is in your hands, you can organize the government according to Communist principles. But how can you win? I think you stand next meeting of the conference defeated, left the hall in complete disgust.

We publish below a very interesting letter received from a sympathizing. In the next issue of the Revolutionary Age we will publish an exemply written by Routenan I. Wolfo and the received from a sympathizing of the flag were green or the flag were gre communal ideal.

In order to win a multitude of adherents in America you must use the American flag. Reaction to that symbol is not intelligent, it is emotional. And blindly powerful. You can use the power if you will use the magic symbol which evokes it.

Start a campaign among the workers of America under the slogan: "Recapture our country!" State that this country was founded by men who were devoted to the ideal of liberty and opportunity for all. Quote the preamble to the constitution and the declaration. Explain that while these founders were alive, Communism had never been heard of. They were the most advanced radicals of their time. The industrial conditions which gave rise to it had not developed and could not be foreseen. But the spirit of the founders is the spirit of Communism.

You can prove that in dozens of ways, from their own words.

State that this country, "conceived in liberty and justice," has been stolen by a small group of clever capitalists. Urge the masses of America to recapture their own. "America for those who make her great!" America was settled and its government established by working people. The working people of to-day, living in a later age, face new problems. But the fundamental problem is the same. Shall we meekly yield the fruit of our labors to a few who live in remote

luxury while we starve?
The vast majority of Americans who can read were educated in public schools where a love and respect, a proprietory loyalty to the flag, was ground into their very souls. They will be slow to rise against it. But they have no such loyalty to the existing forms of government. They ridicule Congress and the President. They distrust the courts. They laugh openly at the corruption of the police. They will be quite easily per-

will fight and die for their own further enslavement. But if you seize the flag, from under capital's nose, you will have these masses supporting progress toward a new and more equitable form of government.

In the recorded speeches and writings of Washington, Jefferson and Lincoln and Roosevelt you, will find a wealth of material that can be used to bring literally millions into the camp of Communism. This will utterly flabbergast capital in this country. It will be a bold stroke, And I think it will work.

In such a movement you can bring out the probabilities that the founders of this country would be Communists if they were alive to-day. What would Washington think of Coolidge and Hoover, and their cold indifference to the sufferings of miners and mill-workers? What would Henry Clay think of Andrew Mellon? If Jefferson and Lenin could have met, would they not have been friends, just as Jefferson and Thomas Paine were? Would Patrick Henry submit to taxes and injunctions issued to-day?

It is a most powerful possibility And your changing flags is not with debt for he lout successful precedent. Mussolini a long time. did it. He changed principles too, to a degree. Let us hope you will not

You cannot swing a big nation without appeal to a nation-wide emotion. Self-respect makes a people slow to abandon their own symbols and accept those of another nation. The Red Flag may mean all workers in theory, but it means Russia to the average American. It is humiliating to admit that what someone else has is better than what we have. We can copy their form of government without a tremor, if you let us swagger

under our own flag while doing it.
(signed) SYMPATHIZER. (signed)

And This Is A "Communist" Paper!

WHAT'S HAPPENING TO 'EMPROS'?

A Letter From A Greek Worker

the Empros those of the Greek workers who know the make-up, the character and the revolutionary record of the personnel put in charge by the Communist Party, expected many things to happen in the Empros. But we never dreamed that this bunch of peanut politicians would stoop as low as to sell the columns of the paper to the petty bourgeois business men and attack the workers who were the founders of the Empros and of the Greek labor movement. And to make the long story short

Comrade George Orvanitis is one of the founders of the Empros and an outstanding leader of the Greek Communist and labor movement, one of the leaders in the last Greek furriers strike, head of a family of four children and a wife struggling under the capitalist system to help keep the family from starving. It seems that he made a loan from a petty bourgeois business man. The present economic crisis hit George Orvanitis severely. At this critical moment, our petty bourgeois business man, like a modern Shylock, came to Comrade Orvanitis for his pound of flesh Comrade Orvanitis could not pay his debt for he had been unemployed for

the following took place:

Our great Shylock went to the Empros and demanded that the Empros help him in his "plight" and promised to pay well if the Empros attacked Comrade George Orvanitis.

The Buro decided to sacrifice this proletarian leader of the Greek move-ment and to become the official "col-lector" of the business man for the 'thirty pieces of silver."

The strategy of the attack was laid by the editor of the Empros whose record was exposed in the Revolution ary Age by a Greek furrier a few months ago. (And by the way I hap-pened to be a striker on the boat on which the editor scabbed and when i

With the change of the administra- | appeared in the Age I met the editor tion of the Greek Buro and that of and he told me: "See, the Loveston-the Empros those of the Greek work-eites are trying to discredit the Empros by attacking me!" I told him it was the truth that he was a scab at that time and he said that "at that time I was a Venizelist and not a Communist." I answered according to him workers should strike only when they join the Communist Party.) The scab editor "advised" the business man to write a letter to the Empros that Comrade Orvanitis was making loans in the name of Communism and never paid them back and was thus discrediting Communism.

When we read this in the Empros about ten workers from the down-town district sent the following letter to the editor:

Dear Comrade Editor of the Empros: "We the undersigned workers, supporters and sympathizers of the Empros for many years, seeing that the Empros is discrediting Comrade Orvanitis who is known to all of us as one of the most active comrades, and is destroying his integrity as a revolutionist, protest vehemently at the stand taken by the Empros towards Orvanitis.

"If Comrade Orvanitis was forced by the circumstances to make a loan and was not able to pay it back because of the present crisis, this does not lessen his revolutionary integrity, as we all know him.

"While some new comrades, business men, were chasing after the aldollar, Comrade Orvanitis, altho he had to support four children and a wife, was running from town to town in order to build the Em

"Comrade Editor, we beg that this be published as a correction in the Empros."

· We sent this letter to the Empros two months ago. We still wait for an answer but the answer is not forthcoming and in the meantime the Buro is conducting an investigation co find out if the signers of the letter assisted financially the Empros and not if the signers are workers

and sympathizers.

The *Empros*, like the clarinet players in the Greek cabarets, plays the favorite songs of those who pay.

The editor explaining the "unhap-py" incident to a worker, declared that if he had not printed the letter, the business man, threatened to go to the capitalist press! So the Empros takes the place of the capitalist press and slanders the workers. That's a fine Communist paper!

Comradely yours,

Greek marine worker.

Frances Perkins, the State Industrial Commissioner of New York, has just announced that the factory employment index for October reached the lowest level in the Empire State since 1914. Miss Perkins stated that the payrolls in New York State have been reduced by one and a half billion dollars in the last two years. October decline in factory employment (3.3%) exceeded any monthly decline on record.

Miss Perkins's solution is the shorter work-week. This "solution" is now being resorted to by numerous companies. Actually, it means the introduction of the stagger system of MOONEY CONFERENCE | employment, whereby the remaining jobs are distributed among more employment, whereby the remaining workers, more wages are cut and thus payrolls are further reduced and the workers standards lowered.

Theodore Dreiser, in a statment issued from New York, branded the charges as a "frame-up." The American Civil Liberties Union and the National Committee for the Defense of Political Prisoners have announced their readiness to defend Dreiser. It has also been pointed out that Judge D. C. Jones, who had brought the whole matter before the grand jury, has made repeated public statements urging mob violence and terrorism against the investigating no-

Quite apart from the obviously false character of the "charges" (Continued on page 4)

tions in the mining towns in the Haran and Bell counties of Kentucky, the local authorities of these counties have resorted to a crude frame-up against Theodore Dreiser, America's greatest living novelist, the head of a committee of writers who, under the auspices of the National Committee for the Defense of Political Priist's stay at Pineville, Ky., was returned by the Bell county grand jury on November 10. The warrants on the indictment have not been served as yet. The "offense" is a misdemeanor under Kentucky law and is punishable by a fine of \$50 upon each conviction.

T. N. SOCIALISTS QUIT

The resignation of practically all soners, have been investigating con-Socialist party members from the ditions in the strike regions of Ken-Conference of Progressive Labor Actucky. An indictment against Theo- tion was officially announced on Nodore Dreiser, charging him with with wind sconduct" with a certain Marie are: Leonard Bright, formerly secre-Pergain at a hotel during the novel- tary of the organization, MacAllister Coleman, Frank Crosswaithe, Louis Stanley, etc. James Oneal, Norman Thomas and Harry Laidler had resigned several weeks previously.

THE C. P. L. A.

The reason for the resignation of these S. P. members was the recent decision of the C.P.L.A. to transform itself into a new working class party. The S. P. naturally regarded this party as a rival reformist party and therefore decided to withdraw its members from the C.P.L.A.

It will be recalled that some time ago, when the decision for the new political party was first made, a group of Communists who had been members of the C.P.L.A., had left the organization because of the impossi-bility of Communists becoming members of a reformist political organization. Now, with the S.P. members gone also, the C.P.L.A. is practically wrecked not only as an effective progressive labor force but even as an organization.

Critique of Capitalist Planning

by Jay Lovestone

(Continued from last issue) Perhaps the most realistic estimate of the limitations and impossibilities for planned economy under capitalism has thus just been made by the National City Bank in its October

1931 Bulletin:
".... The more complete and compulsory
the regimentation provided in the various planning schemes advanced for this country, the more visionary they are, and the less likely ever to win support. On the other hand, the less complete the program, and the less supported by legal compulsion, the less effective national planning would be. This is the dilemma upon which the whole argument may be said to break down.

"The system upon which it is urged that overhead planning should be imposed is a system of individual effort, in which each person is free to engage in any honest work within his capacities . . . The system is one of rivalries and constant change, in which miscalculations are made

and confusion occurs . . . "Under this system the agencies tending to maintain the equilibrium are prices and profits, which rise when there is too little of anything and decline when there is too much, and hence act as traffic policemen directing the flow of capital and labor into and out of various enterprises The agencies tending to disrupt the equi librium include wars, political and social disturbances, changes in monetary systems, natural calamities such as drought interference with the flexible adjustmen of prices and the free movement of goods capital, the defects of human nature which lead men into extremes of exhilara tion and depression, or debt-making and debt-paying, and into irrational economic

'Prices and profits" are the traffic policemen against the workers! These "traffic policemen" have certainly gotten economic traffic into a bad tangle, with the economic pedestrians (proletarians) having a miserable time of it. War and starvation amidst plenty are the results of capitalist regulation and planning. The proletariat pays the prices and the bosses get the profits by exploiting the workers. Prices are now declining not because there isn't enough produced but because so much has been produced by the workers that the bosses have fired them by the millions and that millions of workers, therefore, cannot even touch the superabundance and are forced to starve amidst plenty.

Inherent Anarchy in Capitalist Economy

The well-known American econo mist Wesley C. Mitchell shed further light on the anarchy inherent in capitalist production when he exclaimed

"In detail, economic activity is planned and directed with skill, but in the large industries there is neither general plan-ning nor developed direction. Civilized nations (Mr. Mitchell means capitalist nations) have not yet developed sufficient inventions to make systematic plans for the sustenance for their population; they continue to rely on the badly coordinated efforts of private initiative."

The moment the bourgeois economists begin to go to the root of the question, they lose all faith in the possibility of developing the capitalist system into an economy free from chaos. For example, Mr. Paul N. Mazur, of the banking firm of Lehmann Bros., thus hit the nail on th

each of us were appointed presider of the United States with the power to influence the psychology of the public what would we do in order either to pre vent or to minimize a recession in business? There is a theoretical formula which would make it possible to dimin ish or even eliminate real recession. All that will be necessary is a guarantee that there would be no unemployment, no reduction of wages or no recession of pur-chasing. If the first two and not the third were affected, industry would ac-cumulate inventories. If all three were in force, there would be the same purchasing power, the same ability to consume and produce. That would be simple principle and a principle which the Soviet government of Russia is at tempting to introduce. But in a political

system like our own the principle is hardly practical."

Yes! The much-vaunted "efficient" apitalist system has been a costly curse for the American masses. The development of its "organized chaos," accompanying the development of the country itself, has been a monstrous Said Mr. Floyd W. Parsons, editor of the Gas Age Record:

"The story of the development of life in tale of the waste of wealth by careless people that the world has ever known. We have flooded the air with the wonder fuel, natural gas; covered our land with the ashes of burned trees, killed off our wild animal life for the sport that was in it, and robbed our virgin acres of so much

its finger on the real sore spot of the come their own masters. whole situation confronting the workers in all this "planning" it states:

order and to leave the governor of the machine, which is prices, free of artificial control. If the world is dissatisfied with this method it will have to submit, not to national planning, but to a world dictatorship.'

Here we have it! "To keep the world politically in order"—is the essence of all capitalist plans and solutions for the crisis. "If the world (toiling masses,—J. L.) is dissatisfied with this method, it will have to subindustry in America is the most aritazing mit not to national planning but to a tale of the waste of wealth by careless world dictatorship." This is a plain threat of Fascism, of a Fascist dictatorship not only against the American workers but against the workers of every country.

What is the way out? Let us go of their fertility that in many of our regions farming as a pursuit is about as spinning wheel." to the Soviet Union. There we will see in life how social planning, genuinely planned economy is operating obsolete as a spinning wheel." inely planned economy is operating Again, the National City Bank puts and how the men in overalls have be-

For Militant Trade Unionism!

THE FOOD WORKERS NEED UNITY!

by Alexander Constas

The statement below was presented danger of becoming no more and no pefore the Executive Quorum of the Amalgamated Food Workers and reected by it. The Executive Quorum also refused to have it published in the Free Voice, official organ of the

The ever-deepening crisis in the U.S.A. hit the food industry more than any other industry in the counry. The bosses, taking advantage of situation, are determined once and for all to put the burden of the risis on the backs of the workers. And, as a result of this policy of the posses, we see big wage-cuts lenghening of the hours of the workers speed-up, and tremendous unemployment. More than 50% of the food workers, bakers, cooks, waiters, are tramping the streets of the city to lay begging for a chance and offer ng themselves to the employment sharks and exploiters of labor to work even for a meal so as to be able to keep body and soul together.

The Role of the Trade Union What are the existing trade unions loing in this situation? What is their role and their duty towards the workers in our industry? On one side, we see the powerful bosses associations endeavoring by all means at their disposal to smash any conscious movement for the organization of the food workers. And, on the other side, we see weak divided and union. The existing demoralization small trade unions of food workers, and disintegration of our union are taking no steps to serve the interests of the workers by a centralized united effort, but instead, wasting their time and energy fighting each other rather than fighting the common enemy, the big food trusts. It is my opinion that no one of the existing food workers unions today is able alone to undertake successfully the struggle against the centralized and powerful bosses associations. There fore, today more than ever the slogan of unity of all food workers unions is imperative: it is the only way to counteract the existing apathy and demoralization in the ranks of the food workers, organized as well as unorganized.

Now let us look at the existing workers unions. What do we

The American Federation of Labor food unions, small decentralized craft unions controlled by an unscrupulous burocracy, are today on the road to disintegration and are unable to offer any opposition to the wage-cut drive of the bosses and to inspire any hope for struggle among the workers. Their internal struggles to distribute the few jobs that they control to the followers of the various cliques within the unions and their never-ending jurisdictional disputes take all their time, weaken the organizations, and render them unable to carry out any struggle against the

2. The Food Workers Industrial Union, affiliated with the T.U.U. L. is now a small fraction of what it used to be. It is supposed to be a left wing union that fights for the unity of the food workers but it is doing its utmost to divide the work ers instead of uniting them. Its an tagonistic tactics have brought about a situation that the food workers, instead of looking upon the F.W.I.U. as a leader of unity and struggle against the bosses, look upon it as a disruptive factor trying to grab shops belonging to other unions rather than going out and organizing the thou sands of unorganized workers in the city of New York. The result of the policy of division and isolation has been to lose the few shops that i succeeded in taking with it after the split, from the Amalgamated Food Workers, and to create a serious un employment problem among it ranks. Therefore, the F.W.I.U. is disintegrating day by day to a pro-paganda organization. Today it is not a factor in the industry any

3. The Amalgamated Food Work ers, which is supposed to be an industrial union, is in very serious

less than a second edition of the A.F. of L. craft unions. This is due to the do-nothing and wrong policies of the central leadership of our union. This can be substantiated from the ex-periences of the last attempt by the Hotel Workers Branch to organize the cooks and waitresses working in our so-called organized shops. Altho the constitution of our union calls for an industrial organization, we find that in the shops controlled by the A.F.W. only the bakers are organized and attempts to put the constitution into practice, that is to organize all the workers in their shops are met by unanimous opposition by the officialdom of the organization.

Almost half the members of the locals are today unemployed. The only answer to this situation would be an intensive centralized organizational drive to organize the unorgan

The officials present us with long plans and lengthy speeches but the fact remains that all this remains on paper and nothing has been done up ill now. The situation in our union today is that unemployment increases and membership falls. A radical change must be made in our organization if we want to remain as a militant industrial organization. Today the membership has lost confidence in the leadership of our union. The existing demoralization ample proof of this.

The officialdom, instead of calling a convention which is necessary today nore than ever due to the existing crisis, proposes to postpone the convention and thus stifle the voice of the rank and file.

The officials propose various amendments to the constitution by a referendum vote which in my opinion, s an attempt at strengthening the burocratic power of the central officials. These changes in the constitution can only be made after a thoro discussion by the membership as a whole and by a convention.

What's To Be Done

1. I propose an immediate call for a convention and a thoro, free discussion of our situation and prob lems confronting our locals.

2. I propose that a committee should be elected by the convention to draw up concrete plans for the or ganization of the unorganized. This committee should report its plans to the convention, which should then act on them and entire organization be mobilized for their immediate ex-

3. A call must be issued by the convention to all food workers unions for a conference to plan amalgamation of all existing food workers unions into one powerful industrial union, which will be a powerful weapon in the hands of the food workers for struggle against the miserable condition in the industry.

ALEXANDER CONSTAS

The Play

THE LEFT BANK by Elmer Rice Had not Elmer Rice held out such promise in his "Street Scene" no one would have to be concerned with his recent play, *The Left Bank*.

How is it possible for the same

person to write both plays? How can anyone, after having written of such flesh and blood humans as those that appear in Street Scene, take the responsibility for such dull, empty-headed, trivial creatures as appear in The Left Bank?

The Left Bank is not even a theatrical play; were it such it might indeed have some reason for existence. It is a play of banal discussion. The Greenwich Village "intellectuals," the midst of the stirring affairs in which the world finds itself to-day, still find it possible to go in for discussions on "the freedom to live one's own life, to create, to produce masterpieces, etc."—as in this play. It is with these scatter-brained would-

"intellectuals" that Elmer Rice deals in his play. A successful lawyer, a philandering wife, a sex-starved aunt, make up the main characters of the play.

Elmer Rice has drawn some of his characters well—but who, in these days, is interested in such people? Whom can these types interest today, on the stage and off?

I found a really good line in the play: "They all seem to have to invent profound reasons for doing what they do." To my mind, in this line Rice describes very ably these people of "culture," nauseatingly self-centered and selfish, petty and trivial in their pettiness and in their triviality Topics and people more alive and significant, more sensitive to the changing scene, make better dramatic material and dramatists should learn where to look for fertile sources of inspiration.

The Example of the Soviet Union

We reprint below an article headed "Russian Bolshevism" that appeared in the Mayo News (Ireland), of July 18, 1931. The Mayo News is a rather conservative paper and for it to declare: "Shortly, they (the peoples of the various countries) must go and do what Russia is doing", is a very eloquent testimony to the deep dissatisfaction gripping Ireavail.

We reproduce in our columns this week, under the heading "A Vaccine stantly served up to us by the Irish today) should not only be able, but against Bolshevism which are so con-Russia, until a few years ago admitmuch that she is able to supply the whole world with necessaries and leave the people of all other countries idle? She has done it by the wiping out of monopolies created over the centuries by the autocratic government of the Czars. Her methods of doing so may have been brutal, and we are not of those who believe th the end justifies the means. But the end reached left her free to develop her natural resources, and the exist ence in other countries of such monoplies as she abolished makes it impossible for those countries to compete with her in the markets of the world. If Russian operations force all other countries back to first principles, and to the wiping out of monoplies of the means which God has try, Ireland, men who sought for such changes by constitutional agitation were invariably jumped on as is making itself felt today precisely revolutionaries and imprisoned or ex ecuted. The existing systems were to be preserved should the heaven fall. The well-thought-out plans of the Soviet Republic of Russia have pulled the rotten foundations from under the existing systems, and they are rapidly tottering to destruction.

Communism and Social-democracy

Some Lessons from Germany

by Herbert Zam

An event of tremendous importance to the entire working class, and especially to the Communists has just taken place in Germany. The Somaking no concessions. The most unable to capitalize on the discontent of the Social-democratic masses? Why has it been unable to win any substantial sections to Communism? taken place in Germany. The So-cial-democratic Party, the backbone of international Social-democracy, has split and a new party, the Socia-list Workers Party (Sozialistische Arbeiter Partei), has been organized. This new party has the support of thousands of workers who, having become convinced that Social-demoeratic party is betraying the interests of the working class, are groping for a new path. Naturally, the new party does not represent the solution which these workers are seeking, for only a complete break with reformism in all its forms and the accept ance of the basic principles of Com munism will enable them to conduct consistent struggle against the captalist system. It is, of course, no accident that

such a development takes place at the present time. The burdens under which the German workers, and the workers in cther countries as well,

are deserting the Social-democrats.

ripe for the advance of Communism. Why has the Communist Party been

because of the revival of Marxism

since the Russian Revolution. It is

furthermore clear that dialectical

materialism, with its emphasis upon

the concrete, upon the thing-in-its-relations, is naturally suspicious of

any theory of unilateral evolution and

leans pronouncedly in the direction of

The New Report on

Lynching

Committee on the Study of Lynching,

made public on November 9 by

commission and editor of the Chat-

tanooga News, it is nevertheless very

important, since it reiterates many

already well known conclusions about

lynching—a matter of significance,

considering that the report emanated

from 100%-white Southern sources.

several of the twenty-one Negroes

lynched last year were definitely in-

nocent of all crimes alleged against

them, while many more were "prob-

ably" innocent. The charges against

many of the Negroes lynched in the

United States in recent years were "deliberately 'framed'"; one was

lynched for offending a political op-

ponent, another to prevent him from

appearing as a witness against a

white man; another for demanding

wages, etc. In the forty-one years

ending 1929, only 23% of the Negroes lynched were even charged with

offenses against white women, that

hoary fraud under the cloak of which

so many black men have been murd-

ered. Nor has there been any "hesitation" on the part of courts to convict

Negroes (it is characteristic of the

brazen audacity of the white suprem-

acy apologists, that such "hesitation"

could even be alleged); on the contrary, the white courts of the South

are ready, anxious and over-anxious

The lynch murders in the South

are committed in full publicity, with

a shameless disregard for so-called "law and order." "Altho lynch mob

eaders can be identified without dif-

ficulty," the report relates, "grand

jury indictments are seldom brought against them." Indeed, most lynch-

ings are committed not only with the

connivance of the local authorities

but with their direct participation

The report treats the causes of

ynching in a very shallow manner; the real roots of the matter it cannot

elementary rights of the workers are | The answer lies in the ultra-left, secbeing constantly threatened by the onward sweep of Fascism. Socialdemocracy, instead of fighting against the shifting of the burdens of the crisis to the backs of the workers, has supported every move of the imperialists in this direction. Socialdemocracy is supporting all the "emergency decrees" of the present gov-ernment; it is maintaining the Bruening government in power and were able, thru correct policies, to win away the majority of the workis thereby consolidating the virtual dictatorship of Hindenburg-Bruening; instead of mobilizing the masses in the struggle against Fascism, it is capitulating to it, preparing the ground for it. In indignation at this base betrayal, thousands of workers

The present is therefore a moment

tarian line of the Communist Party, and, in particular, in its false attitude to the Social-democratic Party and to the Social-democratic workers. Let us recall Lenin's words to the German Communists on a very similar development a little more than ten years ago on the question of the Independent Socialist Party, (I.S. P.) Pointing out how the Bolsheviks

> continues: "Why in Germany did a wholly similar movement of the workers from right to left first strengthen, not the Communists, but the intermediate party of the 'Independents, altho this party never had any political ideas of its own but only wavered between the Scheidemanns and the Communists? Obviously one of the causes was the erroneous tactics of the German Communists, who must fearlessly and honestly admit this mistake and learn to correct it. This mistake consisted in rejecting participation in the reactionary, bourgeois parliament and in the reactionary trade unions; it consisted in the multitudinous manifestations of that 'left' infantile sickness which has now cropped out on the surface, and the quicker it did so the better, for the more beneficial to the organism will be the cures (see Lenin's Leftism, chapter

ers from Menshevism, Lenin then

We see here that with the exception of the remark on parliamentarism, this criticism by Lenin applies to the official Communist policy today in toto. In fact, other and equrelation between the class-bias of the ally serious errors are to be noted in place of the anti-parliamentarism of that time. We see the rejection of the united front, which Lenin pro-posed as one of the main weapons to win the workers away from traitorous Social-democracy. sane, dangerous conception of "social-fascism," which leads to the abandonment of all efforts to win the workers following the Socialists. We see flirtations with sections of the Fascist movement and the capitulation to theories of "national liberation" in order to endeavor to win Fascist followers. Instead of seeking for recruits in the camp of Socialdemocracy, the Communist Party is seeking recruits in the can'p of the Fascists. The result is that while a Scheringer is recruited to the Party, thousands of workers are ignored and the danger is created where these workers might be led back to the camp of Social-democracy.

The events in Germany must be a warning to Communists the world over. If the Communist movement is o make progress on an international scale, it will have to adopt such tactics as will enable it to win the millions of workers who follow Socialemocracy. In many countries, as, for example, Austria, Belgium, Holland, Altho nothing very new is to be the Communist Party is insignific found in the report of the Southern antly small compared with Socialdemocracy. The problem of building the Communist Party is intimately George Fort Milton, chairman of the bound up with the problem of breaking large sections of workers away from Social-democracy. That further splits in the Social-Democratic Parties are possible has been demonstrated by the recent German events.

Social-democracy still controls almost everywhere the most important workers organizations, the trade unions, the cooperatives, the freehinkers and sports movements, the raternal and cultural societies. The struggle against Social-democracy must be conducted especially inside these organizations. Under no circumstances will anything be gained by leaving them, for then Socialemocracy will have undisputed sway in them. Social-democracy still inluences directly thousands of workers who grew up since the war and who are not personally acquainted with the betrayals of that period or to whom they are no longer sharp issues. The Communists must expose Socialdemocracy not only on the basis of these historical betrayals but on the basis of the day-to-day betrayals by Social-democracy of the day-to-day nterests of the workers. This can be done especially by the proper utilization of the tactics of the united front, which have been abandoned by the Communist Parties and by the leadership of the Communist International.

The surest way to avoid in other ountries a repetition of the German events is to apply the correct tactics in the mass activities of the Communist Parties, which must be accompanied by a re-unification of the Communist movement and the reestablishment of internal Party democracy. It is hardly likely that workers with experience in political activity will join a Party from which they might be expelled the next day because of some minor or major differences on tactics; or in which they would not have the right to express touch. The two most important of their opinions freely and to discuss problems. The disunity in the Communist movement and the absence of internal Party democracy have acted as a barrier between leftward moving Socialist workers and the Communist Party. This barrier must be removed These conclusions are merely if the Party is to advance in the

About The Theory Of "Cultural Compulsives"

MARXISM AND HISTORY OF SCIENCE

by Will Herberg

(Continued from last issue) Class-Bias and Truth

6. Another shortcoming in Calverton's analysis is his failure to make any distinction in regard to objective validity as between the class-bias ("cultural compulsive") of the bourgeosisie and that of the proletariat. Both are pictured too much as having essentially the same truth-distorting effect upon science, altho in different directions.

It is true, science without a class-direction. It is certainly not without bias (or, class-outlook) is impossible in a class society. But not every entity (especially in the field of soclass-bias has a truth-distorting effect. On the contrary, it seems to me the search for truth are precisely the land today and the rapid spread of that a certain class-bias is even necrolical ideas. TOWARDS ANOTHER WORLD WAR

THE world is so used to terrific progress in its capacities for destruction that unless a war is "bigger and better" than the last one, it is not even recognized as a real war. But today it is no longer a question of whether there will be a war in the Far East. The question now is how long the war will last, whom it will directly involve and what dimensions it will assume.

Several facts dominate the situation. Japanese imperialism is playing in Manchuria the role the U. S. has been playing in Nicaragua, Haiti, the Canal Zone for some years. Of course, in these bandit ventures, the Japanese are less hypocritical, more brutally frank, than the Wall Street plunderers. In Manchuria, Japan is now doing what American, British and French imperialism have been doing in all China for decades. In the colonies and semi-colonies "democracy" has always been synonymous with bayonet rule, gunboat diplomacy, punitive expeditions to "civilize" the exploited and degraded masses.

native Chinese capitalists, bandit generals and feudal forces have played in union control established in the a traitorous role, standing vigorously on the side of the foreign hangmen. This explains why the Chiang Kai-Sheks and the Changs are neither able nor really willing to rally the Chinese masses for a revolutionary struggle for Chinese national freedom.

Only the extreme concern of the Soviet Union for world peace, only the patience of the Soviet masses engaged in laying the foundations of a new, a Socialist world, have so far prevented the war assuming worldwide proportions. In the entire crisis, however, it is U. S. imperialism which is playing the most sordid role. In the ranks of the Japanese ruling class there is a strong section which demands immediate war against the U. S. S. R. Another section believes it is necessary for Japan to move a step at a time and first consolidate its position in Southern Manchuria before launching any attacks against the Soviet Union. Under these circumstances, Wall Street is desperately at work trying to transform the Sino-Japanese conflict into a Soviet-Japanese conflict. This is the basis of all rumors as to Soviet military preparations and operations in Sibenia as well as in Northern Manchuria.

The ruling class, which gave the world the Kellogg Pact and whose war leader, Wilson, consolidated the League of Nations, is precisely that capitalist national group which is striving most vigorously for war. The essence of Wall Street policy in the Far East is thus expressed in high army circles: "Let Japan and the Soviet Union fight each other or cut each other's throat. We can only profit by the operation. Here is a chance of having two of our enemies destroyed or at least weakened. Then we

The game of Stimson is outlined above. In the event that Wall Street does succeed in transferring the present war into a bigger war, into a war of Japanese imperialism against the Soviet Union, and in the event that Japan should meet with heavy reverses, then Washington would immediately proclaim Japan as "the savior of Western civilization" and lead the forces in a holy war against the Soviet Union. However, should Japan secure the upper hand, then Hoover could again play the role that Roosevelt played at Portsmouth in 1905.

This does not mean, however, that Wall Street diplomacy will have its way. The Soviet Union is on guard. We in the United States must be guided by two objectives: First, to defeat the maneuvers of the of the interest of the workers. The Hoover administration against the Soviet Union so as to prevent a world war. This goes hand in hand with the defense of the Chinese masses against all enemies: the Japanese, the American, the British, the French is the situation which arose in conimperialists. Secondly, should the Washington government succeed in nection with the recent strike in Patits manipulations, then we work overtime for the victory of the Soviet Union, for the disastrous defeat of the Wall Street government in its

The Struggle in the Fraternal Societies

Class Struggle in Workmen's Circle

by Ben Lifshitz

class issue, the struggle between the workers and bosses in the Workmen Circle, has been especially dramatized in connection with the recent strike of the Paterson silk workers.

The W. C. was one of the pioneer workers fraternal organizations which grew up and was built up pre cisely as the Red Cross of the Jewish labor movement in America. In the early stages of its development, it took a very active and aggressive part in every important struggle of the workers against the bosses. From 1910-1916, in the period of the great strikes of the dressmakers, cloakmakers, furriers, men's clothing and textile workers, the W. C., thru its various leading committees and the individual branches, took a most ac tive part in helping these struggles In the smaller provincial cities, the W. C. branches were in the forefront of these struggles and helped organ izationally and financially to defeat the employers, who had moved to

With the shifting of occupations during the war and especially during the post-war period, in the years of so-called prosperity, the number of petty bourgeois, middle class ele ments, including employers of labor, greatly increased in the W. C.

Middle Class Elements "Assert"

Themselves in the W. C. These middle class elements are the most articulate in the organization. Many of them are former members of working class revolutionary organizations, who were active in the revolutionary movement in Europe prior to the World War, and in the early stages of the struggles in the Jewish labor movement in the United States, "worked" themselves up and rose to "higher" positions in the class structure of society. The W.C. branches, organized on the basis of "Landsmanschaften," gave a great opportunity to many of these elements, who were known to the workers of these organizations, to gain strong influence among them and to place themselves in leading positions in the branches, city, district and national committees of the organization

Class-Conflict in the W. C. The class conflict in the W. C. manifested itself not only in individual cases thru charges brought in by workers in their branches against the misconduct of their "fellow-members' —exploiters of labor, but especially during and after great strike periods. The grievance committees of the branches and the national grievance most vivid, most violent expression of the whole situation, an expression that has taken on a mass character,

The Story of Paterson

ers did put up a real, genuine, militant struggle against the employers and the city government.

The militant picket lines around

the factories, the breaking of the injunction in Clifton, N. J., showed the way to the textile workers of other centers, how to fight their exploiters and were really a clarion call to them to join in this struggle.

Certainly, there could be no excuse for any worker, especially for any member of the W. C., who gave his solemn pledge when he joined the organization that he must support the economic struggle of the workers, to scab in a strike where the workers were fighting for their very existence. But for the bosses in the W. C. of Paterson it did not matter, that a strike was on; they were determined to protect their class interests and they did everything a boss usually does in order to defeat a strike. They worked out various schemes for scabbing in this strike, utilizing the bers of their immediate family and few additional workers to scab durof the W. C. openly employed scabs and called upon the police for help "in emergencies."

The writer of this article had occasion to witness the action of some of these members. On August 14, he participated in a picket demonstration around a group of textile factories, one of them being the shop of Frucht and Friedman, members of the strike, Frucht and Friedman forced the committee to leave the shop and actually forced the workers to remain on the job. The story of scabbery of the W. C. members in Paterson will remain for the Boston B. Paterson will remain for the Boston B. This story to the B. This story to the Boston B. This story to the B. This s erson to be outraged by the betrayal was a desperate bid for markets. of their "fellow exploiters" in Pat-

The class issue comes to the forcerson, and to initiate a strong movel individual, but that this Paterson sitagain in the Workmen's Circle. The ment for the expulsion of these scabs unation raises in the sharpest form from the W. C. They brought in members in their respective branches. One of them was Mr. Samuel Juloff, a member of the national grievance committee.

> What was the action of these branches? One who does not know the inner workings and the dominating control of these bosses in the W. C. branches would hurry to answer . of course they have been expelled from the W. C. But the decision of the branch grievance committees was to drop the charges against these scabs. These cases have been appealed to the national grievance committee, of which Mr. Juloff is one of the members.

> Two general membership meeting of the W. C. have already been held in Paterson. The leaflet issued for the meeting of September 9, will give a clear picture of the situation.

"The present struggle for piece of bread would be won much quicker if not for the scabbery of the leading spokesmen in our branches, who are parading under the cloak that they are the ones who are keeping up the idealism in the W. C. You are called to a meeting of all workers in the W. C., textile workers and others, so that we can discuss how to deal with the scabs who call themselves bosses and whether we shall allow them to remain as chairmen, secretaries, and delegates, or whether we shall tell them that it is enough. If you want to scab, go where you belong but not in the W. C."

The national executive committee of the W. C. is rather in a predica ment. This was a strike of the bona fide labor movement, directed by the general strike committee of amalgamated unions, the Associated Silk Workers and the United Textile Workers, and endorsed by the A.F. of L. It is hard to find any excuse for scabbery in this case. We are informed that the national executive committee decided to remove Juloff from the committee. Certainly any

ment for the expulsion of these scabs uation raises in the sharpest form, the whole question of the domination charges against a number of these of the bosses and middle class ele- known formula. There is first the exments in the leading committees in the W. C. We recollect the arguments of Chanin at the last national nominating conference (February 1931) in higher reality." Then the practical defending the candidacy of Savetsky salesmen's conception of the sciences in connection with his conduct in the strike of the paper box makers and their interrelation: union. Chanin argued that, as a member of the W. C. Savetsky could branches of knowledge are of enoroccupy any position if the conference mous practical use, the axioms of wished to elect him to it. It did not fundamental assumptions on which matter to Chanin that the grievance each of them is based are charactercommittee of five would consist of istic for each science and more or three bosses and two workers! This is less in conflict with one another. This the national grievance committee that does not prevent our using each is to decide on the appeals brought in science practically in the sphere withfrom the Paterson workers against in which it is found to be useful..... their bosses!

> W. C. of Paterson. Here is a work-ers organization that they built, for Foll ers organization that they built, for Follows the usual attempt to revive which they sacrificed greatly in orther the dead husks of the idealist philodominated and controlled by their verv enemies.

This issue of scabbery in the W.C., which is by no means confined to Paterson alone, cannot be solved by any maneuvering, by means of trying to "liquidate" the matter, as was done in the strikes of Paterson of 1924 and 1928: the issue must be met squarely. There is no room for scabs in any workers organization. These scabs. the bosses and their supporters must be driven out of the W. C.

The Paterson situation has brought to the forefront the much broader question of proletarianizing the leading committees in the W. C.

International Workers Order Seeks

Further Splits
The I. W. O. is trying to utilize this situation in order to split away of mechanism and the idealism of small groups from some of the left vitalism. They exhibit the errors of branches of the W. C. This is the the one or the other or both. Only most criminal policy that a left wing, Communist organization could propose at the present time. Our place is in the W. C., to develop a broad movement around this issue of drivone who grasps the problem must ing out the scabs and proletarianizing realize that it is not a question of an the leading committees of the W. C.

THE CRISIS IN CANADA

by William Moriarty

(Continued from page 1) totalled 40%. Britain went off the gold committee were flooded with cases of standard in the hopes that the conscabbery, of outright open betrayal sequent fall in prices of her commodities in the overseas markets would enable her to regain the former position of chief trader. How did this manouver affect the hard-boiled Canadian capitalist class?

Bennett came out flat-footed with a declaration that all goods entering Canada from Britain would be subject to anti-dumping laws. Canadian merchants will not profit by the low 7,000 silk workers in Paterson. The exchange value of the pound so much conditions of the textile workers as was expected, since duty will have were miserable. Low wages, speed-up, unemployment, systematic wage-cutting left no other way out for the ernment has fixed the exchange rate workers, but to fight. And the work- of the pound sterling at par, that is, at the fixed value of \$4.86 2-3 in Canadian dollars.") Acting-Deputy Minister of National Revenue Cahan declares further that depreciation seeks "to insure that British-made goods may compete more successfully in the domestic markets of Canada and other countries with the similar products of those countries." There has been an outcry against this of course. But the duty sticks and the liberal Toronto Star points out that altho there is supposed to be a preference in the duty on British boots and shoes, in actual practise the prevailing rates are 521/2% against British and 44% against American foot-

Canada and the Gold Standard

There have been academic discus lar and the collapse of the Montreal special situation in Paterson, where there are a number of so-called "commission bosses" that employ mem-Hoover's expense when referring to | his efforts at Mississippi flood relief few additional workers to scab dur-ing the strike. Some of the members of the W. C. openly employed scabs ver's conference had been held two week earlier the Montreal brokerage failures could have been postponed and thus possibly averted, for the concerns, ... are immediately the victims of combination of the Canadian dollar and the panicky rush to liquidity of American banks." It is important to note here that Bennett Branch 140 of the W. C. They had leaders of the large brokerage interwas drawn into consultation with the their shop running full blast, and leaders of the large blowerage much their shop running full blast, and when three strikers came up to the ests for a couple of week before the failure, but the houses had to go when them the Boston banks insisted on them

Canada, Britain, the U.S.A. This story then, reveals the widen Paterson will remain one of the ling of the chasm between not only blackest pages in the history of the Britain and Canada, but also between W. C. It was therefore quite natural for the workers of the W. C. in Patinions. Going off the gold standard

such that any immediate gain in trade will be offset by the ultimate reaction. Canada would be willing to enter into an alliance with Britain if such would be of assistance to Canada in her efforts to realize upon her expanded industrial program. And there are those in Britain who have not lost hope of realizing the dream of a self-contained trading center within the confines of the British Empire. It is recognized here in Canada that victory for the National government in the forthcoming elections would mean that imperial would come to the fore again. Baldwin is openly bidding for Canadian support and the Conservative manifesto, promises that the Imperial Conference would be held in Ottawa in the near future should his group win. It was Bennett's stand for tarriffs which caused the postponement of the scheduled conference. (The last meet saw Bennett and Snowden clashing over this question.) Baldwin, conscious of Bennett's antipathy to the U.S.S.R., plainly words his bid in his Manifesto with an eye to satisfying his colonial brother imperialist:
"The best form of assistance (to the farmer) is by means of the quota and a guaranteed price for wheat. The farmers must be secured against dunmping which has brought so many of their branches to ruin. . . And to this end we must make imperial treaties. . . We shall require such a free hand as will enable us to impose prohibitions, quotas or duties as may be most effective in the situation." Canada has declared practically a sions relative to Canada and the gold complete embargo against Russian goods. Caviar is about the only thing standard. The official point of view goods. Caviar is about the only thing is that Canada is "on". Actually, she is "off." Hence the rates on the dolfor Canadian tarriff preferences, Baldwin, if elected, is willing to "impose prohibitions," particularly against wheat. He is willing meet Canada part of the way. But certainly the only cement which may serve for the time being to patch up imperialist differences will be of an anti-Soviet character. Agreements on tarriffs will be difficult, for Britain is conscious that American branch factories are more numerous than ever, and are only erected in Canada to escape the tarriff walls. And Bennett is more likely to jump to the tune of Wall Street, with its near four billions of investments in the Dominion, than he is likely to pay heed to sentimental pleas of the Em pire preservers.

THE PHILOSOPHICAL BASIS OF BIOLOGY, by J. S. Haldane Doubleday, Doran. 1931.

This book offers one of the cras sest illustrations of the crisis in which modern science finds itself. It has all the elements of a by-now-well-

".... tho the fundamental sciences or we cannot expect to make any science We can understand the rage and into a system consistent with our exanger of the worker members of the perience as a whole" (my emphasis—

der to protect their interests, and sophy under the slogan of "Back to now they find that a number of the Berkeley" (a slogan becoming in branches in he W. C. in Paterson are creasingly popular today amongst philosophical reactionaries) and then to God, of course:
"We realize the interpretation of

the universe in so far as it is ordered perceptions and will of God."

Tho nominally disclaiming vitalism in biology, Haldane offers us only another variation on the same idealist theme.

For the favorite vitalist phrases, 'vital principle," "vital activity," he merely substitutes his pet "manifestation of life" to cover up the same gaps—and there you are!

Lacking a unified world outlook bourgeois biologists in the main swing helplessly between the poles of the two main streams of biologic theory today—the vulgar materialism dialectic materialism can extricate biology out of its apparent theoretical contradictions, but that is a book closed with seven seals to our bourgeois scientists. To read a dialectical materialist interpretation of the bioogic fundamentals after wading thru the above book is to step from where all is darkness and confusion into the clear sunlight. Let those who want to try the experiment read this book and then turn to the articles by Zavadovsky and Colman in the book Science at the Crossroads, which is a collection of the theoretical papers presented in the name of dialectical materialism by the Soviet delegates at the International Congress of the History of Science and Technology held in London this past summer.

A Mahatma May Look At A King The oppressed Indian masses won a great victory when Mahatma Gandhi was permitted to visit the King and Queen of England without changing his diapers for a cutaway coat and a stove pipe hat.

Gandhi did not talk about the imprisonment of Roy and instead of complaining about British imperialism, he complained about the English weather. The King said he would see what he could do about it. "The King and Queen were most friendly and gracious," Gandhi told reporters, "And I also liked the Prince of Wales." From which anyone can see the Mahatma is an irreconciliable enemy of British imperialism.

Helping Those Who "Help Themselves"

Mayor Walker's committee for the relief of the unemployed has been forcing city employees to contribute 2% of their salaries to relief funds. Now, the Seabury investigation reveals that the ten millions so collected was largely used as a Tammany or definite as a manifestation of the campaign fund! Anyhow, the taxed city employees have the satisfaction of knowing that their contributions went to a "worthy cause."

Aesop Had A Fable For It

Those who think China can "avoid giving pretexts" for Japan's further invasion of Manchuria should read Aesop's fable of the wolf and the lamb.

Those wishing to know why the League or such powers as England and the U.S. don't speak sharply to Japan, should read Christ's instructions to those who wanted to stone the woman taken in adultery.

Southern Chivalry

The Southern "gentlemen" who have been robbing, starving and terrorizing the Harlan miners are counting on the lecherous, sex-consciousness of the "great American public' to offset the exposure of conditions in the Kentucky coalfields. If Dreiser can be proved to have spent a night with a girl in a Kentucky hotel, then the papers and "public" won't be able to take their minds off of that alluring thought long enough to think of the murderous brutality of the coal barons. As the cuttlefish escapes discovery in a cloud of ink, so these Southern "gentlemen" hope to escape exposure in a cloud of smut.

Good News Out of the East "Bar silver rose to a new high rec-

The vultures flap their wings and scream their hoarse delight. There'll be dead bodies soon. There'll be rich pickings soon. Good news! There's a war starting in the Far East! Fat news! The war will spread and there'll be rich pickings everywhere. Sharpen beaks and talons, boys. Record pickings coming. New records for the year. New highs for all time! Joy in the vulture camp "under the stimulus of rumors of war in the Far East.'

Nor did it prevent him from up-

caused to be repealed.

sufficient to prevent the execution pending introduction of new evidence which had been gathered. Nor did his "liberalism" prevent his refusal to issue a writ of certi-

tions passing thru the mails.
