The New Haven road has for years fought all attempts to force it to employ adequate train crews.

FAIRFIELD, Conn., June 7 .- All morning long and well into the afternoon to-day the trains of the New York New Haven and Hartford Railroad were crawling slowly in one direction and then in the other on a a single temporary track around the mass of wreckage which still blocked the line near this city as a result of the crash late last night in which four freight trains piled up on each other At least five persons were killed and

seven others injured. One of the dead men could not be identified, beyond the fact that he was a fireman, but the names of the four others were finally learned. When the first light of day came it was, found that all four tracks were covered with wreckage for a distance of a quarter of a mile. It was not until then, too, that the wreckers were able to make a final inspection of the debris to see that no bodies had been overlooked during the night's work.

Up to late in the day, however, it was still thought possible that more bodies might be found, for cars and pieces of freight were piled up on the right of way as if they had been spilled there out of the sky.

Although there were a good many heories put forward to account for the wreck, the general consensus of opinion today was that one of the freights an eastbound train, stopped on account of a hotbox, and that anfollowing close behind crashed into it from the rear.

This collision undoubtedly buckled the two trains and threw some of the cars across the two other tracks. C. B. Clark, engineer of one of the wrecked westbound freights, said that his train was coming down from the with another freight on the other westbound track close behind

The truth of the situation, which the capitalist press dare not publish and which Madero is doing all in his power to conceal, is the fact that Magon and the Socialists are cheaded enough to realize that he his millionaire group have for them and the masess in Mexico.

Right to the Soil.

The cry of the peons, and this cry has been truthfully voiced by Magen and the Socialists, is for the free use of the rich soil which rightfully belongs to them so that they may cultivate it and live in peace and plenty. This Madero does not want them to have Ou the contrary, he wants to work the working class as martiexploit the working class as merci-lessly as he and his group have been doing in the past.

The principal reason why Madero is especially hostile to the insurrectos in Lower California is because the percentage of Socialists in that secis unusually large, and they what they want, the rebels in Lower California

MANY KILLED IN MEX. CITY QUAKE

About to Welcome Madero. Death List May Go Over 100.

MEXICO CITY, June 7 -- It is estimated that at least seventy-five per- accommodatingly beat the Chicago sons are dead from an earthquake which shook the city and adjacent localities, wrecking buildings and reducing houses to a crumbling mass of debris

streets. The adobe houses crumbled. The dead in these cannot be numbered.

The shock was most severely felt in the western part of the city. The shock was followed by an explosion of gas in the artillery barracks, which added to the reign of terror.

Warehouses at the Central station collapsed, killing an engineer. A private boarding school was wrecked, but none of the occupants

vere hurt. The total death list may exceed 100. The National Palace had one of its walls cracked, and the keystone of one of the arches was displaced. The ancient cathedral of Santo Domingo

was damaged. The only foreigner killed was a Chinese.

At Buena Vista the railway tracks were twisted.

EL PASO, June 7 .- A telegram reeived here indicated that many of the fine homes in the American colony in Mexico City were wrecked by the earthquake this morning. E. N. Brown, president of the Mexican National Railway, telegraphed:

"Big earthquake at 4:30. Several killed in the Santa Maria district. My house badly wrecked. All our American friends safe."

The beginning of the quake was a 6:11 o'clock, with the principal shock seven minutes later. The direction of the quake was on lines from east to west, such as were noted at the time of the San Francisco earthquake, and there were slight movements also from north to south.

Professor Tiznan, of Fordham, said that the earthquake was the heaviest that had been recorded at Fordham in a long time. He thought the center of the disturbance was about 2,500 to 3,000 miles away, but in which direction he could not say.

CHICAGO, June 7. - The Cubs dropped one to the Dodgers here to day, and at the same time dropped the lead of the National League race. The Dodgers led most of the way, although the Cubs made a fierce rally in the seventh and, knocking Barger tied the count. The final score was 5 to 3. But the Dodgers, fighting every inch of the way, went to the front again, helped out by rough work by the Cubs. A bonehead play by Cole ended the seventh inning rally just when it looked good.

Nap Rucker, the star southpaw, replaced Barger in the middle of the seventh, and finished the game for Dahlen's team. It was an interesting but erratic contest to watch. Dahlen was sent to the bench by Umpire O'Day for protesting a close decision in the seventh inning. The score:

Owner of Ansonia Hotel in Industrial Investigating Com-Mysterious Affair Involving Letters.

William E. D. Stokes, the 65-year-old wner of the Hotel Ausonia, 73d street and Broadway, who recently married Miss Helen Elwood, of Denver, who is 24 years old, was shot three times in the leg late yesterd y afternoon in the apartment house at 225 West 80th street. by two women describing themselves as Ethel Conrad and Lillian Graham. He

Stokes got the revolver away from the women and also fired three times, but the shots all went wild.

The women said that Stokes came is them to get some letters he had written before he was married, and that when they didn't want to give up the letters he used force, and they got the revolver to protect themselves.

Three Japanese butlers employed in the house were holding Stokes to keep him from injuring the women when they fired the shots that hit him.

Soon after Stokes was taken to the Hospital his personal attorney, Albert H. Glesson, and Terence J. McManus. of Olcott, Grunber Bonynge its Mc-Manus, who have appeared as counsel for him, had a long talk with him. Stokes' Account.

Stokes there told this story to the

"This afternoon I got a telephon message from a woman calling herself Conrad, of whom I had never heard before. She told me where ah was, and said she had some letters that I had written to Miss Graham. She said Miss Graham had sailed yesterday on the Baltic, and that if I wanted the letters I must come right away, as she expected to return to New Orleans with her brother at any

"I knew of Miss Graham, but I couldn't remember that I ever wrot her any letters. I decided, anyhow, to go up and see about it, and I got there about 5:50 o'clock. I had no sooner entered the purior of the apartment before both women faced me, and the door was closed behind me at once. I believe the women were alone in the apartment.

When the police reached the apart ment they found Stokes lying on the floor of the hallway outside the girls room. He told them that the three Japanese servants who worked in the apartment of Pat Casey, the vaudeville booking agent, who lives acros the hall, had held hun while the girls fired at him. On his story the three Japs were locked up, too, as acces

But somebody apparently failed to reckon on the undercurrent which was not visible on the surface.

Socialists Oppose Plan.

The only outspoken opposition was nade by the Socialists, who spoke against it in the city meeting, in open air meetings, wrote against it in the public press and distributed 2,000 nunicipal platforms declaring against it. While the Norwich Socialists do not appropriate all the credit for the defeat of the proposed charter, the only audible, impersonal and consistent campaign against it was that made by the Socialists, although it pel Roo was of course minimized by the local

The vote was light. The Prohibitionists put up a full ticket and patched up their State and national platform and called it a municipal The Socialists, for the first time, put up candidates in a municipal election, having three nominees out of twelve offices to fill. They presented a municipal platform, every plank of which pertained very particniarly to municipal affairs which was an innovation in municipal affairs here, as the Republicans and Demograts have never had any platform except to get the officers.

Refused to Print Platform.

The leading paper, the Norwich Eulletin, a Republican organ, refused to print the Socialist platform, the editor making the excuse that if did so he would have to print the Democratic and Republican platforms in all fairness, and they issued no would print it for \$21 if the Socialists

Court to Oblige Former Official.

Charlie H. Hyde, former City Chamberlain, Gaynor's protege, and under indictment on charges of bribery in connection with an alleged deposit of \$130,000 of the city's money in the Carnegie Trust Company, then defunct, wants an immediate trial.

Justice McCall in the Criminal Branch of the Supreme Court yesterday reserved decision on Hyde's ap-

plication. James W. Osborne, counsel for Hyde, said that there had been too much delay in trying his client on the indictment. He asserted that it was an outrage to delay the trial of a public officer on an indictment of the

guilty, and Osborne was willing to waive all motions and demurrers and go to trial. He said that Hyde was innocent and anxious to have an immediate trial. Justice McCall said: "I cannot see why this defendant should not have a

The working class in Wheeling is awakening. Another atep forward was taken on Tuesday. May 25, when in the city election the Socialist candidate for Board of Control received 1,557 votes, an increase of 50 per cent over the city vote in the State election of 1510 and 1000 per cent over the vote in the city election of two years

This is remarkable enough in itself. when it is realized that the Democratic vote fell off about 50 per cen and the Republican vote about 25 per The Socialist vote is now per cent of the total vote of the city Three thousand voters stayed away from the polls. They were too dis-susted to vote at all. These men, the Socialists believe, will cast Socialist ballots next time.

While the Socialists elected no candidate, they are elated over the wonderful increase, this coming in spite of the fact that every daily paper not only opposed them but villified them and lied about them. Thursday afternoon's papers, the Telegraph and News, both had stories about the Socialists having "fallen down," when in both instances the story was written before noon, when it could not have been told whether the Socialists were falling down or not.

FORM NEW POLISH BRANCH.

At a mass meeting arranged by the Socialist party and held in Wilmington, Dela., on June 1, a Polish branch of the party was organized. This city has 500 Polish voters, most of whom have always voted the Republican and Democratic tickets. One hundred and fifty neople were present. hundred and fifty people were present and addresses were made in English and Polish. After the meeting, the branch, consisting of seventeen mem made in English bers, nine of whom are voters, was organized.

The meeting would have been even more successful, but the capitalists bands of music to play in parts of the town, and provided plenty of heer. These tactics kept same of the younger element away.

THURSDAY, JUNE 8.

IN FEAR AND TREMBLING.

Recent decisions of the United States Supreme Court have so terrified the Steel Trust that it is making preparations for its impending dissolution by doing such things as acquiring coal lands valued at \$18,000,000. It does this, of course, in a purely philanthropic way and in order to show to what an extent recent decisions have driven big capital to cover.

In any consideration of the trust problem there is one feature the courts have blissfully ignored, and that is the other trustified connections of the trust under discussion. The Steel Trust, which seems destined for the same slap-stick comedy repression meted out to the Standard Oil and the Tobacco Trusts, is not only a combination for production, but it is a combination for distribution There is only one way in which it can really and effectively operate. and that is through its alliance with the railroads. It is really here that its strength begins. The responsible heads of the trusts are all allied with the railroads, and allied with the banks, the great loaning institutions that can put through a railroad deal or a productive trust deal. One body is so firmly joined to another, is so much a part of the working force of efficient capitalism, that if the Supreme Court actually dealt a real blow the whole body would be affected. But nobody seems affected, not even the one apparently struck. The Steel Trust, for example, is so much appalled by what may happen to it that it is out acquiring coal lands.

Right at this point it is possible to draw attention to that great and important function being played by the Supreme Court. It is doing nothing to suppress the growth of the trusts, for it could do nothing, but it is doing a great deal to bring the trusts more firmly and safely within the operations of capitalist law. It is not a destructive, but a critical agent; it is not weakening the great combina, tions of capital so that the smaller fleecers of labor can reassert themselves. It is merely indicating to the trusts certain limits within which they may most effectively operate. When the Supreme Court, with frowning brows and serious air, handed down its two recent decisions there were many who believed the trusts would take warning, rush to cover and there reform themselves. The trusts have merely taken steps to change, in a very limited degree, their methods of control. They have been forced more thoroughly to centralize their operations than ever before. This is shown by the action of the Steel Trust, one of the next corporations up to have a decision conferred on it. Instead of bothering about any governmental permit, instead of waiting for any legislative action, and quantities at the supper of The it simply buys what it needs in its business and thereby becomes Socialist Club May 20 but it appears absolute owner

If you get nothing else out of the recent Supreme Court decisions, if there is no other appeal from the perfervid trust discussions, you should at least get this addition to your vocabulary. It comes I am of the opinion that the mathrough Judge E. H. Gary, head of the Steel Trust, from Theodore Roosevelt, formerly President of the United States. "Tacit acquiesence" is what Mr. Roosevelt in his omniscience donated to the Steel Trust, it is what he, as first American citizen, gave to dignify the crowd who are doing his bidding. its operations. And it is good.

It is a term that will be highly useful in what may happen difference as to the fate of the Call during the next few years. It will help the trusts over a few hard have great difficulty in being heard, its places, but it will not save them from the final jolt that is soon to editorials in my opinion are generally overtake them. Socialists do not recognise tacit acquiescence, rotten. It teaches nothins, it is pro in fact, they are opposed to compromise of any kind. They fight A. 1 shall quete the following extract of his essay as still further proof for my assertions. The nine-hour day is of my assertions. The nine-hour day is of the chief demands. The nine-hour day is of the nine-hour demands is of the nine-hour day is of the nine-hour day which made the Asch fire such a glorious success. The murders I deem which took place at that time were all for the greater honor and ine-toglory of capitalism, for the greater profits that could be made through the present editorial policy of the defective building, and through the laxity of the laws concerning building. It will be noticed that while nearly 150 persons are in their graves after having come to a horrible death, nobody is in Simpson it lost its Marxian exponents and certainly the best editorial writer prison for having sent them there.

According to the law, as expressed in the building code, these persons were robbed of their lives through a legal process, and there apparently was nothing that could be brought against those

who were responsible.

It seems that the fire in the Triangle Waist Company factory, pressed his views in the Call of May owned by Harris & Blanck and located in the Asch Building, has 177 been forgotten by all but the Socialists. The trades unions of this city, which should be deeply concerned in the new building code, have not had a word to say. They have made no attempt to make their position felt. They have not attempted to change the condi-tions under which so many of their members are forced to labor.

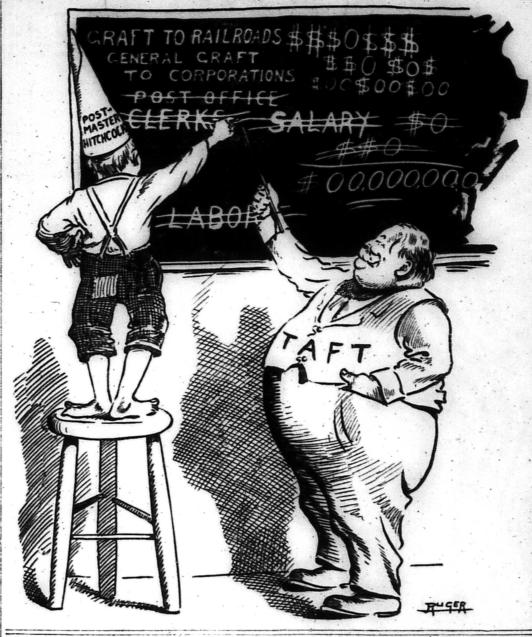

They have left everything in the same old way.

Because of the horrible slaughter that took place in the Asch Building there was really a chance to get at the building code and good. cause such revision that in the ordinary run of the day's work there would not be such a menace as under the old conditions. But so far at the hearings the only ones who have appeared, the only ones who have seemed at all concerned, have been the very people who were responsible for the killing that occurred. They, who caused it tney who have profited by it, are now occupied in devising the new rules that will affect the workers. On the other hand, the possible victims, that is, the workers, are absolutely quiet and seem to look there appeared an article "Thos. upon this as a thing that does not concern them. Wentworth Higginson's Socialism" by

The Socialists alone have not forgotten either the incident or the causes. They alone have not been blind to what is being done by the builders, that is, by those capitalists in New York who through their investments of money in building seek to make more money. So they have followed the fight about the building code. There is no doubt that everybody who has sought lax supervision and more "liberality" in the matter of construction has done so for the purpose of wringing greater profits out of their investments. For that reason they have sought to keep the building code just where it was, to have the same conditions prevail, and to retain the right, if necessary, to cause a slaughter like that which occurred in the Asch

The unions have not yet moved. It is, therefore, up to the Socialist party to compel action. Nothing definite has yet been done. Anything that is done along the old lines will only mean renewed

The Grand Rapids Strike By FRANK BOHN.

I .- Craft Unions Blundering Again

The great strike of the furniture workers at Grand Rapids is a veritable school in unionism and working class politics. The strike was organized and is being conducted by the Brotherhood of Carpenters. As this organization has in this case done much better than the writer expected his criticism will be most lenient. Let it be said that his information was got at first hand during a period of want of bread and shelter. Looking five days at Grand Rapids, while through the columns which record speaking two or three times a day to the strikers

Of course, when the strikebreakers go into the shops they find the union engineers running the engines, union electricians attending to their work union teamsters hauling goods to and from the factories, etc. Nor is this all. The Brotherhood of

If they can't get it then, there

Strikes for fewer hours will no longer be won in isolated industries by a small number of workers. The eight-hour movement must be a mass movement, a crusade. The cry must be taken up by millions of workers at the same time before it is successful. The workers must be taught to work eight hours, and then, if forced to relian at work two hours more, to detroy what they have produced in the eight hours. Or, as good a method would be to work five days a week and then walk out on Saturday and go to work again Monday mornins. This has been tried in numbers of cases with entire success.

Let all the workers be organized in one union, with craft and industrial divisions locally. Let them use all the methods employed by the unions in Europe, instead of the one old-fashioned American method of "go out and starve."

In Grand Rapids many forces are making for the success of the workers. The capitalists of the city are divided. The Mayor is with the workers. Some of the capitalists have surrendered. All of the workers may win.

But If they win and are to keep

PROSPECTUS OF "THE HISTORY OF THE SUPREME COURT OF THE UNITED STATES"

By GUSTAVUS MYERS.

(Author of "The History of the Great American Fortunes,"

No established institution in the United States is more p ful than the Supreme Court of the United States, nor is the the actual story of which is less known or more wrapped in mystery. Irrespective of what legislatures or Congress or courts may do, the nine men composing this court have the of negativing or setting aside any law as unconstitutional. nine men, a majority of five can and do dictate what our laws government and conditions are to be, thus forming a dictatoria irresponsible body swaying the welfare of ninety-five mill people.

The ruling class is willing to allow every other insti-political and social, to be criticised, but it has ever demande the Supreme Court of the United States be held above and above criticism. The reason is obvious: that tribunal has the most powerful instrument of the ruling class, the stud persistent policy of which has been to proclaim its sacred acter and inculcate popular reverence for it.

It is urgently necessary to narrate the facts concerning Supreme Court as it has been from the start, and as it is. to the present, has never been done. Nothing but eulogistic flowery accounts have been written.

To get the accurate facts, Comrade Myers has had to sp protracted period in difficult research. The facts, however, a They are not mere nominal facts, or those of a ficial character. They are the authentic, underlying facts, all i from court and other public records, and for the first time w sent the actual story of the Supreme Court of the United S.
These facts will show, overwhelmingly and indisputably:

That the majority of the men who drafted the Constitut the United States drew it up expressly to safeguard the ruling and to allow the accomplishment of vast schemes of plunder color of organic law.

That the greater number of these men were already them deep in schemes of personal plunder, and, immediately after the ernment was organized, put through still greater schemes of pil An abundance of facts, hitherto never brought out, will be
