MESSAGE:

It is not a matter of general public knowledge that President Taft has just issued a message, but such is the just issued a message, but such is the fact. Presidential messages are usually received with acclamation. but this one seems to have escaped any sort of notice.

It doesn't say anything, of course, that President Taft has not said before, and is, on the whole, dreary reading. All the more so because its ostensible subject is the trust prob-lem, and Mr. Taft has long ago emptied himself on that subject, if an

Thus does the President treat the public demand for more drastic legislation against the trusts:

But now that the Anti-Trust Act is seen to be effective for the accomplishment of the purpose of its enactment, we are met by a cry from many different quarters for its repeal. It is said to be obstructive of business progress, to be an attempt to restore ress, to be an attempt to restore old-fashioned methods of destructive competition between small units, and to make impossible those useful combinations of capital and the reduction of the cost of production that are essential to continued prosperity and normal growth. and normal growth.

In the recent decisions the Supreme Court makes clear that there is nothing in the statute which condemns combinations of capital or mere bigness of plant organized to secure economy in production and a reduction of its cost. It is only when the purpose or necessary effect of the organ-ization and maintenance of the combination or the aggregation of immense size are the stifling of competition, actual and potential, and the enhancing of prices and establishing a monopoly, that the statute is violated.

Mere size is no sin against the law. PATERSON, N. J. Dec. 5.—The ilk weavers employed by the Henry Doherty Silk Company, with a plant Fulton street and its branch shop at Lakoview, a suburb near this city are out on strike against an attempt of the company to introduce the four loom system in its shops. Up to this time the number of looms in the Doherty plants has been limited to two, which, the workers say, is bad enough, and the introduction of the four-loom system will double the work and double the task of the em-

The four-loom system will double the output of the cloth per weaver and will throw out of employment half the men now at work. The strikers say that the operation of four looms is killing work, and no man could stand the strain without giving way.

As to the women, they would have to quit work, or, if they remained at work, they would surely fall in their harness, as they could not stand

the strain of the four-loom system.

The workers say it would be suicidal to let the company install the fouron the street half of their employes, and especially when the company de-mands that the men do the work on a four-loom machine for the same pay. The 200 workers entered the fourth week of the strike yesterday with no break in their ranks. Call and Labor Unions.

The Call figured again in the trial yesterday. This time it was Assistant District Attorney Bostwick who asked a prospective juror whether he was a reader of The New York Call. Attorney Steuer asked one of the talesmen whether he was a member of any labor union. Another talesman, who happened to be a small manufacturer, and was reluctant to serve on the jury, as it would interfere with his business, was likewise asked by Steuer whether he was not afraid of trouble from the labor unions if he acted as a juror in the case.

THE TWO "GREATEST JURISTS"

In the annals of capitalist judgedom in the United States, the two greatest authorities are Marshall and Story.

Volumes have been written of their profound learning and their great integrity. Their decisions are applied as law to this very day.

But the real story of their careers and the circumstances and interests behind their decisions are now being told for the first time in Gustavus Myers' "History of the Supreme Court of the United States," appearing serially in The Call.

In the next chapter of Myers' work, even more remarkable facts than those in previous chapters will be narrated.

There the facts will be related how Marshall validated a 35,000,000-acre grab, for which Story was one of the two attorneys, and how, when Story was appointed the next year to the Supreme Court, he handed down a decision under which Marshall was able to get Lord Fairfax's confiscated estate.

This is merely a glimpse of the extraordinary facts Myers tells. In this immensely valuable work, based upon painstaking research, you get the real story of the forces and interests actuating judges and the making of law.

No one seeking knowledge can afford to neglect reading this history, so pregnant with hitherto unrelated facts, and so illuminative of the development and progress of the capitalism in this ecuntry.

in the new bill presented by the Irish Players at Maxine Elliott's Theater on Monday evening at the commencement of the third week of their New York engagement, and in it the unique versatility of the company is displayed. "Riders to the recently obtained foothold Sea" is a grim study by the late J. M. Synge, of life and death among the fisher folk in an island on the west coast of Ireland and it reveals the ower of the Irish dramatist to visualize the great crises of the common life so neglected by the ordinary dramatist. On the other hand, Wil liam Boyle's "The Mineral Workers" is a comedy of small town Irish character with the perennial struggle be tween the new and the old as its central motive. Each play was present ed with the same high degree of artistic skill which has been the rare feature of the work of the Irish Play-trs from the beginning.
In its one brief act "Riders to the

Sca" epitomizes the terrible tragedy enterprising spirit manife that grows out of the endeavor to snatch a livelihood from that insati-riches, and to free Irelan able and ruthless monster, the sea For those who dare to brave its voracious appettite for human lives there is no mercy. It is no respecter of persons, nor of human wants. It, will take all that comes and cry for more. This the fisher folk themselves know, but to them in their smail, bleak island, there is no other way by which there is bread to be earned. Economic need forces them to battle with nature, though nature continues to exact its greedy toll for their boldness. And even when they attempt to escape the age-long tyranny of the sea, it conspires with the other forces of nature to thwart them. They are in the grasp of a fate which follows Stephen, and Patrick s

Those who speak it are conscious always of the evil impending, they are haunted ever by the omnit present shadow of death from which pression in action and dis they can never, in their struggle for the means of subsistence, hope to escape.

And the actors, from the moment the curtain tises and discloses the smoke-stained interior of the fisherman's cottage, convey by the subdued tones of their voices, their quiet, restrained gestures, their unexaggerated facial display of repressed emo tion, the sense of inevitable tragedy inherent in the developing catastrophe with a poignant effect that is tuated, directly or indire almost overwhelming.

The story is as simple as it is tragic. It tells of the death of Bartley, the youngest born son of Maurya, who had lost her other five fisherman sons before him in the sea. Him she had tried to save from a similar fate by making him a landsman. Now, for pine days, she has been mourning, or keening, to use the idiom, for Michael, her favorite, who had been lost in the Far North, and whose sailor's Guilmant ahirt had been sent home to her, as Uncle Bartle, It was as Beethoven Mhen Bartley starts to go to market of work, well and unclose Andres in a high wind to sell his horses, she J. THE EDUCATION OF LINCOLN STEFFENS

It may seem paradoxical to say that Socialists whose philosophy embodies the recognition of an irrepressible class struggle in society as at present constituted are at the same time the stanchest believers in what is called the "golden rule." But all society is full of these paradoxes and apparent contradictions, and the Socialists are no exception to the general rule.

The paradox, however, may be explained by saying that the Socialists see the utter impossibility of any actual application of the golden rule as a line of general conduct in society while economic classes with antagonistic interests comprise the make-up of that society. Only when that class struggle ceases, they hold, will the golden rule become possible of application. To bring it to an when finished, and it can only end in one way—the establishment of collectivism and industrial democracy—the golden rule will be possible of application—not before.

These remarks are suggested by the attempt of that well known journalist, Mr. Lincoln Steffens, to dissuade the business men of Los Angeles and the capitalists of the country generally, from wreaking the utmost vengeance possible upon the labor leaders and others to attackd them with dynamite, some of whom they have now in their power. His idea was that they should be merciful in the hour of victory, temper justice with mercy, refrain from pushing the war against the unions to the bitter end, and display toward the workingmen the Christian spirit supposedly dominated by the "golden rule."

To Mr. Steffens' gratification they evinced a disposition to fall in with his suggestions, and an agreement was reached by which the lives of the McNamaras were to be spared on condition that they confessed their guilt.

If some Socialist had approached Mr. Steffens at that moment and declared that this apparent concession on the part of the business men was not dictated by any golden rule idealism, but by the fact that the confession was needed at that particular time as a weapon against the Socialists, who were seemingly about to capture the city politically, no doubt Mr. Steffens would have considered that person not only an enemy of the golden rule, but also a cynical misanthrope, without the slightest belief or trust in his fellow men, if not a malignant enemy of his kind, who delighted in seeing society torn to pieces by internal strife.

Yet, any Socialist would have told Mr. Steffens that very thing. and no doubt would have been so regarded by him. No Socialist could have convinced Mr. Steffens that his hopes were illusive.

But the business men and the capitalists could. And they did. For the very next day, when the agreement was carried out by the confession being made public, the business and capitalist element threw off the mask and howled for blood, as Mr. Steffens sorrowfully admitted the very day after that on which he had penned his message. And the Socialist, if he cared to, hopeful "golden rule" might repeat, "I told you so.

Mr. Steffens is a "radical"—a sort of "near-Socialist," unconvinced, however, of the truth of such fundamental Socialist theories as the class struggle. It was an evil thing, and, of course, therefore a mistake, and all mistakes can be rectified. So we find Mr. Steffens declaring "the idea which was presented to the men I workd with was that we should make one more try in this country to beat the class conflict that is tearing Europe in two."

His "radical friends"—he means the Socialists—told him, he says, that "peace was impossible." But he was going to have "one His voice in more try" at any rate, and see what came of it. The capitalists have seek a God,

Capitalists and labor men were to meet, discuss make an of a effort to understand one another, make mutual concessions and devise a somewhat smoother path for the future. The capitalists agreed. "This," says Mr. Steffens, "was the program accepted by the first hard-headed man we saw, and we went to work at it. Darrow and the other attorneys could hardly believe such men could be so wise and generous. That would knock out the Socialist theory of class consciousness."

The confession was duly made, and then, "a change came o'er the spirit of their dream.

The Erectors' Association howl for blood. The Los Angeles him, he kneels before the rock and the awoke with a mightler and deeper the head of his brother. capitalists join in the chorus. The capitalist pack all over the country, full-throated, swell the cry. The "golden rule" is swept aside like a cobweb, and the class war proclaimed in its place. And Lin. my God! like a cobweb, and the class war proclaimed in its place. And Lincoln Steffens, seeing his forlorn hope vanish, declares that "the attitude of the world today on this McNamara matter certainly goes to prove that Captain Fredericks and my Socialist friends were right amid the quiet.

Cain hears in the wind the world in the control of the world in the control of the world in the case.

Exactly so, Mr. Steffens. You were from Missouri, and you breeze. to be shown. You were shown. And what now?

You didn't knock out "Socialist class consciousness," but capitalist class consciousness knocked you out. Class consciousness, Mr. Steffens, is not peculiarly Socialist. We have no monopoly of it. It is common to capitalists also, as you have seen. And you can't "beat" it, Mr. Steffens, in either case. You should be satisfied of that now. A theory, Mr. Steffens, is not necessarily the exclusive property of those who proclaim it. It explained the facts in this ase, and the facts corroborated it in turn. That it was the capitalists who gave the proof, makes no difference. It is not a matter of reproach to them. They simply had to. We would have done so, too. Your "golden rule," Mr. Steffens, is a fact—if it may be called so—of the future; the class struggle is a fact of the present,

and holds the boards today as yet against all future comers.
You are fond of facts, Mr. Steffens. You have been gathering tou are rond of facts. Mr. Steffens. You have been gathering them for years. You recognize them when you see them. So do we And now you have come into direct contact with the biggest and strongest fact in our modern society. You always doubted its existence. You had your "one more try" to knock it out. You didn't. You couldn't. You broke your head upon it. Facts are stubborn things, Mr. Steffens. What will you do with this one, now that you have at last discovered it recovered.

now that you have at last discovered it, recognised it, admitted it? You are an intelligent man, Mr. Steffens, and not without some pretensions as a thinker. What are you going to do with this fact? Deny it, dodge it, deplore it, ignore it, sit on the fence, or—choose ye this day on which side ye shall serve?

Do you see now why we Socialists work for the coming of the golden rule through the development and conclusion of this class struggle, the only path through which its realization is pos-

Does your discovery solve the apparent paradox to your satis-

faction?

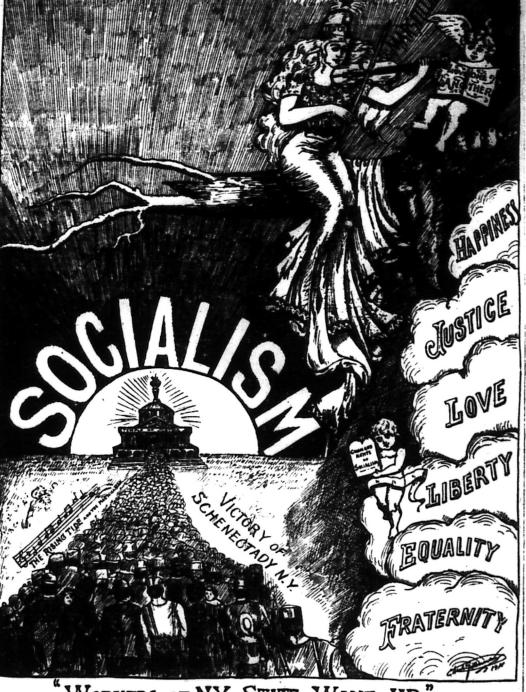

You have admitted literally that we are right and you were wrong. If you are finally satisfied of that, you surely don't want "one more try." That would be superfluous—a wasts of time—after your experience. What are you going to do?

You have two alternatives. Here they are.

You can abandon your dream of the golden rule forever, and regard it as a chimera, unattainable and impossible, or—You can fight for its attainment through the class struggle as a medium, publicly recognizing it as such.

And as a last word, Mr. Steffens, it matters not one particle in the long run which side you range yourself on. If you think you should be with the capitalists because they happened to open your eyes to that great fact, why, well and good. That is your business of not, well, "while the light holds out to burn," you know the rest.

"Ladies and gentlemen," he said, "I think that you have had enough music. Allow me to ask you to take a little supper with us."

The invitation was accepted, and Lists and Rubini entertained the audence to supper at their hotel, at a cost of 1,200 francs. When the guests separated the hosts thought the affair had been a joke about which nothing more would be heard, but they decided to give their concert as advertised on the following night. OLD AGE PENSIONS.

Editor of The Call:

Brother Rubinow has a just grout or criticism in the uncareful quota tion I made from him regarding the number of men prevented from qualifying for citizenship. Unable at the time to lay my hands on his earlier letter, I took a chance at quoting from memory. The best of verbal memories will sometimes play false: and it is evident that in this case I put into the remark attribute to him somewhat more of what other had said than of what he had said.

But his latest letter more than justifies my charge that most of what he intends for argument is merely a play with catch points, I need no dwell on his struggles with the figures on ages of immigrants furthe than to say that he may find much more pertinent figures in the census volumes on population. Nor need dwell on his delicate avowal of a still more delicate unwillingness to "rub it in in the matter of the action of the N. E. C. (a matter, by the way, that disturbs me as little as does the York). I take as a typical example of his method, his instance of the old shopkeeper and his wife and the take the alexampte. anomalous pension they would draw under the Berger bill. This instance moves him to "smile good-naturecly," and presumably it is one of the examples that move him to his graceful remark, both in print and in speech, on the "negligence and carelessness" with which the bill is drawn.

The anomalous pension which these hypothetical persons would draw is negligible. and presumably it is one of the ex-

hypothetical persons would draw is evident enough. such an example is mere pettifogging. No one can draw in general terms pension bill that will avoid these disparities. Rubinow cannot do it, nor can any one else. So various and so changeable are the earning conditions of men and women that no genera provision can possibly take account of them, Even in a bill, drawn through pages and pages of detail, in the attempt to insure an equitable distribution, some such anomalies are function of the co bound to occur. Nobody knows this, or ought to know it, better than Rubinow. No one ought to know better than he that "negligence or carelessness" has nothing to do with Editor of The Call: Why, then, does Rubinow lay stress upon such things? There are several possible explanations. A defective capacity for reasoning is one New York propos of them. Another is a desire to disvigorous campaig play his vaunted knowledge on the the colored people of the subject, and to catch the applause of carnest propagation along the unthinking. Such is the distrust-ful and destructive attitude of mind far-reaching rest of a good many persons who call themselves Socialists that the surest way to win their plaudits is to fine an alleged defect in something. This attitude is especially prevalent in the region of the Lower Hudson, and a shrewd disputant, easer to make pivital point round which points rather than to reason out the every other question of larg truth of things, easily learns to play to test the sincerity of the upon it. Maybe it's something in the spirit. The church, po atmosphere there.

At any rate, this kind of thing makes argument impossible. If Rubinow has anything to advance on the fundamental character of an old age pension measure, it is time to "come across" with it. In his previous letter, by the appearance of an evidently equal favor for a contributory pension non-contributory pension, he has involved the whole subject in an extreme muddlement. If he has anyquestion, the occasion is ripe for it. This is not a question for interminable pettifogging. W. J. GHENT.
