From reliable sources a new flashlight is thrown across the anxiety of the Goldfield mine owners to trample upon the I. W. W. miners. The mine owners were about to be exposed for wild-cat frauds. Federal authorities have been on the field investigating. The rumpus now raised by the mine owners and their mine-owning Gov. Sparks is intended to raise dust with the aid of which the double criminals-wild cat miners and issuers of private money-can escape. Is it at all surprising that these gentlemen should recommend and incite assassination, as their "Goldfield Gossip"

Things are taking their logical course in Goldfield. When wrongdoers cannot meet the just reasoning of their opponents, they proceed to raise clouds of slander against them. So new in Gold-The mine owners' attempt to violate the Constitution by issuing "legal tender" is to be beelouded by the slanderous reports of "finds" by detectives of "stacks of rifles" concealed by the miners near Goldfield.

There is a greater mine for the Goldfield mine owners than the mines of Goldfield-the Bowery stage for tragedians. Nothing can be more melodramatic than the poise of the selfsame gold miners as they "pledge their sacred honor and their fortunes" to the A. F. of L. scabs, whom they are importing, to protect their God-given right to labor. That there is a decided Montezuma Club flavor of whiskey in the pledge does not place the Goldfield mine owners at a disadvantage with the Bowery tragedians. The latter also have strong flavors of whis-key concealed about their persons.

It is impossible for everybody to be posted on full details of current events Everybody, however, can seize certain leading facts, and from them draw conclusions that are as correct as if he were posted on details. Such a set of leading facts the Goldfield sitnation is now offering. Federal troops are in the camp to smooth the way for A. F. of L. scabs to take the places of the I, W. W. miners. Is it imaginable that Federal troops would ever be \$100,000,000 virtually in his own beenlisted to help the I. W. W.? The news that the Russian Govern ment has issued a decree of death against the Editor of an anti-Czar paper in this city is not surprising. Nor is it surprising that the "executioners" are said to be on the way to New York to carry out orders. Assassination cannot be boldly preached in one part of this counis done by the mine owners of Goldfield, without inviting assassins into other parts of the land. The decadence spires invites the barbarians. De caying capitalism attracts the carrion the "Paddy" Mullaneys in the West, and the Black Hundred agents of the Case from the East.

For ever a year Roosevelt has been working on a foundation for the Promotion of Industrial Peace, having devoted the each of the Nobel peace prize to the project. Evidently the ordering of Federal troops to Goldfield is the first active promtly put upon such proletarian impustep in the Foundation. Point is added to the evidence by the fact that Gompers, who remember a certain incident in hiswhose envoys are negotisting to fill the tory when James I, in a fit of rage simistriking miners' places under the bay- lar to that of Clowry, tore out of the onets of these very Federal troops, is minutes of the House of Commons a with Roosevelt on the list of Founders.

If the Federal Administration were to be condemned for itself issuing flat money, how could it be upheld for sending troops to Nevada to protect and enforce the flat money issued by private concerns?

President Clowry of the Western Union Telegraph Company announces with indignation to the indignant Directors that the recent strikers had aimed at nothing short of running the Company and ousting head officials. AN OPEN LETTER

To the Congress of the United States. | the camps, are even fishier than such re- | Gentlemen :-

The Constitution of the United States is an empowering act.

By that act the Federal Government, on the one hand, has no powers other expressly denied to all other individuals, municipal, county or State organizations

The power to issue money is a power vested by the Constitution in Congress. It is, therefore, a power expressly forbidden to all others, be they private or public bodies. The laws made and provided on the subject are ample and explicit. It is the duty of the Federal Government to uphold these laws and enforce them.

The Constitution and the laws are being violated in Goldfield. The mine owners have issued "scrip." Congress only can issue "legal tender," or decree what shall be "legal tender." The mine owners of Goldfield have decreed "legal tender" attributes to the "scrip" they issued. They demand that the same be accepted by their employes in payment of their wages, in payment of the debts due to the latter by the former.

Even if the Goldfield events went no further. there would be cause to set in motion the legal machinery of the land and stop this crime, and punish the criminals. False coiners and counterfeiters are arrested; much money is spent in keeping up an alert body of secret service men to track down such malefactors and bring them to the bar, on the way to the penitentiary. The Goldfield mine owners' scrip is COUNTERFEIT MON-EY, to all intents and purposes.

But the Goldfield events go further.

Not satisfied with trampling under foot the Constitution and the laws of the land, the Goldfield mine owners have invaked, and, to the eternal disgrace of the Executive, have received his aid in their nefarious attempt. Federal troops have been orderd to and are now in possession of Goldfield.

Gentlemen, it is Anarchy that nov rules the roost in Goldfield. The facts are not questioned. They

are unquestionable. The pretences of 'possible' disorder on the part of the ed reports about "thefts," "murders," and "finds" of concealed weapons near is.

They were admitted. It was an unguarded admission, true enough. It is upon just such slips by malefactors that counterfeiters are usualy detected and brought down. The real fact in the case is the refusal of the miners to accept as "legal tender" the spawn of the mine-owning counterfeiters, their refusal to countenance the usurpation of Congressional powers by private, irresponsible, profits-hunting espitalist concerns. Gentlemen-the miners of Goldfield puce more are on the breach for Civilization. For over a year the camp has been the feld of attempted anarchy by the gold mine owners. Again the facts are unquestioned and unquestionable. A murderous, unprovoked attempt was made in broad daylight only recently upon Vincent St. John, the sober and intrepid leader of the miners in that camp. His would-be assassin, "Paddy' Mullaney, now walks the streets of Goldfield under a paltry \$2,000 bail furnished by the very element that now nvoked and received the support of Federal troops in their usurpation of Congressional powers. Valuable to the country's safety as has been the stand taken by the Goldfield mining proletariat before now, their stand new is infinitely more vital. The path to Progress lies through order. There is hardly a principle more vital to order than the principle underlying the Constitutional provisions vesting Congress only with the power to establish a "legal tender." Under a social system such as the one now prevailing, the Capitalist System of individual production of wealth-under this system the soundness of money is the cornerstone of whatever order the sufficiently and inherently disorderly Capitalist System can afford. Gentlemen-rightly or wrongly, the Federal Executive has been charged with bringing about the present distressful industrial or financial panic. Even indiscretion is a serious offense on the part of the Chief Magistrate of the Nation. The right of free speech can not be withheld from the President. He could hardly be disciplined for indulging in the delight of hearing himself talk. This other, however, is a horse of different color. The President, by ordering Federal troops to Goldfield, has violated their fellow workmen on strike, have his outh of office. It is not order the "troops are sent to preserve"; they are sent to Goldfield to "introduce the disorder" of PRIVATE MONEY; they are now in Goldfield to overawe the miners sent to start arolling a ball that, considering the present conditions the country is traversing, is well calculated to turn into the blackest social thunder cloud that ever gathered and burst over this Nation's head.

Gentlemen-THEODORE ROOSE-VELT SHOULD BE IMPEACHED. The incredible has come about. An issue has arisen, in which Labor and intelligent Capital, Capitalists (if intelligent) and Socialists alike have a common cause-THE CAUSE OF AVERTING SOCIAL CALAMITY. That cause has arisen through the latest act of the President, whom even a Yale College professor designated as a man of a naturally "lawless mind." The President's action in responding with Federal troops to the cry of the Goldfield counterfeiters for help against the miners who are planted upon an essential principle of orderthat action is banditism. Its perpetrator must be impeached.

Gentlemen-grave issues are presenting themselves for solution to our generation. Not choos but order is the handmaid for the intelligent solution of social problems. Every day you allow to go by without ordering the recall of the treops from Goldfield, every day you allow to go by without causing the counterfeiting usurpers to remain unwhipped of the law, every day you allow to go by without introducing impeachment procedures against the witless anarchist in the White House-every such day not only renders you accomplices in the social crime of Goldfield, but would go far to justify the belief that the Capitalist System is so decrepit that it lacks even the wisdom to uphold that essential law of its own existence-SOUND MONEY.

The truce is that they return to work for ten days at the old rate of pay and during this time "a new scale will be prepared." That means that the power company will convince the A. F. of L. leaders that business is so dull that the reduction is necessary. The leaders will take the bosses' statements and keep their rank and file at work, thereby scabbing on the real organized workers in the Industrial Workers of the World.

> Los Angeles, December 14-M. J. Monnette, president of the Los Angeles-Nevada mining exchange, and one of the big operators at Goldfield, in an interview, tries to throw the whole blame for the present situation in Goldfield at the door of William D. Haywood. Mennette said:

"All of the present trouble at Goldfield is due to the activity of William D. Haywood, secretary-treasurer of the Western Federation of Miners. It was due solely to his influence that the miners' union refused to accept checks on the Goldfield banks in payment of their wages some time ago, and at a meeting of the miners urged them to refuse these checks.

"The mine owners' association is determined that it will no longer submit to the arbitrary dictation of a few union agitators.'

Haywood has already shown this statement to be absurd. The Goldfield members of the W. F. M. and I. W. W. do not strike at any man's dictation, but when they see the necessity of the

At the meeting of the executive committee of the Miners' Union last night, resolutions condemning the authorities for sending the troops, protesting against their remaining here, and demanding their withdrawal at once, were passed. NOTES AND COMMENTS-BY MITCHELL H. SHAYNIN.

(CONTINUED FROM LAST WEEK.)

If the business and public life of the capitalist class is full of brutality, cheating and stealing, their private life is as devoid of morality as their word is of honor. We often hear of "monkey dinners" at Newport, "Seeley suppers" in New York and "early breakfasts" somewhere else. We hear of the Thaws, the Hydes, the Harry Loehrs and a horde of men and women who have lost all sense of decency, propriety, humanity and the only service they perform is in furnishing the medical profession with the most advanced types of degeneracy. Nothing serves better to illustrate their morality than the following table of divorces, compiled by "The Chicago Tribune":

We could go on with the Coreys, the Hartjes, the Platts, and continue this list indefinitely, if our nostrils could endure the stench these divorce scandals are producing. And this is called an "upper class," a "higher society"! Their lives are rather low. The capitalist class has neither morals nor ideals, and the talk on morality, law and order, sounds strange on the lips of such people, and comes with bad grace from a source that has never known morality and breaks the law of the land, creating anarchy, every time it suits its pockets. It is amidst these conditions of refined cannibalism, when millions are being degraded to poverty so as to enable a few to revel in swinish gluttony, that the young generation, the college youth, is being born and brought up.

Much has been written on the imitative power of children, and one could fill a volume with personal observations. Children play "Papa and Mamma", "Girl and Boy", imitating the relations of different members of their families; they play "milkman", "tailor", "conductor", or any other occupa-tion which they had an opportunity to observe; children of the lower grades play "school"; children of a physician play "doctor and patient"; in the slums children play "drunkard and policeman", and so on and so forth. The young generationand it matters not what class it comes from-is being fed on the same adulterated food, the same embalmed meat from the Chicago stockyards, it breathes the same foul air full of exposures of graft and swindle, it feeds its mind on that "yellow", commercialized literature and has before itself the "illustrious examples" of the captains of industry on the industrial field and some of our "best citizens" on the political field. Are we then to wonder at the unpleasant manifestations of the

student body? We pride ourselves of being "fair" in our treatment of others, and talk a great deal of the "square deal". Let us then be fair to the young generation and let the students have a square deal. The brutality they are displaying in hazing and foot ball, the moral cowardice, cheating and stealing of their every day life, are but the expressions of the spirit of our age, whose children they are—the fruit on the capitalist

"You shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles? Even so every good tree bringeth forth good fruit, but a corrupt tree bringeth forth evil fruit. A good tree can not bring forth evil fruit, neither can a corrupt tree bring forth good fruit. Every tree that bringeth not forth good fruit is hewn down, and cast into the fire." (Matthew, ch. 7, verses 16, 17, 18, 19). And will this corrupt capitalist tree be hewn down and cast into fire? The ominous warnings of our teachers, preachers and public men on the one hand, and the awakening of the working class on the other, eloquently answer-the question.

Prof. Ira W. Howerth, of the University of Chicago, discussing "The Social Question of To-day", gives us the following warning:

"The clouds of social discontent have been long gathering. It is a dull ear that cannot now hear mutterings of a coming storm. Fore-warned, however, we are told, is forearmed. We may therefore in-dulge the hope that when the storm strikes, if strike it does, the ship of state will not be taken unawares, but will be prepared to receive it and weather it out. But if this is so, it will be because of the warnings of social barometry have been not merely noted by a few minds, but also heeded by the people generally. It will be because there has been much general study of the social question." ("American Journal of Socialogy," September, 1906.)

Dr. Jacob Gould Schurman, President of Cornell, in an address delivered in Trinity Church, New York, under the auspices of the Seabury Society, said:

"Steam, electricity and consolidated capital are in our own days eliminating the small producer and the small trader. The chance of young men becoming independent producers and traders, when business is conducted on the scale of millions, instead of thousands or hundreds of dollars, is vastly less than it was in the time of our

"The wage-earner, feeling himself and his children doomed to poverty, rises in rebellion against the economic system which makes such things possible. He protests that capital gets too large a share of the product which laboring men create. His remedy, when he has of the product which laboring men create. His remedy, when he has a remedy, is confiscation of private capital in the public interests and the establishment of a socialistic state, in which all shall work and all receive compensation in proportion to their deserts.

"The masses of wage-earners are, I believe, in angry revolt against the vast inequalities which the present economic system produces. Shall the end be socialism, revolution, or what? For remember that these discontented classes may easily constitute the majority of our voters, and that in this republic policies are determined by the vote of the majority."

Speaking of the present conditions in the country, President Roosevelt warned the nation, saying: "The swollen fortunes are a positive menace and we are drifting into an oligarchy of wealth that would bring disaster to the American people." Thus speaks the President of the nation, and he is seconded by one who would like to be president. Upon his return from abroad, when W. J. Bryan was greeted as the only "safe, sane, and conservative force", the "peerless and fearless leader" of the bankrupt middle class thus defined plutocracy in his first public speech:

"Plutecracy is abhorrent to a republic; it is more despotic than monarchy, more heartless than aristocracy, more selfish than bu-reaucracy. It preys upon the nation in time of peace, and conspires against it in the hour of its calamity. Conscienceless, compassion-less, and devoid of wisdom, it enervates its votaries while it impoverishes its victims. It is already sapping the strength of the nation vulgarizing social life, and making a mockery of morals. The time is ripe for its overthrow. Let us attack it boldly, making our appeal to the awakened conscience of the nation in the name of the counting room which it has defiled, in the name of business honor which it has sullied, in the name of the people whom it has oppressed in the name of the homes which it has despoiled, and in the name of religion upon which it has placed the stigma of hypocrisy.'

In a speech before the Knife and Fork Club of Kansas City, Mo., the famous Chicago jurist, Judge Peter S. Grosscup, thus explains the people's discontent:

"The cause of the people's discontent is in the fact that throughout the years since Lee's surrender the great new life was becoming incorporated. No pains were taken to interest either worker or people as proprietors at all, the one instrumentality in which the new industrial life had embodied itself having been left, though state created, a mere shell, under whose roof and behind whose walls every form of their wars given free form of treachery, and nearly every form of theft were given free rein. This is the great black sin of the times in which we live."

Hannis Taylor, the former minister to Spain, says that wealth lust saps the ideals of the country. On February 22, 1907, at the commemoration day at Johns Hopkins, he said:

"I know of no monster so dangerous to the life of a republic as one who can in a moment throw bewildering millions in one direction or the other, specially when those millions grow out of abnormal conditions that should not exist. The omnipotent dispenser may throw his millions in a good direction to-day; it is sure to be in a bad one to morrow. bad one to-morrow.

"But most and worst of all, he is an image breaker, he is an iconoclast who shatters the ideals upon which the life of this nation was founded. There was a time when our young men thought it worth while to strive to be like Marshall, Webster, Emerson and Washington Irving. But how long will those illusions last under the teachings of the new gospel, which proclaims that nothing is really worth while except the brute force wielded by masses of money?

"If this thing goes on we can soon close all departments of our

universities except those that apply the principles of physical science to the production of material wealth or its equivalent."

Dr. Felix Adler, in his address before the Ethical Culture Society, on "The Evils of Surplus Wealth", finds that wealth carries in it the taint of what the theologians call original

"Now there is something irrational in great wealth. There is no due proportion between wealth and needs nor between wealth and deserts. Rate as high as you please the service which capitalists have rendered in economy of production, still you cannot say those millions that are rolling up while a man is abroad or hunting on his estate are fair. There is something insane in the situation. There may be some fortunes clean—I don't know—but the majority of great fortunes are unclean. The taint of what theologians call original sin is in them."

In an address before the Nineteenth Century Club, Prof. Franklin H. Giddings of Columbia, said: "We are witnessing to-day, beyond question, the decay-perhaps not permanent, but at any rate the decay-of republican institutions. No man in his right mind can deny it." And in his "Natural History of American Morals" Prof. Giddings asks his readers: "Have we become a nation of speculators, gamblers and grafters? And are our attempts to 'lead a better life' largely expressed in hysteria and lynching?"

The warnings are not limited to public addresses, they are carried into our text-books. Prof. Andrew C. McLaughlin thus concludes his "History of the American Nation": "No one that looks about him can fail to see that the nation is surrounded with perils It rests in large measure with the boys and girls that are now at their lessons in the schools and academies of the land to determine whether or not amid the perils of the near future the principles of popular government will justify themselves."

No visitor of note has failed to notice the discontent, the mental uneasiness of the American people. H. G. Wells thus describes his impressions of American conditions of to-day:

"I have tried to show the conception I have formed of the great skein of industrial competition that has been tightening and becoming more and more involved through all this century—long age, the age of blind growth that draws now toward its end—until the process threatens to throttle individual freedom and individual enterprise altogether. And of a great mental uneasiness and discontent, unprecedented in the history of the American mind, that promises in the near future some general and conscious endeavor to arrest this unanticipated strangulation of freedom and free living, some wide spread struggle, of I know not what constructive power, with the stains and disorders and indignities that oppress and grow larger in the national consciousness. I perceive more and more that in coming to America I have chanced upon a time of peculiar significance. The note of disillusionment sounds everywhere. America for the first time in her history is taking note of herself and ridding herself of long cherished illusions." ("The Future in America," H. G. Wells.)

Even the usually cautious "New York Sun" has raised the danger signal by exclaiming "there is now a greater unrest and a greater uneasiness in the air than was before Sumter was fired on." (Dec. 28, 1906.) And above all these warnings the now ex-Secretary of the Treasury Shaw, at the banquet of the Automobile Manufacturers, New Willard Hotel, Washington, D. C., begged his listeners: "We who pray should ask God to save us from any increased prosperity." (New York Times, Dec. 16, 1906.) That such warnings and prayers from such sources should come at a time of "unprecedented prosperity" will surprise only those who can not or will not understand that the height of the prosperity of the capitalist class mr be measured by the depth of poverty and misery of the working class, that the higher the prosperity of the former, the deeper the poverty of the latter.

The warnings of the press, of our teachers, preachers and public men are but half of the tale; the other half is told by the intelligent, class conscious awakening of the working class, who is no longer striving to get "a fair day's wage for a fair day's work," but boldly declares:

"There can be no peace so long as hunger and want are found among millions of working people and the few, who make up the employing class, have all the good things of life. . . The working class and the employing class have nothing in common. . . .

Between these two classes a struggle must go on until all the toilers come together on the political, as well as on the industrial field, and take and hold that which they produce by their labor through an economic organization of the working class without affiliation with any political party." (From the Preamble to the Constitution of the Industrial Workers of the World.)

The warnings that come from the representatives of the capitalist class and the declaration of the working class supplement each other and we are again reminded that "every tree that bringeth not forth good fruits is hewn down and cast into the fire."

that there is still so widespread a misception of the principles and purposes of Socialism—why it is so often confounded with free love, blatherskite atheism, and other freakishness. The es of the movement, of course, do all they can to keep this ignorance going and the consequent prejudices alive. it is an article headed "Practical Socialism." Now we shall learn something, and we do. We learn that their "Socialism" was calculated to gratify their yearning for companionship, that "Socialism" was simply the colony scheme which, while setting forth glowing pictures of the benefits of life in Phalanstry, orchard, garden, ornamental grounds and other things of the dreamed of paradise, really had not one feature of Socialism about it.

One or two of the contributors seem to have been more hard-headed than the rest. One, for instance, taunts his brethren with being in favor of free love until it came to their own wives, "then they become mean tyrants not willing to do as they would be done by." An other complains that "too many reformers, while talking long and loud against oppression, yet when a poor laborer asks them for work beat him down to the lowest going wages."

Fourier's colony plan, as adopted in America, has been much idealized in articles upon the subject. From these old papers I gather that it attracted all that was freakish in the population. With our knowledge of the futility of problem this is not to be wondered at, telegram was received: and yet even to-day there are those who That it is a vain hope the history of all such colonies-from the idealism of Brook Farm down to the swindle of Ruskin, bears ample testimony.

Despite all efforts to revive it, such Utopianism is, however, practically dead, but there still lingers in the popular mind the freakishness upon which it was founded, and the fact that these freaks called themselves Socialists. But as the stern Movement of to-day moves forward the stigmas from Utopianism cannot prevail against it. Yet it is profitful withal to learn just how the misconceptions with regard to Socialism arose-mainly through the antics of people who took to themselves a name of which they had not the slightest inkling of its purport. S. L. P. EXPOSES PLOT TO CRUSH GOLDFIELD MINERS.

Rousing Resolutions Against Capitalist Machinations Passed Unanimously by Big Audience - Workers Warned That, If They Do Not Resent This, Their Turn May Be Next.

Philadelphia, December 10.-It is not usual to report S. L. P. open-air meetings as late as the 8th of Decembernone the less we held a meeting Sunday night at which 500 people stood for two hours listening to Campbell and Young.

The occasion of this meeting was as Fourierism as a solution of the social follows: Saturday night the following Thomas Flynn, 719 S. 24th St. Phila

Flynn immediately notified our mem bers and we arranged a protest meeting at the East Plaza, City Hall, for Sunday night. A large crowd gathered and the news from Goldfield was discussed without pattering with the issue. Young spoke straight to the workers

and told the story of Goldfield. He said: Your turn will come next, and what are you going to do about it?" There was little cheering; the working class is not cheering these days, but the silence was ominous. Campbell followed Young and spoke in his usual energetic way. Indeed, so energetic was he that he upset the platform and would have received a bad fall had not Durner caught the iron supports and brought it back to an upright position. The note Hall, 414 Grand street, Daniel De carnestness of the crowd may be imag-Leon, Editor of The People, delivered | ined from the fact that not even a ripple Unionism," under the auspices of the people who surrounded that platform were in no joking mood.

The following resolutions were handed to Campbell, who read them to the audience and called for a vote. They were passed without a dissenting voice being raised.

These resolutions were passed with a mighty shout of approval.

The hell is that you are lapsed and lose all, should you stop p(r)aying. It has door, with the same preliminaries. The its orthodox and its infidels, its follow-door is opened by a middle-aged woman, ers (or rather victims) and its missionaries, the agents. One of the last named it has been my misfortune to be, and it took four years to rid myself of that

For four years have I helped mother to rob their baby's bank of its few pennies, if there were any, I have atched nickles and dimes, earned by rheumatic woman over the wash tub, hat should have bought bread or coal. I have snatched these meagre scrapings from the eld and the poor, and turned hem over to parasites who bought autonobiles, built palaces, bribed politicians, and guided the pen of newspaperdom. For all that, my activities were no more or less than legal "business."

The insurance religion, like all other religions, has been reared by its missionries. There is not a company in exstence to-day that could last a single year were it not for the agents repretenting it. Two score smooth tongued solicitors could in a short time create a brand new company whose career would send a chill from the roof of the clossy stovepipe hat to the stolen high polished shoes of the insurance grafters n the old and long-established comsanies-a chill that would make them mite forget to choose a single one of these men for U. S. president, or governor either. The old company grafters are well aware of this fact, and proved It last spring when they used every crooked method imaginable to keep the agents from organizing; for well they know that like all business institutions, the insurance company finds its sustenance in the ignorance that binds the working class.

But my object here is not with the companies, but to portray a thorough urance apostle; and by way of introduction, a few explanatory statements will not be amiss. I am a resident of the city of Greater New York, and have dered for the Trinity; I have proven a failure, 'tis true, yet for all that, if one can get to heaven on the number of insurance converts he made while on this sinful earth, I am quite sure of a plush-lined seat with an automatic harp, I can play no other.

A solicitor for insurance needs no other supplies than an indelible pencil and the application blanks of the company he is to advertise; but the "wise" ones take along a few booklets containing miracles witnessed by the company's ls-in dreams, of course. Each miracle is followed by a joke or a confession-that is, a testimonial. The company issues these little sacred tracts, nevolence!) Besides these, the comsany often shows its kindheartedness and, philanthropy by supplying the can-vasser with a handful of one of the folng articles: tape-measures, matchhers thimbles, half a dozen cheap needles on a card, two or three bits of blot. Each of these great gifts bears the company's name stamped upon it, and is called a "door-opener." Around Christmas time they actually give away clumsy stiff board calendars which the poor agent must lug about, one for each This by-occupation makes him look and feel like a pack animal, whose name I will not mention.

The following will give a fair idea of an agent's talk. The same talk, with a few immaterial changes, will serve any and every company. The man that has already worked for one of these money-grabbing concerns stands triple the chances of getting a job with any of the other concerns that an innocent

Isn't your name Mrs. Smith? No? Well, I beg your pardon, there must be a mistake somewhere. But did not any one of your family ever belong to our company and become lapsed? Your husband? Ah! there, I see; that's how it is! You see, "our" company never forgets a policy-holder, and we are always glad to have a lapsed member join again and give us a chance to make up for what they have already paid in. The agent spots the child and takes fresh start. "What a nice little chap! About II years old, isn't he? " I thought so. This business makes a man become a pretty good judge! How old are you Mrs. Jones? I should guess? Well, I should say about 32. What! Fortyfour! Well, I declare! I don't ask you for any money now; you don't have to pay me a cent till you have the policy. All I want is to acquaint you with the benefits of our policies. You know all about them? I beg your pardon; if so, how is it you are insured in a company where you must wait fifteen years for your dividends? We pay dividends every year after the first five years. How is that? > The woman does not relent yet, but the agent pursues the game. "You let me insure that little chap for just the horrors of a panic. five cents," he begs. "I want you to know our company. Children are so uncertain; you never know what will happen next. I had a queer case about two weeks ago-no, it was only last week. I was trying to get a mother to insure her little girl, about as big as your boy here. But O, no, not just then; she wanted the insurance, but later on. I was there to-day. She wanted a ten cent policy, but the doctor should not call. But you bet she did not get the insurance. You see, the child had caught a severe cold, and her doctor said the girl had pneumonia. You know our company is very particular, for it is very prompt in making payments in case of death and it want to be sure the party being insured is well at the time. Your boy is well, isn't he? No use talking insurance if Oh yes, yes, he looks to be a healthy chap, but you can never tell. That's why we have the doctor examine them-[a pause.] Costs you nothing you know."

By this time the victim, if an ordinary voman, is so rattled she doesn't know where she is at, and the agent must act quickly. Taking out his application blanks he proceeds:

"Now you will get your policy in a week or so. What did you say the boy's first name was?" If the woman does not resist, and nine times out of ten she will let the name asked for slip from her tongue unconsciously, the agent goes on filling out the red tape questions and talking any old thing while doing so. The less intelligent the statements are, the stronger their effect. If the woman refuses to sign, the dose is repeated with a few slight change here and there. No matter how many times the woman refuses, the better the agent is, the less attention he pays to her demurrals. On the other hand, if she signs, the agent's job is done for that day, at least. She is thanked, and he tries the next door or floor as the case may be.

When the policy is brought to her, the chances are it is refused because the gaining her senses the woman thought ing, and if the agent is cut out for a solicitor, and the man is only an ordin ary human being, the agent will not only induce him to keep the child's policy but he will also place higher insurance open door. He is homelier than sin, on the man's life in his own company Sometimes he will go as far as to have a person drop his old insurance and reinsure in the new company. In such cases he not only makes the poor man lose all he paid in previously, but actually go without full benefit insurance for a whole year. This is done gene rally by bringing out the many bad points in the policy of the other com-

Another fact to be borne in mind is that no agent will succeed unless he thoroughly understands the contracts of the rival companies as well as his own. If he is a man of ordinary intelligence he the different policy-holders waking up under the company's knocks. The man who would write new business or even keep the business already written, must know how to shatter the arguments of opposing solicitors.

The Hancock man's side of the dividend argument I have already shown. Now, suppose it is a Prudential man. and the prospective victim is insured in the Hancock. He'll speak thus:

"My dear lady, it is true the Hancock pays you on your dividends every year; but do you get it in cash? No! Of course not! It is put on your premium book. With us, I admit, you must walt fifteen years for your first dividends, and then you get them every five years; but can't you see our advantages? We our company is a 'mutual' insurance pay you in cash; you get a nice little sum which comes in very handy." And so he goes on.

The Metropolitan man will give his or is a believer in insurance, or is already insured, but "not in the right comof it that you, as a policy-holder, even pany." But suppose she is against ine morning, from this if it is for five cents, have a right to surance altogether, or has already tasted

Will the Horrors of Fourteen Years Ago Be Repeated This Winter?

Providence, R. I., December 12 .-Many workers doubtlessly remember the panic of 1893; but unless they spent the winter of 1893-94 in a certain western city not far from Upton Sinclair's "Jungle," they never really experienced

The World's Fair left many men and boys stranded along the Lake Front. To take care of these strangers was a problem. They could go nowhere, and job was rarer than a virtuous Pittsburg millionaire. The winter coming on promised to be a hard one.

When the cold weather did arrive it sent the thermometer down to zero and the homeless ones, ablebodied men, willing and able to work, honest, decent, and respectable men forced to accept the charity of the city in return for hard

Along the Lake Front "shacks" were built, long low buildings with inclined planks runnin from the walls to within a foot of the middle of the structure, leaving a passage way about two feet wide. These inclined boards were the only beds many of the unfortunates knew all through that awful winter. For breakfast they ere given a hunk of bread and a cup of weak coffee, and in return for all this were compelled to go out every day and clean the snow from the streets. All morning they would work, most of them ill-clad, all of them half starved, a horrible, awful, pitiful crowd. Back to the barracks at noon, out again, to supper, and then "bed."

The jails were crowded that winter. Men deliberately committed misdemeanors and crimes that they might be arrested and sent to prison where they knew a bed and food awaited them The floor of the City Hall was crowded with newspapers, timetables, blankets (in rare instances), upon which men, human beings, stretched their weary limbs to awaken in the morning to face another wretched day. The churches opened their doors at night, and in the pews and on the floor of the aisles men, onest men, made in the image of the God in whose glory the elifice was erected, slept. Slept? No! They did not sleep. They went mad for lack of sleep, for food, for a ray of hope.

Mechanics, common laborers, clerks, oung lawyers, chemists, druggists-in short, men of every profession among the mental and manual workers, might he found cleaning the streets. Chicago took advantage of her starving ones as did Lancashire, as Marx tells us. Whether 'tis America or England the workers are exploited, every want taken

advantage of by their masters. The writer reached Chicago one cold morning in December, 1893, with about eighty cents in his pockets and nothing in his stomach. Through the "kindness" of the aunt of an old chum work was secured as a porter in a hotel at a wage of nothing per month. In other words, t was calmly and plainly stated that we could go to work for our board and room. As an eighteen-year-old boy generally carries a healthy appetite, and as snow shoveling has its drawbacks, the job was accepted. From 6 a. m. to 8, 9 and 10 p. m. we hustled, performing tasks unfitted to our previous training. The consolation Socialism affords was not ours, but it was not long ere the doctrine of Marx was grounded deep into a receptive mind.

the capitalist press like it or not, they must take that course which they know will be their own undoing, which will banish their own self-respect and which will show to the workers the true character of the journalistic Black Hundred. What are the facts as to the effects of the panic in this part of the country? A swelling of the army of the unemployed, with the consequent fall in wages due to the increased supply of jobless men. It would extend this article too greatly to tell of conditions as I found them in my job-hunt over different parts of the state in the last six weeks. To aveid too lengthy an article let me take Pueblo, Colorado, as a typical illustration.

Take a walk down Union avenue. You will notice standing on the corners, in the middle of the blocks, in hallways, saloons and pool-rooms, and grouped around the employment agencies, a sad looking lot of workingmen. fellows have found from experience the folly of walking their legs off going from shop to shop in search of a job, and have established, as it were, an unofficial headquarters for the out-ofwork, where they meet to exchange experiences.

As you walk along leisurely and speak with these men you find that their experience is that you may as well look for a needle in a haystack as to look for a job now. Even the lure of a far-away job is not there. But let us not be too hasty. There are six employment agencies here - one State (free) and five private,

One morning I made the rounds of all of them. No, I was visited, and on inquiry for a job, "Yes, I want two men

"Why, that used to pay \$1.50 a day and board!" "Yes, I know

"Well, why don't they pay that now?" Well, jobs are harder to get and men are plentiful."

"I see. But that's only about a week's work. Got nothing else?" a thing now."

No. 2 was visited. A dejected looking creature was the proprietor.

"What kind of jobs have you got this norning?" "Well," he drawled wiping his mustache and tugging at his extrasized trousers, "I've got passes for eight men, but they are cancelled now. You come back this afternoon

"No jobs at all " "Well, not just now. Come back this afternoon."

No. 3 is on the second floor, with a displayed at the bottom of the hallway, and a number of signs tell of men wanted here and there. These are old history. Will we see another in this signs but they serve as an advertisement. Before venturing upstairs the writer looked over these ads, and in a con-

of last winter."

"Yes," was the significant reply, "that was last winter."

At 5:30 p. m. I went to the freight depot, where the passenger train stops to pick up passengers, and I found twenty-five or thirty men grouped together talking rather loud and boisterously, and when I got up near them and asked a few questions of those on the outskirts of the crowd I found that the pass for nine men had been given to one man with instructions to take eight men with him, he to use his judgment in the selection. When this was made known to the crowd they surrounded him, each to urge himself to be taken along. The holder of the pass selected eight, who attempted to group themselves around him, and during the half hour of waiting they unceremoniously pushed and shoved each other in order to be taken along. After the holder of others would not acknowledge such practice, and when the train came along about twenty made a dash for the smoking car and at the steps of the car they pushed and jostled each other and it seemed for a few minutes that it would result in a fisticust. The train soon pulled out and those who had lost in the scramble had to again take up the weary and fruitless search for em-

A visit to the neighborhood of the steel works owned by the Colorado Fue! and Iron Company, and the smelters owned by the Guggenheim interests reyeals the fact that large numbers of men have been laid off at both places and the condition of the employed has been made worse. Reports from the workers in the railroad yards are to the same effect-men laid off right and left.

But what need to reiterate the common and well known facts and experiences of the workers? There is one reason, and at this time it should be indelibly impressed upon the minds of the members of the working class, and city of Greater New York. The sum that reason is that the capitalist press, is receiving a portion of the wealth stolen from the working class by the ahead every six years, or about \$8,300 capitalists, and in return have in the per year, merely by the operating of past and will in the future practice every fraud upon the workers which will tend to keep the workingmen ig norant of real conditions existing, in the vain hope that the workers may not find the remedy for these evils.

tale. Not a job to be had. Ah! but weary job-hunter, don't lose all hope: the great capitalist State of Colorado has under its wing a free employment agency. Let's go over and see what hope there is there of a job.

Seated in an easy chair is a well-fed creature, well groomed, who seems to care but little of the storm and strife class entirely from its power. It rests going on. Let us see if he has any jobs, only with the working class. "Any jobs?" "Not a thing."

"Have you had any calls for men lately?" "I haven't placed a man for over two weeks."

Shattered hopes. As these journeys from office to office were interspersed by little chats with members of this army of unemployed the noon hour arrived and I went to dinner. About two o'clock in the afternoon

of the same day I went to the freight office of the Missouri Pacific railroad and made my way to the roadmaster's office. The roadmaster, be it understood, has the employing of section foremen and extra gang foremen, and also the men on the sections and extra gangs.

I applied for a job on an extra gang, and was informed by the clerk that they needed nine men, and that more than fifty men had applied for the job. He however, took my name and told me to be prepared to go out on the 6:05 p. m. train. I asked what wages were being paid. "\$1.60, and nine hours'

Let them alsa unite on the political field under the barmer of the Socialist Labor Party to face the capitalist enemy and hasten the day when the drones of society will be unceremoniously locked on the outside, until they, too, can feel the pangs of hunger and the wintry blasts of winter, till they plead to be taken in as useful members of society. CHICOPEE AND HOLYOKE.

"John J. Kelly," says the Springfield, Mass., "Union" of last week, "the Socialist candidate was simply slaughtered, his vote being but 448 as compared with a complimentary vote of 1040 he received last year. Mr. Kelly's defeat, coupled with the defeat of the two Socialist candidates for aldermen, removes the Socialist party entirely as a factor in the city." In explanation to The People readers it should be stated that the article above quoted refers to the recent

municipal election in Chicopee.

A Holyoke, Mass., correspondent, commenting upon the Chicopee election, says:
"These Chicopee Socialists have strain-

ed with might and main to get some of their members elected, and after talking themselves hourse about Good Government,' are thrown down by the very people who helped to elect them. In Holy oke they allowed themselves to be made a political ash-barrel for sore-head Democrats, who had no candidate of their own, the Socialist party candidates, made ineffectually a hysterical reform campaign as a bid for a big vote-which failed to materialize, after all."

In order to judge a principle of action, it is necessary to shut the eye to the corrupt barnacles that fasten upon it. Leaving aside the corruptionists foregather in the Socialist party as mere incidents, it must be admitted that honestly-intentioned people give the party its standing. What are the principles of these? Their principles are: 1. "Get there the political govern-

Next, in order to get there-

2. "Become fly-paper."

That these principles proceed from warm hearts is unquestionable; that they proceed from unequipped minds is equally certain.

The aim of Socialism is the overthrow of the rule of the Capitalist Class. With such an aim before it, it is the merest folly to believe the class that is to be over thrown can be circumvented. The Capitalist Class know exactly that Socialism neans their dethronement. Accordingly, any method or policy looking to seeming

On the other hand, the aim of Social sm being the overthrow of the reign of Capitalism, Socialism means the Glad Tidings to the Working Class. With such a mission, it is the worst policy possible for the Socialist to try and nocent. In the measure that he does so, he alienates the very element upon which the triumph of Socialism depends

Accordingly, a policy of dropping the sound revolutionary propaganda of So-cialism is a double edged award, both edges of which wound and thereby defeat Socialism. It does not throw the Capital ist Class of their guard, while it throws sand into the eyes of the proletariat, deadens their revolutionary instinct, and

The despatches from the West announce that Gen. Funston is hurrying to Goldfield because he "expects trouble" there to-day.

The story is told of a Connecticut Yankee, whose profession at home was eddling wooden nutmegs, deciding that the West was a fitter theatre for his talents, and medicine a fitter object for his professional attention. To the West he went-away beyond the Mississippl. There he hung out his shingle, and to the villagers that he was a physician That same night he was awakene bed by impatient rappings at his street door. When he opened he saw before him an excited man. The visitor inform ed the doctor that his little boy was taken ill, and he wanted the doctor to ome with him on the spot.

"What's the matter with the boy!" queried the doctor.

"He has small pox!" exclaimed the father stamping impatiently.
"Oh!" replied the doctor with a look

of contempt. "I don't know anything about small pox. But you give the little cuss this," handing him a little vial-"That will throw him into fits. Then end for me. I've graduated on fits." Gen. > There is no "trouble" in Goldfield that a Federal secret service man, employed to corral issuers of false money, could not handle singlehanded. He would find no lack of evidence to swear out a bench warrant against the members of the Goldfield Mine Owners' Association; and be could easily muster up the requisite posse to conduct the delinquents to the nearest Federal District Court. Outside of that "trouble," there is none-none to quell, none to prevent. But, as in the case of the boy, who did not have fits and was first to be thrown into fits, in order that the physician who had graduated on fits could quell the trouble, Goldfield, peaceful Goldfield, is to be thrown by Gen. Funston into the fits of disorder and tumult; and the fit being on, the expert fittist, who has graduated on just such sort of things, will then "suppress the trouble"

Of such contradicting elements is made up the drama of human life—and infinitely more so the drama of the social struggle between the Capitalist Class and the Working Class, the former to uphold s social system that Civilization has prosounced against; the latter to establish the Reign of Peace, where he who works shall live, and he who can, but won't, shall be free to die according to all variations of his individualism.

> > STRAUS AND LABOR.

The "Flashlights of the Amsterdam Congress" make mention of a conversation that Bebel quoted in Amsterdan between himself and Marx, in the course of which, answering to the question, How do you account for the backwardness of the Movement in Great Britain, despite the country's opportunities? Marx answered: "Indeed things would be different here, were not the British capitalists so peakily shrewd: they deaden the Labor Movement by corrupting its leaders. Had Marx lived until these days of Oscar S. Straus, Secretary of the Depart ment of Commerce and Labor, he might have added: "And, in America, the capitalists are so over-confident in their power to deaden the Movement that they 'rub it in.'"

The Department of Commerce and Labor is a new Department. It is one of the "concessions" to Labor, Mr. Gompers' cry "Labor is not represented in the Administration!" was a cry welcome to capitalist officialdom. Whenever Labor, deadened by the Gompers lope, sets up a cry, it is immediately sed as the opportunity to promote the nterest of the capitalist—either his pockets, or his taste for displayfulness The Gompers cry was hearkened Thereupon a new Department was proposed, in which Labor was to be "considered." The dull Gompers imme diately began to nurse hopes of a cabinet position. The Department was established. 'The "Labor" in it was blanketed by the word "Commerce," and a full-blooded capitalist was put in charge. The present incu Mr. Straus, caught the spirit of the

place, and he has improved upon it. Mr. Straus has schemed a scheme according to which there is to be a "Council" attached to his Department. The Council is to aid him in performing his functions. Now-of whom is the "Council" to consist? The Department is called Department of Comonsist of a mixture of capitalists Laborites, after the fashion of the Civic Federation? Not at all. The word "Labor" on the name of the Department has been thrown into such utter "innocuous desuctude" by the word "Commerce," that Labor is not to be considered even in appearance, as on the Civic Federation. The whole "Council" is to consist of merchant princes, with the roulette expert Gustave H. Schwab at the head of the

PREVENT IT!

President Theodore Roosevelt has dispatched United States troops to Goldfield and other mining camps in Nevada. It was done by request of the "Mine Owners' Association." although all citizens of the district are agreed that there was no necessity for the obedience of the President to the orders of the corporations. There was no disorder, no violence, no riotingthe mine workers only protested against the illegal and criminal acts of the mine owners who paid the mine workers in valueless scrips which they had issued through the banks they control, in direct violation and defiance of the law of the United States of America.

President Roosevelt, without order ing an investigation, made himself an accessory to an organized conspiracy to bid defiance to the laws of the land. although it is really an attempt by the mine owners to crush the mine workers organizaton with the aid of the executive officers of the country and force the wealth producers to accept the humiliating terms of the oppressors.

These troops may be used, as so ofter before, to shoot down innocent men and women, and establish similar condition as have disgraced the stars and stripe when they were hoisted over the bull pens of Coeur d'Alene and Cripple

Germany.

The Prussian conference has been held under-the presidency of Singer. A new organization was determined for the Prussian comrades in order to better help forward the agitation in favor of Adult Suffrage in Prussia. Hitherto the Party Executive of the entire party has been the executive body for Prussia which comprises, as may not be known something like two-thirds of the German Empire in population and area. Now it was proposed by some comrades to set new organization new executive for Prussia. But this was rejected, as it would practically reduce the central executive to nullity, and moreover was not required. On the other hand, it was decided to appoint

a consulting committee to work with the executive in Prussian matters, An interesting discussion was opened by Dr. Arons and Edward Adler ,who in two very able papers, showed up the true character of the Paussian policy and the necessity of a change. Dr Arons pointed out among other things that the Prussian state is the biggest employer in the world and showed how the open voting enabled them to practically force their employes to vote as they wished. The discussion showed how keenly was felt the necessity for reform, but so long as such large numbers of workers even yet remain politically un-der the control of the Clericals any action of the party must be doomed to failure in view of the cowardice of the bourgeois parties. Dr. Arous showed clearly that it was due to the Liberals as much as anybody that the three-class system still remains in Prussia, as, at a me when they had actually an overwhelming majority in the Landtag, in the seventies, they voted for the postponement of the question on grounds which were obviously a mere excuse. Happily there is reason to know that the alie workers are daily coming more and more over to our side, so that this reform cannot be long delayed; and with that the reaction in Germany-nay, in Europe-will have lost their surest

MONEY-WHAT IS IT?

"Money is not wealth at all.

"Money a mere makeshiftscheme invented by men to make trad-

"Money represents real wealth, that is all. It is a token, like a soda water cheek in a drugstore."

Thus, during the height of the still rumbling financial panic, spake the sapient bourgeois reformer and dark horse aspirant for Democratic presidential nomination is 1988, Wys. R. Mearst, through the mouth of his paid editorial ist on the New York Journal,

A greater number of heels-over-head errors on a vital problem of economics -a problem, moreover, thrown into full illumination by the happenings of the day-it would be hard to find elsewhere compressed into so small a compass. Every statement there made is false and fatally so; for (1) Money IS wealth; (2) it is NOT a mere makeshift; (3) it s not the mere REPRESENTATIVE of wealth; and (4) it is NOT a "token, like a soda water check in a drug store."

(1) Money is wealth. Wealth consists of commodities. Commodities pos sess value because of and in proportion to the amount of socially necessary labor requisite to their production. A storehouseful of shoes or of pocket handkerchiefs possesses value and is wealth. It does so just because it is the crystallized form of a certain amount of the source of all wealth, viz. social labor. Gold requires for its production, also, social labor. The very fact that it has almost universally been chosen as the standard monetary metal is due to the further fact that it contains crystallized in it a GREAT DEAL of social labor, hence it concentrates a great deal of value into a small snace. and becomes a convenient medium of exchange. The present relative rise in the prices of commodities, due to the decreasing value of gold, due in turn to cheaper methods of gold production, also proves that money has value, and as such, is wealth. The same as pocket handkerchiefs or shoes, gold embodies in itself social labor, and necessarily therefore is wealth. Indeed, a storehouseful of gold would be worth many hundred times more than the same storehouseful of either of the two commodities named. How absurd, then, to say that money is not wealth!

(2) Money is not a mere makeshift. To say so is utterly to ignore the history of money and of commerce. As well say the trigger to a gun or the shaft to an ocean liner is a "makeshift" because without them neither the gun nor the steamship could perform its function. Triggers and shafts had both to be invented before the Colt's revolver or the Lusitania could become a possibility. Money had first to be invented before the modern world of commerce could have grown up. Makeshifts are temporary things to be cast aside when the need for them has passed, without involving therewith other great and voluminous changes. Money can not be cast aside without at the same time casting aside the present economic system of private production for private gain. How both of these may be done together will be indicated further on. But under present conditions money is no makeshift. It is part and parcel of the system.

(3) Money is not the mere representative of wealth. As shown before under (1), it IS wealth, and it is nonsense to say a thing "represents" itself. What money does represent is other commodities, but it is no less wealth than they and therefore cheaper and more submisare, nor are they any more wealth than it itself. Money is used as a measure of value, true; but that is only a case of stating diffuse wealth, embodied in a pretext for the final breach, expecting cheaply produced commodities (kerchiefs or foot-gear), in terms of concentrated wealth, embodied in a dearly produced commodity (gold); it is not stating wealth in terms of something that is not wealth. The paper money in common use may perhaps be thought to "represent" wealth. In the strict meaning of this article, this is not so. Every paper bill in circulation bears on its face the legend, if it be a coin certificate: "This certifies that there have been deposited in the Treasury of the United States (so many) silver (or gold) dollars, payable to the bearer on demand"; or, if it be a bank note, "The bearer on demand (so many) dollars." which was issued merely for convenience in carrying and using, has behind it an actual coin dollar for which it supposed-

- National Bank will pay to These statements mean that the slip of silk fibre paper which bears them, and ly can be redeemed, and on the basis of which it, the paper dollar, is able to circulate and figure in exchange. All the time the paper dollar is ostensibly performing purchases, it is really the coin dollar lying in the U.S. Treasury or National Bank vaults which is doing the work. The paper dollar is merely convenient symbol or voucher for the other's existence; the paper dollar "represents" wealth only in so far as it stands for the coin dollar. The coin dollar does not "represent" wealth,

be said of money that it merely "re presents" real wealth.

for one of these.

(4) Money is not a "token, like a soda water check in a drug store." The soda water check may be of paper, pewter, or celluloid. It has no intrinsic value at all commensurate with its power of procuring soda water. Money, on the other hand, has and must have, as has already been shown, intrinsic value of its own, due to its concentrated embodiment in itself of social labor. Without this, it would not be unquestioningly and universally accepted, as it is. Were money as cheaply producible as the paper, celluloid or pewter soda checks, no one would be wiling to accept it in exchange for his laboriously produced commodities; nor could he legally be compelled to. Money, therefore, can not be "token" merely; it must be hard, actual wealth, whether in gold or silver; paper only figures by being the official proxy

money without intrinsic value be made to circulate, the same as the intrinsically valueless soda checks? The reason is that the same concern, the drug store, which issues the soda check for value received (i. e., the nickel or dime paid for it), stands ready to redeem it with a specified equally valuable quantity of cooling liquor, IT IS THE SAME CON-CERN WHICH ISSUES THE FIAT CHECK AND WHICH STANDS READY TO REDEEM IT. In present individualistic society, no capitalist would be fool enough to honor with goods a fiat check issued by any other capitalist. He would be giving his valuable goods for a valueless piece of paper, which he could never get the value of his goods back for. Value-ful money is a necessity of private production, a sort of pro-tection for each capitalist against being swindled by all the others. Before intrinsically valueless money can be made to circulate, a condition must first be established in which it is the same concern which both issues the money and is ready to redeem it. Not until the coming of Socialism, when the people collectively shall control industry, can such a condition be established, and the taker of such money be guaranteed that it shall be good. Not until then, accordingly, can intrinsically valueless money come into use. Then, in the form of the "time-labor checks" of the Socialist Republic, it will be the only money necessary. But to speak of "token" money before that condition arrives, is to speak of mammalian life on the earth before the land was divided

UNCLE SAM AND

BROTHER JONATHAN BROTHER IONATHAN-Don't you

think the Socialist Labor Party is somewhat intolerant? UNCLE SAM-No, why?

B. J .-- I'll tell you. It calls the labor leaders fakirs because they won't join

the S. L. P. U. S .- Where did you get that from? B. J .- That is what the labor leaders

U. S.-But their saying does not make

B. J.-But does not the S. L. P. call

them fakirs?

U. S .- Whom? These professionals of the pure and simple stripe? B. J.-Yes.

U. S .- It does.

B. J .- Well, there you have it. They are called fakirs because they won't join the party.

U. S .- Not at all: that is not the reason. There is a mighty good reason to call them fakirs; their not joining the S. L. P. would be no reason

B. L.-And what is the reason? U. S .- There are workingmen who actually still honestly indulge the superstition that the union and the strike and boycott are enough for all practical purposes; many a sincere worker holds the view; the blows he has received are not yet hard enough, and you know how difficult it is to rid oneself of a superstition if it once has taken hold,

B. J .- Yes, indeed, I do.

U. S .- Such workers and their leaders are looked upon rather with pity than contempt by the Industrial Unionists or Socialists: these never call them fakirs, but visionaries and illusionists.

B. J.-Well, then, whom do the Industrial Unionists call fakirs?

U. S .- But there are a good many others who have long since dropped the pure and simple superstition; who know that the industrial struggle or strikes and boycotts alone is not sufficient and that the workers must cast their ballots against both capitalism and capitalist candidates, but who, nevertheless, fight the S L. P. with furious rage.

B. J .- Are these the ones the Socialists call fakirs? U. S .- Yes, but not simply because

they fight the S. L. P.

B. J .- For what other reason? U. S .- People may entertain an honest conviction that, although a certain labor party has a correct, platform, still

object to, and is led by people whom they sincerely mistrust. B. J.-You should not call them fakirs

for that.

it is constituted in a manner that they

U. S .- No, indeed! So long as they are honest in such convictions, they are no fakirs. But the test of their honesty is that they set up their own labor party, organized in such a way as they may choose, and led by such men as they may trust. That is the test. The workers who would do that are no fakirs; but those are fakirs who, while calling themselves Socialists and while objecting the S. L. P., nevertheless deliberately abstain from setting up their own party, Such fellows are all-around fakirs; they prove that they are dishonest in their opposition to the S. L. P., that they do not mean well by labor; that they are on the make even if they have to play

trading on their class. B. J.-Such people surely are fakirs. U. S .- And such are the "labor leaders" whom the Industrial Unionists and Socialists hold up with a pitchfork to the well merited execration of the working class

AS TO UNITY.

To the Daily and Weekly People: A great deal is being said of Unity. We the S. L. P. cannot unite with the S. P., as at present constituted, as ,to so, is to compromise, to stultify our principles and confuse them with those of the S. P. and A. F. of L. We should teach the working class through the distribution of our literature and the circulation of our papers. Through the laying of a solid foundation in this manner, a unity worthy the name is assured. Compromise nothing and effective unity nothing and effective unity will come all the sooner.

WHAT IS TO BE DONE?

To the Daily and Weekly People: All the indications seem to be that the unemployed problem is being rapidly precipitated. Lawson declares that the ndustrial depression has not yet really begun. Landlords are inexorable the official sheet of A. F. of L. of the workers are ignorant of what is hitting them, and helpless. If predictions are verified and the industrial crisis results in universally closing the industries, the wolf of starvation already upon many of us will be gnawing our vitals. The idea or conception of industrial organization has not yet permeated the working class so that rapid and systematized action might be taken for commandeering the means of production on a national scale, and the troops of a capitalist government stand ready to shoot the starving to death unless such action could be taken: Election time is so far off that to wait for it would be

CORNICE MAKERS AND THE VOR-WAERTS.

To the Daily and Weekly People: On November 24, in the Jewish Vorwaerts appeared a declaration of the Roofers' and Cornice Workers' Union, written by an A. F. of L.-ite by the name of Shreibman, declaring that the I. W. W. was only a nest to catch mem-It should be made known what kind

of a bunch these Roofers and Cornice Makers are, and why they were suspended by Building Trades' Local 95, I. W. W. They were organized under Sher man's reign and they imbibed a good deal of Sherman and A. F. of L. fake. As soon as they heard that the 2nd convention of the I. W. W. decided not to take any more than \$2 initiation fees, and as \$2 was not enough for their purposes, they contrived another scheme to get money. They instituted an "ex-amination fee" of \$3. If a member passes the examination, he pays in \$3; if not, they take away from him \$1 and tell him to go. When I found out this fake business I reported this to Building Trades Local 95. The officers of 95 tried their best to show the Cornice Workers that this meant demoralizing the working class, and not organizing, and that the I. W. W. wanted to organize the working class, and that it was not hon est to take money from workingmen on such pretenses. But they did not care for all our talk, and kept on doing their dirty work until Local 95 was compelled to throw them out. When a committee of 95 went to take away the property which belongs to the I. W. W., told us that they give the charter but no more, as the financial and minute books had been destroyed.

Then in the Vorwaerts declaration Shreibman says that the I. W. W. doesn't teach its members. I for one can say that the I. W. W. is the only economic school where the wage slaves can learn the class struggle.

A. F. OF L'S TAIL BETWEEN ITS LEGS.

To the Daily and Weekly People: At one time Local 64, I. W. W., had its headquarters in Union Temple, 26 South Washington ave., an A. F. of L. stronghold. They did not like our presence there; in fact, strongly resented it. The only way they could get back at us was by calling to their assistance Nelson and Bohlig, the landlords by threats of boycotting their place of business. They, fully alive to their economic interests, inasmuch as the A. F. of L. people were a hundred to one of us, and spent most of their time loafing around the saloon and throwing their sweaty dollars across the bar, which was under the rooms used as headqurters by different A. F. of L. locals, while we, on the other hand, spent little or nothing for booze, on the pretense that they planned some improvements in the building and needed our room, gave us the usual ten days' notice to vacate.

We did so. Some of us were not clear as to the part our A. F. of L. "friends"

"It is developed that Minneapolis and St. Paul are principal points of attack just now by that strike breaking crew of malignants, known as the I. W. W. Already in Minneapolis there are four lodges, all located in the Union Temple, and their shameless organizer struts in and around the halls, nosing into open meetings of unions and making himself generally ubiquitous, obnoxious and unpearable, so much that it appears almost time for the unions, which have meeting nights there to consult their own best interest, either by moving out, or having the Industrial fakirs thrown into the streets by the landlord. These lodges of the L. W. W have been organized at the behest of the Manufacturers' Association. Their literature is distributed at the shops conducted by members of this association, who at the same time distribute among their help copies of the local renegade labor sheet (The Bulletin) containing inane drivel relative to strikes and boycotts, that is now the merchantable commodity of that sheet. The I. W. W. was formed by malcontents and disreputable rascals who were summarily ejected from the unions, and is a strike breaking organization solely. Its primary purpose is not to elevate or benefit labor, but to sow seeds of dissension and disrupt and destroy organized labor generally. They are a clan of beetle-browed, ignorant self-seekers with whom decency is a crime; but such as they are capable of doing much injury here to organized labor, as they have done elsewhere, and the Trades and Labor Assembly might with great advantage to the same take official cognizance of their presence here bers in, in order to press money out of and by systematic organization through out the city render futile not only their efforts, but the exertions being made by the Manufacturers' Association and the Citizens' Alliance to gain them a foot-

A LETTER TO THE "NEW YORK TIMES.

To the Daily and Weekly People:-The enclosed letter was sent to the 'New York Times." As it has not ap peared I take it for granted that the editor of that paper doesn't like the tone of it.

> Sam, A. Stodel. [Enclosure.]

Editor N. Y. Times .- Dear Sir :- In he issue to-day you have a report from Goldfield, Nev., anent the situation there and in justice to the miners who are on strike in that district may I suggest a few corrections?

The mine owners have been using scrip in payment of wages to their employes. This is a violation of law in itself; but, not arguing as to the viola tion of the law, this scrip is accepted by the local storekeepers only at a discount of about twenty-five per cent.

The situation in brief is as follows These men are mining gold, supposedly, and after mining this gold in ac cordance with the mine owners' logic. there is not sufficient gold to pay their to be there is only visionary and does not really exist.

The companies operating throughout Esmeralda Co., Nev., have got to make some showing whenever prospective investors come around and therefore keep the miners at work, more as a bunco game than anything else. These stories as to high-grading, etc., are lies out of the whole cloth. This is done to lend color to the general scheme and attract the investors to buy stock in the various wild-cat mines; there is so much gold about that it is impossible to stop the men from stealing it, say the miningstock boosters.

If they are going to employ non-union miners under the protection of U. S. troops, is it their intention to pay these men in cash? If so, why did they not do so to those who were already employed there? These are fair questions presume and deserving of answer. To come to the personalities in this

controversy, of which you make men-

First ,the Sheriff notified the Governor that he was able to cope with the situation. There was absolutely no lawlessness in the camps that demanded national interference. The administration has to answer to the question of why in view of these facts were they so anxious to hurry troops into a peaceful community and place the same under martial law? Did the exigencies of the occasion warrant such proceeding?

You, furthermore, misrepresented the played in our removal, but the following men prominent on the labor side of this writer made the remark that "it was with the S. P. candidate for Governor, article, taken word for word from the trouble. Vincent St. John tons not shot only by reading The Pacole that he William H. Johnston's picture on them,

In the meantime the the atmosphere somewhat and shows armed and those acquainted with him know that he seldom, if ever, "packed" a gun. He was deliberately shot at, by a fellow-unionist it is true, and this man was afterward released on two thousand dollars bail, furnished by local members of the Mine Owners' Association.

The stories of the threatened blowing up of mines, electrical plants, etc., are on par with the stories told by Mine Owners' Association detectives in the Colorado troubles. When the U. S. Government report was issued (Document 122-Report of the U. S. Bureau of Commerce and Labor on the Colorado Labor Troubles) it was discovered that most of the reported outrages were committed by detectives employed by the mine owners, and if there are any such occurrences in Goldfield and vicinity the people of the country will know full well at whose door to lay the blame.

I trust that you will pardon the liberty take in writing so large a letter, but realizing that you are anxious and willing to furnish your readers with as true a statement of things generally as s possible for you to do, I feel assured that you will permit this space in your columns. Thanking you, therefore, in advance for the courtesy I feel you will extend

THE RHODE ISLAND UNITY CON-FERENCE.

To the Daily and Weekly People:-As an interested spectator of the Unity Conference meetings now drawing to close, I shall try to give my impresson of them. Taken as a whole the meetings were interesting and instructive, and I cannot agree with those nembers of both parties who hold that it is all time lost because there seem o be little chance of the two parties coming to an agreement, at least no on the most important of the subjects of the three under discussion, which are: Attitude toward Trade Unions Party Press, and Discipline.

As far as the last question is con cerned the S. P. resolution entitled 'Local Autonomy" is not radically different from the amendment offered by the S. L. P. In fact, Leach (S. L. P.) embodied the meat of the S P. resolu tion in his amendment, this being the last paragraph of the original resolution: "Resolved that each branch, local, or state organization have jurisdiction over its own members and internal affairs, each being accountable to the superior bodies only in so far as conforming to the party constitutions, platforms and resolutions adopted according to party laws," If that is what the S. P. calls "local autonomy" I for one have no quarrel with it.

On the other two subjects under dis cussion, the S. P. took, to me at least, a peculiar position. As to the Party Press, most of their speakers insisted that their resolution proved that they were not against Party ownership, quoting this "Whereas. part of their resolution: an efficient Socialist press, responsive to the laws of the party and the desires of the membership is indispensable; therefore be it resolved, that as far as possible the party press should be owned and managed by the party organization and members, but no particular publication should be designated as wages; hence it follows that the amount an official exponent of Socialist philosothe same man would be speaking in favor of their privately owned press (they always say our press) and against party ownership. There was nothing new advanced, not a single argumen against the Party-owned press, but applies also to the privately owned press No, I am wrong-one of the S. P. conferees did spring a new one. Said he, "There is something about this S. L. P. talk about Party ownership that I cannot understand; there is a nigger in the wood pile somewhere. How is lance. The I. W. W. was all right, it in that the S. L. P., which always cries down co-operative schemes, Ruskin col- zation, but a Socialist party should reonies, etc., advocates Party ownership? Is it not the same thing?" As it was time to adjourn he was not answered but the average S. L. P. man would have no trouble in answering that, one way or the other. This is how I should anwer it: "Yes, co-operative or colony schemes and Party ownership are alike in one important respect, their environment; and that which condemns all these one time pets S. P. experiments to a certain death, is bound to make it the fine, and does not compromise. The sacrifices that S. L. P. men have made and are making for their Press shows movement, on account of their taking that they fully understand this; and in the measure that class consciousness develops, so will the influence and cir-

Its separate allegations may be correct enough, but they do not connect, nor do they bear out the theory that a political party of Socialism is superfluous.

J. F. M. PALENVILLE, N. Y .- Read the answer over again carefully. As to the concrete instance with potatoes, we would answer:

If the price of potatoes goes up from cents to 12, the reason may be one of many, or several together:

1. Either the supply has met with an unusual check; or, 2. The demand has gone up wonder-

fully; or, 3. The decline in the VALUE of gold has stimulated the rise of the PRICE.

Keep in mind: the answers in The People of November 17th and 24th dealt with the VALUE of the goods.

> TO WHOM IT MAY CONCERN .-- Articles should be written on only one side of the sheet. If written on both sides their chances of being published are materially-diminished.

> J. H. H. QUINCY, ILL .- 1. The Single Tax was not "slurred" in the article referred to. It was exposed. An absurd economic statement, made by a distinguished Single Taxer at a Single Tax gathering and accepted with applause is no "individual" act.

> 2. The Single Tax theory is that the private ownership of land values is the present cause of involuntary poverty. Socialism denies this. The present cause of involuntary poverty is the private ownership of the monster capital, requisite to operate upon natural opportunities, and, without which, the land and all other natural opportunities are shut off, leaving them accessible only to the man equipped with the necessary capital-the capitalist.

P. L. O. NEW YORK.-You misquote the Denver correspondents to The People. They did not report Haywood as having said, as you incorrectly claim: "The phrese 'Workingmen of all countries. Unite' is not applicable to America. What they reported was: "Pointing to the motto of International Socialism which adorned the wall, 'Workers of all Countries, Unite!' he [Haywood] exclaimed: 'I DON'T BELIEVE IN THAT, I NEVER BELIEVED IN THAT," etc. Whether Haywood made that statement, and, if he did, what the significance is of such an utterance, are matters for intelligent and courteous discussion. Intelligent and courteous discussion is out of the question if misquoting and billingsgate are indulged in. Such methods confuse, they do not enlighten. The capitalist and other press, hostile to the S. L .P., sufficiently attend to the work of confusing and disrupting. N. E. C. SUB-COMMITTEE.

Regular meeting of Sub-Committee held December 8, 3.30 p. m., at 28 City Hall Place. Present: Seidel, Malmberg, Ferguson, Walters, McCormick, Weisberger, Teichlauf. Absent: Katz, Mueller, Wilton, Woodhouse, Romary Vaughan, Chairman, Malmberg.

Minutes of previous meeting read and after correction, adopted. Correction In the minutes of Nov. 24, correcting minutes of Nov. 10, Neuhaus should have been mentioned voting against Seidel's resolutions on No. 10.

Bohn told of mistake reporting vote to N. E. C. in Arnold motion, "Shall Party continue Daily People, etc." Jacobsen's name, given twice, should be, Jacobsen, Johnse

Walters asked and was granted excuse for non-attendance at last meeting. Correspondence:-From Eck. N. E. C. member, N. J., sending vote on Marek motion; also enclosing circular with his remarks on said motion sent by himself to N. E. C. men.

Bohn read and presented his answer

Seidel raised the point that this matter was out of the Sub-Committee's jurisdiction, matter being now before N. E. C. and concerning them, not Sub-Committee. Temporary chairman Ferguson suled that letter was up before committee as correspondence. Seidel appealed from decision, and stated as before said. Ferguson argued that, though Eck is debating before committee with N. E. C., yet he forwards under cover of a letter the subject matter of debate. Seeing it is addressed to N. E. C., we have to digest all which goes to

Vote on sustaining chair:-In favor: Malmberg, Neuhaus, Ferguson, Walters, McCormick, Weisberger, Teichlauf. Op-

posed: Seidel, Orange.

The following was then offered by Walters, seconded by Neuhaus:

"Whereas, The Sub-Committee, at its meeting of October 16, 1907, gave peron to the National Secretary to absent himself from his office several hours per day for the purpose of earning money to be used to defray the salary of his assistant; Whereas, The N. E. C. Sub-Commi

tee did not presume that the Nationa Secretary would cease drawing his salary and the salary of his assistant asdirected by the N. E. C. at last meeting until such time as he had earned money outside the office;

"Whereas, Upon investigating, it develops that the National Secretary has as yet arranged to do no such outside

Whereas, A circular sent out by Julius Eck conveys the impression that the National Secretary was earning monies by tutoring, and at the same time collecting his salary of \$18, and the assistant, \$9; therefore be it

Committee learns with amazement the contents of the letter sent out by the er of N. J., and disti ed by him in large numbers to members of the Party."

In favor of resolution: Malmberg, Neuhaus, Ferguson, Walters, McCor-mick, Weisberger, Teichlauf. Opposed: Seidel, Orange. Motion Carried. Seidel and Orange voted "No" for reason that matter is not within province of

Bohn suggested that his answer to Eck's circular and Eck's letter be published for information of party membership. Motion by Seidel, seconded by berg, "That the matter be filed." Moved to table motion. In favor: Neuhaus, Ferguson, Walters, McCormick. Opposed: Seidel, Orange, Malmberg, Weisberger, Teichlauf. Motion to table

Moved by Ferguson, seconded by Walters, "That the Sub-Committee request the Editor that the circular letter of Eck and answer thereto by Bohn be published in The People, Yes: Orange, Neuhaus, Ferguson, Walters, McCor-mick, Weisberger, Teichlauf. No: Sel-del, Malmberg. Mation carried. Seidel read following: "I hereby protest against ub-Committee publishing the letter of Eck containing his remarks on Marek's motion, and protest against Sub-Comrtee's publishing of Bohn's answer for the Sub-Committee, to address the Party on this matter." Moved by Teichlauf, seconded by

Neuhaus, Ferguson, Walters, McCor-mick, Weisberger, Teicklauf. Opposed: Malmberg. Carried.

Seidel read his appeal to N. E. C. Decided to hold special meeting Dec. 16 to consider same.

Recess was taken at 7.45 for thirty minutes. Reconvened at 8.20.

Further correspondence:-From P. L. Quinlan, charging Editor of The People violated instructions of N. E. C. in publishing fetter of K. Eisenberg, Oct. 15, and statement of Section Philadelphia, Nov. 19, claiming both matters were internal affairs and therefore were forbidden publication according to a motion passed by N. E. C.: said motion reading. according to Quinlan, something like this: "That no internal matters be published in Party press." Referred to Press Committee.

From O. Justh, Chicago, relating his trial there and asking for ruling, (1) Does he stand suspended despite irregularities accompanying his trial? Answer: Appeal must be made to State Convention or State membership. (2) Cannot N. E. C. overrule verdict, without him having to appeal? Answer: No.

From C. M. Spike, Nome, Al., appli cation for membership. Proposed by C. Starkenberg. Moved by Weisberger, seconded by Orange, "That application be accepted and membership granted." Carried

From E. J. Petier, New Orleans, relating affairs in Section: asked information and to have charter re-issued Moved by Weisberger, seconded by Seidel, that information be sent and new charter granted. Carried.

From R Strach S. E. C., Texas, notice that expulsion of J. R. Robinson. Section Houston, was illegal. Filed.

From A Corporal, U. S. army, stating 33 per cent. of army deserted last two years; mostly young men and were good material for S. L. P. Filed.

From Jenning ,Ill., remarks on Eck's circular. Though Bohn's statement as to wages did not tally, it was inconsequent. His position was that if Bohn was not good on typewriter, would be better to hire operator and allow National Secretary to teach outside.

From Gilhaus, Denver, reporting on movement out there; was about to leave for California, holding a few meetings en route. Filed.

Vote of N. E. C. on Richter motion "That National Secretary draw up cir-cular answering Gruelich." In favor: Reimer, Mass; Dowler, Tex.; Jenning, Ill.; Katz, Ind.; Jacobson, N. Y.; Wilke, Wis.; Marek, Conn.; Arnold, Kan.; Kircher, O.; Schmidt, Va.; Gilchrist, Pa.; Johnson, Cal.; Brearcliff, Wash.; Richter, Mich. None opposed.

Bohn reported on his Western trip: "On September 26 I received a letter from W. D. Forbes, National Secretary, Canada, inviting either De Leon or myself to undertake a short tour through Canada. In a letter received October 9 this invitation was repeated. De Leon finding it impossible to accede to the wishes of the Canadian N. E. C., the Sub-Committee gave me permission (Nov. 10) to comply with the request. On October 2nd I received a letter from Eisenberg, organizer Cincinnati,, which read in part as to lows: If you can come as far west as hhio, by all means stop at Cincinnati. The I. W. In each case I plainly stated that I hoped no meeting would be arranged unless there was a certainty of its being successful and worth the effort and expenses. As the time to start approached the Canadian comrades discovered that it was impossible to proceed with the arrangements owing to the fact that it was found advisable to employ an I. W. W. organizer in Ontario and all their present strength must be united to that end. About the same time the organizer of Section Cleveland wrote: 'Although every member of the Section would like to see you here, a festival already arranged would not permit date set by me to be used. Meanwhile other Sections had arranged or were arranging meetings. It was impossible to give up the tour. By wire I changed dates at Buffalo and Cincinnati. The letter from Pittsburg advising me of their acceptance of my offer was secured en route. Columbus was not heard from at all. Because my list of dates was incomplete and indefinite when I started, I left advertisements of meetings in The

I addressed nine meetings at Detroit, Cincinnati, Pittsburg, Erie, and Buffalo. Special meeting held December 16, 28 City Hall Place. Present: Weisberger, Malmberg, Seidel, Ferguson, Wilton Woodhouse, Teichlauf. Absent: Vaughan Katz, McCormick, Walters, Muller, Neuhaus, Romary. Excused, Orange. Chairman. Ferguson.

Chairman stated that the object of the meeting was to act on appeal of Seidel and reply thereto.

A discussion took place as to sub-Committee's regularity in electing a committee on November 24 to take up commitee's side of case when no appeal in writing was before them.

Chairman declared election of commites on November 24 irrergular.

Moved by Teichlauf, seconded by Woodhouse, "That a committee of three be elected to answer the appeal of E. Seidel." Carried.

If permitted to remain in office until the next National Convention, they will have committed the Party to so much political chicanery that it can never be redeemed, and we can't expect to be judged any better than they if we remain silent to their crimes. Mrs. Otis also states that, as she believes the S E. C. is inclined to question De Leon's and Behn's digtatorship, that we take this matter up with the S. E. C. of Colorado. TO MEMBERS AND SYMPATHIZERS OF THE S. L. P., GREETING:

Your generous response to our appea for your assistance in making a success of our picnic last summer enabled u to raise a respectable fund with which we were thus in a position to materially assist our party press. Our press, as you well know, is our most powerful means of education and our ability to do something to forward it was a circumstance to be keenly appreciated. This experience makes us confident of your continued support and cooperation in our latest plan for raising a fund. this time to carry on a campaign of agitation and education Cook County.

We therefore invite you to our Grand Annual Prize Masquerade Ball to be held at Vorwaerts Turner Hall, 1168-1179 W. 17th street, on New Year's eve, and urge you to not only be present, but to de all you can to induce your friends and acquaintances to purchase tickets and come where an enjoyable time is

Now, comrades and friends, let us all work together with a will to make this affair a grand success, and Section Cook County will begin the new year so much nearer to the goal of the Emancipation of the working class from Wage Slavery. Entertainment Committee.

THE NAIL ON THE HEAD

THE PEOPLE DOES-WHY DON'T ITS READERS AND SUPPORTERS?

ber 13th, we received 142 subs for the ingmen, it is true, have less money now, Weekly People and 30 mail subs for the Daily People, a total of 172. In these stirring times we consider it remarkable that subs turned in should be so few. New York comrades and out of town comrades say that The People hit the nail squarely on the head in the Open Letter to Congress, and while we think that The People always does that, we are surprised that the comrades did not hit the iron while hot by rushing in a lot of Weekly People subs so that as many people as possible might read that letter. 'It has been suggested that the "letter" be put in leaflet, but would it not be much better to have the paper \$3.50; Chicago, Indianapolis and Pittswith the good things it contains going week after week to the thousands of \$2,30; Brooklyn, \$2,45; Bridgeport, readers that could be secured, and \$2.25; San Jose, Cal., \$2.35. In addition would be secured, if each comrade sent there were many smaller orders. in but one sub a month-that would mean 500 a week.

Those who sent five or more subs were C. Pierson, Minneapolis, Minn., 26: J. White, New London, Conn., 8; J. H. T. Juergens, Canton. O., 8: W. J. Bryan, New York, 8; Aurelia Corker, Los Angeles, Cal., 5.
