BULLETIN
SAN FRANCISCO, June 28. -San Francisco Longshoremen today answered the unvon smashing attempts of the shipowns ers by consistently refusing to penetrate a mass picket line thrown around the scab-loaded

Point Clear at Pier 54. As fast as longshore gangs are dispatched to the Point Clear they refuse to go through the line. They return to the dispatching hall and are sent to work at other docks.

Shipowners, up until a late hour today, however, were re-fusing to hire at any dock longshore gangs that previously had declined to work the scab ship, Point Clear.

SAN FRANCISCO, June 28-Fast on the heels of a threat by Ryan and Lewis, reactionary Longshore officials, to revoke the charter of the San Francisco local of the L.L.A. because of its rank and file leadership, come late yesterday an ultimatum from the shipowners to the S. F. Long-

The S. F. longshoremen have been ordered to unload the Point Clear or face a lock-out. - The ultimatum, voiced by Plant of the Waterfront Employers, called upon Lewis to remove the militant leaders of the longshoremerrand according to the S. tions in labor ranks. & Scab Cargo.

The ultimatum further says the employers have "no quarrel with organized labor," but throughout there is no mention of the fact that the Point Clear was loaded in Vancouver by scabs (the crew was shanghaied to Vancouver in order to get scab cargo).

Meanwhile it is reported that Lewis has issued a const-wide ballot calling for a vote us to "whether the letter and spirit of the agreements are to be kept." It is further authoritatively reportdown the ballot

Many waterfront workers have taken this to mean that Lewis i calling upon longshoremen to scab on their striking brothers in Vancouver-"or else!"

SOMETHING MUST BE DONE ABOUT

Much has been said revealing the viciousness of William Randolph Hearst. Endless volumes could be written on his corruption. But the problem is no longer to convince the public of his unscrupulousness—a fact so manifestly plain that it needs no further elucidation-but to convince them that something must be done about it.

The man is a real power. There is no sense in denying that. He wields the power of the press and the power of money. And the danger is not that he himself is a solitary menace, unique and complete. The truth is that he is in league with the rest of the major capit lists of the country who control the government as readily as their own households. Indeed, they own the whole country as their personal property and the rest of the population has the status of domestic servants. Hearst's newspapers are not the word of a single oppressor. They are the voice of Wall Street itself, of which Hearst is an integral part.

To take the attitude of, "Let the man rave. I don't believe him and nobody else believes him. And we're not going to be fooled by his tricks," is to play right into his hand.

When you're worried about how to pay the rent, think of HEARST. When your wages are cut, or you lose your job, think of HEARST. When you're broke, when you're hungry. when you need medical attention and can't afford it, think of HEARST. When you see little kids going to school in ragged clothes, think of HEARST. When you think of the depression, think of HEARST.

For these are the real, concrete results of that man's power and of the ruling class greed he represents. A nation that tolerates the activities of such a man is a nation degenerated to a low point of disgrace. There is not a working man or woman in America who does not feel the results of the Hearst press in the immediate difficulties of their lives.

It is far beyond the point where you can verbally condemn the Hearst papers and let it go at that. Their continued publication is costing you too much in personal suffering. You've got to do something about it.

You've got to fight the Hearst press, not as an enemy com-(Continued on Page 6, Col. 1)

NOT WORKEBUT SLAVERY

The whole tone of the new Roosevelt relief policy is one of an offensive drive against the unemployed. An uninformed person eading the capitalist press accounts of the program would gather that somewhere back in 1929 and 1930, millions of people suddenly were overcome with laziness, quit their jobs and demanded that the government support them. The tone would further imply that these millions have lounged in enviable and expensive leisure up to the present time and that the government is now going to drive them back to work with the whip of starvation. The plain and complete fact is that relief quotas are to be

reduced throughout the country. In order to give it a separate flavor from the numerous "end the depression" aril "back to work" schemes that preceded it, the present plan is called a "Work Program" instead of a "Relief

The immediate question is, "What work are they going to do and what are they going to be paid?" Above all, are they going to get union rates of pay?

They are not. They are to draw so-called "wages" which are below the present standard of relief. And they are to perform work that should rightfully be accomplished by kiring union men. The

effect upon wages in regular industry is obvious. If roads are to be built, forests cleared, streets repaired, or any other type of labor performed, why should the men not be paid standard rates of pay? Why should the men be expected to perform this work for a subsistence minimum just because they.

If a man refuses this work, he will be cut off relief and forced into starvation.

His own labor power is all that a worker has to sell. Only by bargaining collectively can he get a fair price for it. The new Roosevelt policy decrees that the worker will be forced to sell this labor power for an absolute minimum price. During the brief and hypocritical flight of the Blue Eagle,

there was incessant caterwauling from merchants to the effect that the N.R.A. dictated at what price they had to sell their goods, and this was un-American. How about dictating to the worker at what price he shall sell

Labor Pledges To Carry On for Bloody Thursday Victims

TO THE JULY 5TH MARTYRS

Sperrey and Bordoise died that these men might have jobs You were at work unloading a ship one day. The loads had been stepped up and fewer men put in the gangs. The bosses were clamoring for more speed-more work. The man next to you was exhausted from the strain. One load swung wide; the man made a mis-step. He stumbled and screamed. You looked down the hatch and saw his body on the jagged cargo three decks below. It sickened your stomach when they brought his mangled body up. You knew he had a wife and three kids waiting at

better life for all. The newspapers paid no tribute to the murdered men. They paid their honors to the police who shot them down. They shouted lies in the public ears, defamed the men who fell and slandered the struggle for which they gave their lives.

The slander was not in shouting "Communism," for there were Communists in the struggle. Many of the most loyal, courageous and self-sacrificing men in the waterfront unions are

Nicolas Bordoise (Coundeorakis), one of the murdered men, was a Communist Party member.

The slander lay in the tharge that the Communist Party had incited the strike for the purpose of causing unrest; that the men were not struggling for better conditions but were merely seek-This was conscious deliberate lying. The newspapers knew

well enough that the so-colled "rioting" on the waterfront was nothing more nor less than a ruthless attack on the picket lines y police in a planned campaign to break the strike by terrorism. San Francisco replied with two of the greatest demonstrations of working class solidarity ever seen in America: the funeral parade of the murdered men, and the General Strike. Sperry and Bordoise were buried in the midst of struggle. And the commemoration of their death will occur this year in the midst of struggle-the same struggle for which they gave

Events are moving rapidly toward a showdown. Employers' have taken provocative action by demanding that longshoremen unload the scab cargo, from the S.S. Point Clear, As rapidly as longshore gangs refu : this scab work they are blacklisted . That is the situation as the commemoration of last year's

"Bloody Thursday" draws near. This much is clear. There will be a showdown. If it does not arise out of the present critical situation, it will come on or before the agreements expire on Ceptember 30.

The whole future of a ganized labor on the Pacific Coast will depend upon the results of that showdown. When it is over, either the men will control the unions, or the employers will. Either there will be real unions, or unions in name only. In the Point Clear incident, the employers have struck at the most vital principle of organized labor SOLIDARITY. It was solidarity that won the gains of last year's strike and solidarity that will be the deciding factor in the approaching showdown.

. The mighty demonstrations of July 5 are labor's answer to the employers and to the A. F. of L. fakers. The unions will not yield a single one of their gains. On this day they will stand erect in full strength and pledge their solidarity in the coming

TYPICAL SCENES from the Marine Strike of 1934. The picture shows a San Francisco cop firing on a worker without provocation. This gives the lie to all claims that the police acted only in selfdefense. It was murderers like this, firing at the backs of workers, who killed Bordoise and Sperry. The answer to such tactics was a militant picket line, which can take credit for any gains the seamen won. The picket lines completely sewed up the port of San Francisco during the strike. Militant action both before and after the strike has given the longshoremen their own hiring halls, which the imployers are planning to take away from them.

It will be American unionism And remember this !They are determined to provoke this protecting its rights.

They will succeed in provoking a struggle because if one effort fails they will try another. Why do you suppose they sailed the "Point Clear" into San Francisco Harbor and demanded the longshoremen to unload it just prior to July 5th? IT WAS BECAUSE THEY KNEW THAT THIS WAS ASKING THE LONGSHOREMEN TO EAT DIRT. They knew that this would be an effective provo-

PLAIN ORDINARY DAMNED FOOLISHNESS

The Tulare Packing Company fruit cannery recently burned down. Without the slightest evidence to lead to such a conclusion, the editor of the Tulare Advance-Register printed an editorial declaring that this was the work of Communists.

Not only was there no evidence in this case but there is no evidence on record anywhere in the country that Communists commit sabotage. Not only this, but throughout all Communist literature any such senseless activity is vigorously opposed and any member of the Communist Party caught advocating or suggesting sabotage or violence is instantly expelled and exposed before the rest of the membership as a dangerous ele-

Nothing could be more detrimental or harmful to the Communist cause than such insane destruction.

When the Morro Castle burned, the cry of Communist arsonists was invented and screamed by the capitalist press. The disaster has since been traced to the mahogany door of corrupt steamship officials. The whole incident has been whitewashed and

Let us consider for a moment; if such pointless destruction was the purpose of the Communist Party, the whole of America would burst into flames tomorrow. There are Communist Party units in almost every town and every neighborhood. What a startling conflagration would result if they all get busy with

insane. The wealthy agricultural interests in back of the Tulare Advance-Register are deathly afraid the Communists will organize heir workers in the coming season to demand living wages.

The moronic depravity of the editor finds its fullest expression in the sentence: "It is sufficient to say that this and other communities should redouble their efforts to stamp out the Leninistic rats and club them to death wherever and whenever they are

WHO DEPRESSED THE WORLD?

claiming somebody is pushing him.

No matter what goes wrong they claim the "Reds did it." A business man was recently handed a printed tract gotten out by some temperance society which claimed there were drowned rats in every brewery vat in the world and anyone who drank beer was poisoning himself. The business man glanced it over, shrugged, and said, "Humph! It's nothing but Communist propa-

More and more prominent is the inclination of the depression crazed parasites to blame the whole debacle on the Communists. This is a very convenient alibi for them, if somewhat crazy.

The GRAND LODGE of Free and Accepted Masons of California recently published a thundering resolution expounding this theory and distributed it (free) to all their members,

The Los Angeles Times printed a brief article "RUIN ALL INDUSTRIES", by Frank A. Garbutt, advancing the same idea. The tirade roars terrifically for five paragraphs and then unexpectedly breaks off into nowhere, like the broken fragment of a stone inscription dug out of a ruin An explanation of precisely why Communists would want to

ause a depression and how they could go about it in the first

Because they cannot pay the working class ten dollars for nanufacturing an object and then turn around and sell the same object to that same working class for twenty dollars, they think is oweing to the Communists. They own the whole country and everything in it. Especially all the money. If the bottom of the ocean could be used for anything, they'd declare they owned

They push a ten dollar bill out their window today and expect that when they suck it back into their cash register tomorrow it will be a twenty dollar bill. It turns out to be a ten, so there is

It sounds a bit crazy. But so is the spectacle of 125 million people half sick with worry and trouble, millions of them hungry and over half of them doing without things in a land that produces twice as much as they could eat and ten times more goods than

But then, it isn't their country. It is the private property of a handful of milliongires whom Roosevelt had the bare faced gall to even so much as suggest taxing.

At first it was "Tax the Rich." The vulgarity of this was very offensive in a democratic nation like America. So the capitalist papers changed it to "Tax the Trifty." MAN ALIVE! WHAT THRIFT!

GETTING TOUGH WITH THE UNEMPLOYED

In the selling of a "gold brick" self-consciousness is fatal. Nothing can lead the prospective purchaser to suspect monkeybusiness in the deal more quickly. And never was the Relief Administration more self-conscious

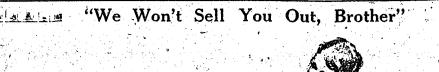

in putting over one of their quack depression cures than with the present Roosevelt "Work-Relief Program." In fact, so positive are they themselves of the humbuggery of the deal, that before it is even put in motion they are threatening the unemployed with everything from starvation to jail if they refuse to accept it. Article in the San Francisco Daily News, Wednesday, July 3:

"SERA CHIEFS MOVE AGAINST WORK DODGERS--Second Refusal by Client Will Result in Dropping Him from Rolls-Warning was given San Francisco relief clients today, etc.-"

This is no isolated example but is the consistent tone of the

This is forced labor and no bones about it. The administration says: "You'll sell your labor power for this much, or else-" What if you walked into Mayor Rossi's market in North Beach and asked, "How much is that steak?" and the clerk replied, "That comes to exactly one dollar." And you replied, "You'll sell it for just two cents, or else-"

You'd spend the night in the City jail. Of course the theory of the ruling class is: "Well, they're unemployed and half-way in disgrace anyhow, and they ought to be glad to get anything. They caused the depression by getting lazy and quitting their jobs. Now they must suffer." The two who towered way above ades, sawed off shot-guns, and I Day-1935."

PROTEST AGAINST BLACKLISTING OF LONGSHOREMEN

The employers discovered they were spitting into the wind when they launched their current attack against the San Francisco local of the International Longshoremen's Association. First they laid down a barrage of idiotic propaganda against rank and file leaders, at the same time throwing orchids at their own office boys in the unions. This, they hoped, would soften the ground or should we say, soften the brains) for the attack.

What they expected would be a speedway for their strike breaking machine has turned into a stone wall. But they haven't given up. They're in a huddle again trying to dope out their It's time the maritime workers went into a huddle them

The employers are doomed to defeat. There is no question about that. But this defeat will not come about automatically. It has to be planned and carried out by the workers.

The employers plot their every maneuver on this contention That the workers are unintelligent, easily confused and can be stampeded into selling one another out. They look upon the mariime workers as: "ignorant, uneducated, the lower classes." They regard themselves as the wise guys, "the educated, superior upper classes who have a corner on brains." By brains, they mean cheap scheming and trickery—sometimes called "business ability."

They have to plot their every maneuver on this basis because that's the only power they have; the power of treachery. When the workers throw down their tools and strike, everything stops They hold ALL THE POWER. The employer has only two things: treachery and violence. After that his brains and ability come to a stand-still.

Consequently, the workers only have two things to look out r: TREACHERY AND VIOLENCE. And they must be pre-If the maritime workers hold solid ranks and refuse to fall

THE IMMEDIATE DANGER OF WAR

Los Angeles Office: Room 418, 224 So. Spring Street

It should be unnecessary to indulge in sentimentality to arouse a struggle against war. It is enough to appeal to common

Pacifist societies have adequately expounded the anguish of heart-broken mothers and war widows. The mountain of rotting flesh and bone heaped up by the last massacre has provided a thousand humanitarians with material for indignation and horror. The economic basis of war, the greedy profitcering that masquerades as national patriotism, lies exposed in a thousand learned * treatises. So disillusioned sare the masses with the mock heroism

That is the raw fact that pacifists find hard to swallow. You are going to stop the government from going to war. You are going to stop the wealthy industrialists who manipulate the government from plunging the nation into war.

This is no child's play. The very fact that you set out to prevent war means that there are powerful agencies that will oppose you. This means a nation divided. It is something like revo-

In's April there was a nation-wide student strike against war. These students had to buck every agency of constituted authority. In many colleges they were brutally clubbed by the police. Many were arrested and jailed. All of them were called Communists. Who clubbed and jailed these students? Can you call those

They are the representatives of finance capital in the United States, the same agencies you come face to face with when you The issue is too serious now to relegate to mere talk. There are scores of organizations in the U.S. which are firmly opposed to war. They have to make their opposition felt, express them selves, find a lever to work with, or else their opposition is sterile.

Whatever other differences of opinion, political, religious, economic or otherwise may keep these groups divided, there is one issue on which they are firmly agreed. They want to pre-

On this issue they must unite for common action. For political action through a United Front Labor Party. For mass pressure, demonstrations, public meetings and pul-

Aug. 1 is an international day of working class struggle against war and fascism. All over the world demonstrations, mass meetings and parades are being planned. This year, the workers arenot demonstrating against a theory opposing their interests, but

It is the business of every sincere organization or person opposed to war and fascism to join these demonstrations and make them powerful expressions of the anti-war movement in America.

San Francisco longshoremen will struggle and lay down their lives for their Vancouver brothers, but will never sell them out on the conditions of some supposed "agreement."

Employers are concentrating the whole issue of Vancouver scab cargo on San Francisco now for the express purpose of isolating this port from the rest of the Coast.

There is only one answer EVERY MARITIME UNION UP AND DOWN THE PACIFIC COAST MUST IMMEDIATELY VOICE ITS CONDEMNATION OF THIS EMPLOYERS TRICK. San Francisco longshoremen are being blacklisted for refusing to betray their Vancouver brothers, THIS IS THE REAL BREAKING OF THE AGREEMENT AND MUST BE PRO-TESTED BY EVERY COAST UNION LOCAL.

W. I. Lewis, who has been indulging in shameless collaboration with the employers, must be demanded by all Coast locals to protest in the name of the District executive board of the I.L.A. against the blacklisting of San Francisco longshoremen.

WHY WATERFRONT WORKERS SHOUL Join the Communist Party

The organized labor movement in any community is as strong the Communist Party in that community. The Communist Party onsists of working men and women in every industry devoting heir best energies in an organized, disciplined manner to the interests of the working class.

In every nation of the world where the Communist Party has been declared illegal and a fascist dictatorship of the employers stablished, unions have either been abolished or exist in name only. Suppression of the Communist Party means suppression of the vorking class generally. The aims and purposes of the Communst Party and the interests of labor are one and the same thing. The enmity of the employers and their agents, Vandeleur Scharrenberg, Casey, Ryan, Green and all other traitorous labor officials toward the Communists is not merely based on principle. If the Communist Party restricted itself to talk, the employers would not worry about them. But the Communists are constantly active in every field winning better wages, better working condiions, better relief; establishing rank and file democracy in the unions, promoting unity and solidarity between all unions, strengthening working class organization. The Communists strive with deliberate, disciplined effort to strengthen working class power in

HEARST AND THE CALIFORNIA

The boycott of the Hearst press and the expulsion of the abor cheat, Paul Scharrenberg by an almost unanimous vote of the membership of the Sailor's Union, were inspired by the same

Collaboration between these two forces, the labor traitors who comprise the top leadership of the A. F. of L. and the sponsors of fascism in America, who find voice in the Hearst papers, has long been obvious to rank and file union men. The apitalist papers have consistently lauded and supported Vandeleur, Scharrenberg, Ryan, Green, and all the rest of their agents in union ranks. The capitalist papers have always been the voice of employers and labor fakers alike

If anything more were needed to expose the corruption of this fascist network, it has been supplied by the appearance of the CALIFORNIA FEDERATIONIST, a counterfeit labor paper issued under the editorship of Edward Vandeleur and Paul Scharrenberg, and littered around the union halls free of charge, No more humiliating insult was ever flung in the faces of working men than this blast of fascist propaganda masquerading under the banner of organized labor. It lacks only the masthead of the San Francisco Examiner to establish it as rine official voice of

From cover to cover, news stories and editorials follow exactly the same line as the Hearst press. To all intents and purposes, reading the CALIFORNIA FEDERATIONIST is disguise attempted is a thin flavor of pseudo opposition to the San Francisco Industrial Association. But not one of the maneuvers of the Industrial Association in its current drive against San Francisco labor is mentioned; the obvious reason being that all these maneuvers embrace the hand in hand collaboration of employers and the Vandeleur-Scharrenberg clique.

The line pursued throughout (which is likewise the line of the Hearst press) is an attack on Communism and the wild cry that ommunists are seeking to wreck the organized labor movement. The obvious truth is that the aims of the Communists and the interests of the working class are identical. It is also plain. that accomplishment of the Communist Party purpose, common ownership and control of the means of production by the working people, makes it of paramount importance that strong unions exist and that their control be vested democratically in the hands of

Paul Scharrenberg, expelled and discredited by the rank and file of his union, emphatically censored by union locals up and down the Coast, and exposed as a traitor and an enemy of organized

And it is well to note here that Scharrenberg's only champions have been the capitalist papers and the clique of labor cheats in A. F. of L. officialdom who comprised the rest of the

Boycott of the Hearst press and widespread resentmen against the other capitalist papers has led the exponents of fascsm to seek other methods of putting their line across. The CALIFORNIA FEDERATIONIST is such an effort. Evasion of boycott is sought by giving the paper away free. However, their halls as fast as it is delivered. And they can pass resolutions against the sheet and refuse to permit its delivery.

could have. When you are building the Communist Party you are building real working class security.

At the present time, when the breakdown of the capitalist system becomes more apparent daily, and poverty grows apace amidst the greatest productive forces ever known to man, a strong Communist Party is more than important. It is a working class

The immediate task of the Communist Party is to organize the workers to demand and win decent wages and living conditions. But the perspective of the Party goes beyond these immediate demands and foresees when the working class, through the same agencies that it now fights for decent wages, will be obliged to take over the forces of production and establish a new society, adequate to the needs of the people and based upon firmer principles than private greed.

The Communist Party realizes that the struggle of the working class is political as well as economic, just as the employers express their domination today by control of all government agencies as much as by ownership and control of the industries. It is enough to point out that in all the strike struggles of the depression years, no employer has been jailed, police have never backed up the interests of the workers against the employer. troops have never been called out to suppress the violence of strikebreakers and thugs. To the contrary, wherever workers have struggled against their employers for better wages, they have come face to face with the batons and bayonets of Civic and

A strong Communist Party in San Francisco means strong unions, good wages and decent conditions. You can do your part to achieve this end by joining the Communist Party today. You will find in our ranks the best, most capable, courageous and self-

COMMUNISM AND TRADE UNIONISM

If the employers and the traitorous top, officialdom of the A. F. of L. can defeat Communism on the waterfront, they will have the unions licked. The Industrial Association understands this clearly. A great many union men, however, are still confused

And yet, by your very action of waging an organized struggle against the employers, you are Communistic. When you demand democracy in your union and the right to elect your own officials, you are demanding Communism. The very suggestion that workers should have a voice in the industry in which they work is out

Why, in the first place, should you be afraid of Communism? eason for not liking it. When you read the daily tirades in the capitalist press against the Communists, don't think for a minute you are listening to the voice of the public. You are listening to

An important crisis is coming in trade unionism. If the unions are under full rank and file control, they will command the greatest power in the land. They will be absolutely invincible. They would be able to virtually dictate their own wages and conditions. Why do you suppose it is that William Green and the rest of the top of A.F. of L. clique so generously praised in the capitalist press, although they supposedly command this invincible power, e unable to maintain decent wages or conditions for labor? It is because their nurpose in the organized labor movement is to

suppress labor, not to lead it. The movement toward rank and file control is growing apace in America. In it, employers read their doom. They will stop at nothing to defeat labor's realization of it's own power. The fight against rank and file control is waged as a fight against Communism. And it is certainly true that the Communists . in the unions are the outstanding champions of rank and file

The reply to this challenge must not be confined to defending the Scharrenberg expulsion. The booting out of other traitorous officials must follow. The ousting campaign must be carried through until every fake official has been driven out of organized

As rapidly as this is accomplished, election by referendum These traitorous officials can only maintain themselves in office by trickery. A whole rigamarole of laws and stipulations has been written into union constitutions to protect their dictatorship. Democracy in the unions would mean the defeat of this employers' machine. Therefore, the whole issue centers upon establishing democracy-otherwise known as rank and file control.

IT IS YOUR JOB TO PREVENT WAR

in its economic measures and war preparations required detailed analysis, charts, statistics and endless argument. Today, the fundamental facts stand so nakedly exposed they need no further

Every capitalist nation is gripped by an economic crisis which they are helpless to cope with. Every capitalist nation has taken substantially the same steps, not toward a logical solution of the problems confronting civilization but toward preserving capitalism at all costs. The trend in all capitalist nations is toward fascism, suppression of working class organization by armed

At the same time, all of these countries are confronted with powerful anti-war and anti-fascist movements within their borders. This is unprecedented in history. Only one country has previously been able to stop war and it took a revolution to do it. That was Soviet Russia. There the struggle for and against war evolved into a struggle between the working class and the cap-

The anti-war movement in every capitalist nation has already taken this form-working class power against ruling class power. Middle class and professional people and organizations, sincerely opposing war and fascism must necessarily join hands with the working class in their struggle, for here is the real power. The movement against war cannot be separated from the struggle of the working class generally for better wages and conditions, better relief, against frame-ups and suppressive legislation. Strengthening working class power in every phase is strengthening the

August 1st is a day devoted to this purpose. It is a day of vorking class demonstration against war and fescism in every nation of the world-for this struggle is necessarily international in scope. The aim of this day is to unite the broadest possible representation of working class and sympathetic groups in com-

The ruling owners, sponsors of both war and fiscism, control. every main medium of publicity—radio, press. screen, etc. Il real public opinion is to express itself, this must be done by parades, mass meetings and demonstrations. It is in this manner that all sincere persons and organizations can give the lie to the fake public opinion printed in the capitalist press. It is in this minner that they can reach broader masses of workers and middle class people and draw them into organized struggle against the twin menaces, war and fascism which endanger all.

THE GREATEST PROOF

labor traitors in A. F. of L. officialdom, that Communists seek to lestroy the unions, has no greater refutation than in the eight Communists now serving terms of one to fourteen years in the enitentiary for organizing California agricultural workers and inning them better wages and working conditions.

Here was an example of where there was no organization whatsoever before the Communists stepped in. Conditions in the igricultural fields had sunk to such a level that actual starvation and disease were widespread among the workers. The Cannery and Agricultural Workers' Industrial Union won vast improvements for labor, and these improvements cost the employers A war against Communism in the San Joaquin Valley was

declared by growers, violence and legal frame ups were used, and , the union, to all practical purposes, was destroyed. Today the agricultural workers are re-forming their ranks and preparing for a new struggle against intolerable conditions forced upon them. The "War Against Communism," cost these workers plenty

-but they learned something from it. And their imprisoned leaders, Pat Chambers, Caroline Decker and others are a living symbol to them of what Communist leadership means. These leaders toiled with the utmost self-sacrifice and courage to build the organization. They faced the clubs and guns of

vigilantes and kired thugs. Neither death threats nor sell-out offers could daunt them. When they were sentenced to prison on fake charges of having sought to overthrow the United States government, they pledged absolute loyalty to the working class and determination to carry on the struggle when they got out. From their prison cells they have issued a call to the agricultural workers for renewed organization and struggle. This is the calibre of worker who belongs to the Communist

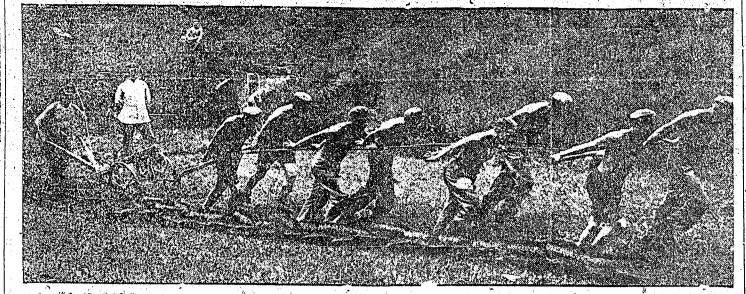

Party. The kind of worker who has a broad understanding of the needs of his class and is willing to make every personal sacrifice, face every danger in order to build a better world for all. These are the men and women the employers want you to drive out

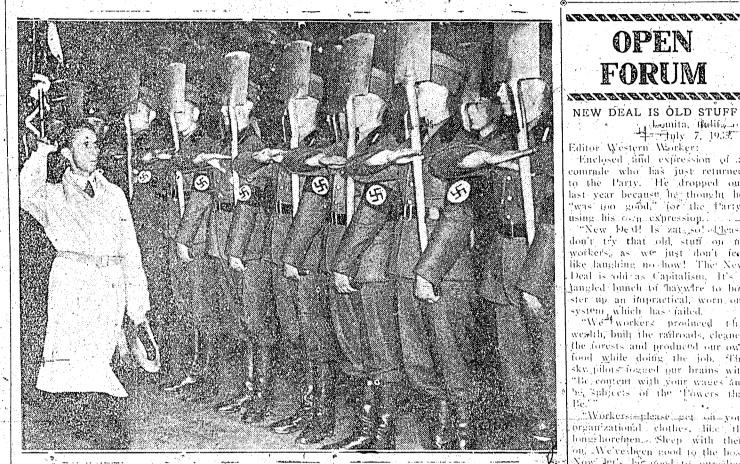

No lie is too base, no treachery too degrading, no brutality too cruel that the employers and their agents will not stoop to it in the hope of inciting union workers to turn upon their most loyal comrades. Will you class yourself with these treacherous parasites, or with the working class fighters who have gone to

This is a decision you are going to have to make very shortly. You had better start thinking about it now.

great deal more than just a possible idea. It is a working class emergency! The imminence of both War and Fascism is too real to need further emphasis. Unless practic 1 steps are, taken to preven both these dangers, they are going to materialize into the most terrible reign of bloodshed and oppression that ever swept a people.

The unions today are finding their real strength. They are casting off the employers' agents who have maintained official dictatorship for years and are estoblishing rank and file control. The employers will take every step to prevent this achieve ment. If they are allowed to control the State, they will crush the unions through the armed power of the government. This can be prevented if strength in the political field. A LIVING EXAMPLE

If the Northwest lumber strikers had a labor representative in office, do you think the employers would be able to call out the National Guard to bavonet them? "HIS MAJESTY'S LOYAL OPPOSITION"

When differences of opinion arise in the British parliament

militancy of those diplomatic gentlemen, William Green, Edward Vandeleur, Joseph Ryan, Andrew Furuseth and all the rest of "His Majesty's loyal opposition" in the officialdom of the American Federation of Labor. The most valuable allies of finance capital in the U.S. masquerading as antagonists.

One of the favorite strategies of these gentlemen is to take an urgent desire of the employers and advertise it as a demand of labor. The employers cooperate with the strategy by putting its militancy through the medium of the employers' own propaganda machine. The "demand" of labor is granted by a supposedly intimidated ruling class. A "victory" for labor is hailed in the employers' own press, and labor's "valiant" leaders are praised

This was the story of the notorious Wagner Disputes Bill which is already being used to nullify the strength of labor and lead all demands into the wilderness of eternal arbitration.

The chief role of the employers' own "labor leaders" is to keep the invincible strength of labor from solidifying and expressing itself. Consequently the "loyal opposition" is at great pains to find a means of preventing solidarity. They must, in some way, contrive to make every action that would strengthen labor appear as a menace in order that there can be some justification for their opposing it.

The employers cooperate by attacking every real labor meas ure, through newspapers, as Communism. This brings about a weird confusion, because, as a matter of

fact, all of these measures ARE Communistic, very definitely. Now we come to the ridiculous situation where everything that would be of advantage to labor is vigorously opposed by employers and their loyal labor officials as Communism. In other words, the proposition is that labor should cut its own throat

because if labor acts in its own interests, that is Communish It is plainly impossible for "His Majesty's loval opposition" to maintain itself very much longer on such an outlandish basis. Labor at the present time is engaged in a two-fold struggle: first power against the employers themselves. Labor is now in the process of peeling off the "loyal opposition" like a dead skin and At the same time, they are tackling the job of ridding, the unions of all the dictatorial red tape of the fakers and establishing new rules which place all control and all decisions firmly in the hands of the membership itself.

Just precisely what kind of freedom is provided in the United States Constitution and who is going to get that freedom has developed into a national brain storm. Does it provide the free dom for individuals to acquire and possess land and factories without limit and establish themselves on a scale of grandeur beyond the wildest dreams of ancient monarchs?

Does it provide the freedom for the working population to as a class both in the political and economic fields? Absolutely it does. There is no question about it.

It establishes very definitely that the employer shall have the right to exploit. It establishes very definitely that the working class shall have the right to prevent him from exploiting.

At the present time the employer is exercizing his constitutional right to exploit to the utmost. At the present time the working class is mobilizing and solidi-

fying its strength to put an end to this exploitation. The constitution supports them both. The fight is on. May the best man win. LABOR IS THE BEST MAN.

WHOSE WESTERN WORKER IS IT?

The employers are now endeavoring to drive the Western Worker from the waterfront. Harbor police have chased our salesman from the Embarcadero. A few blocks away, he was arrested on the pretense that he was "obstructing the sidewalk."

Is this an issue between the Communist Party and the employers, or is it an issue between the waterfront workers and the

There are two ways of looking at it. First, they are trying to prevent the Communist Party from selling its paper. Secondly, thy are trying to keep the waterfront workers from buying the

There is something in the Western Worker that employers don't want the waterfront workers to know. It isn't anything illegal, it isn't incitation to violence, it isn't lies. Otherwise they would be able to suppress the paper through ordinary criminal laws. They wouldn't have to resort to such cowardly pretenses as "obstructing the sidewalk'."

The Western Worker is a six-page paper published twice weekly. Its publishing and distributing facilities are modest. On the face of it, the employers, commanding the greatest presses in the country, equipped with every possible facility, and publishing four daily papers in San Francisco, would appear to be in a good condition to meet the competition of the Western Worker. Yet with all these extravagant means of pleading their case, they frankly confess their inability to stemethe tide of Communistic thought. They print charts and statistics on the growth of Communist influence to illustrate their argument that the only way Communism can be suppressed is by violence. In this they make it clear that the logic of Communism is very sound.

Unable to intelligently compete with the Communist arguments, they are most anxious to silence the Communist voice,

The issue which arises at the present time is whether or not waterfront workers have a right to read what they please.

The articles in the Western Worker are written by American working men. The Communist Party of the U. S. A. is an organization of American working men, although workers of any nationality are welcome to its ranks. Waterfront workers have found in the Western Worker a medium through which they can reach their fellow workers with the truth about waterfront affairs and refute the lies printed daily in the capitalist press. Until the recent publication of the "VOICE OF THE FEDERATION", the Western Worker was the only paper in San Francisco that would print the truth from the workers' standpoint.

Employers know that if they can drive the Western Worker from the waterfront they are one step nearer to breaking the militant leadership of the maritime unions and heroing the men into company unions under the leadership of employers' agents.

Waterfront workers have a right to read the Western Worler. Waterfront workers have a right to belong to the Communist

Waterfront workers have a right to read whatever political or union literature they please, do their own thinking and make their own decisions.

These rights are being challenged by the waterfront employers. Are you going to defend these rights, or stand by and see them taken away from you?

The attack upon the Western Worker is a maneuver in the employers' campaign against the unions. Every attack upon the working class in the past five years has been disguised as an attack upon Communism. There is more truth in the claim than most realize. The whole purpose of the Communist Party press and Communist Party activity is to strengthen working class power both in the political and economic fields. The interests of the Communist Party and the interests of the wo identical. When the majority of the workers realize this, they will understand exactly what the current campaign against Com-

MOONEY AND THE CLASS STRUGGLE

July 28th will mark the nineteenth year of Tom Mooney's imprisonment. He will spend that day at his regular duties as scullion in the officers' mess at San Quentin. Meanwhile, the workers of San Francisco will turn out in thousands to the giant Civic Auditorium meeting to honor his name and demand his

No event could better illustrate the history that is shaping in: the United States today. The masses who will voice their indignation at the imprisonment of Mooney are at the same time voicing their condemnation of a corrupt and unjust social order.

Tom Mooney has always understood clearly just why it is that he is in prison. He knows that he was placed there by a class. He knows that his frame-up is one incident in the class struggle of America; the employing owners, the capitalist class, against the toiling majority, the working class. He was railroaded to prison for organizing the workers to demand decent wages and conditions and to enforce these demands through their economic power-the power to strike and bargain collectively.

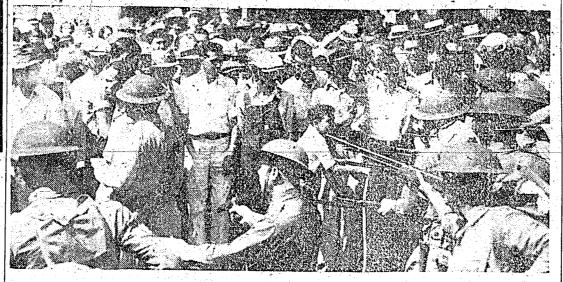

Mooney also knows that his continued imprisonment is accountable to the political power of the employers who maintain control over every government agency. On this, the nineteenth anniversary of his imprisonment, Mooney sees the working class massing to express its strength in the political field-to-challenge the most important power of the capitalist class—the power of the State. He sees this in the formation of a United Front Labor Party based equarely on the needs and interests of the working class.

In his nineteen years of confinement, Mooney has been joined by many other heroes. Men who were mere infants on the day Mooney went to prison, have grown up, carried on the struggle courageously, and are now serving time side by side with him in San Quentin.

During nineteen years he has watched the American working class groping to find its strength-to find the solution to its problems-the way to build a better world. Today he sees those issues coming sharply to a head. He sees the capitalist class sprawling in stupidity and brutality as its inability to rule becomes more glaring daily. He sees mass unemployment, hunger and poverty amidst the greatest productive forces on earth. He sees a nation divided and the line between the working class and the capitalist class growing sharper daily. He sees the working class growing stronger, more conscious of its problems, more conscious

The mass meeting on the 28th means more to Mooney than just a fight for his freedom. To him it means confirmation of his inwavering faith in the working class. It means that the cause for which he went to jail is growing stronger daily.

WHY WE MUST BUILD A LAB OR PARTY

When troops are used against striking workers, it is an expression of the employer's political power. He controls practically every government office and can swing the machinery of the State to serve his greed. The employer's political power is the only weapon he has. If labor would elect its own candidates to office, the wealthy owners could be curbed in their use of troops and police forces for strike-breaking violence.

When workers walk out on sunke all commerce stops. Their economic power is absolute. Labor has potential powers in the political field that are just as invincible. But, to date, this political power has never been

HIGH UNION FEES

ofurade Editor: I happened to join the Cooks mon and what was my sur orise to find they had raised the entrance fee from \$3.50 to \$10 Tow. can any emion expect mem pership with prices like that

These prices would be all right I they had union houses with mion wages. But, as everybody mows; Los Angeles is not union mathis particular trade. And how can anybody pay \$10 when they are making only \$10-\$15 per week?

veek? There is a good way to organize said union (provided, fees tre lowered). First find out names ind addresses from each worker. Let someone who does not work in that shop go and talk, and at the same time ask for addresses other workers in the shop. In till those shops which have a time-card the workers should take the names. I started to do this two days

ago and already have thirty names and addresses. Comradely,

OPEN LETTER TO ANNIE

LAURIE July 16, 1935.

Western Worker, 37 Grove Street

San Francisco Dear Annie; My, my, I always thought you

were a brave woman. Are you too, afraid of Harry Bridges? Better lock all your windows and doors at night. But Annie, you haven't told us why you fear Harry. Yes I know the Capitalist newspapers are saying this and that, and when you write something the result is you don't know what you are writing about. Or can it be some one clse writes your column once in a while? So please, Annie, answer this letter and tell us frankly-what ails you? Slightly Pink,

S. F. Labor Ticket PROGRAM

Union Pay, Adequate Relief, Civil Rights, and Democratic Government for Workers' Benefit Will Be Assured

On July 16 a Conference, representing thirty-seven-organizations; met at the Building Trades Temple in Son Francisco to plan a ticket in the coming municipal elections which would represent the workers of the city, The following is an attempt to explain more fully certain phases of the United Front Labor Ticket and what it can do for the workers of the city.

Question: Of what is the Labor Conference composed?

Answer: It is composed of those rade unions and liberal and radical organizations which vote to end two delegates to the Conerence called to form the habor Ticket. At the next Conference, to be held in August, an effort will be made to secure the attendance of the many organizations not contacted in time to take part in the first Conference.

Answer: The platform and can lidates will be submitted to the onference, which will have final sav 🌬 such matter, subject to ratification by a city-wide convention to be held in the Civic Audi orium in September.

For the carrying out of the campaign, a campaign election sommittee of one delegate froin ach participating brganization has heen set up. In addition, an executive committee of fourteen includets will carry on the day to lay work of the campaign.

Question: What can the Labor Ticket do for the workers of San Francisco if elected?

Answer: A Labor Ticket would for call out the police to murder strikers, as the Rossi machine did in the marine strike last year. But beyond that, there are certain certain definite steps that would be taken.

"A Labor, Licket would abolish by which through refusing permits to retain their power:

working class organizations are enied their constitutional rights. A Labor Ticket would stop the
