U. .. . MS

Mr. Stephen Dhlamini, chair-man of the S.A. Congress of Trade Unions (Durban), is seen addressing the meeting of unemployed workers held in Durban last week.

EW AT1 **Thousands of Families Face** Destruction

THE GOVERNMENT HAS LAUNCHED A NEW AND VICIOUS OFFENSIVE AGAINST AFRICAN WOMEN IN THE TOWNS. In CAPE TOWN the B.A.D. is endorsing women and children out of town in pursu-ance of its "Easten line" policy designed to remove all Africans from the Western Cape and turn this part of the country into an exclusive preserve for Whites and Coloureds.

In DURBAN it has been announced that influx control is to be applied to African women there for the first time. (See story on page 3.)

months. All orders are issued "in terms of Government Policy", making it clear that the present offensive against the African people here is part and parcel of the hated Ban-tustan policy. TOLD TO LEAVE

The **TOLE TO LEAVE** The procedure for serving the A neckstic balls on the wife and instructs her to report to the Ad-ministrative offices. There she is told she must leave the area and is given a cyclosiyled order to take to her husband. The local officials tell the women that they are merc-ly acting on instructions from the Native Commissioner in the area from which they originate. Typical of these orders is the one served on Mr. and Mr. Joseph Mtyekisane, who have lived to gether in this area since 1946, They (Continued on page 3)

FOLLOWING on their demonstration outside the Post Office (see last week's New Agc), unemployed workers packed the Caxton Hall, Durban, to hear speakers of SACTU and the Unemployed Workers' Union call for a united effort to get jobs for all.

After the meeting the entire crowd-African. White and mainly Indian-marched to the offices of the Department of Labour to prethe Department of Labour to pre-sent their demands opposing the destruction of surplus food, calling for the opening of skilled jobs to all sections of the population, cur-tailing immigration and amending the Unemployment Act to include African workers and to pay bene-fie for lower periods fits for longer periods,

After giving their representatives a hearing, the head of the Labour Department promised to present their demands to the Minister of Labour, Mr. Trollip.

Led by their spokesmen, the unemployed workers march through the streets of Durban to the offices of the Department of Labour.

DISPUTE

It is fantastic to learn that the Transkei is slowly progressing to-wards independence or self rule while the regulation 400 is still in existence. The Government does of want to lift this vicious piece f legislation on the pretext that has been asked for by the no of chiefs

it has been asked for by the chiefs. Many people are the victims of this legislation. Some who are most unfortunate are not even known by the public and as the genery of the Transkeian police who actually rule the territory. Unlike the country-wide state of emergency of 1960 where the prisoners had the privilege of being attended to by their visitors or relatives, here no visitors are allowed at all. The only visitors you have are the security police who inder this regulation are milking information from the prisoners.

Without exaggeration the peo-ple of the Transkei are positively living like a captured people. If the Government really means busithe Government really means busi-ness about this self rule it must immediately lift the emergency regulation and allow the people from all walks of life irrespective of any political affiliation to exer-cise their inalienable right of choosing whomever they think is capable of leading them.

EDITORIAL

THE LESSON OF ELANDSKLOOF

THE most interesting feature of the march of the 600 from Elandskloof last week is the panic into which it threw the Government. Here were an isolated community of poor people, goaded to desperation by circumstances beyond their control, who trekked en masse from their homes rather than allow 11 of their number to be victimised by the new owner of the farm on which they lived. They had no clear idea of where they were going, no plan, no campaign. Theirs was a spontaneous and courageous gesture of protest by a people who had simply "had enough."

Yet the Government immediately smelled revolution and marshalled all its resources to deal with the threatened invasion of Cape Town. Police along the route were alerted to arrest the marchers should they attempt to pass through any urban area whose by-laws forbade unlawful processions. Security police were rushed from Cape Town and were soon to be seen in were rushed from Cape Town and were soon to be seen in Citrusdal and environs, tailing every car and snooning on every visitor, The Minister of Coloured Affairs, Mr. P. W. Botha, who had a golden opportunity to win goodwill for his Coloured Affairs Department by olfering to help, instead issued a state-ment putting the blame on unspecified White and Coloured agitators and threatening the marchers with dire penalties if they did not come to heel.

As for Die Burger, it positively foamed at the mouth. Attacking the Cape Times and others who attempted to point a finger at the Government, it asked: "Why is it that White people always have an inclination to choose the side of the Non-White against the White in all circumstances?'

Die Burger put it down to "plain inverted colour prejudice, which automatically puts the Government in the wrong every time a Non-White has a grievance against it ..., It is a form of sickly sentimentality which certainly does not advance the cause of the Non-Whites in South Africa,

"It is in many respects really just a modern form of the old-time ordinary hatred of the Afrikaner."

Well really! Six hundred people camp in the open-and the Nats jump into the laager and reach for their guns. Criticism of the Government becomes treason. The White man is in danger, the Afrikaner insulted . .

It would be ludicrous if it were not so tragic. We are being governed by men who are in a state of great nervous tension, insecure, unloved, a prey to fear and suspicion, unwilling to make a single human gesture towards the Non-Whites lest it be interpreted as weakness and thus encourage further opposition.

The Nats like to talk of themselves as a strong Government. This is no strong government, relaxed and sure of itself. Vicious, yes, because it is isolated and threatened from all sides; but essentially vulnerable, despite all its Saracens and guns.

The lesson of Elandskloof is that the people must keep marching on the road to freedom. The Nats haven't got enough guns or nerve to shoot down ten million people.

SOME THOUGHTS ON SURVIVAL

by DR. ALBERT SZENT-GYORGYI. Hungarian-born American Scientist and winner of 1937 Nobel Prize for medical research.

IN a democracy, like ours, the government and its foreign and military policy should reflect the basic characteristics of the people. The American people are characterised by clear, simple and honest thinking, straight dealings, a regard for human rights, and a blend of idealism and realism.

Our foreign policy and military planning shows the opposite characteristics, We dislike dictators, thus

While the majority of mankind needs help we spend untold billions and ingenuity to buy a ticket to doomsday. The existence of mankind is already dependent on correct functioning of counties hands and buttons, while both humans and machines are known to err, which makes our own bombs into a threat to our existence equal to the bombs of our adversaries. Never has high politics gambled so irresponsibly before with the very existence of mankind, Morals seem to be something reserved for Sunday, when going to church, but to be of no use on weekdays, when making decisions

is not how we got on it, but how we can get off, and make a fresh start.

So if we want to understand ourselves and arrive at a plan of action we must understand what sort of thing this brain of ours is.

NAPOLEON AND CAESAR

This world did not essentially change up to the first half of the last century. If Napoleon and Julius Caesar could meet they could discuss all their military and political problems without difficulty. The two intervening thousand years made no difference. Science has suddenly changed everything in a few decades without giving us time for adaptation. It replaced the speed of the horse by the speed of jets, missiles or radio waves, abolishing distance. The fire it replaced by atomic energy, one of those terrific cosmic forces shaping the universe. We were clever enough to release these forces but have no machinery in our heads which would enable us to comprehend in our heads which would enable us to comprehend, to imagine them, so we tail, about them as if they would be one of those old-type energies. We get completely mised up between the cosmic and petty human dimensions, and prepare to unleash, here on our little globe, he cosmic forces, and then try to head from them by digging little holes in the ground This creation of new dimensions, and inshilty of the human mind to comprehend and handle them, pops up with the corresponding a cantusing at every

We are deeply moved by seeing a fellow man in danger, or suffering, and then talk, with a smile, about "pulverizing" our main cities, killing a hundred million of our countrymen, leaving the rest in un-imaginable misery to envy the dead. We are simply unable to multiply individual suffering by a hundred unable to multiply minividual suffering by a hundred million. If those tens of thousands crippled bodily and mentally, cancer patients and leukemic childen, who were hitherto produced by atmospheric tests could march in a silent procession before the leaders of governments, those tests would never have been

U.S. Marines Practise Landings

LEADING American politicians are calling for an American invasion of Cuba. World peace is being seriously threatened, for such an imperialist outrage would call forth immediate Soviet support for the people of Cuba.

The American threats cannot be dismissed lightly. Two years of intrigue and blockade have failed to topple the Cuban government, which, by honestly and resolutely facing up to the problems of a growing economy in a blockaded country, has got more popular support now than ever before.

The fact is that at this very moment U.S. marines are actively preparing for the day when President Kennedy sends them to invade Cuba.

The real reason for the U.S. aggressiveness lies in the acknowledgement that Catsroism is indeed a cancer in the body of imperialism which is crushing Latin America. Though most of the rulers in Latin America are extremely reactionary, representing feudal and militarist interests tied to the U.S., they realise that they dare not launch an attack on Cuba without provoking demonstrations which could topple their own unpopular regimes.

As a part of its plans to isolate and destroy Cuba the U.S. is putting ambassadorial pressure on the governments of West Europe to enforce a complete blockade on the island.

Another conference of American states is also being convened to prepare further aggression against the island.

In addition President Kennedy has announced the call-up of 150,000 reservists at a time when the international scene is relatively quiet, in order to prepare the atmosphere of crisis which is prelude to a military invasion.
