# WILL RUN OUR CITY?

# Businessman? -:- Politician? -:- The People?

## The Businessman:

### Frank Waterman, Profiteer. Smasher of Labor Unions, Apostle of Low Wages and Industrial Slavery.

By Lee B. Stein

BUSINESS MAN for Mayor-Frank D. Water-

This is the insult that the Republican Party hurls at the intelligence of the workers of New York City. There is no concealment of this slogan. It is not the diabolical invention of political opponents to drive the labor vote away from Waterman. It is the proud boast of the local class-conscious plutecracy. It is their sublime confidence that the habit of submission, of docility of their wage slaves will be carried over into the political field. It is their colossal assurance that their workers will be duped. And so they flaunt their hanners and posters throut the city: "A Business Man for Mayor-Frank D. Waterman."

The wise worker will immediately set himself on guard against this propaganda. All business men invite his distrust, but when one of them gains some prominence he will use him as a symbol and illustration of capitalis enterprise. He will try to awaken his slumbering fel-low-worker. He will point out that to be sympathetic with exploiters is to encourage his own further exploitation. And Frank D. Waterman is a Chief among

### Inherited Pen Company

The Republican candidate for Mayor is President, Tressurer, Manager and a Director of the L. E. Waterman Company, the renowned manufacturers of fountain pens. He inherited the controlling interest in this concern from his uncle, the founder of the company, L. Waterman. Thus he is entrenched in power through the will of the dead. The company is a family enterprise. Two other directors are Lewis E. Waterman and Fredsrick S. Waterman. Another, with a small share, is, William I. Ferriss, the genius of preduction of the firm. who was taken into business when he invented the wellknown clip. The L. E. Waterman Company is no pauper's organization. It has its ramifications all over the world. There are offices and showrooms in four cities in the United States-New York, Boston; Chicago and Francisco-and eighteen in foreign countries, 1 in Canads, 2 in South America, 8 in Europe, 1 in Africa and 6 in Australia. A German custom duty of 400 marks per 100 kiles on the body of the pens and of 2,400 marks on 100 kiles of gold pen-points combined with an anti-German frame of mind inherited from the war causes Mr. Waterman to have no offices in Germany. His factories ar three in number; the one in Seymour, Conn., is the rubber factory where the barrels and holders are pre-pared in crude form another is located at Newark, New Jersey, where the gold pen points and ink are manufac-tured and the chasing or designing on the rubber is executed, and a third is at St. Lambert, a suburb of Quebec There used to be a fatory in New York City on Fletcher Street, but this was abandoned seven years ago at the time of the pen grinders' strike, when Water-man decided he could be unmolested in his treatment of his help by moving to New Jersey. This factory is still for sale and is a dead loss at present. Indeed, a watchman who guards it entails an expense of \$22 per week. What interesting deductions could be made from taxable income with this as a basis!

### Holds Large Rubber Interests

But this is not all. Waterman is a full-sized honestto-goodness capitalist. He owns four subsidiary com-panies besides the L. E. Waterman Co. of New York. The rubber factory at Seymour, Conn., is the H. P. & E. Day Co. The Aiken-Lambert Co., manufacturers of gold pens and jewelry, is directed through F. S. Waterman and offices are in the Waterman Building in New York. The Waterman Building Company conducts extensive real estate operations. Then, last of the subsidiaries is the L. E. Waterman Company, Limited, at Montreal, which is in charge of the Canadian market. But there is still more to the story. A substantial interest in the Miller Rubber Company of Ohio, who supply much of the used in the manufacture of fountain pens, is controlled by Waterman and finally he is the proprietor of the Fountain Inn, a hotel at Eustis, Florida, of which more

If we examine the available financial figures concerning Waterman and his business dealings, we arrive at some extraordinary results. The L. E. Waterman Company is capitalized at only \$250,000. Its including subsidiary companies, for 1924 was \$56,954.47, presupposing, therefore, at 121/2%, a taxable income of \$455,635.76, not even a half million dollars. Judicious accounting methods and real estate operations generally account for comparatively lew income tax returns. Frank D. Waterman personally paid \$16,485 in 1923 and \$7,885.19 in 1924, which means about \$84,000 taxable income in 1923 and \$56,000 in Tax exempt securities be blessed! Bradstreet rates the L. E. Waterman Company at a million dellars and above. In 1906 sales amounted to two and quarter millions of dollars; at present it is about 10,000,000, leaving an estimated net income of \$3,000,000.

### 300 Per Cent Profit on Pens

How can we account for these enormous profits? Well, \$0,000 retail dealers in the United States alone out of possible number of 150,000 stationers, jewelers, druggists and specialty shops and stores help in the distribution of Waterman products; 25,000,000 bottles of ink were sold in 1924. There are no reliable figures available telling how many pens were sold annually, but the company's statement is that it amounts to "milions" . The est of production of No. 2 pens in 75c, divided into 32c for the pen-point and 43c for the holder. These sell for \$2.75 retail and \$1.65 wholesale. This allows a margin of \$2.00 in the former case and \$0c in the latter, or \$67%

and 220% respectively. The pen-point separately sells (Continued on page 5

### THE ARMY THAT WINS THE CAMPAIGN

## Where the Three Parties Stand

By Norman Thomas. Socialist Candidate for Mayor

### "The People's Point of View"

VERY voter with the least bit of intelligence knows that the the City Government of New York is or may be the main factor in helping us get better schools, better housing, better transit, more playgrounds and a whole list of other things which vitally affect our lives and happiness. Each party should state where it stands on vital issues. Let us examine their records in this campaign.

fire traps of tenements. Housing is an acute problem for everybody except the very rich. The housing problem can-not be cured by emergency rent laws. important as these are. What else de the parties propose.

HOUSING

The Republicans propose Mr. Waterman does not even know that the housing problem exists.

The Democrats were finally forced by Socialist attack to issue a statement through Senator Walker, prom-

The Socialists are committed to a careful program of State and City aid to house building for use rather than profit, and to direct City building of safe and attractive tenements at a rent the people can afford to pay, which rent will cover the cost of building and maintaining the houses.

The present situation with regard to coal and the resultant misery and discomfort of the people of New York might have been prevented. For these things the criminal indifference of both old parties, which are the property of the private interests, is solely

The Republicans have said nothing about coal. A lot of you voted to keep cool with Coolidge and you got more than you voted for. You are going to keep cold—but not with Coclidge. He has plenty of coal. He and his party want to leave the anthracite monopoly in the hands of the profit-

tive program on coal. One month too late Governor Smith woke up some sleeping coal commission which, durbusy issuing contradictory statements giving advice. If you can burn the vice you are all right.

The Socialists demand national ownership and Democratic stration of coal mines. Then we demand that the City should replace profiteering middlemen by itself acting as wholesaler. At the beginning of this strike I suggested this in letters to ail candidates. If such measures had been taken then, the City night still have on hand some supply of anthracite which, at a conservative estimate, could have been sold at 70c hundred pounds. The difference between this price and what you pay is the price of government for private

### EDUCATION

The Republicans and Democrats con-The Socialists are committed to an idequate building program, more democracy and less bureaucracy in our school system, the entire elimination of partisan and sectarian politics, and an increase in the number of teachers so that there is at least one teacher to every thirty pupils. Above all we are committed to the education of our children as thoughtful citizens, rather than as docile voters, sheep-like work-ers or wooden soldiers trained to read but not to think.

### TRANSIT

The Republicans and Democrats oth pretend to be for the 5 cent fare and some new subways. Neither party explains how these can be built at a assessments which both old parties

The Republicans would leave transit in the hands of the same private in-terests which, in years gone by, have

outrageously robbed the people.

The Democrats say that they are for municipal operation of new subways, but that recapture of the old subways is impossible. They propose a danger- city.

### New York City's high rents force rearly six hundred thousand families to live in insanitary, dark, crowded. **NEW YORK STATE VOTERS**

state his position, as Social-ist candidate for Mayor, on the four constitutional amendments which will come before the New York voters next Tuesday, Norman Thomas issued the fol-

tion did not pass officially on the pro-posed constitutional amendments, which must be voted on in the forthcoming election. Each Socialist is present procedure of the state with retherefore free to use his best judgment. At the request of the editor of The New Leader I am giving my own opinion on the first three amendments. I leave comment on the fourth amendment which relates to the organization of courts and the right of the Legislature to raise salaries without constitutional amendment, to one of our So-chalist lawyers for comment.

"Amendment No 1. This amendment authorizes a bond issue of \$100,000,000 during ten years, not more than \$10,-000,000 in any one year. Its purpose is to supply funds to purchase land, construct state offices and other works taxes.

"I expect to vote 'yes' on this amendment although I do not consider it ideal. Governor Smith has presented a list of imperatively needed improve-

SKED by the New Leader to | ments to prisons, etc. This list is not stipulated in the amendment and we should have to trust the Legislature year by year to see that the money I not wasted on unnecessary or purely political improvements. Many of these improvements, in my judgment, should be paid for out of current revenue by owing to fament; a more scientific system of taxation,

The Social at Party at the convent. the briden of which should fall upon those able to pay. But there seems to be no chance at all of adopting such a system and there is no doubt that the gard to improvements is haphazard, wasteful and cruel to the wards of the old party government this amendment seems to me about the best we can hope for. Certainly it is better than what we now have. And it will prebably be as easy to hold successive legislatures to proper expenditure of this money as to proper appropriations in general. It makes possible a some-what elastic building program which can be adapted to needs and to costs of building.

"Amendment No. 2. This is the much discussed grade crossing amendment without adding greatly to the yearly it authorizes a bond issue not to extexes.

"I expect to vote 'yes' on this amend-the elimination of grade crossings on the following basis;
"Railroads to pay 50 per cent; city,

(Continued on page 3)

ous political operation of the subways. We Socialists favor building new subways, recapturing existing transit lines and putting them under a uniing the last four weeks, has been very fled administration, with transfers at appropriate points, making possible a genuine 5 cent fare. We would pay enough of the cost of building new subways by special assessments against admini- property especially benefited to keep the 5 cent fare. We would run transit under a municipal corporation with proportionate representation for the parties and direct representation for the various classes of workers on the Board of Directors.

### TAXATION AND **EXPENDITURE**

The Republicans and Democrats as if they were magicians who could give the city all needed improvements and yet lower taxes.

We Socialists propose honest and of city departments and bureaus to prevent waste, and assessment of property at full value according to law. As far as possible we propose to pay for needed improvements by excess condemnation, that is, when the city puts in a new park It should condemn land around the park, which land it should later sell for the higher values created by the park, thus refunding uld also put the printhe cost. We wo cipal burden of taxation on land, the value of which is in no sense created by the individual but by the workers of the city. In a conservative city like Pittshurgh where this plan has in this campaign is for the workers to cording to tables before me as I write are saving enormously in their taxes, housing is encouraged and land speculation checked. In other words, we cent fare without resorting to special Socialists are for real economy at the expense of grafters and wasters, but not at the expense of the needs of the city and its employees. We favor a scientific system of taxation. We now that in a city of such luxury as

a \$685,000 pearl necklace lying around

in a bureau drawer there is money enough to care for the children of the

Unlike the Democrats and Republicans, we Socialists have definite programs for marketing, including the sale of milk; the control of public utilities like gas and electricity; the interest of justice to the poor; and th creation of public playgrounds. want, however, now to emphasize or difference from the old parties on two points of especial interest to the Both the old parties betrayed their olemn promises by refusing to ratify and so save the children of America from exploitation for profit. Both old parties continue the injunction evil by which the State becomes the partner of the bosses in time of strike Against these evils we Socialists pro

### WANTED-THE WORKERS WITH HAND AND BRAIN

I have said enough to show that the Socialists believe that Government should be the servant of the people The old parties believe that Government should keep the people in orde for the sake of private owners of nat ural resources and public utilities, and profit-makers generally. ties will not serve the people. There is no real distinction between them. have listened in this campaign to can didate after candidate and to save my cans from Democrats except as they announced their labels. he great issue build up their own party. It will take The Socialist Party wants memhers and not merely voters. But a big Socialist vote in this election will do two things:

1. It will put fear into the hearts of both old parties, so that whoever is elected will be a little more decent to the people than other wise is possible. 2. It will put hope into the hearts of those who are uilding for themselves and their children the cooperative comwealth from which war and waste and poverty will be banished.

## The Politician:

### "Jimmy" Walker, Broadway's Own, Counsel for the Meat and Milk Trust, Proponent of the Water-Grab.

By Fred Holmes

N this campaign both Mr. Waterman and Mr. Walker boast that they are running on their records. That entitles us to examine those records. Elsewhere in this issue The New Leader gives Mr. Waterman's open shop labor record. It would emphatically disqualify him for the office he seeks even if it was not also manifest from his campaign speeches that he has neither the inclination, the ability nor the point of view to permit him to serve the people.

Senator Walker's record deserves some further examination. Here are some of the high points about him:

He boasts that he is body and soul a Tammany man. That means that he belongs to the best organized and most unscrupulous political machine in America. The very wealthy former Ambassador Girard told a wealthy audience at the Harvard Club the other night that Tammany Hall has saved New York from Socialism. That is, in plain language, Tammany Hall, by bribes and threats, has fooled the people so that they have not made their own city government their servant, but have left it in the hands of real estate speculators, money lenders and other special interests. A taxi driver volunteered the information to our candidate for Mayor that he was an enrolled Democrat because he couldn't last in his business two weeks on New York streets if he were not. It is this sort of an organization that owns Senator Walker.

### Walker Righ With Tammany

Mr. Walker's alleged progressiveism and friendship for labor amount simply to this: He has voted right when Tammany Hall as a result of pressure has told him to vote right otherwise he has voted wrong. The one conspicuous case of his independence was a case in which he was worse than Tammany Hall. But for him the famous Water-Grab Amendment of 1923 would never have been put through the legislature, and the people would not have been put to the expense of voting against it at the polls. How far can you trust a man in that case proved a friend of the private power interests?

How far can you trust the counsel for the meat packers and the milk dealers indicted for impure milk? In these cases he sold his political prestige and pull for cash. How far can you trust a man as Mayor who has shown himself in the legislature as the foe of civil service?

### With You

Mr. Walker now claims to favor municipal operation of subways. Yet a firm of Wall Street tipsters before the primary election advised its clients to have BMT and IRT stock on hand against the day of Senator Walker's nomination. It is not often that Wall Street is mistaken in the character of its men and our suspicion of Senator Walker's sincerity in the matter of municipal operation of transit is greatly strengthened when we find his chief editorial supporter The New York World, suggesting that in the matter of Senator Walker's enthusiasm for municipal operation "Senator Walker is gunning for the Hylan vote.

Do you want to vote for such a man? We have no desire to conduct a public campaign on the basis of charges against a can-didate's private life. We have simply this final. question to ask: "Do you want to vote for the man as Mayor who Broadway so affection-ately calls 'Our Jimmy'?" Can Broadway's Jimmie be ours too?

### A Last Word

In 'the two-party game of fooling the masses in elections it is always necessary to have one candidate to serve as the "good man" for the disgusted voters. Walker is this candidate this year. The two-party machine of those who live on the toil of the masses can never be without one such candidate. There are always two candidates, two headquarters, two campaign funds and two platforms but only one object—HOW TO FOOL YOU!

Do not be fooled. Walker or Waterman mean no power for you. Norman Thomas and the other Socialist candidates mean a big installment of public power for the workers of hand and brain. You are powerful next Tuesday. Will you be powerful for four years?

# SOCIALIST MILWAUKEE'S RECORD

By Daniel W. Hoan Mayor of Milwauke

ROM years of study I have formed the conclusion, and so stated recently at a large pubic meeting of one of our civic clubs, that the city of Milwaukee performs every public service at a cost from one-half to one-tenth of what the expense would be if the same service were performed by private individuals.

I was in hopes I would be checked on that statement, but so far the as-sertion has not been contradicted, and until it is successfully refuted I shall

continue to believe it is true.

Take our garbage collections, for instance. We make a weekly collection for two dollars per family annually. I know of no city that performs the same service for less than twenty dollars annually. lars annually.

Our ash collections are done at a cost of eight dollars per family annually and we go into the basements to get the ashes. No private firm would perform this service anywhere for less than twenty dollars annually.

I am prepared to take up police library, natatorium, or any other municipal service and make like comparisons. It is due not only to the large scale on which the city does its services, but to the low cost of overhead. I stated at that meeting that in the event any citizen could show any service that could be performed better and at a lower cost than by municipal functioning, the city should be prepared to make a rapid change far, however, no such offer has en forthcoming.

I therefore submit, that performing municipal service honestly and ef-ficiently is one of the most patriotic duties that any citizen can contribute. No one shares the responsibility and care of municipal government more than do the comptrollers.

Perhaps the greatest authority on nunicipal finance in bonds as well as the man most familiar with the finan-

Why Can't New York? NEW YORK CAN IF YOU VOTE FOR NORMAN THOMAS For Mayor

> CHARLES SOLOMON For Controller

SAMUEL A. BEARDSLEY For President of the Board of Aldermen

At a conference with Mr. Wood about a year ago he expressed himself as follows:

Mr. Mayor—your city, Milwaukee, has without question the best financial standing and credit of any city in the United States. It is due to the enactment and careful administration of a number of laws and measures which I trust you will continue to painstakingly adhere to.

adhere to. Let me communicate to you very briefly an outline of just what meas ures the judge had in mind and which has resulted, in the opinion of the judge, in Milwaukee assuming the leadership in matters of municipal financial credit and standing.

1. The institution of a scientific budget system which has absolutely prevented the usual recurring financial deficits at the end of each year.

2. The elimination of the issuance of all bonds which might in any sense be classed with such as pay for operating expense. Among the classes of bonds which we have refused to issue since 1910 have been street improvement bonds to dredge rivers and also miscellaneous small issues of bonds

cial standing of cities in the United in place of which we have levied a states is Judge Charles B. Wood of Chicago.

At a conference with Mr. Wood ent results are so obvious as to need no further comment.

3. We have issued a direct tax of

one-tenth of a mill for over ten years and which now accumulates about \$70,000 a year to wipe out a deficit of a half century's standing due to unpaid personal property taxes.

4. We have levied a tax of one-fourth of a mill which now accumulates.

fourth of a mill which now accumulates about \$140,000 a year to place ultimately all of our city departments on a cash basis.

5. We have centralized all the pur-chasing of the city in one board which has resulted in many hundreds of thousands of dollars saved. Added to this is a storehouse on which we keep an accurate check of all goods.

We have been able to inaugurate a system of paying cash for goods purchased and thereby instituted a discount system which resulted last year in a net saving to the city of approximately \$40,000 and which amount in-

creases year by year.
7. Perhaps one of the most valuable steps taken was the elimination of the usual method of paying contractors by certificates. It is a well-known fact that many of these certificates were uncollectible because of nonpayment of taxes, etc., and that the bankers usually charged a large discount to cash the same. We have eliminated this system entirely and pay our contractors in cash. At the time the property owners have been benefited by permitting them to extend their payments over a period of six years if they so elect, by the payment of 6 per cent interest. While this law permits the city to issue a six-year bond to meet any possible deficit of funds needed, I am happy to say that so far our surplus has been sufficient to carry on the system without the issuance of a single bond. The saving from this system is so vast as to need no further explanation. ' '8. Next we have altered our sys-

tem of depositing all our trust funds in local banks or depositories. This fund brought us only 2 per cent for years. We have inaugurated a sysem of investing these funds largely in snort term government securities bringing us at least twice the former ant of interest.

9. We have also inaugurated a tem of permitting a taxpayer who has paid his state and county taxes, the right to extend the time of paying his city tax for six months, upon payment of 6 per cent interest. This latter system saves the taxpayers, who are in temporary financial stress, from the loan shark, and at the same time insures the city a fair rate of interest. As a result of these two systems, together with other interest monies received from trust funds, the city of Milwaukee now receives approximately one-half million dollars annually in Perhaps \$100,000 money. mes from increased interest annually, due to buying short term certificates, while \$52,000 is the amount in interest we receive in an average year for extending taxes.

Last, but not least, due to this ac cumulation of interest we have firmly established recently a municipal amortization fund ultimately to wipe out all of our public debt. In June I had the pleasure of signing a check of \$375,000 out of our interest fund to be placed in this amortization fund. This fund will be added to year by year and will draw interest and compound interest until such time as our debt is finally eliminated, and which will result in a much desired reduction in tax rates. As a companie measure we have also established a private foundation for the accumula tion of private funds for the same

At first glance it might seem that so large a program would be very burdensome upon the taxpayer. would call attention, however, to the fact that of the tax rates of thirty of the largest cities of this country, you vill find Milwaukee's rate down about half way. You might also suspect that our bonded indebtedness is great. However, in an article in a recent issue of the National Municipal Review we find this statement:

Compared with 36 of the largest ities of the United States, Milwaukee's per capita bonded debt comes as twenty-nine on the list with only seven cities lower. Milwaukee's gross bonded debt is placed at \$27,750,500 or \$53.09 per capita as against an average of 103.40 per capita for thirty-six other states, omitting Washington with a per capita debt of .36. The average is \$16.79 for St. Louis to 206.60 for Norfolk.

Space will not permit me to prove hat we have not neglected our public improvements, except to say-we are about to complete the most expensive sewerage disposal works, in comparison to population, of any city in this country, a thirteen million dollar project, of which over one-fourth was paid for in cash.

We have also acquired every foot of riparian rights along our lake front and are constructing the best harbor on the Great Lakes. We are widening ne of our main arterial highways to 180 feet and will provide on one point thereon, a civic center involving an expenditure of eight million dollars.

We have built more high schools and acquired more playground space in the past three years than the city possessed in its entire history. A million dollar viaduct, a new water in-take, and a new million dollar pumping station, a new street lighting system and innumerable other public improvements places our program for municipal improvements second to no other city of its kind in the country.

I am not boasting, but have merely related a fact of which we are justly proud, namely, that we have achieved

ing and credit of all American cities. BROWNSVILLE SUNDAY SCHOOL

financial leadership both as to stand-

Brownsville will open its school for registration of children of the working class beginning Nov. 1 at 10 a. m. in the Labor Lyceum. School officially opens on Sunday morning, Nov. 15.

One of the most inspiring aspects of the Brownsville movement has been its Sunday School, which has spread light and cheer among the impressionable children. The ages of the students run from 7 to 17.

The school is making a city-wide appeal for those interested in the educational aspects of our movement to lend a hand in recruiting its faculty The comrades who have devoted their energies without stint find it physically impossible to be with the school for the season of 1925-1926. Some teachers are attending colleges, some are engaged, in professions with office hours on Sunday and others are prevented from being present through pressure of other business.

## PEOPLE ARE LIKE THAT

WE WILL admit the necessity for more subways and shorter hours for bootleggers but the of the country at the present time is for more Socialists, and the sooner we set ourselves to the job of manufacturing a few hundred thousand the better for all concerned.

It's up to us (this includes you) to speed up the machinery and turn out a steady stream of men and women who will knock the very devil out of this old capitalist system and work like old Harry for the inauguration of a new order of things. There is no good reason for delay; enough time has been lost already, so let's get down to brass tacks and go to work for the comple-

We have a practical plan with justice and humanity on our side. In fact, everything is in good shape and all we need is more people to help put it across. Concentrate on making Socialists. It's good, interesting, and certainly remunerative work for what the change will do for all of us will repay ten thousand fold our efforts of today.

To all of the above no doubt you will agree, but what to do? Well, the first thing is to build a strong Socialist press. That's the first step, and here you can easily help, no matter what you do or where you live. Start today to secure new readers, not tomorrow, but TODAY. It Socialism is worth having it's worth working for. It's up to all of us to hasten the day. Get a new reader today.

"The new column in The New Leader headed "Sparks and

Flashes" is a winner and well deserves the name.
"The only complaint I have to make is that there is not enough of it. Keep it up, Claessens, and you will soon have Coaldigger and the Syracuse, N. Y. ABE KLEIMAN

"Your twenty-two books received. Thanks, I will be feasting my better self for some time with their contents. We are living in an isolated neck of the woods on little farms located on rocky hillsides, and what we lose at farming during the summer we try to make up by catching coon skins during the win-ter—and last winter was not a good catch.

"We are a very democratic (save the word) people here and the most of us still vote in memory of Jeff Davis and Jesse James. However, about thirty years ago I met up with our Gene Debs (God bless him) while on strike in Leadville, Colo. In one of his speeches he told us to think, think, think! Since then I have been voting in memory of myself and those like me that are sometimes designated as hewers of wood and draw-

"After working as a miner in the far western country for 38 years, I was able to retire on my savings to a rockpile in the Ozarks. I am old now and broken down and about ready to demobilize. In fact, I am trying to stave off the role call as long as I can just to spite a Repubican undertaker who lives nearby. However, I still retain the spirit. Best wishes for The New Leader and the cause in general. "Danby, Mo.

W. W. Scotten."

And here in New York there are people whose chief anxiety is their inability to decide between a Buick and a Nash car. A movement that draws to itself adherents like Comrade Scotten must eventually succeed.

"What will you send me 20 or 25 copies a week for? I have made a little here in the oil fields, but realize fully that we have nothing permanent under this cut-throat system, so I am willing to help you scatter the idea of Socialism. Good wishes for you and all your efforts. You can see by the enclosed we are

not going to stay quiet out here.
"Roswell, N. M. W. F. Richardson."

We are glad to make special prices on bundle orders, of which quite a number are shipped out each week. In fact, this business is becoming quite an item in our circulation department. The New Leader offers the kind of material that sticks, so why not have a number of copies sent you each week for sale or distribution? Write the circulation

"I have received one of your circular letters and also a sample copy of your paper asking that I subscribe. In reply I want to say that I am certainly NOT interested. My people have always been law-abiding citizens and fought in every war of their country since 1812, and I trust to God will always so continue. We have nothing in common with traitors and agitators, and I am surprised that you are allowed to print a paper such as yours. In America there is equal opportunity for everyone to succeed. Rockefeller, Schwab and Ford were all poor boys, and all who work hard and believe can reach the top. Thomas S. Smithers." "New York City.

On the top of whom, Mr. Smithers? Then, again, suppose that all of us would "work hard and believe," who would people the lower layer? Your spirit is that of the tory in the Ameriand the conservative in every age of history. Those who would lead the people to justice and truth are always classed as "traitors and agitators." The list includes Jesus as well as Eugene V. Debs.

"Left Uniontown, my last address, over two weeks ago and I have been on the go ever since. That is my excuse for not renewing my subscription before. I simply cannot do without The New Leader. I just crave it, that's all." JOHN DANIELSON. Ellwood City, Pa.

The Society for Tired Radicals gathered in regular monthly meeting in a Cider Saloon on Third Avenue last week. Brother Winde Bagge, presiding, stated that the prime purpose of the meeting was to act upon the case of Isaac McCarthy, who, although a tried and true member for many years, had been caught in the act of smiling and thinking optimistically about the future of the Socialist movement. Brother Snooper, the complaining witness, spoke with vehemence of the grave charge, complaining witness, spoke with vehemence of the grave charge, pointing with pardonable pride to his own record of 27 years without even a grin being allowed to mar his features. "Since Debs spoke here a few weeks ago there is altogether too much optimism pervading this Society," said the brother. "Why, only the other day I heard one member intimate that perhaps Thomas might make a good mayor." Amid shouts of "name of the man and we'll expel him also," McCarthy was stricken from the role of membership. The remainder of the meeting was taken up by ten-minute talks on "Why I would make a better Mayor than Norman Thomas." Every member participated.

# THE MINER'S DEMAND

By Louis Silverstein

HE hard coal dispute has licity and patience. It is in this connection that the report of the Anthracite Coal Commission must be studied in detail to see what usefulness this \$600,000 worth of investigation has in helping us fo understand the crisis in the anthracite coal industry. The commission recog-nices that the union has an important function to perform: its responsibility is the maintenance of stable labor conditions. "The union," says the report, "has passed its days of struggling for existence and has reached the stage of constructive opportunity in which it must justify itself by a new kind of sarvice. The time for purely restrictive exercise of power is past. With the power already achieved, the union now has the opportunity and the obligation to help in the working out of whatever measures are necessary for effective discipline and management in the in-

On the other hand, the investigators were not favorable to complete unionization, though the final report states that the union "is necessary today for the protection of the standards that have been attained." They found "no claim that insistence on union mem-bership is necessary for the mainteint of abstract justice and a somewhat obvious" indefinite claim that the operators acopen shop go by default if only they can preserve the statement of principresence of non-union miners is a constant source of irritation, so that even solemn general agreements cannot pre-vent the local "button strikes," which sim to maintain perfect union control. In other wards, the commission is willing to concede that unionization is a good thing for the industry, but that imperfect unionization is just as good, M not bottor.

Commission Opposed Check-Off

This point of view, of course, affects he attitude toward the check-off. The commission is opposed to the institu-tion of this device because it is solicitons of the union's welfare. Declares the final report: There are valid objections to the check-off, especially in the collection of fines and assessments and it has also injurious effect upon the union in divorcing the problem of income from the winning of member ship and in the resulting lack of close ness of contact and of educational service and centrol by the higher officers to the lower officers and to the rank and file members of the union; yet the check-off is not vital enough to justify a suspension of operations, whether the union is seeking to extend its use or the operators seeking to throw it

And this in spite of the fact that the miners have considered the check-off vital enough to demand it continuously during the last quarter century! If it is not important, why not let the miners gratify their silly wishes? Moreover, it is not a question of abolishing the check-off that is involved. is only a theoretical statement for the bituminous coal operators accept it as an established fact wherever they recognize the union. The actual having asked for the reinstatement of situation is that the miners are trying to extend the check-off to the anthracite fields, not that the operators are trying "to throw it out" of that terri-Just as educational to collect its dues through the operators and through its own financial agents. And, finally, if unionisation is beneficial to the industry, there is no better way for the eperators to improve their business and discipline of its men by facilitating state. 25 per cent.

trol, but it is indifferent and even opposed to the aims which the men still hope to accomplish, namely, complete unionization and the check-off.

Non-Committal On Wages

When we turn to wages we find that the Commission's report is non-commital. It confines itself to the presentation of factual material in an arrangement which does not correlate cost of living, earnings and profits with each other so that a judgment be reached concerning can easily wages. At the time of the Commission's investigation there were 147,500 anthracite workers of which slightly more than half (\$3%) were foreignborn, the majority from Russia and Poland. Over half of all the anthracite miners-62% of the native born and 51% of the foreign born-were the sole support of their families. Their standard of living permitted "of sufficient expenditure for food and clothing when measured with standards set up by experts . . . But that the income of all anthracite mineworkers' families is not sufficient to names or protection of the union. Their enable all to reach the prevailing (the miners') defense reduces to a feelstandard in their communities is also relative obvious." The Commission found "that families with incomes of less higher, quiesce in letting the practice of the than \$125.00 have a hard struggle to make ends meet; that families whose incomes range from \$150.00 to \$175.00 A Living ple." In the same breath the commismay break even, save or go into stos's research men declare that the debt, depending upon individual thrift or circumstances. When the \$175.00 income level is reached about half the people are enabled to put aside some money for future use, as well as to pay for current needs." Computed in terms cidental sources.

The Minera' Annual Earnings

the annual earnings of the miners are. Piece and day rates give us no \$1,500 a year. As for day men it is adequate idea of what the workers' income is because they must be studied in conjunction with the number of \$1,515 for 299 days' work (two weeks days (starts) worked per year. The in excess of a normal year) while outseven increases since that of 1903. At the same time the volume of employof 182 days in the last decade of the nineteenth century out of a possible full-time year of 304 to 254 in the second decade of the twentieth. In 1920 and 1921 the number of days worked in each year was 271. On the what this means in terms of changing cost of living. A comparison made between the relative rates of anthracite contract miners with the Bureau of Labor Statictics index of cost of living indicates "that from 1913 unitil the second half of 1921 the cost of living had risen at a more rapid rate that did the wage rates of contract miners. Beginning with 1918 there was a considerable spread in the curves of living costs and relative rates, this being particularly pronounced at the peak of prices in June, 1920, when the relative difference was 66. Since 1921 the relative rates have been somewhat especially after September,

Wage Rare

1923.

However, these comparisons meaningless unless we know what the annual earnings are and how they compare with the annual cost of livfor current needs." Computed in terms inc. The Commission has practically of annual earnings this means that any said, as we pointed out above, that an amount less than \$1,800, that is \$150 anthracite miner requires \$2,100 a x 12 spells certain disaster while only year to maintain himself and his famsums above \$2,100, that is, \$175 x 12 ily in comfort. It has calculated that assure the miner a comfortable liv- the average annual earnings of coning. It must also be remembered that tract miners is about \$1,922. \$200 about one-fifth of the family earnings more must be deducted for supplies. is derived almost wholly from the it is, apparent, therefore, that even children's labor, boarders' rent and in-cidental sources. and they constitute one-quarter of the total number of employees engaged in and around anthracite coal The next point to determine is what mines (46,951 out of 162,503).

tices, known as the contract miners laborers. Their average daily earnings were \$5.87 as compared with \$7.78 contract miners. The unusually high rate of turn-over among them due to dissatisfaction with their lot also cut into their wages. They earn about on the average annual earnings of miners, for example, have received side men earn \$1,460 yearly for \$25 working days (a month and a half overtime per year). The sum total of these figures leads but to one infer-ence; that the miners, even allowing for the 10% increase of 1923, are still miserably underpaid. Only some of the contract miners, who all in all make up about one-quarter of the total workers in and around anthraofte mines receive annual earnings that at all approach a living wage.

Can the Industry Permit Wage Raises? The question, then, arises

whether the anthracite coal industry can absorb increases in labor costs Will the operators' profits be nated? Will the public foot the bill in increased prices of coal? The anthracite business, as everybody knows, in controlled by a combination. "Eight producing companies, affiliated to some extent with the railroads, produce 74 per cent of the total output and control 90 per cent of the underground reserves. The remaining 26 per cent of the output is contributed by a number of independent companies. The larges of these 'independents' retains a community of interest with one of the railroads and nine others control 13 per cent of the output. Until the decree of the Supreme Court went into effect, the Reading and an affiliated company, the Central Railroad of New Jersey, produced 20 per cent of the total annual output and controlled more than half of the unmined reserves. Through these affiliations of railroads and mining companies the same financial interest controlled both the production and the transportation of coal, and commonly, also, its wholesale distribution, either through the selling department of the mining company or through a separately incor porated but financially related selling company." Therefore, very often a detailed analysis of the finances of the affiliated railroad must accompany the study of the profits of the anthracite companies.

25c.

More Publicity Is Urged

The Commission avoided the de cision of determining "the basis thou which the rate of income should be reckoned." It did make a number of estimates, however, though its work is vitiated by the fact that it did not go beyond the sworn statements of the operators, and anybody who knows anything at all about accounting is aware that one need not be a perjurer in order to conceal swollen profits. Original investment cost and book values may be increased with ease and much apparent justice, and coal reserves held out for speculative pur-poses may be charged as liabilities. Some interesting figures, however, are deduced. Margin per gross ton has continuously increased, and so markedly since the strike of 1922 that the Coal Commission excitedly recom-mends that more publicity "as to "as to costs, margins and profits should begin at once." The business of the railroad coal companies has been lucrative, the profits amounting to as much as 45.7 per cent where there has been no revaluation. And in answer to the claim of the operators that further wage increases will bankrupt them, a study of dividends shows that it is frequent to have them run higher than per cent. The companies are still far from poverty. is well sustained. It is doubtful, how-At der the pretext that their labor costs

In one respect the Coal Commission devised not involving the expense of interest charges on a bond issue. I view. It recommends the adoption the shall vote for the amendment, thereshall vote for the amendment, there are not as ideal but as the best practice. m undoubted evil.

"Amendment No. 3. This is the profits and wages have been deducted.

The general recommendations of the Commission asking for continuous investigation and publicity of the facts, and the creation of Coal Division in the Interstate Commerce Commission to act as a Federal Fuel Distributor in emer-gencies, spring from the fundamental thesis that coal is substantially clothed with a public interest. It is unfortunate that the United Mine Workers of America do not grasp at this fundamental principle and counter either with demands for a thorough reorgan-ization and overhauling of the coal industry or with the union plan for nationalization of the mines that has been gathering dust since its

formulation two years ago.
The union should see further than the immediate demands of higher wages, shorter hours, the check-off and improved working conditions.. The miners could ob tain all by enlisting on their side the interest of the public and placing the operators on the defensive if they but offered a constructive program. Then the report of the Coal Commission could really be useful, for it would serve as a point of departure, a base of operations for carrying out an of-fensive against the exploiting mine operators. The democratiza-tion of the anthracite, and, indeed, the entire coal industry, would be the victory and the glory of the United Mine Workers of America.

# :-: THE MASTER-PROBLEM OF WORLD PEACE

By Rennie Smith, M. P. address Delivered Before the Vashington Conference of the In-erparliamentary Union.)

O one who desires peace among the nations can rise from a perusal of Dr. Munch's report without dis-quietude. The fact of failure not only to achieve the smallest measure of general disarmament, but even to bring together a respon-sible World Conference, is obvious. This Conference, which is minus one of its delegates because of his open and confessed belief in a militarist philosophy, this Conference has to make the sorrowful confession that a majority of the governments repre-sented here have actually increased their armaments in the last three years. My own country is no exception in this mat-ter. It has, within the last year re-opened the Singapore Naval Base; it has increased its expenditure appreciably on the air and naval services.

The countries which stand out prominently as exceptions to this world tendency to increase of armaments are countries which have been disarmed by an act of external compulsion, coun tries whose very sovereignty in these high and vital concerns has been virtually abrogated.

The one country which stands eut noticeably in a splendid act of resistance against this flowing tide of militarism, is Denmark. We in Great Britain, and more particu-larly those of us who belong to the Labor Party and support a So-cialist philosophy, have followed with the liveliest interest the efforts of the Danish Socialist Rigsdag to work out in practical deeds the logic of a peaceful policy. It is fitting that the resolution be-

fore this conference should be spon-sored by a distinguished representative of a country which has made its high intention, in this matter of armament, clear to all the world.

Few statesmen can find any satisfaction in the present arrangement whereby a major group of nations exercises the power of compulsory dis-armament over a minor group. The only result of this policy is to increase armaments in the major group. It is the logical price to be paid for the exercise of such power. In the minor oup the removal of armaments can ly in the long run serve to breed the spirit of resentment and of future armament. If history teaches any les son it is that such a group, so sub-jected and so treated, will find sooner or later, a method of expressing the resentment and the suppressed militarism which it feels.

### Compulsory Disarmament Self-Defeating

The method of compulsory disarmament is self-defeating. Moreover, bad as is the Treaty of Versailles; inevitable as its revision is, either by the method of negotiation and consent or the method of war, it did not commit the supreme folly of erecting into a system the principle of compulsory disarmament. On the contrary, the acceptance of compulsory disarma-ment by the minor powers was envisaged in the Treaty as but the prelude to a process of general disarma-ment. As I understand the matter the first act becomes meaningless without the fulfillment of the second If the second act is not proceeded with then the peace treaty in respect of this large item becomes the incarns tion of tyranny, arbitrary power, the grinning fiend whom all men detest iving in a house of beautiful words. It was in 1919 when we laid down

### DR. EUGENIA INGERMAN

# The Complete Disarmament Plan of Denmark As a Model for All the Nations of the World

the second process of general disarma ment into operation, I do not know. I hope I am not impatient. I hope I am not unmindful of the difficulties But I do submit that six years is rather a long time in which to have achieved nothing. Nay, worse than nothing; our resolution notices "with the great-est regret that of late years the miliexpenditure of most countries

I am glad to think that the British Labor Party, while it was, in a brief and significant venture, the Government, associated itself so warmly with the forward movement in world politics known as the Protocol. That involved an attempt to define the aggressor which history will not forget. That Protocol provided for an agreenent on general disarmament as a condition precedent to the operation of any other terms. The Protocol was rejected. It was rejected on the initiative of Conservative British Govern-ment which succeeded Labor. It was rejected mainly on the battleground

reasonable conception of National Republic. Part of the ambition of this Sovereignty in relation to the growing needs of an International Civilization There is no stability in Conservative Governments, not even British ones however imposing their superstructure The new conceptions of national severeignty will have to be elaborated, if mankind is not to perish.

The Pact Not Enough

From the point of view of disarma-nent, I do not know what importance attaches to the Pact. I will not discuss it. I will not throw cold water on it, nor remind you of its dangers. But whatever the Pact signifies, it is not Times presses. The of man grows weary of procrastination

What is wanted is a general act of disarmament. And it is wanted now. Where are the men and women; where are the political parties; where is the economic policy; where is the moral will that will make this deed possible?

I am glad this Conference has given a lead to the League of Nations - it

inter-Parliamentary Union is to set the pace and prepare opinion for the more elemn and official workings of the League of Nations. The time therefore is surely not far distant, because of this very purpose we confess, when we shall, as a world group of parliamentarians, be two up on the League, I am surely not alone in trying to imagine what this Conference would be like, in what respects its discussions would have been enriched, if representatives of the Russian Republic had also been present

Ladies and Gentlemen: We must have all Parliaments or their equivalents represented here. It is only by we can work out all that we have it in our power to become as an opinioncreating body, as a moral and intellec-

drawn in such a striking way in this Conference, but that the Council take every possible step to bring the political representatives of all countries into

I am glad that the resolution "asks the Groups of the Union to consider every practical means of creating . . a mutual feeling of security between the Nations.' I am glad for this further statement: "the Conference believes that one of those means-and one of the most important-would be What Else

Can We Do?

I have wondered in glancing around this Assembly, incomplete as its repre-sentation is, whether we are doing all that we might, to assist in the solution of this master-problem of peace. I say tual force in the politics of the world. to myself, as a youngster willing to If it were proper for me to do so, I learn, I sit in the midst of some of the would gladly ask the whole of the world's greatest statesmen. I sit among members of this present Conference to its best lawyers, its best parliamenta-instruct the Council of this Union, not rians, its most public-spirited men. I only to consider the problem of the va- ask myself: do they feel the same disconstitutes a proper and includes representatives of the German cant chair, to which attention has been content as I? Do they feel, as I do.

that whatever we have done yet is not enough? The establishment of these committees and subcommittees to deal disarmament is all to the go Their work can be nothing but of the highest importance, like that of General Charteris. But the world wiff not be won for the adventures of peace by a committee and a subcommittee. What else can we do, we who could-without pride or dissimulation describe ourselves at this moment, as the parlie ment of parliaments?

We can do much more. Could we not, every year at our assembly hold great public demonstrations for the cause of peace? Men and Jomen, sick in spirit, require to be assured of themselves and of their destiny. We could, in a way that has been opened to few associations yet in history, turn the eyes of the world towards the great goal of the peaceful evolution of umanity. Why could we not arrange a great series of peace-platforms every Why could we not hold, here in Washington, in many parts of the political headquarters of these United States, why could we not hold a series of great mass meetings, with repreplatform, speaking to the people the

"A Moral Challenge

For Peace"

more to prepare initial steps for a world conference on disarmament? We all know the profound interest which the present President of the United States has shown in this question of seneral disarmament. Why can not this Conference, here at Washington, give a lead? I would like to see this Union become one of the world's chief generating centres of a politics, of an economic policy and of a moral will making for peace. I would like to see us attempt for bigger and far more daring issues than any we have yet attempted. I would like us to be a moral challenge flung down in all the anarchy and turbulence of this present age, for the cause of peace.

I hope we shall take the Resolution seriously. I hope when we return home, especially those of us who go to lands of increasing armaments, we will take up with a new zest this fundamental question: Let us spend a little less time criticizing our neighbors and little more in setting a term to the fol lies in our own household.

Time presses. We have all heard of Irag. We have all heard of the war in Northern Africa. We have all heard of China. We all know that Russia is on the map of Eu-rope and Asia. Rumbling today; omorrow the thunder. New policies; new men; new methods. fessor Einstein once said to me in a no-more-war demonstration in Berlin, the greatest obstacle to peace was the evil traditions we inherited. It is possible for us, in the deep sense of men who are resolute in a great cause, to be loose from these past evils; to become the greatest creative me ment in modern politics.

I am tired of the sweet words of tatesmen. I want the concrete effort of a Denmark to become the deed of a world. I want it not because peace is anything in itself, but because it will register another wrench from the animal kingdom, because it will enlarge the content, the joyful laughter of our human heritage.

### HOW NOT TO **FIGHT** COMMUNISM

By Norman Thomas

AM NOT a Communist. I do not want Communist control of the Labor movement. I object vehemently to many Communist tactics and much Communist ethics. But-

I believe that imperialism is the foe of the workers and of peace.

I believe that the Dawes Plan, while a decided improvement on the conditions that preceded it, is essentially unjust and falls with terrible weight primarily on the workers of Germany and secondarily and less directly on the workers of other lands.

I believe that the vote is a weapon, but only one weapon, for Labor. Political democracy has its virtues but given capitalistic control of jobs and the means of communication, it has its limitations. It is no exclusive God. The British coal miners were abundantly justified in using direct industrial action

I believe that we must work for trade union unity as a matter of necessity. Heretofore Communist tactics have made it a hard, almost an impossible, job to bring about this unity. But circumstances may compel the modification of these tactics and were I a British worker the sheer pressure of necessity for some sort of a united front against capitalist-imperialism would make go on trying to find a possible

basis for a working agreement. Now, when I hear such beliefs as these called Communist, I get mad through and through. It's bad enough when the bosses' papers it: it's worse when labor men and socialists themselves seem to say it. So far as I can discover, the British Trade Union Congress went no farther toward Communismhowever active some Communists may have been-than to express To keep calling these ideas Comnunist, in England or America, is not the way to fight Communism.

but to build it up.

The trouble with the British Trade Union Congress was that it was strong in its expressions of general opinion but not so strong working out practical programs. That, as the English New Leader (which is not a Communist paper) points out, is a natural fault of big

advice the merchants in fifty thousand American communi-

S I sat trying to hear what A was being said at Liver-pool in a hall, the acoustic properties of which were so bad that it might profitably be chosen as the place of trial for all dirty social scandals, I thought of the Westminster Assembly of Divines when they were hammering out the Confession of Faith and the Shorter Catechism. "Plots and packing worse than those of Trent," said Milton of the Assembly. When logic, spun from the flimsy stuff of possibility, probability, and the putting of two and two together with wranglings galore over the sum, was flying about, I saw grey wigs and black gowns all around me. It was glorious, and there was only

A notorious advocate of dictatorship and a scornful condemner of that false notion of bourgeois ideology democracy, to wit-put up an eloquent and even tearful plea for that myth, and later on for its twin fraud, a free was lost in the high vaulting of the hall, that he had been summoned true, as they have summary ways in ent fields, and the usual crop of mis-Russia and Bulgaria for dealing with understandings had grown up. All that those who believe in democracy, and had to be ended. We have all marched

privileges.

The Liverpool Conference, like the Westminster Assembly, will leave its mark on the church. For at least months, manifestos, conclaves had taken in hand the flabby, time-serving, supercautious being of the Labor Party. It was losing the confidence of the masses—it was going to perdition. We had all got old and we had been educated outside Labor colleges. It was long since the red wash on our houses had been put on, and it had become pinky, and weather stained. And so on. We had either to go to the Italian Oil shop and get fresh wash or we had to submit to being classified with our sedate, spent and respectable neigh-

A wonderful tactical move had also been made which at Scarborough had almost been successful. A wedge, according to the latest edition of the Red Soldier's handbook issued from Moscow, was to be driven in between the political and industrial wings, of the Labor movement and inserted in the industrial resolutions discussed at Scarborough were to be expressions that were to convey censures on press and liberty to criticize bosses, the political leaders. Some friction Comiterns, Soviets, and Praesidiums, and suspicion had naturally grown up and it was rumored before the last between life-long friends in the two sections that only required interviews to remove, but until they were reto Moscow to be examined and dis-ciplined by the Protocult Inquisition for mischief. We had been working for heresy. I hope the rumor is not hard and had been worried in differ-

and downs had leaned too heavily upon each other, to let this mischief remain. Scarborough was a warning.
Liverpool has ended that. There will still be far-away rumblings and grumblings, and the earth will quake now

and again. But the old harmony between the two wings is restored. It is probable that the Moscow nuclei, rebuffed so severely in their attack upon the politicals, will turn their attention to the industrial movement. Their German "marrows" have been instructed in the "Letter from the Executive Committee of the Communist International to All Organizations and Members of the Communist Party of thus:

"The Social Democratic Party of Germany must be beaten by our Trade Union work. The Red United Front must be formed by our Trade Union work."

And if Moscow considers it worth while to continue to supply our Communist Party with money and instructions, that will become the tactics here The Trade Unions forewarned are forearmed.

munism are emphatic, but the local parties may still have to carry on a fight with people who, though rejected, will still try to push their way in and will continue to supply duplicated resolutions for unwary Branches to pass In a few Branches there are men and women of the Communist faith who have played a perfectly straight game who, when subscribing to Labor Party principles, have meant what they said. They are the exception, however, and the others will try to continue their membership. This will require firm handling, and the National Executive, after the Liverpool decisions, will, no doubt, put its foot down heavily upon offending parties. Liverpool has laid down the Charter of the Labor Party, and those who are not to respect it had better clear out.

The Trade Union position is a difficult one; it must be considered sympathetically. Communists ought not to be elected as Trade Union Delegates for political purposes, but if they are, their colleagues should see to it that the industrial organization is not to be We must trust to the vigilant backing of our own supporters. They ought not to be disgusted by the babblings and the squabblings that are to destroy them. They ought to remain and take steps to defend their movement. It may be a troublesome ness, but once done, it will be finished. Ready to

Keep in it. Stay with pape,

Of course away back in 1875 there rades, a bit older, a bit bent under burdens, were there, and we walked perfectly wonderful catalogs to be arm in arm, sat together and gossiped mailed to you for the asking; and there was not the splendid mail service we now have. Of course our grandfathers could not order from the great mail-order houses and save ings of the valetudinarians came only money, save much money too. Well, then that settles it; if grandfather the Movement. I returned to a desk never did we shouldn't. Just so in heaped with letters from people who politics, we should always find out had been wondering whether the how grandfather voted and scarefully Movement they had helped to create was being disintegrated, and who saw strain on the intellect to do anything in a new way—if your brain is weak. You know best. Be careful. Take no chances. There is the old beaten road.

# TEACHING TODAY

"Youth is the revolution, it enters life in each ageneration filled with possibilities for change and for improvement. Wherever two or three young people are gathered, there is the spirit of the

"The school is the trysting-place. There teachers with youthful minds and hearts and boys and girls by the millions, eager, hope-ful, full of faith and of confidence in themselves and in the future meet and prepare for the world that is to be.

"Long live the institutions of learning!"

### By Joseph T. Shipley

COTT NEARING seems unduly optimistic over the schools.\* He can hardly have the private schools in mind save for the few "experimental" or "new" schools—that are still too vague to be effective-these are hotbeds of aristocratic snob-

The public schools, upon which h therefore must rely, are unfortunately in the hands of teachers who are young, who are either actually old or held by fear, desire of promotion, or cynical indifference, in the old, worm grooves. Less than three percent of the New York City school teachers-pre-sumably among the country's most progressive-possess that youthfulness of spirit which would bring them to join the Teachers Union. The many facts gathered by Upton Sinclair, together with those given earlier in this very volume, should have tempered the enthusiasm of Scott Nearing's hopeful close. Education, as Bernard Shaw seizes every chance to remark, has by no means proven its value for spiritual progress, for any growth save an increasing accumulation of comforts. Of these the masses may have continued to gather their proportionate gleanings, without relative improvement of their condition through the ages.

The hopefulness of Scott Nearing is probably due to the fact that he is especially recalling, is building his lume around, a former teacher whom he devoutly admires. To the gener-ation of his pupils Dr. Patten must have been a revelation, but to teacher today his methods seem still question able. The personality of Dr. Patten was evidently powerful as well as kind; he was clear in his presentation of his viewpoint, quick to confess ignorance and to admit that his attitude had changed. Yet these very facts indicate that he revealed his attitude; by doing this he tended to influence the opinions of those students who admired him. The true teacher today, Professor Morris Cohen of City College for example, contents himself with starting the discussion and seeing that it keeps within the bounds of logic; he completely withholds his own opinions so that the student will have nothing to suggest in any way what to think, and can do nothing but struggle to learn how to think—to think, that is, for himself. This method will ultimately prove more successful for progress than propaganda, for the conservative forces in power have always greater resources and more effective control of propaganda. Only when we are taught how, not what, to think, will genuine spiritual progress be effected. Propaganda is more than Scott Nearing states, "the presentation of selected facts and of stereotyped clusiens in such a manner as establish a mental habit or set in a given direction." The indication of the teacher's attitude is propaganda. "A

# Scott Nearing "Unduly Optimistic" in New Book on Education The matter for the student. Of course of the definition of the student of the stu

careful weighing of the evidence, and a statement of the conclusion to which the evidence gives rise"—which Scott Nearing declares "is all that is expected from any teacher"—is also propaganda. Nearing scornfully suggests that a teacher who does not present conclusions "stops talking when dangerous subjects are reached"; this very remark carries the implica-tion that on "safe" subjects the conclusion given is the common opinion, yet when a subject is "dangerous," which means "disputed," any opinion offered by the teacher is prejudging

effort, and the pupil's conclusion.

Nonetheless, Scott Nearing's volume is stimulating on various phases of education, especially the problem of the part the teacher should play in the life of the community, whether his voice should be raised outside the classroom against abuses his expert knowledge enables him to discover. Other teachers may find occasional points to dispute; they and all other readers will find much cause for indignation at conditions described, much stimulus to thought—and frequent desire for action. The funda-mental question, "What can we do?" seems still largely unanswerable.

### ANDERSON FALLS SHORT

By V. F. Calverton

ARK LAUGHTER"\* springs from the quaint atmospheric background of the Ohio and the Mississippi. Lovers lying under summer moons on the banks of the river; Negroes laughing, singing, dancing on the docks of the harbor; slow, deep waters, lonely and silent, "crawling down between the mud banks of an empire," evoke the enchantment of the exotic. The death of the river life, with its gaudiness and gayety, marks the passing of civilization. In its place has come the age of speed, of fast-running trains, of industrialism.

In this drowsy, cotton-clothed milieu, with its eternal flow of ships, its corn and sugar-sown soil, the plan and plot of Anderson's fifth novel are laid. There are a fragrance and a freshness about this vivid picturization of the life and tradition of our southwestern territory, with its river-fed towns cities that are now struggling with the gigantic problems of a new and startling age. The coming of the fac tories, the inhuman enslavement of the proletarian, is again a motif in the social theme of the work. As in his earlier novel, "Poor White," there is that lingering romantic regret for the disappearance of the day of the artisan, the time when manual skill was they made and shaped. The machinery of contemporary civilization has crushed the artisan and created the

automaton. Modern science has annihilated the magic and spirituality of life, its deep-flowing emotionality and imagination, and substituted the rigid sterile mathematical patterns. It is this change that Sherwood Anderson deplores, and in the body of the work his attitude finds expression in soft elegiac utterance.

In the foreword to "Mid-America: Anderson's adventure into verse, we have a confession of creed that is singularly illuminating as a guide to an understanding of contemporary American literature—and of this novel "Dark Laughter"

I do not believe that we people of Mid-Western America, . . . have come to the time of song. To me it seems that song belongs with and has its birth in the memory of older things than we know. . In Middle America men are awakening. Like awkward and untrained boys we begin to turn toward maturity and with our awakening we hunger for sorig.
. . We do not sing, but mutter in the darkness,"

This description should not confine self to Mid-Western America, but the whole of our multiplying population, and it should include our prose as well as our poetry. Our literature is still in not yet grown up in thought. Indusare still bewildered by the miraculous change of two generations. Our land is wide and loose and crude. Its surface and substance are shifting and chaotic. This condition of our life is reflected in the character of our literature. It is reflected not only in the works of Sherwood Anderson, but also in those of Dreiser, Willa Cather, Westcott and Sinclair Lewis. We cannot escape from it. The formlessness. the chaos, the infantility of our literature are the products of this environ-

It is in this way that we can explain the formlessness of "Dark Laughter," its looseness of structure, its unilater-

"Dark Laughter." by Sherwood Anderson. free

ality of character portrayal, its limitedness of situation. From its fascinating social background flow fragments of pictures, radiant interpretations of nature, futile dreams of sex-thwarted men and women. But there is no artistic framework into which the respective parts can fit into an exquisite whole. The careful discrimination of episode, the meticulous elimination of the superfluous, characteristic of the great novels of Hardy, Flaubert and preciation of the fact that the finest spontanelty in art is secured through the wisest exercise of restraint.

The narrative itself is uncloying of details. Bruce Dudley, a newspaper reporter, having deserted his wife. Bernice, because of their incompatibilitie of reaction, starts down the Mississippi in an open boat, seeking something. felicity, that he himself can never define. He is everlastingly seeking this ever-elusive something, a poetic if not mystical contact with reality, let us say, that will rest his anxieties and tranquillize his perturbations. length he lands in Old Harbor, Ind. secures work as a factory hand and for a time contents himself with conversations with Sponge Martin, a mechanic who has still retained his affect tion for tools and the beauty of manual creation. By a kind of intuitive compulsion, Aline, the wife of Fred Grey, the factory owner, and Bruce are drawn mutual affection results in a "new finding of themselves," a total rejuvenation of life-impulse. With child by Bruce, Aline in the dramatic finale, leave Fred for her new lover. This dramatic climax is handled with skill, with feeling, but not with power. Done by a Hardy, a Zola, a Tolstoy, it might have been a masterpiece.

The character depiction is purely introspective. Here again Mr. Anderson is not versatile. Like Byron, he has created a type, perhaps himself, which changes in form but seldom in substance. Aline and Bruce are both characters seeking satisfactory sex-re-sponse and gratification. That they find it in themselves is the psychological solution to the novel. Sponge Martin, the mechanic, is the most original and striking figure in the book. Here is a picture of a proletarian painted with extraordinary sympathy and insight Mr. Anderson must strike out for new types, however, plunge into new psy-chologies, if his characters are not to

become stereotyped by repetition.

The comparison of "Dark Laughter with the novels of Hardy, Zola, Flaubert and Turgenev is not unfair, since Mr. Anderson is the only contemporary American, aside from Theodore Dreiser, whose fiction in the past has deserved consideration beside that of European artists. And we must grow out of our state of provincial criticism! The point of perfection achieved by "Winesburg, a stage of adolescence, hesitating and Ohio," Sherwood Anderson has yet to tremulous in the face of an approach-surpass. "Dark Laughter" is an at-ing and dublous maturity. We have tempt, but not its achievement. It is brilliant in parts, often persuasively trialism set upon us with a haste from poetic, but never great. Unfortunately, which we have not yet recovered. We it endeavors to soar on wooden wings.

### SERGIE KO: ENKOV, SCULPTOR By McAlister Coleman

TIS name is Sergei Konenkov and he has come to this country to show us how his looming genius has interpreted in chiseled wood and marble the tragic spirit of the Slav. You may see his work on exhibition from now until November 1 at the Reinhardt Galleries on Fifth avenue, at Fifty-seventh street, and if there

is in you a love for something new under the artistic sun, a seeking for deep spiritual values in modern sculpture, here is one exhibit you will not miss.

Konenkov, who was born on the banks of the River Desne south of Moscow fifty-two years ago, inherited his love for dark forests and the woods that grow in them from a long line of those who made their living by the hewing of wood While he was but a youngster he absorbed the stories of the wood-nymphs and water-sprites and fairy folk who the peasants believed, abounded in the brest that came to the edge of the clearing near his door and some of his most charming sculpture consists of the wooden reproductions he has made of these remembered myths.

His genius early recognized, Konenkov was sent away to art school in Moscow and there the aged Tolstoi came and sat for a portrait for the excited young art student and talked with him about the necessity for a native Russian art free from European influence. Konenkov's woo statue of Tolstoi, aged, barefooted, in the peasant's garb the philosopher loved so well, is a stirring masterpiece, brooding almost divinely down from its pedestal.

He has done Dostoyevsky in chains on his way to Siberia and Lenin, a living, tense Lenin, making revolution in Moscow. And there is a striking reproduction of the head of Morris Hillquit, a charming study of the artist's beautiful young wife, some stunning nudes all by a way of showing Konenkov's remarkable versatility.

Konenkov is by no means without honor in his own country. Long since he has been hatled by the leading Russian art critics as the greatest of that tragic country's sculptors. But he is a new note in American art and a strangely stir-

## FRANK D. WATERMAN'S RECORD

(Continued from Page 1) for \$1.25 with an allowance of 20c for the old pen, leaving a margin of 93c on every pen, or 73c if we deduct the allowance. The holder sells for \$1.75. leaving a margin of \$1.32. No. 5 pens cost \$1.05 to produce 60c for the pen and 45c for the holder. These sell for \$5.00 retail and \$3.00 wholesale, leaving a margin of \$3.95 in the one case, or \$1.95 in the other or 376% and 186%. respectively. Separately, the pen-point sells for \$2.25, with an allowance of 50c for the old one, leaving a margin of without the allowance and \$1.15 with it. The holder sells at \$2.75 at a margin of \$2.30. Add to this the protection against foreign importations of a high (Republican) duty on fountain pens of 6c per piece plus 40% their value. Is it any wonder Waterman's profits mount? Is it at all astonishing that with the enjoyment of economic power to the full that he should decide to win political glory, too? Is it, therefore, surprising that two years ago he should have moved to New York City from Madison, New Jersey, where his residence had been? Now he is eligible to run as mayor It matters little that a large proportion of his time is spent outside New York City, in Europe, in Florida and other parts of the United States. He is ready to remedy New York's ills anyway.

### How the Profits Are Made

And how is it possible for one man to make such enormous profits? Chiefly through the exploitation of labor He is vehemently anti-union. Seven or eight years ago he resisted a demand for wage increases of the pengrinders' and the rubber turners unions. Then when the men had returned to work he gradually weeded out the active members and the unions were broken up. His help is chiefly Christian Americans. There are few foreigners. Some Jews are age. Compute what this means if it employed to refute any charges of big- had been distributed weekly in the otry, but none ever obtain the higher positions. Negroes can only find employment as porters, with one notable exception, the window dresser at the New York store, who receives \$35.00 a week, after more than a decade's service, a low salary for the work done and the years of faithful work.

There are about 300 employees in the New York office and 800 in the Newark factory. The offices open at the unusual hour of 8:30 A. M. and close at 5 P. M., including Saturday, except during the month of April, when the Saturday closing hour is 3 V. McKee, candidate for President of P. M., and from May first to the first the Board of Aldermen, and the Republican speaker will be Irving Kurtz, year, in view of the pending election, Saturday in September 1 P. M. This candidate for City Judge. Rev. Leon the 1 o'clock closing hour on Satur-Rosser Land will preside. There will be solos by Genevieve Kaufman. acmonth of September. Deductions for more than fifteen minutes' lateness per week are made. In the factory there is a 44-hour week, with straight time for overwork. Three quarters of an hour are permitted for lunch.

What is the compensation that these workers receive for producing the Waterman profits? The pen-grinders are the most highly skilled workers Upon them depends the reputation of the pen. Theirs is the most fatiguing work of all. Their eyes undergo a fearful strain that often causes irreparable harm. What do these creators of perfectly ideal pens receive for their skill? Forty-five dollars per week. When they tried to organize seven or eight years ago their union was smashed. The rubber turners' wages are about twenty-five dollars weekly, while most of the other workers, chiefly girls, are paid \$16. After five years of service their salaries are generally increased to \$18.00 and they may advance themselves to as much as \$20 per week.

The ordinary office worker receives from \$16 to \$20, but those with long years of service behind them and no doubt many before them may receive more, as the following example

Sex. Married. Service.
Male Yes 20 yrs. Position 20 yrs. \$33.00 16 yrs. 26.00 16 yrs. 28.00 12 yrs. 24.00 Bookkeeper 9 yrs. 22.00 H'd of repairs What induces human beings to be

satisfied with such conditions, to remain with one firm almost literally for decades, to be fully aware of the increasing prosperity of their employers and yet not rebel? In the first place they glory in the name of L. E. Waterman. There is social prestige attached to an employee of a large corporation, particularly widely known. Waterman's employees slave-driver when they see and experience one, but by a peculiar twist of the human mind the slave is compensated for his degrading status by the dignity of the master to whom he is attached.

But there is a second reason for the humility of Waterman's workers. He feeds them on the modern "welfare and loyalty bunk." Employes contribute 10c a week towards a sick beasfit fund and when they are ill receiv \$8.00 per week during the period of Then they are eligible to join illness. Then they are eighble to join two societies. One is the Ten Year Club, which offers membership to those who have passed the decade mark of service. While they continue in the employ of the L. E. Waterman Company the firm arranges a \$1,000 insurance policy for these members collectible at death. Every year the club holds a dinner to which each member contributes \$1.00. What method of reducing labor turn-over, increasing the timidity of workers, putting a premium on dying in har-The other association is the Twenty-One Year Club for those have stood the 'test of endurance for two decades and a year. As a reward they receive \$1,000 outright, enough to make any old man happy in his old form of increased wages. It would have been exactly 91%c added to a worker's pay envelope every over a period of twenty-one years. And for this men slave at \$30 and less for the best part of their lives.

Employees who are sick or convalescent are often made happy by an offer of Mr. Waterman to visit his hotel, the Fountain Inn, at Eustis, Flor-They do not pay anything, but they are expected and made to feel acutely the obligation to pick orange on Waterman's plantation. True, they may send home to friends as much of please, but workers who accept the charitable offer of their employer never go into ecstasy in appreciation of their wonderful treatment.

Some years ago Waterman's ran estaurant for their employees in their New York premises. Competition from other commercial establishments in the neighborhood made the venture unprofitable. It was not run on a cost basis, so it was abolished. In the Newark factory the restaurant still exists, affording an additional source of profit to the company.

Frank D. Waterman, is directly

responsible for the conditions we have described. He considers himself a shuge success in handling labor. He thinks himself a mode employer. No troubles from union labor! Only bamboozled work-ers! Rather discharge than increase wages. He has told young men in refusing them raises that they would never give the addi-tional pay to their mothers but would only spend it on candy. He has been annoyed to hear his help getting ready at three minutes to five to leave the office-three mi utes by actual consultation of his watch. He has acted like the mon-archs of the eighteenth century who have come to be known as

### JOB HARRIMAN, PIONEER, PASSES

SociaLists and progres D trade unionists will grieve to learn of the death in Les Angeles of Job Harriman, Afflicted with tubercular trouble, Harriman had for many years been fighting for life and new the grim reaper has gathered him In.

Job Harriman was better known to the older generation of Socialists. For a number of years he York City and rendered valuable services to the trade unions. Prior to this period he had been one of the most influential speakers in California and upon his coming to New York his services were always in demand.

Harriman was one of the first to break with the S. L. P. in 1899 when that organization began its senseless and barren attacks upon the trade unions. In 1900 he was the candidate of the Social Di eratic Party—the group that with-drew from the S. L. P.—fer Presi-dent, with Max Hayes of Cleveland for second place. Shortly after this nomination a conference was held with the Chicago Sosial Democratic Party and the two organizations united in nominating Debs and Harriman as their stand-

return to the more concenial allnate of California where he again rendered valuable services to the movement. During the famous McNamara trial reaction feared that Harriman would be elected Mayor of Los Angeles and mayor of Los Angeles and it was believed by many that this was one of the reasons why everything was done to induce the MoNamaras to confess. That confession con-tributed much to insure the tria umph of reaction is certain.

Job Harriman was a fine char-Job Harriman was a fine char-acter and devoted to the Cause that has inspired millions of the world's toilers. The movement suffers by the loss of such a man. When informed of Harriman's death Morris Hillquit said:

"To the new generation of Socialists the name of Job Harriman probably have known him in the best years of his activities the news of his death will come with a feeling of profound grief. Harriman was one of the trues; and noblest figures produced Socialist movement of the States. As a young man, full of faith and enthusiasm, he threw himself into the Socialist movement with every fibre of his intense existence and your and enthusiastic he remained to his last hour in spite of the fatal illness which undermined and finally de-

stroyed his body.

"As one of the pioneer builders of American Socialism he will always oc cupy a prominent place in the history

of our movement. "As a man of rare and magnetic eloquence and contagious optimism, as an indomitable fighter and true comrade, his lovable personality will al-ways live in the faithful memory of those who were privileged to know him well."

### Hallowe'en Dance Tonight at Rand School

A Hallowe'en dance and party will be held this Saturday at the Rand School Auditorium, 7 East 15th street, under the auspices of the Regular Saturday Night Dance Committee. The intent of the Committee is to assure all the students of the school and their friends and general sympathizers a pleasant and enjoyable time. The dancing program starts at 9 o'clock and will last till 1:30. Aside from the dancing, the Committee is arranging some feature attraction for every week.

# LABOR'S SUMMER SCHOOLS

By John W. Brown

(Secretary of the International ederation of Trade Unions) T HE first of the I. F. T. U. International Summer Schools this year was held from Aug. 1 to 15 at Brunssvig, a tiny village on the far side of a lake some distance north of Stockholm. It was held in the Brunnsvig People's College, and was attended by 55 students. There were 8 different nationalities reprenamely, Denmark, Germany,

great Britain, Holland, Ireland, Lat-via, Poland, Sweden.

Lectures were given on the trade union and labor movement in Ger-many, by Albert Falkenberg, Presi-dent of the German Civil Servants' Federation; in Great Britain, by J. W. Bowen, Secretary of the British Na-tional Union of Postal Workers and President of the Postal Workers' International and on Poland, by Zys-Pietrowski, M. P. Lectures or the history of Denmark and the Danish trade union movement were given by C. V. Bramsnass. Finance Minister of that country. Three lectures were given on Sweden; two by Sigfrid Han-son, Secretary of the Swedish Workers' Educational Association, and one by Rickard Sandler, the Prime Minister Sweden, which was very much appreciated, on Socialisation in Sweden The question of socialisation was dealt with by Dr. Croner, with par-ticular reference to Germany. A series of lectures was given by Engel-

bert Graf, Director of the Educational Department of the German Meta Workers' Union, on tendencies in modern industry and economics. America was represented by Spencer Miller, Secretary of the Workers' Ed-Bureau of America, who spoke on the labor movement in the United States and also on the question of migration. J. W. Brown, Sec-retary of the L. F. T. U. and Director of Studies at the School, gave lec tures on "The Trade Union Movement in its International Aspect," the "Innational Workers' Educational, "International Migration," and "The Far East," and on the British miners'

All the lectures were followed by very interesting discussions, which were all the more valuable inasmuch. as a considerable number of the students had had practical experience on which to base their arguments, either workers, or as leaders, in the trade union or labor organizations in their own countries.

The students were enabled to get a very good idea of life in Sweden ough the various excursions which had been arranged for them. A conducted tour was made on the first day round Stockholm and to the trade union headquarters and the co-operative buildings in particular; and visits were also made later on to labor institutions in other towns. Other excursions to the fron mines at Graen gesberg, one of the biggest in the eountry, a steel works and a paper pulp factory, were very much enjoyed.

ing that the school was an unqualified success, thanks to the labors of comrades of the Swedish National Centre, not forgetting the kind offices of Rector Hugo, our host at Brunnsvig. The Summer School at Prague was held from Aug. 17 to 30. The students numbered about 70 and came prin-cipally from Great Britain, Ireland, Germany, Denmark, and Poland, with a large group from Czechoslovakia it-

Fascists Prefer Soviet Diplomats to Socialists.
nee in a while a news item appears that carries a lesson, that points moral to adorn a tale, and that requires no comment. Such an item was an Associated Press dispatch from Milan which appeared a days ago, and any comment, no matter how brilliant, would be futile gilding of the lily. The item read:

Milan, Italy.-The Popole d'Italia, organ of Premier Mussolini, strongly stigmatizes the ignorance of the Italian Premier during his visit to Locarno by the Belgian Foreign Minister, Emile Vandervelde. The paper terms M. Vandervelde "an absolutely insignificant person," and says the Locarno episode will not be forgotten.

"It must be recognized," the newspaper concludes, "that the Russian Bolsheviki maintain in their international relations absolutely correct diplomatic demeanor, while the Social Democracy, of which Vandervelde is an exponent, shows itself to be as much a Hooligan in diplomacy as it is in the internal policy of the countries afflicted by it."

Union and Labor movement.

Lectures were given by Dr. L. Win-ter, Minister of Social Welfare Czechoslovakia; Prof. Dr. Jos. Macek. of Prague; R. Tayerle, Secretary of the National T. U. Center of Czecho slovakla; Engelbert Graf, Spencer Miller, John Turner, member of the General Council of the British Trade Union Congress, and L. J. Duffy, Executive Member of the Irish Trades Union Congress.

The curriculum fell into two parts: the special study of conditions in Czechoslovakia and the workers movements there and the consideration of the international workers movement and the world economic problems which it has to face, also the attempts which are being made face these problems through workers' education, nationally and internationally. Special lectures were also given on the British movement (as the pioneer Trade Union and labor Movement), on the Irish movement (as one of the newest and as being in its complete union political and trade union activities of the workers), and on the American movement and its historical background.

Through the good offices of the Czechoslovak Federation of Trade Unions, and in particular of its Sec-retary, Rudolf Tayerle, various excursions were organized as part of the general study of the country. In addition to visits to places of historic

Wisconsin. Not that the Socialists ex- really enjoyed Sinclair's "common-

wankee, there is not enough education Angeles, and probably elsewhere, is among the masses. This is something that we are devil-ridden by a terrible

which is, perhaps, neglected by the need of money for party work. Nev-

Milwaukee Leader in not giving out- ertheless I believe it is a mistake to the charge admission, sell literature, so-

Socialist Party itself in not being alert lieft subscriptions to the party press,

prestige every day instead of figures that the admission ought to

self. The great majority were active in the city and to the opera, longer workers in or leaders of the Trade excursions were made to Kladno, to visit a blast-furnace and steel and en gneering works, as well as a great Co operative flour mill and bakery; to Teplitz, where two glass works were visited, one making fine table-glass and artistic products and one pro-ducing window glass by the most modern mechanical methods, and again to Teplitz, to see the well-known Skoda works and the equally famou brewery.

Wherever it went, the Summer School party was greeted with the greatest enthusiasm by the workers The students received an official reception from the Lord Mayor of Pra ue in the magnificent Town Hall, and at Pilsen they were also received officially by the Socialist Mayor, Com rad Pick. The leading Socialist paper Pravo Lidu, contained each day reports of the school, with 'photographs and even gave a short daily accoun in English

In addition to the contract with Czechoslovak comrades in the school itself and in the excursions, an oppor tunity was given on the last evening at a dinner given to the students by the Czechoslovak Federation of Trad-Unions, to meet local officials in the Trade Union, Socialist and Co-operative movements.

At both these schools, personal relationships were established between active members of the workers' move ments, Sweden and Czechoslovakia and in the countries from which the students came, and also among the dition to visits to places of historic interest, to cooperative establishments represented on the list of students.

The New Leader Mail Bag.

that had paid admission, and then

bought literature, would resent an im-

mediate third drain on their pocket-

books in the form of an appeal for a collection. I think the audience

My own talk for the collection was

undoubtedly too long, and I can well

imagine that every near-communist

like Whitaker felt imposed upon by

an explanation of the need of mone

for Socialist Party organization and

resented being asked for it. One min-

ute would have been too long for some

of them. Ten minutes must have seemed a century. It is really too

bad that Whitaker did not remain a Socialist Party member. His long

training as a Baptist minister would

have enabled him to get twice as much

money in half the time. And we would

Every active party member will recognize that the real trouble at Los

and then on top of all that to try to

take up a collection. It offends many in the audience and creates the im-

pression that the party or its officials

are mercenary. The average audience

cover all the expenses, and they re-

sent the effort to get more out of

them. But the program of the Na-

and the Los Angeles management were

loyally trying to make good. The re-

sults deserve some of Whitaker's strictures, but the individual partici-

pants were not such egotistic misfits

NEW YORK.—William Rice, 33 years old, of 40 20th Street, West New York, N. J., died yesterday forencon in Roosevelt Hospital of a fracture of the skull received a short time before when he was crushed under an automobile in a garage at 509 West 50th Street.

Brownsville Hallowe'en Dance

The 23rd A. D. will hold its annual Hallowe'en dance this Sunday night, Nov. 1, at the Brownsville Labor Lyceum, 219 Lachman St. A good program of entertainers and a fine dance orchestra have been arranged. All members in Brooklyn and readers of The New Leader are cordially invited to spend a pleasant evening with the Brownsville Socialists.

# FOR THE CHILD

## A Plea for Understanding in Treating the Young \*

By MRS. C. G. PAXON

FTER reading Comrade A Hackman's letter in the "Mail Bag," as a Socialist I hope you will find space in your paper for a few observations.

As the crime wave is being discussed nation-wide, and many reasons are given for the cause, I would like to place before your readers one cause that leads to the first steps in crime and suggest certain cures.

It is a wonder children ever accom-It is a wonder children ever accomplish anything when they grow ut, considering how they hear "don't and "Mama whip" all through their babyhood. It leaves a lasting impression in their developing minds. "Treat 'em rough" puts no good in anyone. Continually calling a boy bad implants in him a belief that he really is bad. Later he decides that he might as well have the game as the name. Ben B. Lindsey, Juvenile Court Judge says "There are no bad boys; boys are made bad." So prevention of crime is what is needed. Burdette G. Lewis declares "Society Burdette G. Lewis declares "Society wipe out all crime if it wants

Parents to Blame

There is no doubt as to the parents being to blame for all juvenile offenders. Judge Shay of Camden says he wishes there was a law to punish parents for failing to bring up their children properly.

I am sorry to say the first seeds of cruelty are sown by members of my sex, who slap a babe in arms when it pinches the breast, bite its little finger when it puts it in the mouth, hurting the child to teach it not to hurt. All that is necessary is to hold the little thing's hand and say "Ah moor Mama."

and say "Ah, poor Mama."

Mothers permit their children to choke and stick their finger in the eyes of a kitten, or jerk and pull a puppy around by a rope tied around its neck. If the animals resent such treatment and scratch or bite, are kicked and broomed out of the house instead of telling the child not to hurt "poor kitty" or "poor

A boy is given a rocking-horse with a whip to best his toy. This inspires him to cruelty or indifference to suffering. A girl will spank her dollie while playing Mama. When a baby gets into mischief the mother begins whipping. As the child gets works the whippings set child gets worse the whippings get more severe. When a bey gets be-yond a mother's strength the father begins to use the hickory stick till omething serious happens

Child Suicides

Two little children, a boy and a girl, took their own lives because they were scolded and whipped by their parents. They surely did not go to that herrible extreme on account of one scolding or one beat-

ing.

Fearing a whipping because he thoughtlessly broke his sister's glasses, a boy of 9 was found two miles from home. Another boy of for a sked by the officer why he had done it, he said he was hungry and afraid to go home for he would get

a whipping. Children will lie to escape a whipping. They begin their stealing from mother. They will have extra pencils and say some boy or girl gave them these, or that they found

Two Camden boys, 10 and 11

years old, respectively, with loaded revolvers, threatened to kill a de-tective and a policeman when caught robbing a store. If these boys had been taught by their mothers the

been taught by their mothers the horror of a toy or genuine gun, that never would have happened.

One 10-year-old Camden boy admitted he had been arrested seven times. Another of 6 was a defendant in the police court. When it was suggested to Recorder Stackhouse that the boy was the youngest prisoner ever before the bar of justice in Camden, he replied, "He's been here before."

One offense follows another till

One offense follows another till children get into the hands of the law. All could have been prev had their mothers realized could have been done.

**Environment and Crime** 

Environment and Crime
Facts like these and many, many
more were used by the suffragists
as a logical reason why women
should vote, hoping this power could
obtain better laws for the protection
of the young and get more playgrounds where they would have
good, moral teachings and learn the
golden rule. Dr. L. Vernon Briggs,
internationally known psychiatrist,
says, to his mind, "Environment is o
the whole cause of crime."

I have reared three step-children,
one a lawyer, and three of my own.
Their work and conduct in school
were among the best. The few times

were among the best. The few times I tried corporal punishment I found it developed combativeness.

it developed combativeness.

In caring for several grandchildren that were called "little devils"
by their parents, I transformed
them into affectionate, trustworthy,
obedient "little darlings." Confinement, love, and gentle persuasion
taught them the better way...

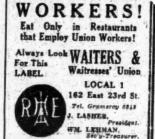

When a mother will reprove her
box because he did not lie which

when a mother will reprove her boy because he did not lie, which is worse than stealing, what can be expected of her ward placed under such an influence? In these days of the woman bandit and jazz mothers, our little girls need the guidance of a noble mother as well as our boys. Dr. Frank Crane says, "Where is there a craft more needed than mother craft?"

So, then, let us have an abundance of playgrounds, with coopera-tion of the press to help eliminate some of our evils!

Our prison authorities are not allowed to beat hardened criminals. our army and navy regulations strictly prohibits the infliction of physical punishment. Then, what justification can there be for the beating of helpless, little children?

tried to, from leaving unchallenged the article in The New Leader of September 12 in the News of the Week sec-tion entitled "The Passing of Viviani." The implication is made there that only those or such party members ever drift back into the capitalist camps who at any time anywhere committed the sin of rebelling against an already existing, bona fide, Socialist Party. True, the writer did not state this nevertheless, just as effectively. upon the foundation of this false sertion, he erects the structure of the whole diatribe.

Such writing may be-as the one in question meant it to be-handy material for petty factional squabbling, but it certainly does not represent the truth. I wonder how the writer could qualify his statements if called upon te do so?\_

Of course, it would be desirable to have, from some one well qualified, nds.

A psychological and social explanation of the type well known to all, only parily familiar with Social and abroad.

Labor movements, here and abroad. given opportunity they flop r over, boots, bundles and all, into ranks of the enemy and in turn be come a good asset over there. ness the royal Socialist or semi-So cialist governments of Europe. Where is the distinction? They overlap so nicely with bourgeois confreres of any shade, that one could find no difference with a high powered magnifying glass. What a sorry lot. Or our own glorious war patriots, formerly high lights in the Socialist Party.

These remarks are not meant for any controversial or personal purpose.

or even high priests, until at som

I simply wish to see more fair play practiced, even among fighting adversaries. OSCAR JACOBS,

Bridgeport, Conn.

Our correspondent apparently misunderstood the item he criticises. Our criticism was directed not against those who leave a Socialist organiza tion but those who leave it because they have come to oppose political action. One may leave a Socialist Party for other reasons and still believe in political action. Viviani did all the harm he could and then turned Syn-dicalist. From this extreme left he jumped over into the camp of bourgeols politics. Viviani has been held up by Syndicalists and Communists as an example of what Socialist politics will do. William Z. Foster in his "Syndicalism," published in 1912, charged Viviani to us, ignoring the fact that Viviani was a Syndicalist when he turned to bourgeois politics. All this does not imply that Socialists who remain with the party may not be critized for some other reason. All that we did was to deal with a particular type and we believe that what was said holds good in the United States as well as in Europe.—Editor. ...

### Our Own G. A. R.'s

### Nobody Loves Us-Except the Politicians

UT in a little Mid-West town where we were once condemned to spend a year, two gnarled and withered veterans of the Civil War were wont to sun their ancient limbs on the spittle-stained courthouse steps. And they would put their old heads together And they would put their old heads together and mumble through toothless gums about Shiloh and Antietam and Lookout Mountain and the days of their glorious youth when they were wearers of the blue and "fit the rebels to a standstill." The burden of their refrain was "battles long ago."

It is easy to excuse old age for garrulous reminisence. If we were members of the Grand Army of the Republic we would doubt-less do the same. But for any man under fifty to dwell continuously in the past is unhealthy, to say the least.

Now all this leads to the fact that of late we have run into a large number of comrades who seem to have formed a sort of G. A. R. branch of the Socialist Party, although few of them are over fifty.

We wonder if you have any in your community, those comrades, we mean, who sit around and sigh for the good old days of 1917 when they rolled up a majority of five thou-sand (count them) votes for Comrade Whozis and when Comrade Whats Hisname swept the Eighth District, with bands, with parades, with banners, with banquets.

During the New York campaign we have hardly gone to a street meeting no matter what size, without having one of these G. A. R's hurry over to us and say:

"You don't call this a meeting, do you? . Why, comrade, in 1917 that street was so packed that traffic was stopped both ways and the police went crazy. You should have been

Well, we happened to have been around in 1917 and we have managed to survive the sturm and drang of those days. In fact, we are in such good shape that we are willing to sit up and take a few more shots of that success dope. Even a victory katzenjammer doesn't last us eight years.

Here and now we serve solemn notice that although we are of the most peaceful disposition, and wouldn't harm a fly, unless it happened to be a fly cop, we will assault with intent to maim the next comrade who comes up to us and says, "Oh, but you should see what we did here in 1917."

The thing to do with these G. A. R.'s, girls and boys, is to take them out to the nearest burial ground, dig a grave for them and fire off a military salute of eighteen guns over their

As Wendell Phillips once advised his Harvard colleagues, "Sit not like the figure on our coins, forever looking backward." Forget how good you were. Jim Jeffries was once the world's heavyweight champion, and where is Jim now? Remember the time when Fatty Arbuckle was the world's leading comedian?

While conditions have changed to be sure since the embattled days of 1917, there's plenty to be done right now in 1925, and it will never be done at all if we all sit around and sigh for past glories.

So that's that, and we will now tell you about what happened to our campaign banner with our name on it in big letters that we spent so much time and jack getting strung up across the street. Do you remember the day of the big wind, with the rain, with the tornadoes? Well, two days before that, having started in to argue with the banner people about a month previous, we had just got the banner up. Right down the street was a Republican banner and a Democratic banner telling how much the Republican and Democratic candidates love the dear

workingman. Along came the wind and the rain and beat upon the banners. Blam! A great soggy mass of our banner comes of a sudden down, kerplump, upon the astonished heads of two passersby who had just made up their minds to vote for us, no matter if they had to go to jail

After they had emerged with furious struggles from the banner's soggy folds they turned and ran at full speed straight for Republican headquarters to sign up as campaign workers for our G. O. P. opponent. And all the while the Republican and Democratic banners were floating securely in the gale. Which confirms our belief that God is good

to fools, drunken men and members of the

Republican Party.

Even if God doesn't love us any more, we seem to have made a lot of friends this week. Friends among the professional politicians in our district. Somehow we have managed to keep the fact that we are a rival candidate a secret from these glad-handers and as a result we are smothered with kindness. They come up and ask us about the kiddies. We presume they mean kitties, for the only evidences of child life in our family to date have been contributed by Isabel, our black cat. Anyhow, when we tell them that things are jake in the nursery they seem quite cheered up about it and offer us a cigar and tell us that we are a credit to the Old Man and the Republican Party and why don't we come around to headquarters once in a while and meet the boys and have a quiet little game of friendly pool?

But every now and then just a teeny-weeny hint of suspicion comes over us. All our conservative friends are constantly saying. "The trouble with you Socialists is that you are always suspicious of the motives of the capitalists, always criticizing, never building up And we struggle as hard as we can against being critical of anyone and shout with Browning, "God's in His Heaven, he's all right with the world." But try as we will, the fact that it's only one week a year that we ever lay eyes on these old-party pals of ours and that is the week before the first Tuesday after the first Monday in November, keeps us tossing on our pillow fighting off the horrid specter of doubt that hovers over us. horrid specter of doubt that hovers

McAlister Coleman.

## -:- The Communist Manifesto -:-THE HISTORY OF SOCIALIST THOUGHT

By HARRY W. LAIDLER, Ph. D.

ODERN industry has converted the small shop into the great factory. The workers are crowded together, enslaved by the capitalists and by the machines alike. With the development of machinery, women's labor gradually supersedes men's labor As seen as the worker receives his wages in cash, he is set upon by other members of the bourgeoisie-the land-

## Disappearance of Middle Class

The lower strata of the middle class—the small tradesmen, the shopkeepers, the handicraftsmen, the peas ants, etc.—all sink gradually into the proletariat, partly because they cannot compete with their small capital against the large capitalists, and partly because their specialized skill is rendered worthless by new methods of production. "Thus the proletariat is recruited from all classes of the popu-

### Of Workers

The working class goes through various stages of development. From its birth it carries on a struggle with the capitalist class. At first that struggle is conducted by the individual worker, then by the work people in the fac-tory, then by the operatives in one trade, in one locality. The contest is at first waged against the machiner; as such, and much is destroyed. The are enlisted by the bourgeoisie in the beginning of their career in a fight against absolute monarchy. Machinery tends to obliterate distinctions of labo and nearly everywhere reduces wages to the same low level. Their livelihood becomes even more precarious. Col-lisions between them and the capitalists assume even more the character of collisions between two classes. Thereupon the workers begin to form combinations (trade unions) against the bourgeois; they club together in order to keep up the rate of wages they form permanent associations in order to make provision beforehand for these occasional revolts. Here and there the contest breaks out in riots.

The workers have occasional vic tories. Their unions become more ex pansive. Their growth is aided by the increased means of communication The struggle becomes a national one It also becomes political in its nature

### Labor Parties

Emerge proletarians form a political party. The party is continually upset as a result of competition between themselves. "But it ever rises up again, stronger, firmer, mightier. It compels legislative recognition of particular interests of the workers by taking advantage of the divisions among the bourgeoisle itself. The capitalists, involved in contests with other capitalists of their own and other countries, are often compelled to appeal to the workers for help. In so doing the ruling class "supplies the proletariat with its own elements of political and general education; in other words, it furnishes the proletariat with weapons for fighting the bourgeoisie.'

### Proletarization of Other Classes

Further, entire sections of the ruling classes are precipitated into the working class or are at least threatened in their conditions of existence. "These also supply the proletariat with fresh elements of enlightenment and prog-

struggle nears the decisive hour, the ocess of dissolution going on within the ruling class-in fact, within the whole range of an old society-as-sumes such a violent, glaring character that a small section of the ruling class cuts itself adrift and joins th revolutionary class, the class that holds the future in its hands. Just as, therefore, at an earlier period; a sec ion of the nobility wen bourgeoisie, so now a portion of the bourgeoisie goes over to the proletariat, and, in particular, a portion of the bourgeois ideologists, who have raised themselves to the level of comprehending theoretically the historical

### Labor the Only

Revolutionary Class
Of all the classes that face the capitalists, the proletariat alone is the really revolutionary class. Other classes— the small manufacturer, the peasant, etc.—finally disappear, fighting the while against the bourgeoisie to save themselves from extinction. They are reactionary, as they try to roll back the wheel of history. If revolutionary, they are so on account of their impending transfer to the proletariat. They defend not their present but their future interests. "The social scum. that passively rotting mass thrown off by the lowest layers of old society, may, here and there, be swent into the movement by a proletarian revolution; its conditions of life, however, prepare it far mere for the part of, a bribed

### Movement of Immente Majority

The proletarian is without property. stripped him of every trace of national character. 'Law, morality, religion, are to him so many bourgeois prejudices, behind which lurk in ambush just as many bourgeois interests." When other classes got the upper hand, they sought to subject society to their domination. The workers, however, 'cannot become masters of the productive forces of society, except by abolishing their own previous mode of appropriation. They have nothing of their own to secure and fortify. . . . All previous historical movements were movements of minorities, or in the interest of minorities. The proletarian movement is a self-conscious, indepen

dent movement of the immense majority. The proletariat, the lowest stratum of our present society, cannot stir, can-not raise itself up without the whole superincumbent strata of official soci-

ety being sprung into the air." The struggle of the worker is at first a national struggle. "The proletariat of each country must, of course, first of all settle matters with its own bourgeolsie." It later becomes international. more or less veiled civil war, raging within existing society up to the point where that war breaks out into open revolution, and where the violent over-throw of the bourgeoisie lays the foundation for the sway of the proletariat."

### Increasing Misery Of Labor

The condition of oppressed and oppressor cannot continue unless the oppressor assures to the oppressed cer tain conditions under which it can assure the continuance of its slavish existence. The serf, under serfdom, raised himself to membership in the commune. The petty bourgeoisie under feudalism managed to develop into the bourgeois. ,

"The modern laborer, on the contrary, instead of rising with the progress of industry; sinks deeper and deeper below the conditions of his own class. He becomes a pauper, and pauperism develops more rapidly than population and wealth. And here it beomes evident that the bourgeoisie is unfit any longer to be the ruling class clety, and to impose its conditions of existence upon society as an overriding law. It is unfit to rule, because it is incompetent to assure an existence to its slave within his slavery, because it cannot help letting him sink such a state that it has to feed him,

### Capitalists Produce Their Own Gravediggers

The essential condition of the exist-ence of the capitalist class is the formation and increase of capital. The condition for capital is wage labor. Wage labor cannot exist without competition between laborers. The development of modern capital brings labor cutting "from under its feet the very foundation on which the bourgeoisie produces and appropriates products. What the bourgeoisie therefore produces, above all, are its own gravediggers. Its fall and the victory of the proletariat are equally inevitable."

### Relation of Communists To Working Class

After thus prophesying the downfall of capitalism and the supremacy of the producing class, Marx and Engels turn a section devoted to the relation of the workers to the communists or socialists. The authors insist that the communists or socialists are part of the working class, and decry any idea of isolation.

"The Communists do not form a separate party opposed to other workingclass parties.

"They have no interest separate and apart from those of the proletariat as

"They do not set up any sectarian principles of their own, by which to shape and mold the proletarian move-

"The Communists are distinguished from other working class parties by this only: 1—In the national struggle of the proletarians of the different countries, they point out and bring to the front the common interests of th entire proletariat, independently of all nationality. 2—In the various stages of development which the struggle of the working class against the bour-geoisie has to pass through, they always and everywhere represent the in terests of the movement as a whole They are the most advanced and reso lute section of the working classes of every country, that section which pushes forward all others; on the other hand, theoretically, they have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions and the ultimate general results of the prole

tarian movement. "The immediate aim of the con munists is the same as that of all the other proletarian parties: formation of the proletariat into a class, overthrow of the bourgeois supremacy, of the power by the proletariat."

The conclusions of the communist a universal reformer, but spring from an historical movement going on under our very eyes.

### Answers Charges Against Communists

The remainder of the section take up one by one the charges burled at the communists. Communism does not intend to deprive any man of the power to appropriate the products of society, but merely "of the power to subjugate the labor of others by mean of such appropriations." The capitalist bemoans the loss of culture resulting from a producer's regime, but cap-italist culture for the enormous majority "is a mere training to act as a machine." The communists are ac-The communists are ac cused of desiring community of women but their whole point is merely the abolition of "the status of women as mere instruments of production." "For the rest, it is self-evident that the abolition of the present system of production must bring with it the abolition of the community of women springing from that system, i. e., of prostitution, both public and private.

### National Antagonisms Between Peoples Vanishing

Communists are reproached for de siring to abolish countries and nationalities. "The workingmen have no country. We cannot take from them what they do not possess. Since the proletariat must first of all acquire po litical supremacy, must rise to be the leading class in the nation, it is, so bourgeois sense of the word. National differences and antagonisms be tween peoples are daily more and more vanishing, owing to the development of the bourgeoisie, to freedom of commerce, to the world market, to uniformity in the mode of production and in the conditions of life corre-sponding thereto. The supremacy of the proletariat will cause them to van ish still faster. . . . In proportion as the exploitation of one individual by another is put an end to, the exalso be put an end to. In proportion as the antagonism between classes within the nation vanishes, the hostility of one nation to another will com to an end."

### French Bank Strike Ends in Compromise

The strike of many thousand French bank clerks, which lasted fifty days and seriously handicapped the floating of the Caillaux "fixed value" loan, due to the banks' refusal to allow the strikers to do Government work while not handling regular business, has ended in a compromise under which the workers get much less than their work was resumed on the basis of the Protocol of Aug 31, the chief points of which are the reinstatement of all PINKERTONS SEEK TO clerks, the fixing of a minimum wage for all categories over 23 years when the usual increase in salaries is made at the end of the year, the payment of heating bonus for the winter months of this year, and conferences with clerks' delegations on all questions touching the staff. These delegations are to be composed of members of the trade union who are in the employ of the respective banks. In a manifesto published by the national strike headquarters, it is affirmed that the conflict onstrating the solidarity of the work-

### Belgian Metal Workers Spoil Bosses' Scheme

The six-weeks strike of the 60,000 Delgian metal workers has ended in obstinately on their wage cut of 5 per situation.

cent, have given way. Work was resumed on the former terms, with 2½ per cent wage cut for the first six days only. This victory of the metal workers has wrecked the scheme of the employers to force through a gradual reduction of wages in all industries As was pointed out by the president of the National Committee of the metal workers at the close of the final meeting, the victory of the Belgian metal workers will have international riginal demands. In the large banks of the foundries is still going on.

BALK BANK CLERK UNION CHICAGO.—Every bank in Chicago is being offered the aid of the Pinker ton private detective agency to prevent the spread of the Bank Clerk's union, which now has members in 10 Chicago banks and has at least one institution organized 100 percent. Eager profitably to serve the bankers, out of whom they had scared stiff fees in the brave days of the red menace following the war, the private detective boys are now trying to pick up more husiness by brandishing the dangers of trade unionism before the financiers.

The Pinkerton game consisted of sending to the bankers memorandum on the Illinois State Federation of Labor convention resolution in favor of unionizing bank clerks. With the metal workers has ended in The employers, who insisted erate with the banks in meeting the

### Loose Screws and Nuts

TF SOME fellow used a life saving belt as a parachute, you wouldn't blame it on the belt if he broke his neck; would you? And if another guy lathered his face with the razor and shaved himself with the strop, that wouldn't be anything against rasors and strops, would it? You'd simply set these fellows down as being cracked in the beanery and let it go at that. But do you know that you and I and the rest of us are doing crazier things than these other nuts and think nothing about it? In fact, thinking nothing about things is our specialty. Else, how come that we use labor-saving devices to make us work more? Do you get me? No?

Well, I didn't imagine for a second that the bald statement of an obvious fact would go home first crack, so let me explain the obvious.

Gilbert and Pogue, two scientists who were hired by the Smithsonian Institute to tabulate the visible rupply of loose screws in this enlightened damocracy, claim that every man, woman and child has thirty slaves working for them, which means one hundred and fifty slaves per family, (Loud and prolonged guffaws).
Well, wait, can't you? The slaves these gentlemes

are talking about are not like the black slaves your grandad didn't own "befo the wa." They are steam, electricity, water power and machinery. In short, they are the labor-saving devices which litter up every nook and corner of this great nation.

Now the purpose of labor-saving devices, as everybody should know—and nobody does—is to save la-bor. But do they? Friends and fellow immates, they do nothing of the kind. At no time in the history of our fool race have men worked harder than they do now. Everybody is bustling, hustling and go-getting at top speed with the exception of the idle rich, and ing time. But not only do our boasted labor-saving devices force us to work harder than ever before They even make us work harder than the dum brutes who haven't got a single tool outside those life, liberty and happiness.

Take the robin for an illustration. What labor-saving device has he besides a keen ear, a pair of sharp eyes and a long bill? He hops around your lawn-on which he don't pay rent or tax. He cocks his hes don't pay rent or tax. He cocks his head to one side listening to a fool worm who tries to get into high society. A quick peck and the climber wriggles in the bread basket of Mr. Robin. The meal is over and neither check to pay nor dishes to wash. Call him a dumb brute if you will, but please remember that without a single labor-saving device this bird makes a good living, raises and educated five or six young ones every year, goes south for the winter and north for the summer. He is his own boss, does as he pleases. Every day is pay day and play day. In short, he's "free as a bird" and "happy as a lark"-which is also a bird.

Now, how about you birds? Suppose you live in Chicago or any other of our pro-hysteric cliff dwell-eries. You are surrounded by all the labor-saving devices that were invented since Cain made a stone ax to brain his brother Abel. In short, you are one of those one hundred and ten million free-born slave owners who has thirty slaves tolling for him. So you are jerked out of the arms of Morpheus by a six-bit alarm clock (labor-saving device) at five a. m. in the morning. You poke a quarter into the gas meter (labor-saving device), grab a doughnut (dough-saving device), chase for the street car (walk-saving device), hang on a strap (space-saving device), punch a time clock (straw hoss-saving device), and for the balance of the day you perform the endless series of twists, jerks, spasms and Saint Vitus varia-tions demanded by this particular mechine you serve (heavy on the serve).

Labor-saving devices—tell it to Sweeney. All that we machine piggly wigglys ever got out of them is more work, worry and weariness.

In order to fully understand the slave driving proclivities of labor-saving devices, I must make a brief excursion into the realm of economics. Put on your thinking caps, Deep stuff is coming.

To start with, what is the purpose of Industry?
"To supply human wants."

The purpose of industry is to make profit, invest the profits in labor-saving devices for the acquisition o' more profits and so on. Now the usual way of making profit, is to produce

the greatest possible quantity of goods at the lowest possible cost and sell it at the highest possible price to somebody not yet revealed. And in order to make goods cheap and in ungodly quantities, we must have labor-saving devices, for the party who makes the most for the least, grabs the plums. Thus there starts a race for labor-saving devices somewhat of the same nature as the race for killing devices by which one nation tries to out-kill the other. time a new gun—I mean labor-saving device, is in-vented, whole batteries or generations of similar devices are thrown on the junk heap and new ones are

For instance, let's say that I, having a generous manufacturing business. I have machines that turn out 2,000 screws per minute. By and by I discover that my competitor in the screw line has machines that produce 3,000 screws per minutes. So I scrap my machines and get new ones that turn out 4,000 per minute. No sooner said and done, when my competitor buys machines that turn out 5,000 per

In the meantime, the market is clogged with screws. So I turn loose a swarm of salesmen to sell my screws. So does my competitor to sell his screws. screws. He follows suit. I go him one better.

By and by it costs more to sell screws than to make screws. What the race for improved labor-saying devices is not eating up is devoured by selling and advertising campaigns. In the end, the waste and fury of competition increases the price of screws so and man power are thrown in idleness and there are too many screws, screw-makers and screw factories just as there is too much coal, too many miners and too many mines.

Thus the slave has become the master. The thirty servitors that you, I and the rest of the nuts are supposed to have working for us, lash us from work-house to heartbreakhouse and bughouse. While our industrial plants are overflowing with labor-saving devices, our asylums are overflowing with nuts, and or penal institutions with criminals, which means & different sort of nuts.

Everybody is hell-bent on doing something or so one. Everybody is striving, slaving, scheming to beat everybody else. Drive yourself. Drive others. Get ahead. Find work. If you can't find it, make work. Work for the night is coming. Work and save. Save and work. Brag that you work day and night. Brag that you haven't had a day off in years. Brag that you started work at the age of nine and that you are still at it at the age of seventy.

Never mind peace and tranquility. Forget beauty, song and play. Forget flowers, birds, and murmuring brooks. Forget May days, love and youth. Forget life itself. Hark! the machine is calling for the merry race. Turn your hearts into force pumps. Convert (Continued on page 1;

# :- A MODERN DON QUIXOTE

By HENRY HARRISON

E VERY now and then there appears on the surface of the earth another Don Quixote who is eager to combat the windmills of adventure. In such a day as this it is indeed astonishing that a Don Quixote comes to life. Such a man of fortune was Sergeant Sam Dreben, the Fighting Jew, who died the other day in Hollywood.

renture in an editor's office, nor could he have encountered it in a factory. He doubtless could have toiled in a fur shop for years without ever having felt that he and adventure had been the closest of friends. Drober's spirit wanted friends. Dreben's spirit wanted change. It longed for battle, the kind of battle that is marked with excitement. And Sam Dreben would not have found anything to become excited about in the ordinary run of life. So the Russian youth became a soldier not only in the regular sense of the word, but a soldier in the spirit of adventure.

Let's see, what was I about to say?

oh, yes, we older Socialists

must not neglect the young. Newer and younger blood must constantly pour

into our ranks to keep us ever youth-

ful. Youth is a joyous adventure, its

energy limitless; its enthusiasm for

by any instrument yet invented. No

movement on earth can live or progress without youth. Its dynamic energies

must be guided along constructive channels . . . excuse me again, please . . . Aw, don't stand on those chairs, Get off them, quickly, do you

hear? Look at the pile of lumber in the

rear of the room. That used to be chairs! You've busted enough already.

You kids will have to behave if you

As I was saying—youth is indispensable to any movement that expects to move. The worldwide Socialist and

Laber movement recognizes this fact.

# The Adventures of One Adventures of One Who Sought Excitement The desired Mexican bandit, Mr. Villa. Do not think for one moment that Mr. Dreben entered Mr. Villa's army because he was in sympathy with the Mexican outlaw. Far from

Sam Dreben was born in Russia. To be sure, that much discussed country is precisely the place where excitement and adventure ought to run hand in hand. At any rate, it was either too adventurous a country for Sam Dreben, or it was not quite adventurement and precise adventure of the sure of th quite adventuresome enough, for at the significant age of 20 Dreben came to town. The Russian youth had left his native land for these

-:- Sparks and Flashes

For Adventure

Probably the very first question that entered Sam's head as he landed in the city was this: "Now, how am I going to get adventure?" So Sam looked about him. And what did he find? He found that the United States army was in need of soldiers. Sam Dreben signed his name, and joined the army. Here, he must have thought to himself, is a chance for me to participate in a

life of excitement, a life of ro-mance, a life of life. And so the redoubtable Sam Dreben became a member of the American army, and later made his bow in the Philip-pines, where he saw regular service.

Perhaps the Philippines were much too calm for Sam Dreben. At all events, he went to China with his regiment, and participated in the defense of Pekin. In the meandefense of ream. In the mean-time, those adjectives "picturesque, romantic, dauntless" were lending themselves to the person of Sam Dreben. And Sam was having the time of his life.

Again the call of adventure charmed the blood of this young Russian-American. Dreben joined the model of a Richard Harding Davis character, General Lee Christmas, then in Honduras. Variety was the spice of Dreben's life, for he took a role in the Madero revolt against Diaz in Mexico, and

Campaign bears eloquent testimeny to that fact. What we can do in

the near future when we will be thousands again is the hope and

dream that keeps us giving. Our

standard bearers, Comrades Thomas, Beardsley and Solomon, did

form presented with better genius

with these three musketeers at the

head of our ranks. Thanks to these comrades, especially Norman

Thomas, we commanded the atten-

tion and respect due to a genuine

opposition party—A real menacing, battling Third Party.

"I would rather win with Thoma: nd 'walk in' with Thomas, even though

thought that those who think and those

who toil will some day win—the world."

ANNA RAPPORT.

We know just enough psycho-analy-

sis to understand the subconscious operations of the minds of both the

later joined the forces of that cele-

it. Mr. Dreben, as I have already pointed out, was a free-lance soldier of fortune. Excitement was the thing for which he searched, and if Mr. Dreben could find adventure in a bandit army, why, then, Mr. Dreben saw to it that he became a disciple of the aforementioned

Some time later, General Per-Some time later, General Pershing (of whom you may of heard) led a punitive expedition against Villa. Do you think that Mr. Dreben continued to engage himself to Mr. Villa? If you do, you had better change your mind, whether you are a woman or not. For Mr. Dreben, soldier of fortune that he might he was an American, and he might be, was an American, and he bade au revoir to Mr. Villa, joining General Pershing in his battle against the Mexican bandit

In all likelihood, there was not a single war in which Sam Dreben did not participate, excluding, of course, those engagements that came before his time. Wherever there was adventure, there you were positive to find Sam Dreben. He should have been a padlock inspec-tor. At any rate, this eager spirit considered it an excellent idea to enter the World War. Mr. Dreben was only a little over 40 years of age at the time, so you see that he was still an adventurous boy. He personified youth.

So, you want to know something about the Ypsels, eh? Well, I am happy to inform you. The Ypsels, bless them, are the Young People's Socialist League. Ranging between 14 and 25 years of age, these young rebels are banded together in junior and senior circles or branches. They A Successful Day's Work

are composed of high school boys and girls and young shop, store or office employees, many of whom go to evening schools. Some of them are ardent little Socialists while others are merely the friends As a matter of course, Sergeant Sam Dreben had to make his name of Socialists and sympathizers. These youngsters generally meet in our Socialist Party club rooms, usually rent free, and they bring the life, laughter and boundless enthusiasm of youth into our midst. They ... pardon me a moment ... Say, will you young devils please cut out that racket in there. Suffering cats! I can hardly hear my own voice. Stop that running around the room and that yelling! a little firmer in the minds of adventure-lovers. One of his greatest exploits, one that won for him the Distinguished Service Cross, occurred in October, 1918. This Fighting Jew was authorized to act at the head of a small detachment of volunteers (note: volunteers; and Sam Dreben at their head!) who were to dislodge a German blocking force. To make a story as short as possible, Mr. Dreben emerged from the fray with four machine guns, two prisoners, and all of his men (not one wounded), leaving behind no less than fifty-

> ben must have smiled on that day. To be sure, Sergeant Dreben not To be sure, Sergeant Dreben not only received the Distinguished Service Cross, he had to get the Medaille Militaire, the Croix de Guerre with Palms, and an Italian decoration. As a matter of fact, General Pershing "honored him by inviting him to American headquarters in Paris as his guest, and on one occasion, referred to him as on one occasion referred to him as 'the finest soldier and one of the bravest men I ever knew.'"

eight departed Germans. Mr. Dre-

When the World War terminated, When the World War terminated, Mr. Dreben became lonesome for adventure. So what did he do to appease his longing? He merely figured in the attempted kidnapping of Felipe, "Little Phil" Alguin, a notorious Los Angeles murderer, who was hiding himself in Mexico

paper to appreciate what's going on when both of these gentlemen changed our phrase "the cost of living" into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the man, and Sergeant Sam Dreben between the cost of living into the livin "cost of loving." They had us saying, in last week's issue, "A reduction in the cost of loving need not be followed by a reduction in wages." You are right, gentlemen. That is not what we said; nevertheless, you are right. And here is wishing the best of luck to however. It was revealed that he According to the coroner's inquest, however, it was revealed that he had died by accident, his nurse hav-ing erroneously treated him with

medicine. And so there passed a glorious figure. HIS is the last of these campaign talks

I have enjoyed them and I hope you have. But I shan't mind a rest and

We must not rest too long. With us a municipal campaign is a mere episode in the

long conflict in which we have enlisted. We

have talked together about various issues—of housing, schools, transit, marketing, coal, etc. They are enormously important, but the

fundamental issue for us is the building of a

strong party of the workers with hand and

valuable and effective all service by the city to

the old parties cannot and will not give us schools which will educate fit citizens of a co-

operative commonwealth. I believe in city

housing, city operation of transit, and the ex-

tension of city service in the marketing of

many products from coal to milk. But if

Tammany Hall carries on this work, it will not

be free from graft, bureaucracy and political

pressure. Ambassador Gerard told a wealthy audience at the Harvard Club the truth when

he said that Tammany Hall was the principal factor in keeping New York from going Socialist. Tammany Hall has many tricks. One

of them is to steal our issues as they become

popular. That happened with home rule, with the rent laws, with municipal operation of sub-

ways, and it may happen with housing. But then the politicians spoil them. I am proud

that I taught Jimmy Walker to say the word "housing." For many weeks during this campaign he could not pronounce it. Now he can

say the word. But he puts us off with the

promise of a commission. This is one way in

LOOSE SCREWS AND NUTS

Candidate for Mayor of N. Y. City

which Tammany fools the people. Should

public pressure compel the commission to

recommend municipal housing, you can trust Tammany to see to it that graft and favoritism

in whole or in part will defeat the ends we

sumers must have their own party. It is our great task, not for a few weeks but through-

There are two more jobs in this campaign that you must help us do. The first is to go

like the cold wave without coal which they

got. Some of them won with Smith. Ask them what Smith did, or the city Democrats,

to bring the coal wholesalers and retailers to time. Will they do any better when they "win with Walker"?

Keep up the missionary work till Election

day and then help us by supplying watchers. You know what Tammany and its little Republican brother do to our vote. Ask Claes-

sens or Cassidy. Or ask Mayor Hylan. According to him, in one district at the primaries

he got 137 votes. He was first credited with

one vote which by the large hearted generosity of a district leader was raised to 137! The

only way to prevent this sort of thing is to

have our own watchers on the job. My last word until after the election is, "Give us

gold and silver. Our hills give forth coal and iron.

Our fields yield wheat and corn. Our prairies spout

oil and gas. Yea, and even our statesmen spout hot air. The hams are ripening on the pig and the eggs

in the hen. But alas! thou hast also given us labor-

saving devices, wherefore the mocking birds are mocking us and the mud turtles call us mutts for

these labor-saving devices make us toll like galley slaves and we have no more peace and rest than a

flea-bitten dog with seven pups and a tom cat for a neighbor. Therefore, we beseech thee to take these

labor-saving devices from us, or tell us what goed

there is in them, so that we may be as happy and carefree as the beasts of the fields, the birds of the

air and the fish of the deep, who have no labor-sav-ing devices to make them work like fools.—Amen."

on carrying the message to your friends. mind some of them how they voted to "keep cool with Coolidge," and ask them how they

out the year, to work for that party.

The workers both as producers and con-

retire to the voting booth, open the ballot and make an X in the voting space in front of the names of the candidates. If all voting booths are ccupied, wait until one is vacant, but do not leave the enclosure. If a voter leaves the enclosure without having voted, he cannot enter again, and therefore loses his vote.

If a voter makes a mistake in marking the ballot, do not erase or deface the ballot. A ballot on which there is make an X in the voting square nex an erasure will not be counted. If the emblem of the Socialist Party.

in the polling place. The voter must it to the inspector and ask for a new retire to the voting booth, open the

In such a case, see that the spoiled ballot is placed in the box marked "Spoiled and Mutilated Ballots." Every voter is untitled to three sets

'The ballot in New York State is simple. Each candidate has the emblem of the party in front of the name and Do not make any other marks on the ballot except the X in the voting in the voting space next to the party emblem, which is the arm and torch. All the voter has to do is to follow the ballot down section by section and make an X in the voting square next to

instructed above, refold it in the same way as when you received it from the inspector, leave the voting booth and hand the ballot to the inspector at the eral Ballots," and the smaller ballot in the box marked "Questions Submitted" and the stub in the box for stube.

See that the inspector in tearing off the stub does not open or tear the ballot. It is a misdemeanor for anyone to tear, deface or open a ballot, and an inspector who does it is liable to arrest Instructions

For Voters

Where voting machines are used—In New York City, voting machines will be used in only one Assembly District the Fifteenth Assembly District of New York.

On entering the polling place voters will give names and addresses, etc., the same as where paper ballots are used, When the voter is qualified, he or she enters one of the voting machin

enclosures. On top to the left is a handle. Swing this handle to the right. This closes the curtain around the machine so that no one can see how the voter votes and it unlocks the machine, ready for

The voter will find on the machine several rows of small levers running across the face of the machine.

The top row of levers are for the Constitutional Amendments. The second row is for the Democratic Party, the third row is for the Republican Party and the fourth row is for the

Socialist Party.
You will find the emblem of the Socialist Party, the Arm and Torch, and the names of the candidates running across the machine from left to right. Above the emblem is a little lever. Move all these levers down (they move very easily). Move every lever in the row as far as there are emblems and

names below the level. When the voter has moved all the little levers down, swing the big lever on top of the enclosure from right to left. This registers the vote and opens the curtain, and the voter is through.

There is a small fac-simile of the face of the machine on the table in every voting place, and a voter may use this keyboard to practice how to operate the machine.

The machine operates very easily. A child can work it. It works quicker than the paper ballots, and, what is more, the votes are all counted and there are no chances for some dishonest Election Inspectors to miscount the vote. Every voter is sure that his or her vote is counted as cast.

No one can see the counters. They are locked in the back of the machine and no one knows how the voter voted, as all the voting levers spring back in place when the big lever is swung to the left and the curtain opens.

No one is permitted to enter the voting booth with a voter to assist in the preparation of the ballot excepwhen on registering the voter asked for assistance because of inability to mark the ballot, such as blindness of lack of arms. In such cases the vote has a right to either select two inspectors of opposite political opinions or the voter may select his father mother, brother, sister or child to assist in the preparation of the ballot.

If the voter is challenged either be fore he gets his ballot or before the ballot is deposited in the ballot box, do not leave the line, insist on voting (If you are legally entitled to a vote). The inspector will administer the

oath, but under no condition permit the inspector or anyone else to intimidate you and stop you from voting. This will end your duty as a citizen

and you will have done your duty as a voter, but does not end your duty as a Socialist. Socialist voters should report to the

headquarters of the Socialist Party and help by acting as watchers or in some other way. Any voter who needs any help o

advice should call up or report to the following headquarters: New York (Manhattan) County and City Campaign Committee, 7 East Fif-

teenth street. Telephone Stuyvesan First and Second A. D., 204 Ees Broadway. Telephone Orchard 6267.

## - DRAMA

# The Berlin People's Theatre

A THEATRE where the seats are balloted for and each-from gallery to stalls—costs just the same for admission as certainly novel.

Over 50,000 people in Berlin are this is the case with the Berlin People's Theatre. The crowded en-trance hall of the Volksbuhne (People's People's Theatre. Theatre) in Kaiser Wilhelm Strasse indicated its popularity, for everywhere

massive front and the imposing struc-ture is only marred by several bloated res in stone, added for ornamental reasons. Corridors, cloak-rooms and stage have been constructed on a lavish scale and the whole theatre is built on a circular plan. Behind each block of seats, numbered in corresponding order, are the cloak-rooms. Everyone can go straight to his part of the cloak-room directly opposite his seat, and so all jostling for coats and wraps is avoided

Lining up outside one of the ticket offices, the writer, by arrangement with a member, presented a membership card like the rest and on payment of the equivalent of three halfpence in English money received a ticket. This entitled me to take part in the ballot

The method adopted is for each ticket holder to draw out a number from an urn, and this decides which seat he will occupy. If he desires, he may draw for two seats together. As the seats are exactly alike, comfortable, ny armchairs, each commanding a perfect view of the stage, the uncertainty of the ballot does not destroy the pleasure of any of the theatre

Program and cloak-room charges are included in the price of admission,

"Craig's Wife"

George Kelly's Latest at the

Morosco Theatre Can Stand

On Its Own Merit

After "The Show-Off" and "The

Torch-Bearers' any play by George

Kelly would deserve more than passing

attention. Kelly's latest offering,

"Craig's Wife," at the Morosco The-

atre, however, could stand on its own

even if it were separated from his

Off," Kelly draws from material some-

what nearer home than Mayfair. As far as we who mix in the hum-drum,

work-a-day world are concerned, the scheming Mrs. Craig and her docile husband, are made of real stuff.

Mrs. Craig sets about to solve the

problem of security that faces every

woman in our modern, economic and social structure. Her first and last

thought is for a home, even if only it

be a roof overhead and four walls

around. The home as a protector from the dangerous possible ties that threat-

en every average dependent woman, is

To win this haven, the husband is

made only an incident. Starting with such an all-pervading desire for a safe place to roost in it is but a narrow

psychological bridge Mrs. Craig crosses

to the point where she lays down the rules and regulations for the conduct

imagined, these are of the pettiest na-

room but a little, windowless com-

Mrs. Craig's tyrany, growing apace,

goes so far as to eleverly exclude visi-tors. Soon this ban extends to his

friends. Craig is so emersed in his

love for his beautiful wife, that he does not realize the scheme that is

It takes the revolt of an aunt who had been residing at the house to

start him on the path to comprehen-

sion. The murder of an acquaintance, bringing a frenzy of fear to Mrs. Craig

less her sanctorum be endangered by

her one ideal.

"Craig's Wife," as in "The Show

linked up in this movement which now owns three theatres, besides frequently hiring eight others. The society main-tains over 200 offices in the city to deal with its members in various districts. rose up a pleasant buzz of anticipation. Members are entitled to go to the plays This, well arranged theatre, seating 2,000, continues the correspondent of The Christian Science Monitor, has been specially built for the Berlin People's Theatre Society.

Six great fluted pillars support the support the street and the imposing strice.

It is today one of the most wide spread and significant movements in Germany, for the same plan has been applied in many cities. But during its growth it had to overcome great difficulties. Its roots go back to the Free Stage Society formed in 1890. Ibsen, Tolstoy and Zola inspired the movement, which aimed at freeing the stage from the rigid censorship. The plan was to give at least eight performances annually in Berlin which should be wholly free from the censor and the pressure of the box office.

In March, 1890, Dr. Bruno Wille isied an appeal in the Berliner Volksblatt for a free people's theatre. This read as follows:

"The stage, until now degraded to the shallowness of drawing-room witticisms, begins with the help of cour ageous realists to purify and free itself. In the Free Stage Society the movement has created an organ which will evade the censorship, which otherwise prevent the staging of revolutionary But we must go further and bring this society to the people."

Dr. Wille then put forward a plan would be possible for all members. This idea remains the foundation of members acting as attendants to save the present flourishing scheme.

THE NEW PLAYS

### MARGUERITE NAMARA

will play the title role in "Princess Flavia," the musical version of "The Prizoner of Zenda," opening at the Century Theatre Monday night.

### Psychoanalysis Of Cinderella

Molnar Probes Deep in "The Glass Slipper," Excellently Acted at the Guild

HE first production of the Theatre Guild this season, Ference Molnar's "The Glass Slipper," sets a standard for choice of play and nesse of acting that they will have hard work to maintain. In production as well, the practiced hands of Philip Moeiler have excelled themselves, and by which on payment of about 6d. a Lee Simonson has managed the set-month, a monthly visit to the theatre ting, especially the difficult verandah ting, especially the difficult verandah and courtyard scene, so that the possibilities are plumbed.

The play presents four rounded characters, all intimately grasped by the author, though not equally empha-sized in the action. Young Irma, the usual poor relation unusually visualized, the second Cinderella, is maid of all work at her Aunt Adele's boarding house. Her romantic soul sends forth its love in dreams of an aviator who shall descend from the sky into her arms, to lift her beyond the sordid concerns of everyday drudging. Meanwhile, with all the ardor of adolescence she nurses a deep sorrow, for her hero is crystallized in the form of Paul Csaszar, a boarder who pays no rent, being largely supported by Adele, who is his mistress. Adele, however, loves other, a much younger scoundrel. Lajos Sipos; learning that Lajos has designs upon a rich man's daughter, in desperate hope of forgetting him, she forces the weakling Paul to consent to her. This after ten years of life together, most of it, she tells him frankly, merely endurable, some of hateful. Irma sees through all the brusqueness of her hero a fine soul, ardent and romantic as her own; that cturns to Broadway in "Young this being should be cheated is more than she can bear. On the wedding Woodley," a new play by John Van night she deliberately gets drunk and denounces her aunt and the young lover she has supported. The newlymarried Paul has just enough manli-ness to do what society would expect; leaves his bride forever. At the police station the next day Irma is rescued from the dark life she had seen before her and moves along to happiness with her hero. As they go off she carries the valise: he has found a new and

ounger woman to support him. June Walker swings over from "Pro essional" into a less significant play A. Kennedy and Co.; Tom Smith and but a richer, deeper part, which she carries with tremulous capture of the tion will be Sir Arthur Conan Doyle's frail yet strong spirit of the girl, held story, "The Lost World."
"The Lost World," Sir Arthur Conan above the filth of her environment by the wings of her blue-tinted dreams. Doyle's adventure story, will have as Helen Westley is also endowed with one of the best parts of her memorable Beery and Lloyd career. She takes its every oppor-Hughes. The picture abounds with tunity, while she remembers her lines fantastic creations of prehistoric times George Baxter and Lee Baker as the which men of science insist are actual two men are good foils to the women; the former indeterminate, giving somewhat the impression of a blustering weakling; the latter as swaggering a Monday to Wednesday—"Mama in the Box"; Herbert Clifton; other acts.
"The Woman Hater," with Helene is well drilled and carries smoothly Chadwick; every night, movie contest. along the turmoil of the action in a Thursday to Sunday—Joseph E. psychological study that is also excellent drama.

The Actors' Theatre is preparing Storm" by C. K. Munro as the next production of its regular program at Load of Mischief," now playing at the the Comedy Theatre. The Theatre Others in the cast are Jose- Ritz Theatre, will be brought out in Guild will also produce another play Williams, Eleanor Mish, and book form by George H. Loran and of his, "At Mrs. Beam's" this season. of these plays have been done in London.

DRAMA

Brilliant "Arabesque" Sweeps Panorama of the High Parade of Gallantry Wins Ruth Chatterton at the Ritz Theatre

> N "The Man With a Load of Mischief." which Lee Shubert is presatisfies on the Sheik—pronounced, it seems. Sheck—whom she seduces in most bewitching and daringly impudent senting at the Rits, Ashley Duker tion of the remantic comedy of courtly manners. His servant does not turn out to be a prince, nor is his lady ex actly what Booth Tarkington would have called a lady, but perhaps they are the better off therefor. At least, Ruth Chatterton might easily persuade us the lady is good company. She takes her courtly life with that grain of cynic salt which betrays the an-guished heart within her profered bosom; she walks in airy grace with that defiance beneath her submissive frame which marks a soul free, however enslaved the body. Nay, she is even in body free, for she has run as fast as her coach will carry her from the pampered prince of her past, and it is in free bestowal that she yields herself to the gallant man of her fu

> > sopher soun from the recent revolution on the Continent (the action oc curs some hundred years ago), and that he is convinced of his superiority to his master and the shallow host of Bath as the chauffeur in "Man and Superman," make Ralph Forbes' part no less original and entertaining; the traditional role of the faithful servant whose courage and love lift him to heights of the hero. To Robert Loraine fell the more difficult and more skilfully handled task of portraying the gallant blood, the M'Lord of the time. whose delightfully shallow yet sparkling comments, delivered to the firt of a scented kerchief, might furnish an act of Oscar Wilde with epigrams, Through the lips of this contented yet keen member of princely society, we learn much of the courtly manner of the time, that "many a friendship has been lost by being claimed," that prudence is the gentleman's chief valour. that virtue consists in winning society's

applause. The play is somewhat more than a lavender romance, set in a frame of country inns and kingly courts, sprinkled with tenderness and cynic satire's thrusts. It is the gesture of a Rale bowing his coat to the pathway of the Queen-and thereby subtly bringing her to his level; it is the kiss by which a gentleman, pressing his lips to his lady's hand, honors her no more than he exalts himself; it is—even to the word "opleege," singled out to show us the actors know pronunciation has changed—a tender singing romance of the days that are memories of dangled lace and quick-drawn rapiers . . . keeping us in mind (most pleasantly)

of the fact that even today
"The tallest tree still casts the longest shadow,

And the longest shadow is reality,"

## THE SOCIALIST PARTY AT WORK

### NATIONAL

Deba' Birthday

Eugene V. Debs' seventieth birthday will be Nov. 5, when he will be in St. Louis attending a banquet. He is, of course, extremely interested and knows quite well of the very wide interest the comrades throughout the nation feel in the event. However, he has repeatedly assured the National Executive Secretary that he would be em barrassed to have comrades spend a total of many hundreds of dollars in telegrams of congratulation and in Over and over again he has urged that his supremest happiness at the banquet would surely be realized if in the two weeks preceding his seventieth birthday 10,000 comrades would each secure 2 or \$ subscribers to the American Appeal-and let the National Office wire him of the magnificent total secured as a birthday favor to the editor-in-chief. Three days ago he said in personal conversation, "that would be one time in my life I couldn't hold back my tears -my heart would melt with gratitude and appre-

ciation of such beautiful love." What more effective way could be thought of? Remember, money talks when it comes to starting a paper! This one stroks would make the Amer ican Appeal SAFE! A birthday greet ing to the editor-in-chief! Send it in omrades-send it before Nov. 5. Address National Office, 2653 Washington Blvd. Chicago, Ill.

### COUNT THE VOTE

HE last week of the New York City cam-paign practically ends Saturday with the prospect of nearly a majority of the voters staying away from the polls. It is a peculiar fact that while many sacrifices were made for the suffrage in the United States millions pay little attention to it. This has so alarmed the ruling classes that they have created some special organizations to award baubles as prizes to those States that show an increasing percentage of non-voters going to the polls.

That the parties of capital and finance present no appeal to these masses is not surpris-At the same time this situation is a heavy indictment against these parties. On the other hand the Socialist Party does not command the funds and the powerful press to reach the sleepers. It, therefore, is unable to take full advantage of its opportunity to place any large group in the Legislature and the Board of Aldermen.

Nevertheless, we must convince the masses that they have it in their power to get control of every office in the city and State. To the statement, "We cannot win," must always come the answer, "We can win when we de-cide that we want to win." With the will to conquer we can drive the two capitalist parties together into a minority cohesion bereft of its public plunder.

The few remaining days before us must be devoted to enlisting our workers for the work of getting out our vote and seeing to it that the vote is counted. There are certain election districts that are cess pools of political iniquity and where the working class is feared. These strategic places must be guarded first and every precaution taken to see that the mercenaries of capitalist politics are thwarted in their attempt to pollute the ballot box.

Election day should be the day of greatest service. Every worker in the cause must do

### NERVOUS EUROPE

T HAS been a nervous week for the big imperialist powers of the world. With France and Spain waging war on Morocco and the Powers gathered in Peking to see what they can do for the Chinese invalid one little Balkan rooster attacks another and the whole barnyard tribe began to cackle. The war for "democracy" issued out of the Balkans and when the Greeks began to advance into Bulgarian territory and shell Bulgarian villages the imperialist statesmen began to wonder whether this might not lead to another general war.

Then the League of Nations got busy. would not stand for any nonsense by two lit-tle states, even if the nonsense took the form generally followed by the big Powers when they want somebody, else's real estate. Last year Mussolini could send his castor oil braves against Greece, but as Italy is one of the larger Powers the League was more circumspect in dealing with him. Greece and Bulgaria are little brigands. They may enjoy a few assassinations among themselves and set up despotic regimes, but when they proceed to spill the beans all over the Balkans the League tells them to "cut it out," or the police will have to take them in charge.

Greece, therefore, reluctantly gets her troops out of Bulgaria and the League now plans for another security pact, an inquiry into the causes of the brawl, fixing the blame and assessing damages. So the nervous tension is relaxed and the two brigands are to be called before their bigger brothers to give an account of their naughty conduct.

On the other hand, even if the League is largely an instrument of the greater imperialistic powers it has demonstrated that it can compet the Balkan kids to quit playing with fire. That is something worth while.

### THE COAL CRISIS

EEPING cool with Coolidge does not mean Coolidge keeping cold with us. With a fearlessness that commands admiration, Lord Calvin sets the date for Thanksgiving Day and tells his loyal sub-jects that "God has blessed us with resources whose potentiality in wealth is almost incalculable." He has, but an important section of those resources is in the hands of mine owners and they appear to be those who have been "blessed" by them.

Meantime, while we keep cold and Coolidge keeps cool and God has blessed the mine owners with coal, the coal supply of New York City is about exhausted. Major Berry of the Coal Commission is just as fearless as our good Lord Calvin. He, too, talks. "The public must be impressed," he casually observes, "with the fact that the hard coal supply of New York City is exhausted and something else must be burned during the coming

Yes, we are impressed. The most forceful impression we get is that if words supplied

heat we would not have to worry whether any coal was delivered this winter. Dealers are warned to stock up with soft coal or municipal depots will be opened. A day later the situation is saved. Major Berry assures us that plenty of soft coal is on the way and that he will not act. Not at all. He will talk.

Thus we have the story of how bourgeois politicians and officials act in the face of an emergency that means suffering for millions and certainly an increase in the death rate. The profits of a business class are of more importance than human welfare. No planning, no anticipation of an emergency. Only talk and a drift to the very crisis of the emer-

Well, there is an opportunity to talk back next Tuesday. A Socialist vote cast on Tuesday is a blow between the eyes of those who have power and who refuse to use it in a great emergency.

### CHARTERIS ON THE GRILL

T is evident that General Charteris faces an unpleasant situation because of his blurting out the story of his having altered two photographs during the World War to give the impression that Germans were boiling their dead for fats and fertilizer. Before sailing for Glasgow he denied that he had made this revelation. The Times reporter who reported his lecture insists that he not only reported the incident as told by General Charteris, but that the latter had specifically given his consent to the publication of this part of the lecture.

But even in his denial of the Times report the general sadly says that he would not have spoken as he did if he had not been assured that his remarks would be treated as confidential. But why should he desire no publicity regarding the lecture if he did not tell of the origin of this story?

Meantime British circles are stirred over the incident and General Charteris faces some unpleasant hours after he lands. It is reported from London that the War Office may hold an inquiry while several members of Parliament promise to interpellate the government regarding it. Lloyd George says that at the time the story appeared the government knew it was not true and it was not issued by the British Propaganda Department, but a former Under Secretary of War observes, "I had no cause then to doubt its accuracy. The thing cause then to doubt its accuracy. The thing would never have been touched had we not believed it true." This appears to be in contradiction to Lloyd George's statement.

It is amusing to observe this dodging and squirming. Apparently, one of the professionals has made a terrible blunder, a dirty secret is out, one nasty phase of capitalist imperialism is in the spotlight, and the professionals are sweating about it. We hope that another general possessing some secrets will drink some American tea.

### EDUCATING EUROPE

REFUSAL to admit Countess Karolyi to the United States and cancellation of an engagement for Arthur Henderson to speak in Hartford at least serve one good purpose. Our pork chop aristocrats are convincing intelligent Europeans of something that we could not convince them of for many years. We have insisted that our bourgeois class has always peddled bogus goods when it and its agents abroad talked of American "idealism" and "liberalism." Europeans would not believe us; possibly they will believe the aristocrats themselves.

First Count Karolyi was muzzled when he arrived here. Then Saklatvala was excluded. Now Countess Karolyi is refused admission. Arthur Henderson is paged by the National Security League and a meeting is cancelled. Others are yet to be deprived of passports and still others who may slip in will find the g-r-e-a-t democracy the fraud that it is.

Then there is, the affection shown by our bourgeois aristocrats for remnants of former ruling classes. Surely Europeans took notice a few years ago of an American warship being employed to transport a gang of former Romanoff officials to a Pacific port from the Philippines. They certainly have observed how the Hungarian bandit, Horthy, has thrust his bloody hand across the Atlantic and obtained the muzzle for Karolyi. Even years ago when Taft, Roosevelt and Nicholas Murray Butler went abroad they crawled before Nicholas Romanoff, Wilhelm and their kind. It wasn't the liberators who were sought by them and when they returned home they slopped over in admiration of the parasites who smiled upon them.

We are glad that Europe is learning the truth and that our ruling classes are confirming it by their actions, much as we regret the loss that we sustain by being quarantined against new ideas.

The American Legion is proposing a bill which. if passed, will draft all persons between the age of 21 and 30 in any future war. If the next war makes the world as safe for democracy as Italy, Spain, Rumania, Bulgaria and a few other nations are, are our American conscripts to rejoice at the prospect of their noble job?.

New England local organizations of big contractors have been told by General R. C. Marshall, Jr., of Washington, that municipal, State and Federal enterprises are "more of a menace to this country" than anything else. A menace to "this country," mark you, not to them, for they have no pockets to fill. How disinterested!

We rise to ask how much of the proposed \$11,-000,000 boost in the city payroll will go to street cleaners, clerks and other city employes if Waterman or Walker have anything to do with it?

Tammany and Governor Smith join in asking for a big vote for bonds in New York City We hope for a big vote against bondage to Tammany Hall.

# The News of the Week

French in a Bloody Orgy parties. Understanding the drift of opinion, the party of Calliaux recently decided in favor of a capital levy. Caillaux balked at this proposal but his own financial program was not satis-factory to the Cabinet. Unable to induce Cailfaux to resign, the whole cabi-net resigned to get rid of him. The finances of the Government are still in a bad way and in the meantime news comes of the horrible massacre by French troops in Damascus. The dead is estimated from 1,000 to 8,000, the lesser figure being that of the French camels' movements," writes the Times correspondent. This infuriated the population instead of cowing them as the French had expected. France holds the mandate for Syria from the League of Nations and the theory of the mandate is that the custodian power is to act as a benevolent brother for the weak nation and as trustee is to report its good deeds to the League. When French imperialism comes to the League to report with blood and flith dripping from its hands we wonder what the answer will be. Incidentally, Greece has just been ordered out of Bulgaria by the League but note how the League

acts in the case of this revolting French

Charging that Chilean Election the election of Emiliano Figueroa Causes Strike dent of the Republic of Chile on October 24, by a vote estimated at 180,000 against about 75,000 for his opponent, Dr. José Salas, was made possible by gross frauds and outrages at the polls perpetrated by the Conservatives, the leaders of the organized workers called a protest strike of 48 hours, which was quite effective in Santiago and the larger cities. It appears that a combination of Socialists, Communists and Labor men in general had supported Dr. Salas in the hope of defeating the bourgeois groups that had united upon Señor Figueroa, whose sentiments are said to accord with the conservative and occasionally reactionary ideas championed by ex-President Allesandri since the latter's return last Spring from several months' exile in Europe. At one time Alessandri was considered a tribune of the people against the nitrate kings and other exploiters, and the Communists and Labor unions played a prominent part in the move-ment that brought him back after the military clique that had expelled him had failed to satisfy the demands of the masses for better conditions. But during the big strikes last June Allessandri allowed the wholesale slaughter of practically defenseless strikers and their families by troops, and since then has shown no especial interest in the cause of the workers. Labor papers

More Trouble In Panama

met in conference with President Chiari following the recent disturb-ances which resulted in a couple of rent strikers being killed by the police and American topops being called in to back up the authorities in their aggression against the tenants, it was agreed that rents should be temwhich undoubtedly is much too low, porarily reduced by 10 per cent below For three days the butchery and destruction continued. It appears that apparently feeling that they can relighted in the rising was due to the brutal arroupon American soldiers to help impance of a French officer who had pose their will upon the masses, the porarily reduced by 10 per cent below aroused intense animosity. Machine landlords have not only failed to cut guns, artillery, airplanes and tanks rents, but have tried to increase them were employed by the French to kill and have had the local judges issue and destroy. A few weeks before, the orders of eviction by the wholesale. French burned several villages and Consequently, President Chiarl on then transported corpses on camels. October 26 warned the rent hogs that The parade was a revolting spectacle unless they showed a little considera-as the bodies rocked in rythm with the a special session of Congress to enact rent legislation. He naively added that he hesitated to take such a step for fear that the Legislators, impressed by the recent disturbances, would be too much on the side of the tenants. Some days before this announcement, the Panama Cabinet had begun elaborating plans for public works as a remedy for unemployment and the general unrest prevalent among the people.

The Chinese

ed. including China, opened its first session with 2,000 students demonstrating in the streets against the Pro-visional Government. When such a demonstration can be held in Peking, the capital of the Provisional Govern-ment, we may be sure that this government has earned the distrust of the masses; yet it is the government with which the Powers are conferring. After eighty years of control of China's tariff, these Powers are now considering how much increased customs China will be permitted to have. While the Washington Conference provided a mere revision of the tariff, the Chinese delegates are proposing that all tariff restrictions of the Powers shall be surrendered and China agrees to abolish the "likin tax," that is, a tax on goods in inland transit. There are some other minor proposals, but these two are of the most importance. The tragedy of the situation is that the concession of tariff autonomy to China will give increased revenue to the Peking militarists and strengthen their control of China. This is one reason for the demonstration of munist aldermen may abandon the the students as the conference opened.

Back Agair appears to be in stress laid upon the need of relieving power again in the housing shortage by municipal conNicaragua. This gang was kept in struction. A list of the offices ists and Democrats was materially held by the family included the presidency and other leading positions at actionaries.

For months local have been suppressed and union lead- home and abroad, including brothers, elections in ers thrown into fail upon the slightest nephews, cousins and many other rela-france have been pretexts. Allessandri resigned from the going to the Left Presidency on October 1. opponents were tortured by methods that recalled the most revolting cruelwhen representatives of the Chamorro clan maintained "order," landlords and tenants of Panama e with President of the Clan and its American allies. Gen. Emiliana Chamorro is reported to have seized a fortress at Managua and have seized a fortress at Managua and demanded that the Liberal members of President Soforzano's Cabinet shall be dismissed. If the clan comes back into power, it remains to be seen whether American bayonets will again be placed at its disposal. American imperialist policy in Latin American finds consistency almost impossible. Its tendency is not to recognize a govern-ment based on an armed revolt, but here is its pet clan coming into power by this means, and experience has shown that it will faithfully seve the banking firms of Seligman & Co. and Brown Brothers, Wall Street bankers. Can Coolidge keep cool with such an opportunity to serve his class?

The capital of

Labor Re-takes the German Re-Berlin Berlin the hands of rep-resentatives of the workers, after having been controlled by the bourgeois parties for four years. According to incomplete reports of last Sunday's municipal election, the new Board of Aldermen consists of 75 Socialists, 43 Communists and 107 members of other parties, whereas the old Board, elected October 16, 1921, was made up of 46 Socialists, 43 Independent Social Democrats (who subsequently affiliated Opening of the Customs Confereither with the Socialists or the Comence, with twelve munists following the split in their
Powers representparty at the Halle convention and the amalgamation with the old Socialist Party at Nuremberg in September, 1922), 21 Communists and 115 bour-Nuremberg in September, geois members. The total vote this time was about 1,750,000, against 1,720,041 four years ago. As the proportional system is used, the popular vote of each party may be worked out from the number of its aldermen. The total vote was much less than that cast in the final round of the Presidential election on April 26, 1925, when 2,413,-344 Berliners went to the polls. German Nationalists increased the number of their seats from 42 to 47, while their femporary allies, the People's Party men, fell from 35 to 13. The Democrats rose from 17 to 21. The rest of the seats were divided among the smaller groups, including the Centrists and the Economic Party. Erroneous rumors that the Socialists and Communists had combined their forces were probably based upon an offer by Communists to name joint candidates in line with the new policy of conciliation dictated from Moscow, but re-jected by the Socialists. The Compurely obstructive tactics of their predecessors and try to convince the Socialists of the sincerity of their de-The notorious sire for some sort of unity. A feature Chamorro Clan Chamorro family of the Socialist campaign was the

### Dawn on the Rialto

The portals to the cabaret are shut, And stilled the jass, the rattle and the crash. But where the warlet guzzled with the slut, The owner sits and fondles with the cash.

The temple fades to drabness with the day-The scats keep grinning at the gaping shrine— It must be droll to know the fools who pay To scream with laughter at an empty line.

As ever it remains that fools make gay With froth and bubble-though they pay for wine.

Henry Harrison, poet and epitaphist, numbers among his other fine accomplishments. chairmanship of the Grub Street Club, New York's only democratic literary society, where the minor poet and the major lute-smiter can rub elbows and swap "Didjever hear this one" ribaldries, just like regular fellers.

This Monday night, Nov. 2nd, 8:30 o'clock, we are invited to appear and read our verse in company of Harold Vinal, Clement Wood, Gus Davidson, Joseph Auslander, and others. Meeting takes place at the Chez Lucien, 49 East 10th Street. If the clamoring hordes of the Bronx can spare us for an hour we hope to be able to chime in and trill a little.

### Matrimony a la Mode

You were promised last week a sort of solid enlightenment on the subject of Marriage and its Cure. We had almost forgotten, what with the press of campaigning and the like, when a news item this morning jolted us back into reminder. It read: "Bachelor Commits Suicide, Leaving Note That All Young Folks should Marry."

It being common knowledge that no normal moron will deliberately take his own life, and that suicide, in fact, is always preceded by a fierce fit of insanity, one can readily understand how sensible it would be for an otherwise sane and life-loving young person to follow the suicide's advice.

Which, by the side, reminds us that the world's champion pessimist was a bachelor who killed himself, but left a note in which he expressed the most earnest regret that his

que us of just being mock-serious about the

father had not remained a bachelor.

Anyone who knows us well will never a

subject of marriage; some thirteen years of its felicity and adversity fits us up with sufficient armor and weapons to defend or attack. The economic, political, ethical, psychic and other heavy phases of the subject we leave to weightier authority. We wish to discuss it merely as an affliction on common joy. other words-we wish to elaborate on marriage as a joy-killer.

As these words echo out of the typewriter, we can visualize twenty million lined, sparse-cropped, brow-tumbling faces and heads perking up from twenty million newspapers all over the country, with just the faintest light of hope and warmth haloing them. A Daniel has come to judgment, Loch-invar has come out of the West, Hercules has arisen for the thirteenth labor. The tune of a new Internationale with new words, thrums in-"Arise, ye prisoners of marital exploitation"—"You have nothing to lose in the change"—"You would eventually, why not now"—and so on, each rhyme a challenge, each phrase a ringing slogan. Visions peter in upon a slowly awakening consciousness, visions of freedom and peace—rest, quiet, contentment—no more harsh commands decontentment-no more harsh commands, demands, arguments, provocative and con-sumptive,—hills and trees and meadows arm outspread in welcome, taverns and inns with luring open doors from which leak out snatches of song and laughter, and enchanting odors-fair faces and forms, soft smiles and trills of joy like silver timbrels and golden castanets mingling, kisses as light as sun beams and as warm, eyes dancing like gems in moon-rays, cheeks smooth as milk-weed floss, and hands that touch only to sanctify-more music and more perfume-the whole world like an invisible censer—spiraling attar of the Orient—romance, Omar wine, jugs-tent under a Cairo moon-ah-

"Sam, run upstairs and take the wash off the roof; it's raining—" Devastating doom. Crash of a thousand planets into dull dust bang of a billion doors—boom of dead boul-ders down mountain sides—poof-puff-siz-We rise to our chores with zle-aw. . . . accustomed unalertness. All over the country, twenty million wrinkled faces and beaten brows turn half-bald heads back to the funny pages of twenty million newspapers-slowly, sadly, in ultimate resignation
