NOT even in Washington has there been much pocrisy than the talk about conscripting wealth as well as life in the next war. On this ground the Capper-Johnston bill has been justified in a recent hearing. Yet at that same hearing much time was taken over in discussing whether or not five or six per cent should be set as the rate of return allowed to capital. Even the language of the bill speaks of control-ling, not conscripting, wealth. Control is left to the President. The railroads "Jersey justice" does not wait for twere controlled in the last war to the great profit of stockholders. Cost plus is enforced on the street, in the meetcontracts might conceivably be inter-preted as a form of control. They are a long way from conscription of wealth.

This hypocritical measure has been advocated as, a means of preventing war. The wealthy, it is argued, will keep us out of war if they see that not merely their sons but their money may be conscripted to fight. The argument is a sorry commentary on the ruling passion of the rich. However, it is too simple. If we continue to walk along imperialist paths no vague threat of future conscription of wealth—certainly not such control as the Capper-Johnston bill proposes—will be an ef-fective guarantee that we shall not

land in the abyss of war.
What the bill really does is to make peace agitation or labor agitation practically impossible in the event of an-other war. All men will be conscripted, made subject to martial law, expected to render absolute obedience to where they live and where they work. What is left of civil liberty will be dead. We shall have the slave state in its worst form. Under certain cirstances your imperialists and great capitalists might regard the benevolent Hitting King control of their wealth by a friendly for wholesale conscription of the work-

A conscription of wealth unjustly won and unjustly held has merit as a peace time measure. One could make case that such a conscription peacefully carried out would go far to prevent future war. But the control of wealth as an alleged parallel to the conscription of all life in the event of another war-this is a gross perver-sion, an inverted form of Socialism which is a thing of horror. It is a reproach to our intelligence that it should be advocated in the name of justice and peace. To fight this sort of thing s one of the chief duties of the Socialist Party and of the labor movement. It must not be forgotten by Socialists then in their convention they consider their declaration of principles.

Among other questions which I hope to see discussed at Pittsburgh is taxrious for us as it is in Great Britain, but it is absurd to imagine that we great cities, the problem of the tenant farmer or the question of nationaliza coal without stating frankly society's right to the economic rent of That right can be asserted by taxation. The clubs of the uniformed thugs enforce the law on the spot. Cases of violence followed by arrest, are virtually commonplace. A well-founded report is now being tracked down by the strike heads that one of the workers has been killed by the police and his body concealed.

In the streets, where the pickets would form their line to make a silent, peaceful protest against the miserable conditions in the mills, they are met with the gun, the club and the brutal brawn of the police.

Yet this tragedy is outmatched by far in the courtrooms of the strike district. The proceedings in the Gar-field courtroom Tuesday afternoon were seldom, if ever, equalled in an American court. It is doubtful if any American courtroom, even in the serf colonies of West Virginia, was ever presided over by as brutal and ignorant (Continued on page 2)

ECOGNITION of his achievements as manager of the New York Joint Board Amalgamated Clothing Workers for the past three months was given to Abraham Beckerman in a banquet tendered to him ast Friday evening at Beethoven Hall. DASSAIC, N. J.—"And they call this justice!" exclaimed a young girl striker, learning a new lesson as she sat in Garfield courthouse at the hearings of those arrested when Bergen County Sheriff George P. Nimmo read the riot act. Jersey justice ought to become a byword in the American labor movement. The present local government strike-breaking activities directed by feudal mill owners make an instructive lesson for the 13,000 wool textile strikers.

Clean them out!" precipitating the worst assault the police have made during the twelve weeks' fight.

Nancy Sandbwsky, one of the staunchest picket leaders, was immediately picked from the line by the frantic sheriff. She was under suspended sentence in Passaic and was huried off to Hackensack jail to be held under \$10,000 bail. I stooped to help up a woman knocked to the gutter when a policeman twisted her wrist viciously. I looked at the sheriff and started walking rapidly, when he yelled to an officer, "Grab her!" and I was hustled to the patrol wagon. We were all held over night on \$10,000 bond.

During the night the jail rang with strike songs and cheers. Jack Rubinstein and Clarence Miller, young strike leaders who had been picked up in the morning (the riot act was read in the late afternoon as the mill closed), were cellmates with Dunn and Weinstein. I

What is apparent is that there is a Act, and it is also evident that the United States is "wetter" under this ct than it was before prohibition. The most valuable testimony came position which The New Leader has taken on this question. In Canada the liquor traffic is controlled by the Provinces, and in Quebec, Manitoba, Saskatchewan and Alberta the evils of both private manufacture and government prohibition have been avoided. The Canadian Provinces had the same experience which we have had. First there was a revolt against private capitalism in the manufacture and sale of liquor, which resulted in prohibition. The latter was no more satisfactory than the former when the Canadians turned to provincial con-Under the control system, crime has so decreased in Manitoba that under prohibition the Province was 'converted into a network of stills" The same experience was realized in other Provinces. A bill has been prepared ostensibly to enable farm co-operative organizations to finance the marketing of surplus farm products in time of emergency. This Administration bill is said to be designed to offset a more radical bill for creating a division of co-operative marketing in the Department of Agrifavored by the farmers themselves, who met in a convention in Iowa Vhatever the result may be on either bill, we predict that the farmers will have been in the past. The trouble with most farmers is that they cannot see beyond the present capitalist system; but in this respect they have ot differed much from a majority of the wage serfs of the cities. In the seventies they began with regulation of railroad rates, and then played with the illusion of cheap money. In re-cent years, marketing problems have absorbed their attention. ### Labor Doings Abroad

Yugoslav Socialists Urge Unions Enter Politics

A LMOST simultaneously with cablegrams telling of another cabinet crisis in Yugoslavia, due to the "walkout" of Stephen Raditch and his fellow Croation leaders on April Fool's Day when their demand for the speedy re-convening of Parliament was refused by Premier Pashitch, came belated reports of the January national convention of the Socialist Party of Tugoslavia and of subsequent developments in that somewhat inharmonious combination of Serbs, Croats, Slovenes and various smaller racial groups.

As the Socialist political organization in Yugoslavia is not represented in the Skupshtina or in any of the important municipal bodies, as the result of the increase of nationalist hatreds after the World War, and of the Communist agitation which finally brought wholesale persecution upon practically all working class groups, the January convention was principally devoted to a discussion of ways and means for carrying on the work of arousing and educating the Yugoslav workers to the need of independent Socialist political action and of trade unionism.

Taking cognizance of the step toward a unification of all the trade unions of the country effected at the unity conference in Belgrade last October, the convention adopted a resolution expressing the hope that the new Federation of Labor would not remain absolutely neutral in politics, as had been decided at the October conference, but would adopt a Socialist platform and accept the leadership of the International Federation of Trade Unions. That this suggestion is likely to be followed seems indicated by the desperate fight against the unity movement being carried on by the handful of Communist unionists who have refused to line up with the majority of their old comrades and join

with the regular trade unions.

The January convention pointed out that the influence of the Communists in the Yugoslav working class movement had been reduced to just about nothing, which made the Pashitch Government's new terrorist drive against them all the more ridiculous and unjustified. This drive, which started almost coincidentally with the arrival in the United States of the Yugoslav Debt Funding Commission and resulted in the arrest and jailing of several hundred alleged Communist agitators, most of whom have been released without trial, and a few of whom are being held, may have been timed to show dictator-loving Washington that the "old fox of the Balkans" could crush labor just as efficiently as Benito Mussolini, and therefore is entitled to just as tender consideration

But the anti-labor activities of the Yugoslav authorities, as instanced by its hounding of Communists and its recent cutting down of the functions of its Ministry of Labor under pretext of economy, have stirred the trade unionists to renewed life. They have been holding many protest meetings and demanding more, not less, labor protection. In the recent election of members of the Labor Boards in Slavonia, the regular unions captured twenty-seven of fifty seats in these semi-Governmental bodies, after a hot campaign which brought out 56,236 votes. The candidates of the United Trade Union Federation polled 29,844 votes; the Clericals, 15,017; the Democratic-National Socialist group, 8,359; and two other groups, 3,500.

#### Labor Conditions in Burma

THE General Secretary of the Burma Labor Association (which is affiliated to the All-India Trade Union Congress) has recently sent to the International Federation of Trade Unions a report on the working conditions of the workers in this India province, with its population of approximately thirteen millions.

The Burma workers are divided, roughly, into the three main classes: Independent workers, attached to mills, steamers, workshops and factories; independent workers, not employed under any body and earning their living in free work such as rickshaw pullers, hackney carriage drivers, carrien, barar coolies, et al., and workers by contract, recruited by agents, or contractors, for a certain period, as wharf coolies, mill coolies, mine coolies, et al.

these workers live in the most miserable quarters. Those who are attached to mills, etc., are provided with accommodation by their employers, rent free; but such accommodation as is scarcely fit for human habitation, barracks made of corrugated iron roofling and fencing, ill-ventilated, and entirely deficient in all sanitary arrangements; in many places the room allowed is not more than 5x4 feet per person; pure water, either for washing or drinking purposes, is unobtainable—with the result that epidemic diseases

are chronic, the workmen dying in large numbers every year. The inhuman system of work by contract which is still in use here and there in the British and other colonies, and is little better than slavery, has been greatly abused in India. In Burma, too, the contractors take all the advantages offered them by their position. The workers have to bribe them to get work, and, having got the work, they have to bribe them again to get the miserable pittance due them. Those who attempt to escape from the oppressive hands of the contractors are punished under the contract laws.

The public authorities are but little better in their treatment of the natives. Little is done for public hygiene, no provision is made for water. And such is the "civilization" of the Europeans in control of public offices that in port health stations workers are compelled to strip and undergo medical examinations naked in the open air. Needless to say, there is no representation of Labor in either the legislative or municipal councils.

But the Labor Association of Burma, which was organized in 1920, and is the only labor union in the province, is able to carry on its activities in spite of the dearth of leaders and numerous misfortunes, and it has been successful in improving the lot of the workers by a number of big strikes.

## From Scabs to Yellow Dogs

OMPANY unions have shown substantial growth on electric street car railways.

Yellow dog contracts, binding the worker not to belong to the Amalgamated Association of Street and Electric Railway Employes of America, feature the company unions on Interborough Rapid Transit Co. and Brooklyn-Manhattan Transit Corp. of Nev Interborough's rump union called the Brotherhood of Interborough Rapid Transit Employes, hold an annual conference of "representatives" at which a vote is usually taken to defer wage-raise questions another year "in view of the company's financial condition." The 1925 conference for this purpose lasted only half an hour.

The plan on Brooklyn-Manhattan subway and elevated, introduced in 1920 after a strike which cost the company \$2,500,000 to break, is much like the Interborough one: final decisions on all matters rests with management; the 9,500 workers affected have only a fake collective bargaining power, no treasury of their own, no expert service in negotiations, no mass meetings. The members of this helpless union, at annual primaries and elections, select 74 delegates who sit in conference with the company to soften the sting of its dictation. An elaborate employe benefit association and house organ, the B. M. T. Monthly, go with the plan. Interborough also publishes a 46-page monthly bulletin and operates a welfare committee "simply as a family affair, a practical means of looking out for our own

The Russian Socialists' Golgotha

Communists continually broadcast protests against the tortures to which their followers in European prisons are often subjected. There is no doubt that many of these stories of brutality are true, but that treatment of Socialists in Bolshevik prisons is just as savage is also true.

This brutolity in Russia is all the more reprehensible considering that the Socialists spent years in fighting

Czarism and that the difference between Communists and Socialists is not whether Czarism shall return but as to what program is best to serve the workers and peasants.

We have published some letters from Russian prisons. The following story of Soviet prison brutalities is taken from the "Dni," a Russian publication in Paris, issue of January 29, 1926. It has been translated for were not asbamed to blackmail to gain their object; they made false announce

TE boys are cutting up again at Herrin. These constantly recurring up again at Herrin. These constantly recurring outbreaks of animal spirits that serve to put pace and go into the life of that otherwise normal small Illinois town are variously attributed to athelsm, unionism and communism. None of these is the real reason for Herrin's violence. We were there for most a year and we are here to state that the natives of Herrin are in nowise different from the natives of any other small town. For the most part they are devout Baptists and ardent Coolidge Republicans. They go about their various businesses unperturbed by the popping of guns and the cries of the wounded. We must qualify that "nowise different" a bit by admitting that there is in the native of Herrin a certain fine spirit of revolt against the drabness of modern life in a small IIlinois town. Adjacent Marion, for example, where life is fully as monotonous, accepts its fate placidly and looks with horror upon its boisterous neighbor. But as soon as you have set foot in Herrin you are These men and women refuse flatly to be bored by life. Not for them the eternal round of movies, lodge meetings and sewing circles. They are forever seek-ing some new kick. A short time back Herrin went in for religion on a wholesale basis. They had in a pulpit a pounding evangelist who sweated and prayed to such effect that some five thousand stalwart na tives hit the trail and publicly disarmed. This was hailed as a great victory for righteousness by the religious press. To celebrate this victory a huge assembly gathered in one of the largest churches. The collection taken was one of the largest ever gathered in the town. Unfortunately some low-life back-slider sneaked in the side door, stuck up the man with the collection plate and swiped all the jack. As soon as the word spread all the converts rushed home to get their guns, but by the time they reappeared the thief had fled town. This put quite a damper on the religious enthusiasm. The evangelist had gone with a good wad of Herrin money in his back pocket and it was evident that the time had come to start something again. Last week Herrin went in for politics. In the heat of the campaign someone poked someone else in the jaw. Fist fighting simply isn't done in to use one's fists in a quarrel. If you happen to differ with your neighbor on matters of politics or religion you simply draw your gun and shoot him through the stomach. So when the news leaked out that two natives had been caught fist fighting it was evident something drastic must be done to save the fair name and reputation of the town. -The result was that six men were shot dead in various parts of the town in half an hour. But that is no reason why editorial writers all over the country should cut themselves with knives and cry aloud. Herrin has nothing to be ashamed of except for the fact that its pioneering spirit is sometimes misdirected. Herrin simply refuses to conform. Better be dead than

We were over in Passaic yesterday listening to the sheriff read a piece that ends up with the words, "God save the State of New Jersey." As soon as he calls on his Maker it is a signal for all hands to run like sixty or get hit on the head. CALIFORNIA bootleggers are doing their best to put the country's leading industry on a busine like basis. They are taking out insurance. For actual death "while in the line of duty" they are insured for \$10,000; for time spent in jail they are insured for \$5 per day. Insurance also covers court fines and other expenses incidental to business risks. All of which indicates a much-needed stability in a large-scale enterprise not hitherto noted for its stability.

It is surprising that none of our latter-day economists has given bootlegging the important position it deserves in our present scheme of things., Certainly it is a reality of American life with a lot more life in it than antiquated rehearsals of "the law of supply and "entrepeneurs profits." "laissez faire" and the rest of the hokum that the professors are still ladling out in the name of economics.

No doubt we shall soon have chairs of bootlegging in our more prominent universities and courses will be given through the mails. Some correspondence school go getter will be getting out advortisements with pictures of successful young bootleggers coming happily home off nights to the wife and kiddles. Under the pictures you will read something like this:

Capitalism may not be on its last legs, as some maintain, but it sure is getting wobbly on its pegs. Twelve dollars down and five per week ever after buys an automobile; five dollars down and whatever you can raise after paying the installment on a suit of clothes, electric washer, vacuum cleaners and radio set buys a talking machine.

Three million autos or \$0 per cent of the total output of 1925 were sold on the installment plan. Adding to these the credit extended on the sales of used cars the unpaid auto bill of the nation reaches the snug sum of two and half billion dollars. All told, the installment debt of the fiation is estimated around five billion dollars or one-twelfth of the national income.

If this sort of thing keeps up, it won't be long before grocery keepers will sell bunches of radishes for one cent down and a cent per month and I wouldn't be at all surprised to see smoked hams bearing the label: "Pay as you eat."

The trouble is, of course, that the purchasing power of the masses is insufficient to absorb the commodities produced plus profit. When more is produced than can be sold, selling must be artificially stimulated. So while the capitalist brethren cut wages wherever they can they are at the same time borrowing money finance the purchases of the masses. Thus capitalism goes in debt to loan money to its own victims. It is almost as if a highjacker would advance a ten spot to the man he had just relieved of his watch to en-

able him to buy his watch back.

Yes, this is called an economic system and some people even claim that it will last forever and then some.

Cheer up, girls! If your fellow jilts you, you may keep the engagement ring. At least this is the decision of High Court Justice McCardle of London, England, and it goes without saying that whatever a British high court has decided becomes gospel to the courts of these free and independent United States of Amer

The case originated in the shattered romance for which Cissie Cohen, a London East Side beauty, obtained cash damages for her bleeding heart to the extent of seventy-four pounds and ten shillings from Nathan Seller. Nathan, who felt as deeply wounded over the seventy-four pounds as Cissie did over her bleeding heart, thought he was at least entitled to the return of the engagement ring valued at twenty-five pounds. The jury decided that Nathan had been bled enough and should have the ring back, but the High Court held that the gift of an engagement ring was in the nature of a down payment on a contract and that Nathan having failed to carry out his part of aforesaid contract, it served him good and right when he lost his initial investment in the holy bonds of mat-

rings until the right fellow comes along, when you can convert the collections into the furnishing of a cozy flat where you can live happily ever after, because if that right fellow happens to turn out wr you can turn him out on the street, being that the furniture belongs to you.

By the way, you may not know that in most Indian tribes the tepee, blankets and household utilities were the property of the squaws, which was one of the chief reasons why marriages among the original American Reds held fairly well together. When Chief Mud-inthe-Ear became too unpleasant around the house Squaw Afraid-of-the-Soap would simply roll up the cold meals and blanketless nights for her "Lord and Master." In others words, the lady possessed the economic power to freeze and starve her spouse into 

But coming back to that engagement keepsake, you must, of course, take pains to preserve the letters in which the intended victim tells you that "it's all off between you and him." There are usually a score this kind of letters in every love correspondence and by the simple method of keeping the "All-off" and destroying the "Yours forever" letters, you'll have no trouble to convince any reasonable court that the ring

N met Gaylard at The Club. The Club made Dan afraid. It was an alien place, an amazing place, built in the medieval style with long corridors dim-lit, filled with melting, Oriental rugs, great spaces, and marble stairways. From the moment, Dan entered with Gordnite, he was impressed. He tried not to show it, to ignore the parade of physical beauty, but it assailed his senses and left him slightly unmanned. He wondered why he had come, felt in-secure, and blustered and swaggered to hide his self-consciousness. In a private room upstairs, Dan sat down to dine with Goodnite and Gaylard.

Gaylard had a high, effiminate voice and his face was minutely wrinkled. He called Goodnite "Hiram" and put Dan at ease at once. He was of good bulk, and his little eyes searched in-

cisively the eyes of his guest. While Dan was occupied with specting the array of silver on napery of ivory-whiteness, and the display of food. ### Population Problems

By W. H. W.

THE lay reader will be agreeably surprised by this volume (Population Problems in the United tes and Canada. Edited by Louis I. 4) should he chance to pick it up. He will discover a number of professors at unorthodox opinions on the problems of population and offering substantial epinion in this book, a compilation of the lectures delivered by 25 experts at the December, 1924, meeting of the nerican Statistical Association.

Their scorn for technical terms has ade this volume an excellent intro-uction .to the study of population oblems, despite the fact that varied horship has made it uneven in qual-It could not be expected that all who took part in the symposium equal George Soule's chapter on the Training and Direction of Our Wolfe's spirited presentation of the optimum population concept. Hear Pro-fessor Wolfe:

"The notion of the optimum assumes that the function of the ec mic process is to serve individuals. he nation may be regarded as a proactive unit, but must not be thought of as an end. . . . An optimum policy, aiming at the maximum percapita income, will require . Stringent restriction of population growth."

Throughout one meets with the sugconclusion (never explicitly stated) that capitalist industry will in-evitably face a stone-wall crisis when mlation increase has exposed the of haphazard productio for profit. In chapters devoted to ob consideration of the available data it is pointed out that shortly this continent will face both the exhaustion of its mineral resources and steeply rising costs in agriculture. Birth control and expert planning by society are solutions suggested, if huge masse of population are not to be submerged by lower standards of living

There is something of joy in the enthusiastic way in which such super-stitions as the "Nordic myth" are swatted by Alexander Goldenweiser and Ales Hrdlicka. Certainly, the liberal tone of the book and the high respect its authors have for the facts of the case recommend it to the intelligent student of our social ills. By eans the least of the book's merits the introductory chapter by Louis I. Dublin, statistician of the Metropolitan Life Insurance Company whose liberal intelligence seems to - contributors.

New Russian Peasant;

A Hopeful Report N AMERICAN writer of Russian A birth - Maurice Hindus - has lately shown that it is still possible to say something new and interesting about Bolshevik Russia. In his book, "Broken Earth" (International Publishers, N. Y.) he gives us the record of a journey that he made, a few months ago, down the Volga, through the Tartar Republic, the Ukraine, Great Russia, White Russia, the Cossack settlements, until he came to his native place, a small village of about ore hundred and fifty families tucked away in the mudlands of Central Rus-

What he saw and heard in this vi'lage, miles away from the nearest railroad, constitutes the subject, matter of the main part of "Broken Earth." Mr. Hindus is an excellent reporter, and his pages fairly sparkle with life.

We see in this book the older peasants going about their tasks in the accustomed ways. Their economic ondition is not a whit improved since pre-war days; they work in the fields with the same implements; and they are almost as distrustful of the Soviet officials as they once were of the Czarist minions. But, in spite of al', a new spirit is in the air. Mr. Hindus speaks of the articulateness of the muzhiks as one of the outstanding gains of the revolution. They not enjoy the right to speak freely, but also ing to think, and they are gradually outgrowing many of the old supersti-

The upshot of all is the author's conviction that Russia, despite the mistakes and barbarities of Czarists, Bolshevists and peasants alike, is actually, if slowly, emerging on to a higher plane. Mr. Hindus stresses, in particular, the enthusiasm of the younger generation, which talks of tractors, education and electricity, and is looking forward to the building L. D. A. society.

### A New Socialist Program For New York State

By S. H. Stille

HE success of an organization

The Socialist Party of the State of New York, governed and directed by the Executive Committee, depends upon the plans and the visions of the committee. No stream rises higher

Our plan is as big as the United uncertainty that faced it continually. process of constant building. New Drive after drive has been put on for York will demonstrate that it can be everything but the Socialist Party of done. the State—such worthy causes as the L. I. D., the Rand School, The New Leader, with other minor drives, and the sums run into the thousands. If in the end there are a few pennies left, cend them up to the State office, with which the State Secretary is expected to build the Socialist Party.

Facts should be reckoned with. Here
is one: The Socialist Party of New York State cannot grow, build, thrive, succeed, realize our dreams, under the present hit-and-miss system. We must have a systematized plan of constant organization going on, governed by a carefully prepared budget. This message is built entirely upon my experi-ence for the party as organizer for the last year, in which I have brought in around nine hundred members, besides many other minor results. Other plans may work-I do not know-But I do know that the following will work and bring fine results. Here it is:

We have plans running through 1926, 1927, 1928. We have the budget complete for the year 1926, which calls for the expendi-ture of \$11,547. This includes the expense of the State office, paying the present debts, including organization,

lectures, literature, conventions, etc.

Now the budget will be realized by the sale of a Debs Liberty Bond which is a work of art, also including the sale of stamps. The bond is a pictorial outline of the history of the Socialist Party, including the pictures of thir-teen of our internationally known leaders. In the center of the bond are fine selections taken from Debs' famous speech on "Liberty." It is finished in two colors and is indeed a beautiful on to take his place with the Lincolns piece of work, one that you will want of the world. to frame and hang in your room. The bonds will sell for from \$5 up and can be paid for any time through the coming year, a payment being made with the application. The bond represents organized to further the ideals and bet-ter the living conditions of those who do useful labor. The dividends are not paid in cash, but rather in perfecting the organization, spreading our propaganda, building new locals, rebuilding old ones and thereby placing the Socialist Party of the State of New York on a dignified, safe and sane financial basis, redeeming it from its present

status of a beggar.

The Socialist Party faces one big eternal question. It is organization. We must organize as we have never done before. A comrade remarked the other day that "the voters of New York City gave the city to Tammany Hall." Comrades, please bear in mind that Tammany had an organization to re-ceive the gift. Tammany lives and con-

tinues to live by organization. When the present plan of our state is worked out in detail and ultimately is adopted HE success of an organization depends upon constructive and systematic planning. A broad vision embraces the entire landscape. A builder sees the building complete in every detail long before the building is completed.

The success of an organization out in detail and ultimately is adopted by the national office we will hace. After ten years of such constructive planning and budgeting, a bigger and stronger party in the States, than we ever had. It can be done in ten years. It will then be a solid and active group, truly Socialists of natural growth, and The Socialist Party of the State of truly Socialists of natural growth, and

committee. No stream rises higher than its fountain head. A party is as big as the vision of its leader, and no bigger. For a long, long time the state once have a national plan of organizaoffice has lowered its dignity to that of a beggar—no budget, no plans, no monoy, just hobbling along from day to day in constant fear of the terrible ing to a small gathering, it is a slow to day in constant fear of the terrible ing to a small gathering, it is a slow to day in constant fear of the terrible ing to a small gathering, it is a slow to constant the lider. New treatment of constant building New Treatment in the limit of the state o

Comrades, do you get the vision? Do you see the field, the golden opportunity? Do you want a state organization working and functioning in a proud and dignified way, slowly putting into reality the lofty ideals of our cause? If you do, be sure that a Debs bond hangs in your home. Bear in mind that we are not paying big money for halls, dinners, etc., but that one hundred cents of every dollar invested goes to the party. It is a better method. Eternally the spirit of change works wonders, destroying the old, designing and building the new. Winter is followed by spring, snow is replaced by flowers and verdant fields. One age grows into another. From the ashes of the old we build anew.

Feudalism, slavery, monarchies and empires have disappeared down the long lane to oblivion. Capitalism now rules the world. We are living in the twilight and dawn of a new era. Canitalism is next to join the ranks of the not wanted and fade away to be re-placed by a Socialist age. Socialism is inevitable. It is a stranger to defeat and failure. From all our tem-porary trials we shall rise triumphant victors, and declare that the emanci-pation of the producers and the spirit of brotherhood shall prevail; peace and liberty will follow the sunrise.

There stands Gene Debs. his sad. sweet smile is all aglow with his head bowed. He wants to see the party rebuilt, to see the gaps in the ranks for-ever closed, to see his army united in purpose, its banners unfolded and its march resumed before he passes

of the world.

Comrades, be cool, be resolute, firm, loyal and energetic. Help us plan for years of practicable and constructive organization so that we may have a party of which we may all be proud an investment made in a political party and happy. As your organizer and servant I have done my best. It is up to you.

The creation of the Cinedie occurs

at the time when Paris is celebrating the thirtieth year of the invention of the cinema. A commemorative plaque, affixed on the building where once stood the Grand Cafe, reminds the Parisians—and the visitors to the capital—of what they owe to the Lumiere Brothers. Thirty years ago, writes the Paris correspondent of the "Christian Science Monitor," in the underground room of the Grand Cafe, bands of no more than 17 yards were unrolled. For the modest fee of 50 the Comedie Francaise has centimes one could see a train entering a station, workmen coming out of a factory, a ship leaving port.

A New Opera By Siegfried Wagner

A new opera by Slegfried Wagner has been produced at Karlsruhe and with a very kindly reception. Written some ten years ago, this work, "The Peace Angel." has nothing to de with any other war than that waged by individuals against one another. The setting is medieval, and the story that of two illicit lovers who took their own lives to find in death the about dragging them from the grave The figure of Christ appears suddenly both pitiful and powerful at the same time, turning the petty hatred and Music Notes bigotry into reverent awe and some inkling of understanding of the significance of true religion.

#### Luigi Pirandello And His Plays

"I make no pretensions to the role of philosopher, nor do I assume responsibility for any psychological the plays." Luigi Pirandello stated in a recent interview given out at Milan. "Those who find in my work a relationship to Freud or Bergson had better concentrate on the unity of idea which they will find in my writing from my first story to the latest play. I consider my conception of the tragedy of life my own, free from outside influences."

Pirandello declared that the process of creation is still a mystery to him. His ideas, singular and outre as they

appear, simply happen.
"For instance," he said, "my comedy, Right You Are If You Think You Are, was born in a dream. And yet I can't possibly describe the process whereby the obscure symbolism of sleep was molded into a play.

"As to any special beliefs or tenets that I may hold? I believe that external reality exists only subjectively; that is, in the eye of the beholder."

He was questioned as to his plans in onnection with his political career He has just been elected Senator and much concern has been felt among his admirers lest his official duties inter-

"Most distinctly," he said, "I intend to continue writing plays when I am in office, however foreign this may be to the custom of Senator."

He has several new plays on the fire, among them "La Moglio di Prima" (The First Wife), "Le Nuovy Colonia (The New Colony), "L'Amica delle Moglie" (The Friend of Wives), and "Diana e la Tuda."

"These plays," he assured the inter viewer, "will not necessarily be profuced by the company which I direct I try to keep my company's activities quite independent of my work as an author. I am planning next year to give a repertoire of Italian compositions, several new French plays and new interpretation of 'Sophocles 'Electra'-not in the modern spirit, but in as close observance of the old Greek manner as possible

The company will play in Italy for a while and will then go on tour in Spain and South America. Pirandello's taste in foreign authors

#### PASSAIC'S PROSTITUTION

SATURDAY, APRIL 17, 1926

E now have in Passaic and vicinity the inevitable fruit of textile mastery. The petty governing officials by their actions leave no doubt as to their allegiance. The governing powers of this community are bureaus and agents of the textile owners and only a feeble attempt is made to even mask this brazen fact.

This strike of textile workers has been one of the most peaceful and orderly strikes ever waged in New Jersey. The men and women have displayed excellent discipline in the face of trying conditions and repeated provocations on the part of the authorities. Practically every illegal act in this strike has been committed by responsible public officials or has been the logical fruit of their servility to a handful of textile owners.

Citizens have a fundamental right to meet in peaceful assembly to discuss their welfare. Either the First Amendment is still operative or it has been repealed by the textile owners and their political poodles in office. Norman Thomas and others have been arrested for attempting to hold meetings to discuss the welfare of the strikers. The arrests are in violent conflict with the First Amendment. But not satisfied with using this Amendment as a footmat for the textile masters the bail of arrested victims has been fixed so high that it is apparent the intention is to prevent the strikers from having any meetings whatever.

There is violence in Passaic but the violence, disorder and defiance of elementary rights which we assume citizens are guaranteed have been committed by officials in office. Textile capitalists are the governing officials. Their will is law, not constitutions and statutes. A capitalist revolution has been effected by these officials. Prostitution of public powers is masked as "law and order." The government has been locked up with Norman Thomas. To free both is the task of the hour.

#### LUTHER BURBANK

N THE death of Luther Burbank there passed an American who was alien to America. He was alien to the country of his birth in the sense that his outlook on life was strangely in conflict with our dollarized civilization. Most any other American would have capitalized his discoveries, organized a horticultural trust, sold millions of watered stock, piled up wealth and talked nonsense after the fashion of Gary and his kind.

Luther Burbank cared nothing for the things that motivated our Babbitts. He was as strange in capitalist America as the rosecolored poppy that issued from eight years of experiments. He was a scientist, a lover of nature, a pioneer in his field of endeavor. His only use, for money was to serve him in producing a spineless cactus or a new flower. Many millions of dollars were made by others from the results of his experiments, but his chief reward was in the knowledge of achievement and knowing that he was serving

When we compare Burbank with the typical American like the late William Jennings Bryan we also establish a marked con-Bryan, professed fundamentalist a go-getter. His palms itched for coin and his mind belonged to a primitive age. In fact, Burbank, who personally knew Bryan, once said that the skull with which nature had endowed the latter "visibly approaches the Neanderthal type." Burbank was a thinker, while Bryan never learned how to think. Burbank belongs to all humanity, but the Great Realtor is cherished only by a medieval

Luther Burbank was a rare type, too rare, for the United States. When the capitalism that smothers genius is no more there will be room and opportunity for his kind.

#### RARE COURAGE

FEW educators have the courage that Dr. James Sullivan, Assistant Commissioner of Education of the State of New York, displayed in his address in connection with exercises in commemoration of the founding of the City of New York. He referred to the committee of correspondence and the part they played in the American Revolution. These committees went to extremes in protecting the revolution by silencing opponents, confiscating property, exiling Loyalists and in many other ways suppressing opposition.

His remarks were met by hisses in the gallery, where, no doubt, there were some who think of the revolution in terms of a polite social affair where nice ladies and gentlemen might gather without getting their clothes soiled. As a matter of fact, no tricks in the art of suppression and force were overlooked by the sainted "fathers" in getting what they wanted and private property of their opponents had no sacred appeal to them. The

'fathers" were the original "wobblies.' Dr. Sullivan's courage is rare, for it is unusual for the truth about this matter to be told at such gatherings. He will be fortunate if the Ancient Order of Descendants of the Patriotic Fathers does not indict him for treason and boil him in oil.

#### FOOLING BRITISH WORKERS

WE HAVE received a letter from H. W. Lee of the British Trades Union Congress General Council expressing apprehension over a propaganda led by the London Daily Mail. This crusade is to sell to British workers a glorified view of American methods in industry. These methods are regarded as beneficent, the American capitalist generously granting high wages to the workers without the intervention of the trade unions in return for faithful service and in-creased production. The idea is to break down the British trade unions on the assumption that as living standards are higher in this country with a much smaller portion of the population organized in trade unions living standards will improve in England as the trade unions are abandoned.

To students of American economic history this view will appear grotesque. Living standards have always been higher in this country than in Europe because of the influence of free land down to the twentieth cennothing to do with it. But these standards are not uniform. They apply chiefly to the higher skilled occupations. Below them are descending grades of living until we reach large masses whose poverty is as desperate as any to be found in London's slums. chronic distress of the workers in mining, textile-production North and South, the low standards in the lumbering regions, hop fields, canning factories and the frightful economic misery that is widespread in the cotton growing sections of the South and Southwest, to nothing of the expropriation of hundreds of thousands of farmers in the West in recent years, all constitute a hideous contrast to the glowing accounts of American "pros-

perity. As for the "beneficent" capitalists, it is only necessary to point out that the Mail's campaign begins at the end of nearly five years of a tremendous campaign by the great masters of industry for the reduction of wages and the destruction of the trade unions. Moreover, this campaign has been waged by a class that has engaged in the greatest extortions of any class in the history of the world. Still another fact is that the masters of American industry have more organizations pledged to complete capitalist mastery than any other ruling class in the world. The publications of these organizations display a spirit no more modern than the Junkers of the old Prussia. Enjoying complete organization of their class, they expound a creed of complete disorganization of the working class.

The Mail has had a committee of Labor men in this country to investigate American methods of industry and that committee is on the back to England to report. We have heard nothing of its investigation in New York, certainly the most important urban center in the United States. In an interview in the New York Times we have a fore-cast of the report. Mr. Murray of the United Patternmakers is reported as saying: "The thing that surprised us most is the cordial relationship between workers and the employers.

How alluring! Did they find relations "cordial" in the coal fields of West Virginia and vicinity? In our anti-syndicalist laws? In the numerous spying agencies whose vermin swarm in our industries? In Cossack California? In the hells of the United States Steel Corporation? In the unhappy homes of textile workers of New England and the Carolinas? In the publications of the numerous employers' associations? Or did they find the "cordial" relations at nice dinners arranged by Babbitt go-getters?

We warn the British workers against the importation of this bogus "Americanism." Should they ever accept it their children will regret that their fathers had ever listened to the siren song of the Daily Mail. The future of the workers in all countries lies in their own organizations and the democracy which they must wrest inch by inch and day by day from the masters of the world. Any other road leads to disaster. Economic security and industrial freedom are to be won by labor organization, political and economic, if they are ever won at all.

#### MEXICO

Y THE recent exchange of notes between the United States and Mexico the latter country gets another breathing. The drive of the past few weeks for intervention in Mexico has been the most sinister that has been made since Pershing's troops were recalled from their invasion. We may expect other crusades of the same character. Our capitalist imperialists regard Mexico as the greatest prize in the Western Hemisphere and they are willing to sacrifice hundreds of thousands of American lives to have the American Government take over Mexico and hold it for looting by these mercenary extortioners.

The recent drive by oil and land investors had the active support of clerical imperialists and this group is by no means satisfied. Archbishop Curley in the current issue of a Baltimore publication again places his standard by the side of the pirate flag of the oil interests. "American journals, red and otherwise, sing the song of Calles and his robber band for pay," writes the exponent of love, tolerance and piety. One gets the impression that Curley is profoundly disappointed that the opportunity for spilling blood has passed.

If there is anything that will give the Ku Klux Klan a new lease of life it is this attempt to use the government for clerical in-terests in alliance with American bankers and capitalists with investments in Mexico. Imagine hundreds of thousands of workers mobilized in an American army, an army consisting of Catholics, Protestants, Spiritualists, Agnostics, Materialists and Koo Koos, to make Mexico safe for oil and clerical su-premacy! That would be an event unique in the history of modern times.

Workingmen of all views have nothing to gain and much to lose by any such raid. Their enemy is not across the frontier, but here in the United States, where the masters who would despoil Mexico live upon the unpaid labor of these same workers.

The process of the law was in any case most oppressive to a prisoner. Penn and his fellow prisoner, William Mead, once a captain, were required to plead after the indictment was read. They asked for a copy of it, but it was refused unless they pled first: so they had to plead "Not Guilty." They had no legal assistance. They were brought to the bar again in the afternoon, where they were kept for five hours till quite exhausted, when they were sent back untried to prison. Their case did not come on till the third day. Two constables, Cook and Read, deposed that they had been sent to disperse a meeting in Gracechurch street, and that they heard Penn speaking at that meeting, though they could not hear what he said. They also saw Captain Mead, as they called him, and one, Read, said that he had been kicked on the shin. There were about four or five hundred there A person named Whiting also stated

He turned to the jury and, since the Recorder had refused to give them the law upon unlawful assembly, proceeded to quote from Coke. The Recorder, forgetting he had to deal with an ex-army officer, mockingly raised his hat and said: "I thank you, sir, for telling me what the law is." "I would slit his nose," said the Lord Mayor. Penn prohim to the ground." The jury and the Recorder argued for a long time; the back and in open court commended something the same was needed in England. The jury was sent back and locked up for another day and night.

> Next morning they were twelve jaded-looking men, but they made an attempt to return again the verdict they had written. The Recorder forbade it to be read, whereupon the foreman declared that their verdict for Penn was "Not guilty" and for Mead "Not guilty." The Recorder was completely defeated. Furious though he was, he could not describe this, too, as "no verdict." He made each member of the jury answer his name and give his verdict, and not one of them wavered. Then he said, "I am sorry, gentlemen, you have followed your own keep my life out of your hands. But for this the court fines you forty marks a man and imprisonment till paid.

> Penn then spoke.
> Penn: "I demand my liberty, being freed by the jury."

Mayor: "No, you are in for your fines."

Penn: "Fines for what?" Mayor: "For contempt of court."

Penn attempted to argue that the fine was illegal, but he and Mead were hurried out of court along with the jury. Both prisoners and jury were immediately put into Newgate prison, and that was the end of the trial

Fortunately, Mr. Edward Bushel was man of means as well as great ob-stinacy, and in spite of many obstacles and much expense succeeded at last in getting a writ of habeas corpus, which reversed the order of the court, and ment. And since then no judge has sent a jury to prison for returning a verdict of which he did not approve. though often enough his attitude has shown that he would dearly have liked to do so.

TWO SONNETS Naked I never saw a room so full of thing Of things that had no meaning. Persian rugs.
Old English chairs, the furnishings Of palaces, gay Spanish barroom jugs.

The room was dark. I should have said it, gloomed.

Perhaps a paid companion told her: "Light Will spoil your precious things." And so entombed She sat among her loot, her lips shut tight.

So might a savage woman cower over bones That meant a meal, in winter, for her young. About her neck a necklace of bright stones, A leopard skin across her shoulders hung. Beneath the silks and velvets of her dress I saw the misery of nakedness.
