The one thing that will be influential for the miners is not the strength of their political pull with Calvin Coolidge but of the economic pressure they can bring to bear merely that the gallant ranks of the strikers hold firm but that if possible the strike should be spread to open shop mines. The unexpected strength of the Colorado strike would seem to be an argument proving the unrest of the miners in various fields. At any rate, none of us can afford to relax our efforts for these brave strikers and their families because we put our trust in the mediation of politicians.

Honor Medal For Scientific Genius

PROF. VLADIMIR KARAPETOFF

Prof. Vladimir Karapetoff, of University, for many Cornell years a staunch Socialist and fre quently a candidate for state office on the Socialist party ticket, has received an honor which has come to few American scientists.

Prof. Karapetoff has been informed by the Franklin Institute of the State of Pennsylvania that, upon the recommendation of the Committee on Science and the Arts, the Board of Managers of the Franklin Institute, has voted him the Elliott Cresson Gold Me "in consideration of the inventive ability, skill in design and detailed theoretical know ledge of kinematics and electrical engineering displayed in the dev elopment of computing devices."

The medal will be presented to Prof. Karapetoff on Wednesday, May 16th, 1928. In addition to his membership in the Socialist Par-ty, Prof. Karapetoff is also a vicepresident of the League for In-

"Competition" Is Blamed

The United States Bureau of Laor Statistics reports that the usual vages for male workers in northern otton mills range from \$18 to \$24 week; women (who constitute alst half of the employes) usually get between \$15 and \$25

The reasons given for these cuts are "competition" as well as "poor business conditions." As far as the first reason is concerned, a statement issued recently by Parker F. Murphy. Secretary of the Lowell, Mass. Trades and Labo Mr. Murphy said:

"The Naumkeag Company of Salem, one of the strongest competitors of the Pepperell company, is paying wages 20 to 25 per cent higher the wages paid by the Pepperell company. Colorado Fuel and Iron Desire to Embarrass Co**lumbine Owners Subject** of Comment

By Frank Palmer

DENVER-One of the first requests that will be made of the church investigating committee representing Catholics, Protestants and Jews, after it reaches Colorado will be that it probe the "why" of the Columbine massacre.

There is a mass of circumstantial evidence to be laid before such a committee and it is believed by some of the more optimistic that it will take only the right to put certain individuals on he stand and ask a few questions to "break" the whole story.

The mystery lies here: While the Rocky Mountain Fuel Company always had been of the old hard-boiled school of coal operators, just about the time the strike started Miss Josephine Roche, a member of the Juvenile Court staff under Judge Ben Lindsey, inherited dominant (though not a majority) interest in the company. She called Merle Vincent, a progressive attorney, to represent her interests. They immediately discharged Walter Belk, notorious since Ludlow days, as head gunman at the Columbine and announced they would not dig coal under guard. They "accepted the resignation" of George Peart as General Manager and of Judge Jessie G. Northcutt, the leader in the fighting at Ludlow, as General Counsel. Then they ordered that Ted Peart, son of the former General Manager and Superintendent at the Columbine, leave the gates open and allow the strikers to hold their meetings in the Columbine, Miss Roche saying, as it is reported, that she would "sell her stock for fifty cents if blood were shed on the property."

Adams Feared Bloodshed

Governor Adams was apparently anxious that this strike should pass without bloodshed. He refused to call the militia until after the Columbine affair. He gave orders that the state police should not use their guns except in defense of and most important of all, when he country.

Miss McKellar told the union leaders that the Actors' Equity Association realized that the attempt of the New York Traction interests to secure a drastic injunction against the Amalgamated and the entire membership of the American Federation of Labor is a blow aimed at all organized labor and that the right of all wage earners to organize for their own protection is being challenged.

Here's a New Lindbergh Story - -HOME GUARDS/HATED DAD

HERE'S a Lindbergh story that hasn't been going the rounds of the daily papers. It goes back to the days of the World War, when Lindy's father was a candidate for governor of Minnesota. The writer of the story found the Home Guards of Minnesota were chasing the elder Lindbergh off the city streets for fear he might disrupt the country. The story:

How the super-patriots did attack their lives, which were never endangered, Lindberg (the elder). Enemy to his Pacifist, Seditionist, Pro-Gerheard there were machine guns at the columbine on Nov. 19, he ordered them were hurled at him, but the chief wearemoved immediately.

"CAME THE DAWN"

"Hark. Hark, the lark 'gainst Phoebus 'gins arise!"

SINCE the first Cro-magnon chipped the first songs of his race on the dripping walls of his cave, the poets of all ages have waxed lyrical about the dawn. Their optimism strikes us as unwarranted. We have the suspicion that these matutinal minnesingers have composed their various odes, ballades and lyrics exalting the sunrise, long after dark. At any rate the majority of poets of our acquaintance know as little about the dawn as our black cat Isabel's grandchild, Jacob Panken-the handsomest kitten on the east side -knows about low-temperature carbonization of bituminous coal. Their idea of the dawn is around halfpast one o'clock in the morning in the Ivory Tower in the howling minettas in Greenwich Village, New York.

With us dawn consists in arising from dreams of listening, gagged and bound, to an address on the Founding Fathers by Elihu Root at the Town Hall, over whose doors now stands the inscription, "Ye shall seek the truth and the truth shall make you free." (It is no dream of ours, by the way, that this should really read, "Ye shall speak the truth and the truth shall keep you out.") At any rate, we rise in blind agony and totter towards the kitchen, which resounds with the buzzing of the dumb-waiter bell. This signals the emergence of ice from the lower depths. Our ice is delivered to us by a young revolutionist, a junior member of the Workers' Party, now attending the DeWitt Clinton High School, who has taken to heart the slogan, "From each according to his ability, to each according to his reach." His general sense of direction is as revolutionary as his tenets. We live on the fourth floor, and if by any chance he succeeds in elevating the ice between the second and third, he considers his duties well done, and departs to harry other householders. After several weak and futile shouts of "Higher!" down the chilly and silent shaft, we begin the pulling-up exercises. These are grand for developing the biceps and chest muscles, and cause a vast hilarity on the part of Jacob, and his sister kitten, The Bear, who take advantage of this god-given opportunity to crawl with sharp claws up our exposed nethers. (Never yet have we been able to discover a make of pajamas sufficiently sturdy to ward off aspiring felines).

When we have finally clutched the icy burden to our scanty bosom, we stagger across the floor with it to the ice box, and there let it fall where it will. Usually it wills to fall upon the milk-bottle which Mr. Borden has ironically labelled "Grade A," crashing said bottle into a thousand fragments. (Prolonged applause from cat cheering section).

Exhausted by these struggles, we returned to bed, to obtain what we hopefully call our beauty sleep. And then begins the "steam-heat chorus." This is played upon coils of pipes by irate tenants all through the apartment-house. Its purpose is to rouse the Polish janitor to the point where he will get up and start the furnace. Members of the orchestra use hammers, nail-files and the backs of hair-brushes. hammers, nail-lifes and the backs of hair-brushes.

One talented musician directly above us is apparently
learning to play the Polish national anthem in the
vain hope that some lingering sense of patriotism will
induce the janifor to stand up while the performance is going on.

In sheer desperation we finally arise to take in the morning papers. Our blood-shot eyes fall upon the morning papers. Our blood-shot eyes fall upon a self-explanatory photograph of Miss Sue Isabel Boggs, "the Little Girl from Greenville, South Carolina," who "never had a beau in her life." It seems that now Miss Boggs has gotten a beau, heralded by the New York World as a "rich New Yorker." At his luxurious residence, 316 Nineteenth Street, College Point, Queens, this fortunate youth announces that he is soon going to Greenville, and hopes to return engaged. Wishing him all the luck in the world, we read on through a welter of hammer murders, gas explosions, impeachments of Oklahoma governors, and sewer probes, to learn to our vast delight that the firm of Cowan, Dempsey, and Dengler, are in search of a vice-president for a company "a few miles out of It seems this vice-president will have to spend practically a year in studying and in earnthe right to leadership "over the able junior executives who are now at the head of the sales force. Entranced, we read on. "During this learning and earning probation, he will have to be content with a salary of twenty thousand to twenty-five thousand year, but just as soon as he has proved himself, he be made vice-president in charge of marketing." t of course dashes our hopes. We would gladly That of course dashes our hopes. enough have been a learner for Messrs. Cowan, Dempsey, and Dengler, but it is sheer brash on their part ask anyone to be content for a whole year with a pitiful twenty-five thousand dollar salary.

The lady on Rivington Street who called up the telephone company and told them to take the dial telephone out of her home, had the right idea.

"But, madam," was the answer of the telephone's representative, "we can't do that. All the telephones your central are dialled. You will have to learn to operate yours.

"Nu," exclaimed the lady, "I should be a professor for the telephone company!" We should be a pro-fessor for twenty-five thousand dollars a year, earning the right to leadership over able junior executives!

So throwing down that offer, we go on to take our morning cold plunge. Cold plunge, at any rate, as far as our right foot is concerned. By this time the mail has arrived. We are informed that there will be a meeting of the executive committee of the L. I. D. last Tuesday, that the Washington Square Association expects us to be illuminated on Christmas Eve. (as do most of our friends,) and that we can get cigar-lighters at Dunhili's for as low as two hundred dollars apiece. Further, the Society for the Preservation of Second-Class Cretins, of Brooklyn, wants ten dollars for their Christmas fund, and the in Wilton, Connecticut, where we spent last summer, is putting our bill in the hands of his lawver.

Sure, the dawn is a great institution-to write poems about.

The Whigs were divided into rival clans of conflicting views, all enemies of Jackson either because of his attitude towards the bank, the tariff or nullification. Harrison, White, Webster and Mangum were anti-Jackson and opposed to Van Buren, Jackson's friend, but they had no common political views. So wide were the divergent views of Whig leaders that they never attemptive the formulates and mass enacted in three bills they provided for the abolition of the slave trade, but not slavery, in the District of Columbia; a more stringent fugitive slave law; the admission of California as a Free State; territorial governments for Utah and New Mexico without any restriction of slavery.

Instead of composing the slavery question the compromises aggravated it. This time he is horror-struck at the very idea of this free republic receiving one Moukhtar Bey as amba dor from the bloody republic of Turkey. James of James cries out that the cussed Turks "butchered 30,000 Christians in Armenia", which had been recognized as a self-determined nation by all the Allies. Of course, butchering Armenian Christians is a crime we would never be guilty of, though butchering Christian miners in West Virginia, Pennsylvania and Colorado gets me guessing where we get it over the terrible Turk.

But the Armenian Christians were butchered after

we and Standard Oil had recognized them as a free, self-determined and independent people. "And now," rails James, "this man Moukhtar Bey, representing those who murdered but yesterday 30,000 Christians and despoiled Armenia, is to be welcomed and embraced by the President in the name of the American

Remember, again, that the 30,000 in Armenia were not the only Christians to be butchered in order to make the world safe for Fascism and High Finance. As I remember it, more than 15,000,000 Christian and Heathen boys went out to win the war you and other noble and tender-hearted statesmen and plutocrats

And what is war if it is not butchery, and bestial butchery at that? I may be crazy and unpatriotic, but I'm blessed if I can see how you can go wild over the by-product butchery in Armenia and then pat yourself on the back for helping turn the whole to one vast butcher shop.

The trouble with your crowd, James, is that you are absolutely blind as a bat to the blood on your own hands, unable to see yourselves as others see If Moukhtar has anything on you, Haig, Foch Hindenburg and the rest as a butcher, all I've got to say is that he needs to be pitied and not damned

Coolidge pointed out that the Republicans had relieved the farmers of paying income taxes, which the good for nothing ungrateful grub givers don't seem

Well, here's another advantage the backbones of the nation have over the brains of the republic. An Illinois farmer was condemned to pay his ex-wife \$25 a month alimony. He didn't come across. She haled him into court. This was where the would-be golddigger made a mortal error. "He proved that he had earned \$25 since the court order had been is and that he did not make \$25 a month cultivating land on share rental" in Illinois, one of the richest agrilitural states on earth. The judge, having some humanity left in him, which is remarkable in a judge. decided that he could not be held in contempt if he not earned any money", and gave him another month to cough up what he didn't have and couldn't get

After this, who will dare say the farmers are not being spoiled by special privileges? No incomes to No incomes to pay taxes or alimony on and special bulletins to tell them how to make cider with a sweet kick in it, privileges none of the rest of us are allowed, and still the old geezers aren't satisfied. The buffooning of the merry devil Sokoloff is an engaging counterpoint of the main theme, and its buricaquerie adds to its force. The power if Moissi, his mobile face and obedient voice, are further elements of the improvements. The Irish Players are successively in the skill of the acting that much of its success resides. KNUT HAMSUN, PLAYWRIGHT

The American Laboratory Theatre has now produced the first play by Knut sun to be offered in English in this country, "At the Gate of the Kingdom"; and in truth—while Hamsun is a flower-worth watching in any expression—this at least of his dramatic efforts in need of considerable tightening.

The theme is one of fairly frequent occurrence, though of permanent validity: currence, though of permanent validity: the struggle of youth to remain true to its conviction, against all the forces of life—the opinions of the settled majority, money, love, life itself—that bend it toward compromise or full betrayal. The situation is complicated by the unnecessary jealousy of the wife; her constant suspicion, while it leads, perhaps, to her own ultimate running off, is a distraction from the main purpose of the draman; yet there are elements of charm and amusement in the details of the play. Its worst fault is the extreme obviousness of the development of the plot; there is little about the play that one cannot tell at the end of the first few minutes of action.

The players make good efforts to infuse life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the control of the life into the somewhat stereotyped for the life into the somewhat stereotyped for the life into the sound in the life into the sound i struggle of youth to remain true to productions.

fuse life into the somewhat stereotyped drama; and an effective setting helps please the eye; but the root of the production is weak, and the flowering cannot be hearty. The Angelus Allied Arts Club, 139 Macdougal street, Greenwich Village, New York City, announces that several scholarships in voice, piano and elocution will be awarded to worthy applicants. This club has inaugurated a plan for bringing out unknown talent which deserves eminence in the musical and elocutionary arts but is not in a position to pay the high fees usually required for such training. Other scholarships in other subjects will be announced from time to time during the season.

The final selection of aspirants will be based on an actual public test at a well-known New York theatre. The club believes that at the present time many fine talents are lost to the world because of financial handicaps and it is making this offer as a concrete contribution to the workers who hold music at heart. Applicants are requested to phone Spring 0551 for information. Free Scholarships

Organize Now

Organize Now
Socialists in unorganized secitons should organize a local. Five or more can constitute a local. In places where a local is not possible, Socialists should become members at large. National Headquarters will gladly co-operate with the comrades everywhere. Organization leaflets, propaganda leaflets as well as books of all kinds may be had from the National Office.

News Matter

State, District and Local Secretaries should not forget to send Party news to the National Office weekly. Matter for publication in The Leader-Appeal and other Socialist papers is sent to these publications every Monday. Our members should take advantage of this so that all meetings will be given space in the Socialist press.

Kansas

The State Secretary, Ross Magill, 401
West 1st street, Garnett, writes that he
is anxious to hold meetings and organize
the Party. Magill is asking friends to

Michigan

Jos. Bernstein, State Secretary, 2210
Woodward avenue, Detroit, writes the
National Office for charter blanks, and
blanks for application for charter. He
has great faith in the new activity of
the comrades of Michigan.

Guy Lockwood has a good healthy
local in working order and also agrees
to assist in organizing other cities in
Michigan. Readers in Michigan should
write to the State Secretary and get
cooperation from him. If desirable, Guy
Lockwood will fill speaking dates and
organize Socialist locals. In places where
a local is not possible applications may organize Socialist locals. In places when a local is not possible applications may be mailed to the State Secretary for membership at large.

To The New Leader,
7 E. 15th St., N. Y. C.
I suggest that all your readers "turn Christians" for at least as long a period as it takes to write a check or insert a greenback in an envelope addressed to The New Leader as a CHRISTMAS PRESENT.

Here's mine—given willingly and gladly—as in contrast with quite a few that I will give because I have not the nerve not to.

Fraternally yours,

—GEORGE H. GOEBEL.

Idaho To Socialists and Sympathizers

To Socialists and Sympathizers
The 1928 campaign is upon us. If
you wish our party candidates to appear
on the state ballot next year we ask you
to affiliate with the party through the
Idaho State Socialist Organization Committee. We need your help. We need
funds to pay for postage, stationery and
circulars to put this over. Do not wait.
We must circulate petitions for 1,500
signatures for a place on the ballot. We
must have state, county and local organizations. Will YOU help? Write
and send all remittances to C. H. Cammans, Box 31. Boise.
C. H. Felton, Chairman, C. H. Cammans, Secretary.

State

Darlington Hoopes, State Secretary, desires to hear from Socialists in Pennsylvania where they are ready to organize a local or become members at large. He realizes that Socialists now in power in Reading should be given cooperation by a well organized Party throughout Pennsylvania whereby they may be able to give the news of Socialist administration to the people of other parts of the state.

The members, in cooperation with the Harlem Jewish Branch, Y. P. S. L. Senior and Junior Circles No. 6, are engaged in an effort to make a huge success of the dance and entertainment scheduled for Saturday evening, Dec. 24 (Christmas

The branch will meet Tuesday evening, Dec. 20, at the headquarters, 1167 Bos-ton Road.

Another meeting was held last Sunday and success was obtained in the 'organization of the new Bensonhurst English-speaking branch. Ten applications for membership have been received and there are at least another ten prospectives who will join when it is officially organized and chartered. Next Sunday afternoon at 2:30 P. M., at the Workmen's Circle School. 7313 Bay Parkway, August Claessens will speak on the "Socialist Movement in the United States". All Socialists and sympathizers in Bensonhurst are invited. Plans are afoot to hold lectures every week and an effort will be made to circularize every Workmen's Circle member livivng in the vicin-

ity. As soon as we obtain our new list of enrolled Socialists, every enrolled So-cialist will be visited in an effort to ob-tain more members.

A well attended meeting was held last Monday evening. Fourteen new comrades were present representing part of the recent wholesale addition in membership. William Karlin gave an excellent talk on matters pertaining to organization. The Friday Night Forum will hold its first session this Friday evening. Comrade Claessens is the lecturer. Branch meetings are held every Monday evening. An effort will be made to have a speaker on some current topic at everyone of the branch meetings. 23 A. D.

An Echo of the Sacco Case

A REPORT of the Judicial Council of Massachusetts to Governor Fuller presents a forceful criticism of judicial procedure in that state and recommends certain changes which vindicate the assertion that Sacco and Vanzetti went to their death largely because the present procedure permits one judge to sit in judgment upon all issues, including his own prejudice, except the question of

The Council declares that in a case which involves life and death "we think the responsibility too great to be thrown on one man. If he errs in any matter of discretion as distinguished from law the result is irreparable. Even if he is right, his decisions may challenged, especially in a time of public excitement and there is no tribunal to establish the fact that he is right. It is vital that our courts do justice; it is also vital that the people know that they do

justice. All of which is sound, but it comes too late to be of service to Sacco and Vanzetti. This very issue was raised in the Sacco-Vanzetti case. Governor Fuller knew it was an issue. So did the members of his advisory commission in this case, headed by President Lowell of Harvard. They let two men go to their death with the knowledge that one judge had sat in the trial since its beginning, that this judge passed upon the issue of his own prejudice and upon new evidence which the defense counsel claimed to have.

We have not the slightest doubt in the world that if the life of one of the ruling clique in Massachusetts had been at stake and the trial judge had been charged with the offenses that were charged against Judge Thayer there would have been no execution. There would have been a stay of the execution till the law could be amended so that a higher court could have passed upon the issues. Sacco and Van-"Send them to zetti were aliens and workingmen. the chair and consider the judicial procedure later. This was the attitude of all those with the power to nzetti bition of class malice and nothing else.

Southern Capitalism

THE increasing industrial development of the South has expanded to the Southwest as far as Texas with the rise of a new economic interest that will rule this whole section. Texas oil production by great petroleum companies and some thirty cotton mills are increasing the number of wage workers and the former hostility to large corporations is on the decline. The business class is eagerly seeking new industries and wooing more capital for investment. The Southwest is being surveyed by experts for raw materials to serve the greater industries that are expected.

The rise of capitalist production in North Carolina, especially textiles, in Virginia, Florida and Alabama is transforming an old agricultural region into an image of the North. Naturally, the Repubinvading the South with the invasion of big capital. This whole region was once a "solid" barrier against the Republicans. The election resas in the past ten years show a Republican vote on the increase and it rises with the development of industrial capitalism. This is especially true of Maryland, North Carolina, Virginia and Florida, Coolidge received nearly 130,000 votes in Texas in 1924 and with more invasions by corporations the Republican vote will continue to increase. The cry for a tariff by the capitalist class also becomes more insistent in the South and even the Democrats from the States that are being transformed hear their master's voice and forget the "time-honored principles of the

All this is to the good. The rise of capitalism in the South will bring with it organization of the working class and the possibility of a Socialist move-It will tend to make the workers forget the race prejudice which has been used by their white ters to keep them allied to reaction in politics. The Republican Party will bring the workers of the South nothing and the Democratic Party will, as it does now in North Carolina, hire out in service to industrial capitalism. A two-party alliance of capitalism will then range throughout the country and only the blind will be unable to understand its sig-

A Tale of Two Nations

TWO events within a few days in two nations provide a comparison and contrast that are of vast significance to the workers of the United States. Since last April the bituminous miners of Pennsylvania have been on strike. They are the victims of the most amazing injunction in labor history. They are being evicted from "homes" owned by mining corporations, face a bleak winter, and are dependent upon aid of the unions and their friends throughout the country. An invitation by President Coolidge to the corporations to meet the unions in conference is rejected by most of the mine owners and Coolidge lets the matter rest there.

The scene shifts to Germany. A huge steel trust threatened to lock out 250,000 workers on January 1 rather than keep an agreement signed last July to inaugurate an eight-hour day. A cable from Berlin to the New York Times Tuesday carries this news: "The German Government will brook no delay in putting the eight-hour day in force as far as heavy industry is concerned, declared Herr Braun, Minister of Labor, in a letter to the United States Steel Trust. As far as technically possible a threeshift day will be put into effect at the first of the year and arrangements necessary to introduce the system must begin immediately.

What a contrast between two nations! During the World War we were told that the Germans were fighting for "autocracy" and the Americans "democracy." There are starving and evicted miners in western Pennsylvania who fought in the World War. We are certain that if they were asked to choose between the policy of the German Government and the policy of the American Government they would choose the former.

Why does this contrast occur? It is because the organized masses of Germany have one of the strongest Socialist parties in the world and the German working class have a powerful fighting group in the Reichstag to fight the battles of Labor. group has a powerful influence over the Ministry itself. One of the most powerful corporations in Germany is compelled to live up to its agreement with the workers because the latter have political power to protect their unions. The German Government will not permit a lockout. In our bituminous coal fields we have what has become a lockout and the Chief Executive of the United States practically washes his hands of a struggle that means measureless suffering for many thousands of men, women and children this winter.

Workingmen of America! How long will remain powerless in the affairs of government? Why must the United States be one of the leading nations of the world where the working class is beaten inch by inch and day by day for lack of political power? Awake! Political power is yours if you The Socialist Party shows the way.

Billions For Arms

PRESIDENT COOLIDGE has approved a fiveyear naval building program involving a billion dollars expenditure which exceeds the 1916 naval program when war was a possibility. navy" men have their way. Coolidge declares that this does not mean competition with other nations. We must take his mere assertion for this. matter of fact this program is provocative and will lead to an expansion of naval building abroad. It may be the beginning of an armament race that will end in the ditch of war. Then we will have a "war to end war," another peace of desolation, more armaments, and thus repeat a vicious circle.

The so-called "statesmen" have learned nothing new and have not forgotten anything old. All of them talk glibly about the need of being armed to 'preserve the peace' but when the leading nations load up with arms they are ready to fight, not to preserve the peace. They are all the more ready to fight when there is competition between each to ac-

cumulate more arms than any other one. The stupidity of all this is evident from the fact that the relative strength of the powers can be maintained by a general scaling down of the arms of each. If it is to be a ratio of 5—5—3, that ratio can be maintained by all increasing their proportionate strength or by decreasing it. In the first case it is certain to lead to armed conflict. In the

second case it makes conflict more remote. This is so elementary that a schoolboy can understand it but the polished gentlemen in control of nations do not grasp it. Now and then one of them rises to rock the boat. The others follow the This lunacy continues till millions are called to the colors to fight over some issue of concern to big property interests but of no concern to

the toiling masses. It is significant of the outlook of Coolidge that he approves this bilion-dollar program for destruction but has disappointed the expectations of millions of people in the matter of recovering the devastated areas in the Mississippi Valley and building against a return of another flood disaster. Billions for protecting the trade and investments of the capitalist and banking classes overseas, but let the people in the flooded valley shift as best they can.

The Fascist Farce

OBVIOUSLY, the Dictator of the Slave State of Italy has ordered his servile gang in the United States to "get" some victims as the result of the murder of two Fascists in the Bronx. Mussolini and his followers in this country are not They want anxious to punish the real murderers. victims. Anybody will do so long as they are opposed to the slave regime in Italy.

All this is apparent from the trial of Greco and Carillo. The cross-examination of Alexander Rocco, Fascist organizer and star witness for the prosecution, proved that gentleman to be a weak ree? upon which to lean. Claiming to have been a witss of the murders, Rocco dramatically pointed to Carillo as being one of the men who committed the crime. Unfortunately for the "star witness," on the day of the murder he had given to the po lice a description of the alleged murderer. This earlier statement was so in conflict with his identicourt that Rocco presented a sorry spectacle when he was tied in his own contradictions.

Yet this is the sort of vermin that rule Italy. The case is about the weakest ever staged in New York but friends of the accused men will not relax their efforts till they are acquitted and return to their homes.

CRITICIZES MAURER

Editor, The New Leader: I happened to be in Boston when nrade James Maurer lectured on "Conditions in Russia." Comrade Maurer is a member of the Socialist Party, so am It was, therefore natural that, I, together with other comrades who happened to be born in Russia should be interested to hear what comrade Maurer had to say. Most of us happen to read everything that comes out of Russia, I, ce, have not missed a "Pravda" (The Central Organ of the Russian nist Party) in the last three years. I am a constant reader of the "Isvestia." of the "Ekonomitcheskaya Zhizn, "Krasnaya Nov." and other Russian periodicals. I went to Comrade Maurer's lecture, not to find out what is really going on in Russia. This I know from the Russian Press and literature I wanted to learn how Russia impresse an American Socialist. I expected Socialist interpretation of Russia, and Socialist appreciation of Bolshevism.

What a disappointment! I heard from nrade Maurer an editorial from "The Daily Worker." The same language same style, the same justifications of everything; even the same jokes! word of criticism. Comrade Mauren has not found anything in Russia that he could not justify. Everything is good, fine and satisfactory.

What had comrade Maurer really seen in Russia? He was there three weeks He does not understand the Russian language, nor its psychology. Nevertheless, he is convinced that Socialism is really being built there, that the workers are free, happy and contented, more than in any other country of the world; that strikes are really unnecessary. Conflicts of course do occur, but the workers have their own government and this government settles every conflict quickly and nicely to the satisfaction of the workers. He was telling his audience about the great Russian trade-unions But he failed to make clear why trade unions are necessary in a country where everything belongs to the state, and the state to the workers. He found Russian production has risen 15 per cent above the 1913 level. (He could read in every Russian paper that this is not true Maurer admitted, of course, that there is no such thing as freedom of the press or of speech, or assembly, or of organization. Does he justify it? He cordented himself with repeating what Stalin told him that "It is alright, it is necessary for the preservation of the Soviet Government." Comrade Maurer seems to agree with Stalin, though he must know that freedom of press and of speech is denied not only to the bourgeois class in Russia and to the Socialists

out also to the Communists. Russian Freedom

It should not have been hard for omrade Maurer to learn that there is freedom in Russia only for the ruling Stalin clique. While the "Daily Worker is legally published in United States Trotsky and Zinoviev, the first commander of the Red Army and the father of the Communist International, cannot legally publish their platform in Russia Comrade Maurer did not utter one word of disagreement on this question. One thing, he said, is that "we Americans cannot condone" the peculiar judicial process in Russia." The ge-pe-u (Tche-Ka) arrest people whatsoever, either fair or unfair. But even for this barbarism comrade Maurer has a justification. A prominent Communist told him that "these people" are tried before they are arrested, that is, they are tried without their knowing about it and of course without any opportunity of defending themselves. After they are found guilty, they are arrested and shot. And comrade Maurer did not find a word of condemnation or protest against this Bol-The same prominent shevik justice. mmunist asked him, "isn't it 'true that working people are shot in the United States without any trial?" And Maurer could not find an answer to this At least he did not tell his Boston audience what he did answer to his Communist questioner.

And the things that comrade Maurer has not seen? He has not seen anyone in jail, neither Socialists, nor So revolutionaries, nor Anarchists: he has not seen the jobless and breadless about which we read in the Russian Bolshevik papers: he has not seen the bread lines he has not heard a word about the goods famine: he hasn't noticed the opposition movement, neither has he noticed or at least heard, of the growth of the new Bourgeoisie in the cities and the kulak in the villages, though Stalin and Bulkarin constantly speak about And this growing danger is even on the Agenda of the all-Russian Comnist congress, now in session.

AGreat Worker-Artist Discovered

"Gal", Miner and Sidewalk Artist, Creating Sensation—Some of His Pictures

"GAL," an obscure miner, has been discovered. For "Gal", in addition to being a coaldigger, is an artist. His genius which is winning the approval of all.

How "Gal" was discovered is an interesting story. Credit goes to The New Leader, the Socialist paper in London, which is sort of a brother-publication our own New Leader. Traveling on a London bus some months ago, the siness manager of the New had his eyes drawn to the work of a 'sidewalk artist." He happened to be 'Gal". The gifted artistry of this sidewalk artist was sensed in a moment. "Gal" was asked to draw on paper, and before long his work began to appear in The New Leader, where it created quite a sensation. Through the courtesy the British New Leader, we will print a number of "Gal's" drawings. first, "The Village End," appears in this

Harold Neal, chairman of the Ilkesto Labor Party, was one of "Gal's" workmates and writes interestingly of his pit days:-

"Often during the brief 'snaptime' 'Gal' entertained us with drawings of celebrities in public life, with a wagon, a 'gate-end-plate,' or a ventilation door as his canvass. ventilation door as his canvass. Sometimes we laughed at the artis, sometimes we laughed at the artist, whenever an attempt was made to persuade him to make a career with his pencil it was met with the miodest reply, I have a lot to learn yet."
"He was a close friend of George Bissil, the miner artist, whose work

If the pundits say Bissil's drawings are good, they must be; but I think it is because 'Gal' has not t the common touch that we love

THE CHATTER BOX 7

THE more I see and experience this career of business, the more I long and dream for forty acres and a Chevrolet. Yet no sooner do I peer too closely into the cruel phases of the ordinary farmer's life than I rush back into my mobbed city and lose myself in the bediam of trade, barter and shop. Back again in the store, I snatch a moment from orders, bills and telephone calls to puzzle things out a bit. Outside and telephone can't to puzzle things out a bit. Outside before my eyes the three hundred thousand autos roll on in a daily routine. The multitude of men and women rush by, to and from work. The office and factory buildings hang over these streams like canyon walls, or rather like fearful totems of a frightening faith. I am caught up in it; just another drop of moisture in a hunger-driven torrent. Whither?

Where? I, alone am questioning, it seems.

I jump a train for the farm lands. Grass, trees, fences, poles, roads, hills, cows, brooks. Here a barn, there a farmhouse. A woman hanging up clothes, or carrying a pail. A man and a boy unloading a wagon, or chopping wood, or digging into the turf. Crows caw over fields of old stubble, a stream shines under the light like a golden ruffled ribbon. The trucks of the train cars clatter rudely through a realm of peace Peace for the season; for all things of nature on land, except for the self-acknowledged lord, man. What an ugly thought just when I look up at the sky-ceiling and scan a dome wider than a hundred cities, and

bluer than the seven seas. Yet the tiller of the soil saddens me. For of all the sufferers under the established disorder, he gets the rawest deal, and makes the least complaint. Something there is in a sense of possession, that numbs the nerve and hardens the soul. Mortgages, past due notes at the bank, unpaid installments on cars and radios, bankruptcy from year to year, forced to sell his pro duce below cost, pawning his next year's crop to pay last year's losses, contenting himself with shoddy and drab indulgences, he staggers from season to season in a rut of struggle, a toiled-drilled beast, blindered to side roads, reined and tethered to an eternal drudgery. But the farm is still his. Even when he belongs quite definitely to the legion of tenant husbandry, the sense of some day owning the pungent earth he plows, drugs him into an insensibility to reason. I wonder if he ever understands how it comes about that he falls upon a good season, with high prices for crops so that he can pay back a part of the old debt, and get up enough courage to buy a new car on the part payment plan, a new coat for the wife, a new roof for the barn, a power pump for the well, all on expected profits. This done by millions of him creates a surge of general prosperity. But the cycle swings into recession so quickly, and lean seasons follow, and then nstallments, and taxes and interest on mortgages, and bills for feed and materials pile up unpaid, until the next turn upward, so that in an endless circle he keeps paying off a little more of what never is actually ever American agriculture has been in a state of perpetual bankruptcy before and since the good old Why and how, I leave to solemn statisticians days. to explain. All I know is that the rural banks are perpetual receivers and the farmers are just helping them to liquidate private investments. Also, that when the situation becomes unbearable for even the moneylenders, Congressmen and Senators get busy and give the farm invalid a dose of State Socialism. call it government loans to move crops, and fix high prices on grain and produce for the rest of us to pay and so assure the farmer a profit. In simple words

the politicians see to it that the farmer gets back

enough money through government and public extortion to pay back the private money lenders what is due them, and what they never could collect otherwise. In still plainer language, the bankers see to it that the rest of the country pays back to them what the farmer cannot pay. This is the manner in which a crazy house of cards is kept erect in a sort of solid semblance. The farmer retains his title to farm own-crship, and the usurer can lend his money to him, secure in the knowledge that the government will col-

God willing it * * * * me and my sons, God willing it Mortgages, interest, past due bills and such will be paid off with next crop or the next. Congress will pass a farmers' Relief Bill at the next session. Socialism, hull, that's plain slavery * * * slaving for a lot of politicians, that's what is. It's agin God, law and country. I may be poor now, but every cloud has a silver lining and every dog has his day. Potatoes will be scarce next year, so I'm planting twenty acres of them. I figger that will fetch me one of them new Fords, and pay off the radio, and some back taxes, mobes. You city fellers and your forrinners can have your Socialism together with your garbage lined gutters and airless flats. Where come you flat chested folk telling us what to do. A day's work plowing would kill most of you. We aren't much on fancy dress and silk firings, but we can keep going six days a week from dawn to sunset, and go to church on Sunday instead of to the movies. We're men as God meant men to be. You and your cities of Sodom sin and poison gin are going to hell while us farmer folk keep growing toward God in sun and wind and rain. I am not denying I have debts and such. But I'll pay them honestly. My farm will pay everything off. a house, a barn, chickens, cows, machine, a great acres of good land and acres of wood. What do you could be a supply to the supply of the sup house, a barn, chickens, cows, machinery, horses, city fellers own? Nothing but rent receipts. I read the newspapers, but I also read the Good Book to help me reckon things out. I take counsel with the preacher and with God. You smart folk go to schools where God's image is insulted. You learn that the likes of me and you came from monkeys. You can be low enough to believe it for yourself, but down here you're trespassing on our intelligence when you tell us such things. We have buckshot and feathers for such smart I'll take no city sass like that from alecky doings. you, sir. Go back to your alleys, your Socialism and your forrin propaganda. If that's all you got to say, just get off my farm, and stay off. * * * "

And in face of such logic and vehemence what else can one do but shift himself back to a world of stone and steel. I find myself at the store window again my desk littered up with bills, and orders. There are phone calls to be answered, packages to be packed, letters to be answered. The three hundred thousand cars roll on, and the million foot and soul weary slaves file by. To-morrow I will halt the shop serfs and make harangue with them. And will they have more of reason to offer me in their replies. * * * ?
