To the enthusiast for any sort of a "r-revolution", or for the big aggressive labor movement organized industrially and politically which we So-cialists want, there is plenty that is discouraging in a trip like this. But there is also plenty to challenge the hopeless pessimist or cynical disbe-liever in any sort of live social interest. In colleges and among the work-ers, in cities and country districts there is discontent, there is interest. There is no enthusiasm for war imperialism or even the prosperity ballyhoo among those who are its vic-There is a lack of hope, of faith and hence of courageous effort. There is a disposition to wait for a Messiah or at least a Moses. And there isn't much organization of our forces either in the industrial or political field. Too many Socialists quit too soon and too easily—a fault which is not eternally incurable.

But enough of these generaliza-tions. How about politics? So far as I can learn the farmers' "progresin Iowa and Minnesota doesn't fly higher than Lowden and that is pretty low. The farmers have a right to demand relief legislation which will admit them to the tariff table—or trough—or its equi-valent. The McNary-Haugen bill won't solve the farm problem; it is not even the best emergency subsidy measure that could be devised. But that bill with the equalization fee is better than the Coolidge substitute without it and I am becoming reconciled to the political wisdom of let-ting the farmers try the remedy for which their strongest organizations cry. I gained in Iowa the distinct impression that the most intelligent farmers aren't fooled into believing

the bill is a cure-all.

Smith sentiment seems strong among the workers and in the cities -but I can't see him carrying any Middle Western states. As usual too much both of the support and the opposition to him is based on prejudice, not reason.

When I wrote "Smith" I meant, of

course. Al Smith, They have a wouldbe United States Senator by that name here in Illinois who hangs on to his credentials though the Senate says his admittance card isn't good with them. To debar him pending with them. To debar him pending formal action seemed to me a dangerous precedent. To refuse him a seat after discussion on the evidence seems to me wise though not without possible danger as a precedent for unseating some future radical whose opinions the Senate holds in horror. Certainly it is a good thing that power magnates like Insull should not buy Senators by wholesale gifts to their campaigns. Illinois Federation of Labor, like the Anti Saloon League, also endorsed this Col. Smith in the primary fight. He had done them some small fav-But in the Senate, depend upon he would recognize Insull's not labor's, as his Master's voice. Labor now isn't openly proud of Smith and Victor Olander reminds me that he and others blocked any endorsement of any Senatorial candidate follow ing the primaries but prior to the election. That's something!

And prohibition? Well, everywhere I've been they talk about it. Some folks are more worried one way or the other about when they or their neighbors drink and what than when and what they eat—if ever. And cer-tainly we discuss the right to drink more passionately than the right to think. At the excellent Chicago forum run by the Workmen's Circle and allied groups a woman who questioned me spoke for a vigorous Socialist campaign against prohibition. I can't see it as a Socialist issue. Important it certainly is, but outside the ogical realm of party politics one can be a wet and a good socialist or a dry and a good socialist. Moreover the continued intrusion of prohibition discussion in party politics obscures other fundamental issues. Therefore again urge that the Socialist Party which can't afford to pussy foot by saying nothing should recommend that the issue be left to a properly framed nation-wide advisory referen-dum to which all candidates of all

fifty delegates, representing unions and labor colleges in the surrounding terri-tory, are gathered here for a two-day discussion of the problem: "How to Organize the Unorganized." Determined to tackle the question from all angles, the conference, sponsored by the Labo College of Philadelphia with the endorse-ment of the Central Labor Union of Philadelphia, will start its sessions on Saturday afternoon with a survey of the unorganized field as it exists today. It will then continue with a dinner, at which H. H. Broach, International Vice-President of the International Brotherhood of Electrical Workers and James H. Porters' Brotherhood Chiefs Confer in Chicago

Chicago.—In the Vincennes Hotel January 12th and 13th the Pullman Porters Brotherhood chiefs, consisting of M. P. Webster, Chicago Division Organizer, Roy Lancaster, Secretary-Treasurer; Bennie Smith, Field Organizer; A. L. Totten, Assistatn General Organizer, and E. J. Bardley, St. Louis Division Organizer, were called together by General Organizer, A. Phillip Randolph, in Chicago, for the purpose of reviewing the struggle ent to organize the pull porters, and to map out a program to neet emergency problems that may arise rom this stage of the struggle through completion of the fight.

A policy committee was appointed by the General Organizer, whose duty it will be to serve the movement with a view of shaping programs. Randolph left Chicago after the conference for Kan-sas City, Missouri, where he will join Assistant General Organizer, A. L. Totten, in staging a Negro labor conference for the mid-west. From there he will return to Washington, D. C., for the hearing on the case of the Brotherhood versus the Pullman Company, before the Interstate Commerce Commission, January 21st.

The significant contribution of the proceedings was the address of Senator Wagner to his newspaper audience. From the I. R. T. side the important thing was the advantage taken by Quackenbush, genius of the company of the recent decision of the Court of Appeals in the old I. R. T. injunction suit.

Hovering over the proceedings was this opinion of Judge Lehman issued on Jan. 10, 1928, in the Lavin case arising out of the 1926 strike and the decisions of the Federal courts in suits involving the "yellow dog" contract. Quackenbush made the most of both. The lawyers for the defense unfortunately did not meet his contentions squarely.

The true significance of the Lehman opinion has been submerged in a flood of press statements expressing jubilation over the victory for the union. The decision holds that the "yellow dog" contract that I. R. T. employees agreed to through the General Committee of the company union was invalid in that no definite peated interv period of employment was specified. Hence, either party could terminate relationships at will. Therefore, organizing activities among I. R. T. em- that a strong attempt should be made loyees were legal.

Influential Organ Says Coolidge Deals in "Amiable Words" and Deadly Airplanes

(By a New Leader Correspondent) WASHINGTON.—That the United United States is forfeiting an opportunity to improve relations with the Latin-American countries at the present Havana Conference, by prompting Cuban suppression of free speech and a free press, is the statement made by the National Council for Prevention of War, as the result of information received from its American correspondent in Cuba

Control of the Cuban press to the end that nothing unfriendly to the interests of this country shall be printed, hand-picking of audiences where the American delegation appears, and deportation from Havana of persons known to oppose America's Carrib-bean policy were the specific points brought forward in substantiation of

the Council's statement.

All Men, Say His **Managers** Hoover Things

(By a New Leader Correspondent) Washington.-The Republicans have been plugging away, boosting the candidacy of Herbert Hoover. Mrs. Malaprop said of Caesar's wife that she was all things to all men. Republican campaign managers are evidently trying to get Hoover into the class with Caesar's wife. On the one hand they tell us that he is a great liberal, and the supposedly progres-sive Scripps-Howard newspapers announce that they will support him in the campaign. On the other hand they assure us that he is all isiness, and they hint that he will have the support of Uncle Andrew Mellon, the leader of the reactionary forces in this country. To think of Herbie Hoover as a liberal is to laugh. So far as I

know he has never made a speech on any important issue in which he has not defended, and with some vigor, all the privileges of the special interests of this country opposed to labor and favoring capital. The collective action of the people in any way, shape or man-ner, is abhorrant to this man Hoover. Using the most questionable methods when engaged in re lief work abroad, he did all in his power to suppress the revolutions of workers and peasants in Hungary and other countries. In this country there is no doubt that he was instrumental in persuading John L. Lewis of the United Mine Workers to sign the disastrous Jacksonville agreement. Unques-tionably the agreement has worked

favor of the non-union

fields, as against the organized miners, and is at the root of the present troubles in bituminous coal. Those farmers who can remember back to war days will not be likely to forgive Hoover quickly for the part he played in the fixing of the price of wheat.

They have begun early, these oldtime politicians, with their propaganda for the 1928 campaign. The other night over the radio, Charles D. Hillis of the Republican party, and Franklin Roosevelt of the Democrats, told their audience of respective merits of their ies. Mr. Roosevelt said that it made his blood boil when people said that there was no diffe between the two old parties. But in the course of a long and rather dreary speech, in which he blamed

all the financial panics of the past on the Republicans, whereas Mr. Hillis had just blamed them on the Democrats. Mr. Roosevelt lected to explain just what this difference was. Every Shakespeare student will

inderstand that the only difference between the two old parties is the difference with which the co man wears his rue. There is no hope in either of them. They are vestigial remnants of the days when there really was a conflict of ideas in this country between the followers of Alexander Hamilton, representing the banking and mercantile interests, and Thomas Jefferson, representing the workers in the cities, and the farmers. The Hamiltonians won long ago, and now there is simply one grand Re-

publican-Democratic party, far removed from the aspirations of the common man, devoted to the protection of privilege and the consequent opposition of the producer.

They have found a way for bridging the aisle which separates these two in the Congress. That bridge is campaign contribution, such as In-suli of Illinois made with openhanded generosity to both candidates in the last Senatorial election in his state, contributions for which the successful candidates are expected to return full measure to the corporations making them. Quackenbush pushed forward this nent of union membership as often as he could. It was apparent that he was counting a good deal upon it. He begged that the "boring from within" should be restrained or a strike would ensue. The reply of Senstrike would ensue. The reply of Sen-ator Wagner and Republican ex-Con-gressman Perlman was two-fold. That will take months, if not years. In the meantime, organization work among the I. R. T. employees may be said to have ceased. A strike is out of the question, even if it were possible, for refraining from a walk-out had to be promised the court in order to avoid the granting of a temporary injunction in the first place. It looks very much as if the union is merely marking time to obtain its members on the I. R. T. ready-made, when the

Prize Fights Draw Big Turnout to Meeting of Textile Union

(By A New Leader Correspondent) Northampton, Mass.—Trade Union meetings have not been altogether free of fist fights in the 100-year-long ory of labor organizations in thintry but until this time there probably never were friendly boxing bouts staged between various orders of business at the regular meeting of a local union. The Florence branch of the American Federation of Full Fashioned Hosiery Workers discover-ed that its monthly meeting fell on the night of the Sharkey-Heeney fight. Word was passed around the shop that a radio would be set up in the hall and that husiness would air. The meeting opened shortly after eight with a big-turnout of members present. Routine business was trainacted and some matters of importan taken up until a recess was called to hear the description of the prize fight. After listening to the radio story of the match a surprise was sprung on the meeting. A bout was staged right in the hall between some of the knit-ters present. Three different pairs all to the great amusement of the

The Union meeting was reopened and a good discussion had on import ant shop questions until midnight when adjournment was moved with a big nights' work accomplished. Several younger men were induced to take part in the meeting as a result of this event who had formerly taker trade unionism as a matter of pay-ing dues and hearing a bunch o grey beards orate at each other.

The Florence local new plans to for the next meeting.

WAR AIMS AND ILLUSIONS

The great joke of the World War is that Germany got what we said we were fighting for and we got what Germany was said to be fighting for. The war destroyed the Prussian military machine while our militarists are feverishly at work to establish it here by militarizing education and bringing about universal military conscription. We have less democracy than we had before the war and Germany has more than it had before the war. Then we are doing in Latin-America what Germany was charged with wanting to do in the East. Moreover, the western farmers could not be worse if the German armies had eached their region.

GOD AND THE TAX-COLLECTOR

NO doubt about it. The city of New York has a crush

We have told you in these columns how we have long since been a mascot for the Commissioner of Jurors, and how whenever they want a good juryman they send one of their municipal boy scouts after us.

Now, it seems , we are the Fair-Haired Boy for the Bureau of Taxes.

We had not been having what one might call a round of gaiety. We had just come back from the dentist in fact. But don't let's go into that. Three strong young men, armed with hammers, drills and dental engines (the things that go Bz-z) had gone into us. As a result our face had gone Left. This ought to be good news for the Daily Worker. In fact, the entire left half of our face looked like nothing less than the inflation of the French currency.

At the same time we had gone on the wagon and had received two manuscripts back from the publisher, telling us that while they were neatly typed and all that, they did not somehow seem to fit their requireemnts. And after taking one look at us, Isabel, our black cat, and all her progeny had gone under the bed.

So altogether we were not full of what they called in the army Joe D. Vee, the fellow who used to go around with Cest Laguerre.

In the midst of our anguish, a hearty voice asked us over the telephone if we were that same Coleman who had formerly lived on West 71st Street.

Thinking, as we do, that some unsuspected aunt of ours had dropped dead in Bayonne, N. J., leaving us one hundred shares of National City Bank stock, we weakly answered, "yes". "That's good," said the bouncing voice, "I have a summons and complaint for you for failing to pay your personal property tax in 1922." He was so happy about it all that we couldn't bear to disappoint him by refusing his request to come down right away to the Municipal Building.

Whe we got there we found that they had a dandy suit all fixed up for us. It seemed the City of New York was suing us for \$682.50 for the 1922 taxes on what they told us was \$25,000 worth of personal property that we were supposed to own at that time. They said this property consisted of mortgages we held on real estate, oil paintings, and other household possessions, yachts and other marine vessels, automobiles, horses, carriages and draft animals. We were quite impressed. "Goody," we cried, "where is all

But in spite of the fact that the man who sent for us was as amiable as anything, it turned out that he had a grim superior who looked gloomily at us over his spectacles and said, "Do you want to make a state-

He took us by surprise. Up to this moment we had not thought of making any statement. But we are not noted for our inarticulateness, so when he called in a stenographer we started right off .-

"I predict that in the presidential campaign of 1928 the Socialist Party will show gains everywhere. If the Republicans nominate Herbtr Hoover—"

But it seems that wasn't the sort of statement that he wanted. He wanted us to answer questions that he asked us, like that stupid game everybody was playing last year. And the cross-examination went thuswise—Q. Where was you in October, 1922?

- A. Herrin, Illinois.
- Q. Did you at that time have any yachts or other marine vessels?
- A. Not that I can remember.
- Q. Had you any old paintings, personal jewelry, or real estate mortgages?
- Q. Had you any oil paintings, personal jewelry, or other draft animals
- A. (We had quite a struggle with our New England conscience here; is Isabel a draft animal? If so is she subject to personal tax? If we fib about Is abel and keep her a secret from this horrid old man, will the city of New York repleven her? Or is it garnishee that they do? Or perhaps impound? Impound sounds ominous. Suppose we had to see her going off in a wagon with a deputy sheriff. She might not like the deputy sheriff. He might not know that she preferred chopped liver to the pink salmon that the man in the A. & P. store fishes down with a long pole with a hook on the end of it. Would they put her in Ludlow Street Jail, or send her to the Tarrytown Home for Unmarried Mothers. In either case, it would be embarrassing. When people ask "Where is your Isabel?"—we would have to say, "She is held by the City of New York incommuncado until we pay our personal tax for 1922." So we decided to take a chance, and gulping a bit, we answered) No.

Q. Any mules? (Again we were taken by surprise. Most of the mules of our acquaintance are working in a coal mine, and the idea that anyone should have to pay a tax on one, would strike a mule driver as

ludicrous in the extreme. But this was easy to answer. We practically never owned a mule. And having seen mules in action, both in the army and in the mines, we have never had the least desire to own one.) No.

When the lady with the pince-nez had taken this all down, the grim old gentleman said that was all. He didn't tell us what had become of the suit, but said we would hear from it later. So here we are again a state of horrid suspense and dental agony certain as to what our fate shall be. Every now and then we look timorously out of the window, expecting see the sheriff drive up in his official shrievalty Chevrolet, (try that on your drunken friends).

We will keep our readers in touch with events. In case we have to go to the jug. we smoke Fatimas, wear Faultless Pajamas, and just adore fishcakes, which can be prepared quickly on Sunday mornings.

The Agrarian Revolt

rplus of funds and lavish expenditures ought attacks from outside and fac-ons within. In 1875 the National Grange voted a loan of over \$50,000 to state granges which led them into disastrous business ventures. Admission of politicians, business and professional men prought hostile elements into the Grange, extensive cooperative enterprises in the West failed, while "rapidity of ornization resulted in an unwieldly and undisciplined mass of members, whom the leaders were unable to control, and sentions soon arose within the ranks". The ceremonials and social and educa-tional features of the Grange, while bringing farmers together, offered no solution of their economic distress. Non-partisan in politics, the Grange could not restrain the tendency of members o raise political questions and to act in ndependent political movements.

OTHER FARMERS' ORGANIZA-

TIONS. As the Grange declined local and state alliances of farmers appeared in response to the same economic problems which had given impetus to the Grange. A maze of these organizations appeared. These include the Agriculural Wheel, organized in 1882, which inited with the Brothers of Freedom, expanded into other states, and emerged the National Agricultural Wheel in 1867, claiming 500,000 members. The National Farmers' Alliance in the same year was a union of two independent al-liances and in turn amalgamated with the Wheel as the Farmers' and Laborand in 1889 failed to unite with the southern organization at St. Louis. The southern organization became the Naional Farmers' Alliance and Industrial

THINKING An Introduction to its History and Science

CHARLES H. KERR & COMPANY

PROSPERITY PIFFLE

ALL ye who are burdened and heavy laden, cheer up, Prosperity is with us still. It may be so founded still in your case that you can't notice it. But all the same, it's with us still.

According to Andy Mellon, the greatest secretary of treasury since Alexander Hamilton, we (heavy on the we) are entering the new year with 228 citizens reporting incomes of over one million bucks per annum and that is 21 more million dollars a year men, than we had last year Better still, the number of those blessed with incomes of \$5,000,000 and better per annum more than doubled, having risen from seven

Now, in order to make our prosperity still more preposterous, the House, meaning the lower house of Congress and not the little green house on K. Street, has already approved the retroactive reduction of the federal tax on corporation profits from 131/2 to 111/2 per cent. This means a charitable donation of some \$160,-000,000 to the 228 needy patriots in the one to five million per annum income class, for retroactive means going back behind the income returns of 1927. In other words, that one hundred and sixty million iron men represents a rebate on taxes already paid.

Of course Uncle Andy, who, as already stated, is the greatest Secretary of the Treasury since Alexander Hamilton, swears up and down that corporation taxes are shifted on the consumers of corporation products and there is something to that contention if we con sider gross incomes only.

Andy, for instance, is in the aluminum ware business and that being the case he naturally pays taxes on his aluminum ware plants. Now taxes are part of the overhead of said aluminum ware plants along with insurance, interest, depreciation and other unavoidable misfortunes. So, when Uncle Andy sells you an aluminum kettle he adds your proportion of his tax on his aluminum business on said kettle and in that wav you pay Andy's taxes. Ain't that cute?

This system is called indirect taxation and is the greatest, best paying and most respectable swindle ever devised by the minds of mortal men.

Well, then, you and I and the rest of us free born in dependent Aluminum Kettle consuming cuties have already paid Uncle Andy's taxes for 1927. The government has got that money now-our money, for we paid it out of our jeans.

All that good Andy did was to collect it from us and then hand it to our government, and now he is pushing that retroactive rebate act which will enable him to appropriate the money we paid to our govern ment for a bigger and better navy for the protection of our financial interests in Nicaragua to his own private pockets. And if Andy succeeds, as he certainly will, then he will have our money and our bigger and better navy and all we have to do is foot the bill when it falls due and maybe get killed by some lousy Nicaraguan while trying to collect the interest on our money which Uncle Andy and his kind invested in their Nicaraguan aluminum mines, or whatever they mine; down there that ain't mine or yours.

But, migosh, I got plumb switched off from the subject on hand. What I want to say is that this prosperity to which I'm trying to put you next, got more twists, crooks and kinks in it than a tin can full of angle worms. Here, for instance, is an ad in Commerce and Finance in which the Industrial Commission of Richland County, South Carolina, boasts that the annual wage averaged by persons engaged in the. textile mills of South Carolina is \$631.00

Then the Commission of Richland County goes on and says that "It is conservatively estimated that in South Carolina fifty thousand whites (native born of Anglo Saxon origin) desire industrial employment—" at an average weekly wage of \$13.63. Blacks, tan, and saddle colored native born of African origin and and saddle colored native born of African origin and Caucasian infiltration don't need such ungodly high wages as the superior whites, of course, but of this the Industrial Commission of Richland County, South Car-olina says nothing, being that the Klan won't allow those inferior persons to compete with Nordics for \$13.63 a week jobs!

As an additional inducement for prospective textile how what houndless opporinities they may find in Richland County, South Carolina, the Industrial Commission adds that "The typical rural attitude, which they (the Richland County ruralists) bring to industry, is particularly appreciative, and co-operative with their employers. And—in all of co-operative with their employers. And—in all of South Carolina's textile plants there is not one Labor

Sure there is no Textile Workers Union in South na. The \$13.63 average weekly wage proves
But why in the sam hill did that Richland County booster outfit overlook such valuable indu ments as the total absence of legal restrictions on the hours white native born American men and women may slave in that happy country; that women are perfectly free to work at night, that South Carolina employers are not pestered with accident and compensation laws and that child labor legislation is still in

its infancy or died a "borning." I've forgotten which?
If I had the time I would write a few snappy alogans
for those ambitious Richland County boosters, something like: Come to Richland County and Prosper on poverty.

You furnish the mills, we furnish the ills. Bring us your plants and banks, and we supply the

We let the little ones come unto you and suffer them not. Nor shall we suffer anyone to interfere with their suffering after you land them.

Richland County and an average weekly wage of \$13.63. Richest country on earth and 50,000 white native born Americans in one state, alone, willing, glad, to swap six days of life for a seven-day supply of corn pones and sow belly. Two hundred and twenty-eignt persons with an annual income of \$1,000,000 and better. Two million children and future nicthers elaving in mills and factories. A baker's dozen of billions bil-lionaires, a few divisions of guilded joy chasers and

jazz hounds, and armies of weary job hunters! G'wan with your wealth statistics, production rec-ords and prosperity chatter. If the goal of govern-ment is the greatest good to the greatest number and if the goal of life is happiness, then you Richlanders are the most glorious fizzle of history.

a sterling play. "The Patriot," Affred Neumann, in an excellent impation by Ashley Dukes, is a picture the last year of the insane Paul I, Tsar all the Russias, and of the steps taken a patriot to free his country from the all the Russias, and of the steps taken a patriot to free his country from the in's reign.

The play develops with a majestic dignity that removes it far above the disordanised stir of usual melodrama; its empo is serene as ultimate despair; and he dramatic trony of the scene where he pathetic Tsar wrings the heart of time who, for his country's sake, has siamed the regicide, is Greek in its ragio intensity.

The intrigue is complicated by the propusal integrity of all involved; there is, at this struggle of patriotism and pity, no perty rivalry, no personal jealousy or single-stemmed ambition; Count Pahlen, pain whom the duty of freeing his pountry falls, moves as calmly to his own leath as to the enthroning of a proper rag. The one woman among these many but single-purposed men forms surious alliance with the mistrustful Tsar, whose half-wit fears, whose whims of cruelty, torments of doubt, are segmently as the tableau of the seamstresses who will sing opera airs, songs and due to find the convention presented in the vivid performance of Lyn Harding. Bancroft, who with Wallace Beery, plays a most important role, injecting the comedy into this production, has since its world premiere, become a star. His work in "Old Fronsides" was instrumental in his rapid climb to stardom. Bancroft's name will be billed over "Old Ironsides" in the electric lights for the first time next Saturday.

The eighth annual Senter City. Statistics for the closing of the year reveal some interesting data on the handling of the crowds at the Roxy Theatre and the general conduct of the house staff. For the week ending December 30, 1927 there were 156,218 paid admissions. Out of this tremendous audience the management received only two complaints from patrons who claimed that discourtesy was shown on the part of attaches. Investigation of these complaints showed instances of irritability on the part of the patron rather than any discourtesy on the part of the usher. A reciprocal compliment is paid by the management of the Roxy to its audiences. Since the opening of the house almost 5,000,000 people have passed through its doors.

Pioneer Youth Forum To Meet Monday, Jan. 30

If you are between 16 and 20 years old and enjoy lively discussion you are cordially invited to come to the Pioneer Youth Forum Monday night, Jan. 30, 7.30 p.m., at 3 West 16th street, Pioneer Youth headquarters. Bruno Lasker, a secretary of The Inquiry, will lead the discussion, but will not deliver a regular lecture. The audience will do most of the talking. And it will be lively talk too, because a large crowd of high school and college boys and girls and younger labor union members are coming.

The subject under discussion will be

members are coming.

The subject under discussion will be "Superior People." A nominal admission of 10 cents will be charged. You will meet hosts of your friends and probably decide for yourselves what the next Forum, a month later, wil be about. Let's create a Junior group of trained thinkers and talkers.

Ress Magill at Work

State Secretary Magill is on the field. At Fredonia he sold a supply of Socialist books and has ordered another supply from the National Office. Applications for membership are being received. Other Socialists who are short of money are signing application cards and will pay later. Those who pay are paying for three and four months. Magill takes up his work without a dollar being guaranteed for expenses. Who else will follow his example?

Milwaukee Nominations
The county headquarters of the Socialist Party has announced the nomination of a full city ticket and a list of candidates for aldermen and supervisors. Daniel W. Hoan will be a candidate to succeed himself as Mayor. The election occurs in April and Milwaukee Socialists will bring another victory to the national convention.

The State Executive Committee has planned down-state organization work and nomination of a state ticket. Cook County (Chicago) Socialists will nominate delegates to the national convention on Feb. 12 and act on other matters of importance to the party.

veath and Disaster Ahead

WORKERS who supply the human sacrifices in war might as well make up their minds that we are on the road to another war. The Administration program of naval armament and the shouting of our naval jingoes who are talking in terms of a billion dollars program make this inevitable unless the masses send representatives of their class to Washington to avert the disaster. The shouts have been heard in England and have been played up in the headlines of British newspapers for it is apparent that our jingoes are challenging the British navy.

The challenge to British naval power is easily understood. The United States has become the leading power of the world. The investments and loans of its ruling classes extend all over the world and a g navy is their police department. In many parts f the world American investments come in contact with British investments. Friction and rivalry lead to jealousy, then a contest for mastery, and the final tage of the struggle is the hurling of British and American farmers and workers into the hell of war.

If there are those who think that our ruling classes cannof put over hymns of hate against the British people as they did against the German people they are mistaken. This propaganda is essential in order to shape the minds of millions in this country for war against England and it is a very easy job. Of course, it will be necessary to wipe the slate clean of all the words of affection spoken when the ates was allied with Great Britain in the ar but that can be done and it will be done. is necessary is to go back to the literary this country from the period of the revo-

on to the Civil War, bring this stuff up to e for modern consumption, and British "Huns' lake the place of German "Huns". There are ne old stories of British employment of Hessians in War of the Revolution; the employment of Indians on the frontier to scalp farmers, trappers and their families; the burning of Washington in the War of 1812; the long antagonism with Great Britain over her practice of impressing American sea-men for forced service in her navy, the Oregon bottndary dispute with its jingo cry in politics of "54, 4) or Fight", and any number of other disputes which will serve the gang who want another jolly

We predict that within the next few years this propaganda will begin to take shape so that the masses may be fitted for the slaughter. There can be no fight unless there is hate and the jingoes will provide the hate in order to get the fight. If the resent drift continues The New Leader will be able to reprint this editorial as a prediction of the accur-acy of Socialist forecasts. While we are thinking of wages, hours, democracy and more freedom, here is a monster that will throw everything dear to us into the ditch. Everything will be sacrificed to feed the furnace of war. Neither party organization of capitalism reveals opposition to this fearful catastrophe and when we are dragged into it all opposi-

Your votes are priceless this year. Given to these arties it may mean the commission of suicide. The Socialist Party is an evangel of peace. It raises a warning signal. A political revolt of the masses can avert death and disaster, death for millions and disaster for human freedom. It is for you to an-

Dead Cats

WHEN the State of New York is represented in the National Republican and Democratic conventions and the brokers choose candidates to police us for King Capital, it will carry to both auctions the smell of big graft. For many weeks the "New Tammany," the Tammany that has washed its ears, wiped its nose, and is preparing to move to a more respectable neighborhood, has had the Queens sewer graft of a few million dollars staring

Like a man dragging a dead cat at his heels, this has been very embarrassing to Tammany. Now it can rejoice that the other political firm of capitalism will drag a dead cat into the Republican convention Each will have a carcass to throw at the other during the campaign, for Mrs. Florence E. S. Knapp, ex-Secretary of State for New York, is the subject of a report and recommendations by Randall J. Le Boeuf, Jr., who charges her with "criminal intent to defraud the State." Among the charges are forgery, false audits and certifications and abof public records in taking the census of A few others are involved in the dirty mess and if the State recovers nearly \$200,000 illegally spent it will have to bring action in court. It is also reported that it will probably cost \$100,000 to meet

the cost of investigating the sewer grafters.

It is a rather dirty mess no matter how you may tit and an interesting preliminary to the cam-this year. Considering that each party has d animal on its hands there may be a quiet tent between both to bury the bodies. Frank tells the story of one party hadquarters in Chicago in 1924 calling up the headquarters of the rival party in New York a few days before the election and arranging for a gin party of both in the latter city following receipt of the election returns. If they can laugh over gin there is no reason why the party brokers cannot sign a treaty to bury respective cats for the odor is of no service

The Ousting of Smith

CONSIDER for a moment Illinois and the barring of Frank Smith, the Senator-elect from that unhappy state. Governor Small announces that he is deeply affronted at the action of the senate in excluding Smith, because the latter was indiscreet enough to spend about half a million dollars on his primary elections. Now anything that can affront Governor Small of Illinois is in the nature of a miracle.

The Governor himself is an affront to decent citizens everywhere. He began his political career by taking graft derived from the sale of blankets intended for the inmates of the insane asylums of the state, and since then he has risen to greater and greater heights. When the courts recently decided that the governor would have to refund a cool million dollars which was strangely missing from the state treasury, the Governor complied by levying an assessment on all State employees, including the scrubwomen in the State House at Springfield, naively explaining that it would financially embarass him to pay the money back from his own pocket. He of the rawest deals that the Republicans of Illinois have put over on the people of the state, and

that is saying a lot. All this, of course, is aside from the merits of the refusal of the Senate to seat Smith. In our opinion this sets a bad precedent. If ever labor becomes strong enough to elect its own Senators, it may find them barred by action of the conservatives within the Senate, who take it upon themselves to pass on the qualifications of the elected official.

Shaking 'Em Down

ONE of the essential industries spawned by the World War was a peculiar form of graft which for a number of years paid handsome dividends. Hundreds of organizations appeared and marketed the new product. The upper range of our Babbitts invested millions in it but the industry declined despite all efforts to keep it a going concern. A few firms are still at work and turning out the routine article but the demand is not very brisk.

We have in mind the business of saving the republic from mystic Bolsheviks. Of course, our bur-lesque bolshies at the beginning of the industry, when the stock was selling at a premium, occasionally hurled a few bristling documents from high buildings. Old ladies fainted and the Union League Club mobilized its members for an air attack. The bomb squad clubbed some heads and the National League appeared in the headlines to save

Hundreds of "patriotic" organizations sprung up like mushrooms and the mails were filled with frantic appeals to millionaires to come across with funds. It was easy plucking and many charlatans lived a happy life. Fred R. Marvin of the "Key Men of America", is one of the few survivors of this rosy era of easy graft and he is still "shaking 'em down" for the long green. A recent output of his a seven-column advertisement in New York papers showing a skeleton with a seed bag sowing seeds and carrying a scythe to reap the harvest. The seed is Communism and the soil is the United States.

Graft returns on this should be considerable despite the fact that Communism has been reduced to a few street "nuclei" in New York and Chicago. Freddie has few competitors in this industry for we have not for a year or more seen any advertisements or documents of this kind and all of them found

their way into The New Leader office. Shake 'em down, Freddie. You might as well have the coin of the illiterates who do not know any more about the Third International than they do about the fourth dimension.

The Savings Bunk

IN a recent issue we called attention to the bunk regarding the number of savings depositors in the United States. We pointed out that depositors generally place their savings in two or more banks yet each deposit is counted as a depositor. There was the case of one woman who had deposits in 34 banks but in census returns she appears as 34 de-Another case is that of a woman who recently died in Middletown, Conn. An inventory of her estate shows that she had deposits in 33 banks. are two depositors alone who appear in official figures as 67 depositors.

Do not let the prosperity ballyhooers get away with the old hokum regarding the millions of work-ers who have savings deposits. Nobody knows how many depositors there are but it is certain that the number is much smaller than the number advertised.

The Torch-Bearers

ALTHOUGH by an oversight we are a week late in paying our tribute to two New York comwho were the recipients of testimonial dinners by their friends, we hasten to make amends for the omission. Two men more worthy of such testi-monials could not be chosen than Abraham Shiplacoff of the Pocketbook Makers and Morris Berman of The New Leader Board. "Ship" is a type of Socialist and trade unionist whose idealism has never become tainted with that cynicism that has afflicted some of the old idealists in the unions. has had to contend with the adventurers who have nearly destroyed some unions in the needle trades but in fighting this poison he has not ceased to hold aloft the banner that inspired the organization of the needle trades, the Socialist banner of a working

class organized for political victory. Berman is of another type, one who has won leisure for himself and family and might easily retire from the Socialist movement and pay homage to the altars Babbittry, but for him life is joy in the old human struggle for a better world. Never distincts and facilities the altary redemption of the couraged, faith in the ultimate redemption of the working class unshaken, a keen interest in every phase of Socialist activities, serving when asked and giving of his means without ostentation, Morris Berman is a living rebuke to the cynic, the pessimist and the shirker.

Men like these aid humanity in the long struggle for a better world. May they carry the torch to old age, their tribe multiply, and inspire many others to follow their example.

And this, thanks to you, and the other loyal readers this country over, The New Leader has done. Done, perhaps, not as effectively as we might have wished, but done at any rate in a manner that makes its future assured so long as there is a Socialist and labor movement worth the

rare moment of despair, "Running a labor paper is like feeding melted but-ter on the end of a hot awl to an infuriated wild-cat." At times it has seemed like that to us on The New Leader. Only we would be inclined to ibstitute for "infuriated wildcat," "inlifferent titmo

But birthdays are no times for dragging up unhappy recollections. If one sensible, on his birthday he struts bit, sticks out his chest, gives interriews to visiting newspaper correspondents, on rules for success and how he ved his end by thrift, hard work, and abstinence from any sort of dissipation. Well, to be sure, if we have suc-ceeded at all, thrift and hard work have certainly had something to do with it, and abstinence from dissipation has been our part perforce, as one does not lead a double life on the income derived from lishing a labor paper.

The Accomplishment

.At this period, we can point with pride to certain accomplished facts. We can say that throughout four years The New Leader has been faithful to the larger ideas and ideals of the Socialist Party, that it has never consciously favored any cliques within the party, that it has shunned all manner of factionalism which might weaken the movement, and that to the best of its ability it has constantly held before its readers the goal of us all—namely the creating of women who have proved their fundaleve that anything which is understand- here. able is necessarily superficial. All across America men and women are writing to The New Leader commending the paper for its stand against capitalist hypocrisy, and urging that the fight be carried on with even greater vigor.

Of course we will not fail those of the

inarticulate producers of the country's wealth who have placed their faith in us. To reach more of them with our message of constructive radicalism is our fondest hope. And we can do this with

Friday evening, Jan. 20, the Williams-burg Socialists, Workmens Circle mem-bers and trade unionists tendered a ban-quet to William Shapiro at the Philip Morris Mansion, in celebration of his 60th birthday. Almost 40 out of the 60 years of Comrade Shapiro's busy and useful life have been devoted to the service of the Socialist and Labor movement. Warm and touchus tributes were neal bit he and touching tributes were paid him by his comrades and the celegates from va-

his comrades and the celegates from various organizations.

In many respects this banquet was unique. First of all it was a rare tribute to a comrade who had seldom made a speech, written on article, or was ever in the limelight and whose 40 years was one of service as platform carrier, literature distributor and all round Jimmy Higgins. Many comrades spoke glowingly of Comrade Shapiro's life and example. A fine gift was presented to Mr. and Mrs. Shapiro as a token of the affection of Kings County comrades. A musical program was rendered by Sidney Schwarak and Frieda Kirsch. Mrs. Eva Dann rendered some songs and the quartet of the choir of the Vladeck Forum sang some beautiful Jewish folk songs. Jos. A.
